obvious. The Israelites were afraid of crossing the desert. "The wilderness hath shut them in," can only mean that they were entangled and wandering in the land of Egypt, because the desert was for them an insuperable barrier. It is to be noticed that whereas in other parts of Scripture, and especially in the description of the route in the wilderness, the geographical data are sometimes vague and always very concise, here they are given with a remarkable precision. It is not said to the Israelites merely that they are to stop near the sea in the most favourable camping-ground. They are to reach a definite spot, the landmarks of which are given: on the N. Pi-hahiroth, on the S. Migdol, in front the sea, and on the opposite side Baal-zephon. We have the Egyptian name of Pi-hahiroth. A great tablet found in the excavation at Pithom mentions in the neighbourhood of that locality another sanctuary called Pi-Qereht (house of the serpent). It was a sanctuary of Osiris, or what the Greeks called a Serapeum. The Antonine Itinerary mentions Serapiu as being 18 miles from Her. It seems impossible not to connect Pi-hahiroth with Pi-Qereht. Undoubtedly the Heb. letters do not correspond exactly with the Egyptian, but a proper knowledge of Semitic would carry the name passing into another language always takes a form which has, if not a sense, at least a sound familiar to those who pronounce it, and hahiroth sounds much more Semitic than Qereht. Standing on the pier at Ismailia and looking over lake Timsah, the horizon is lined by a flat ridge of land, by a flat ridge of land, a mountain now called Jebel Mariam. Just at the foot of that mountain on the S. and near the bank of the Suez Canal is an important Roman settlement, partly covered by the lagoons, but the ruins of which above the water cover an area of 500 yds. square. This seems to be Serapiu (Pi-Qereht). Its distance from Her. agrees nearly with the Itinerary—14 miles instead of 18. This would be the landmark on the N. On the S. we have Migdol. This name in Heb. means a tower. We have information about it in the papyri of the Brit. Mus. In one of them a scribe who is going all to the desert, one of the slaves, and that first arrived at the enclosure of Succoth, evidently a wall which protected the region against the invasions of nomads. There he was informed that the fugitives had crossed the wall N. of the tower Migdol (the Heb. word is employed there in an Egyptian form) of king Seti I. Another papyrus speaks of the stronghold in the southern part of Succoth. Migdol was the watch-tower, which from the aspect of the country we should place on the height called by the French the Serapeum, and where, until a few years ago, there was a trilingual tablet, Egyptian and cuneiform, dedicated by Darius, but destroyed when the canal was dug. This watch-tower was necessary, since, as we shall see, owing to a phenomenon which took place occasionally, the nomads found the sea open, and could easily wade through in order to pillage the royal domains on the Egyptian side. "Over against Baal-zephon"—most commentators agree that this was not a city nor even a village, but a place of worship of a Semitic divinity in the form of a Baal. It was, as the Targum explains it, the sanctuary of an idol, the form of which is unknown, but which may have been a mere stone. The name Baal-zephon, in its Semitic form Baal-zaphun, is mentioned in a papyrus, which also shows that it was outside Egypt, on the other side of the sea. We may consider that it was a holy place, like the tombs of sheikhs generally, placed on hills around which people congregate on certain days. Even now there is a place of that kind in that region. Going out of lake Timsah there is a hill called Tissium, on which a sheik, called sheikh Ennedek, was buried at the beginning of the 19th cent. Every year about July 14, thousands of people assemble on that hill and celebrate near this tomb a religious festival. There is evidently (perhaps not on the spot of the tomb, but in that neighbourhood) a religious tradition, which has persisted, in spite of the numerous political and military changes, that seems to be the reason why the sheikh wished to be buried there. Having determined the landmarks of the encampment of the Israelites it is natural to ask why this spot was chosen and pointed out to Moses with such precision. The reason seems to be that at that spot a phenomenon occurred which had always been present since the escape of the Israelites: the sea receded under the influence of the wind. "The Lord caused the sea to go back by a strong east wind all the night, and made the sea dry land, and the waters were divided" (Ex. 14:21). It has often been noticed by travellers in Egypt that when the wind blows from the N. to the S., in that kind of temperature, the sea recedes sometimes for a great distance, and comes back again to its former bed when the wind ceases or changes its direction. This phenomenon is not rare in lake Menzaleh (see J. of Victoria Institute, vol. xxviii. p. 267), which communicates with the sea, in lake Bourlos, and in other parts of Egypt. There is nothing extraordinary in its taking place in old times in the part of the sea between lake Timsah and the Bitter Lakes; moreover, the slow rising of the ground which in later times cut off lake Timsah from the Bitter Lakes was already being felt, the sea is rising at that point, but so slowly that the difference is very wide. One may even suppose that it had been known before that this phenomenon occurred at that particular spot, and for this reason the place was pointed out so exactly to Moses; and it may also have been this which led the Pharaohs to build a stronghold there. The result of the action of the wind in causing the water to recede was to create a temporary ford which people could easily wade through, as was seen N. of Suez, at the end of the present Red Sea, before the canal was dug. This occasional passage was watched from the tower Migdol. To the action of the wind we must add that of the tide. Striking instances of the power of the wind compelling even a strong current to stop for a time have occurred in other countries—in the Rhone at Geneva and in South American rivers. We have here an instance of a miracle consisting, not in something quite new and marvelous, but in a natural phenomenon beginning and ending at the right moment for a definite purpose. As was said at the beginning, this route shortens con-
siderably the distances of the journey, and also
avoids an objection made to the place advoca-
ted by Sir William Dawson—the southern
part of the Bitter Lakes. The Israelites would
have had to pass over the ridge of Jebel
Geneffe, a considerable height, difficult of
access. In travelling by rail from Ismailia to
Suez, before reaching the Bitter Lakes their
way seems entirely closed by the Jebel Geneffe
and its highest summit. The Israelites in their
flight would have had either to climb over the
mountain or to follow a narrow track, if such
had existed, between the sea and the mountains.
Josephus twice alludes to the fact that the
Israelites had before them steep mountains
projecting into the sea, and that they were shut
up between the sea and the mountains. Their
way seemed entirely barred, and this explains
their despair, as described in Scripture and by
Josephus. After passing through the sea, they
had nothing more to fear from the Egyptians;
the water had covered the chariots (Ex.14.27,
28), a light and quick vanguard very suitable
for a pursuit, and which, as was often the
case, may have been under the command of a
son of the king, and "all the host . . . that
came into the sea after them" was destroyed.

[PHARAOH; EXODUS, THE.]

Reed. Under this name we shall notice
four Heb. words: (1) 'aghmon occurs Job 40.
26 (A.V. 41.2, hook), 40.12 (A.V. 41.20,
caldron); Is.9.14 (A.V. rush). The 'aghmon
is mentioned also as an Egyptian plant,
in a sentence similar to the last, in Is.19.5,
while from 58.5 we learn that it had a pendulous
panicle. It doubtless denotes some aquatic,
reed-like plant, whether of the nat. order
Cyperaceae or that of Graminaceae. Celsus'
opinion that it is the Arundo phragmites is
probably right. The drooping panicle of this
plant answers well to the "bowing down the
head" of which Isaiah speaks. (2) gômd, trans-
lated "rush" and "bulrush" by A.V., un-
doubtedly denotes the celebrated paper-reed
of the ancients (Papyrus antiquorum), a plant
of the sedge family, Cyperaceae, formerly
common in some parts of Egypt. The Heb. word
is made to agree with gômd in Is.18.2, 35.7;
Job 8.11. Modern Abyssinians use boats made of
the papyrus reed (Bruce), which is found in Syria,
but not now in Egypt. Dr. Hooker saw it on the banks
of lake Tiberias, a few miles N. of the town.
It is abundant in the Huleh marshes, and the
P. syriacus in the Kishon and in Sharon
(Trente, Nat. Hist. Bible, p. 434). The papy-
rus plant (Papyrus antiquorum) has an angular
stem from 3 to 6 ft. high, though occasionally
reaching 14 ft. R.V. renders gômd "papyrus"
in Is.18.2 and in the marg. of Job 8.11—an
introduction of much judgment and taste, as
Groser remarks. Specimens of a cyperus
gathered by the present writer on the Ghour in
an imperfect condition (December, 1883) were
doubtfully referred by Prof. Oliver to the
papyrus, an interesting extension of the range,
if correct, as is probable. Another cyperus (C.
electusoides) of tropical distribution was dis-
covered there, also for the first time in Palestine,
on the same day. The Cyperus
Phragmites communis is abundant and well
deserves the variant name P. gigantea of J.

Gay. In Wâdy el’Ain in Sinai this form reaches
a height of 15 ft. (3) 'drôth is translated
"paper-reeds" in Is.19.7, the only passage where
the plur. noun occurs; there is no reason for
rendering of A.V. "drôth," says Kinchi, "is
the name to designate pot-herbs and green
plants." It probably denotes the open 
grass land on the banks of the Nile (R.V. mea-
dows). (4) gân, the generic name of a reed
of any kind: it occurs often in O.T., and
sometimes denotes the "stalk" of wheat (Gen.41.
5.22), or the "branches" of the candlestick
(Ex.25.32, 37.18); in Job 31.22 it denotes the
bone of the upper arm (os humeri). Elsewhere
A.V. renders it "calamus" or "reed." The
Arundo donax, the A. aegyptiaca (?) of Bové,
is common on the banks of the Nile, and may
perhaps be the "staff of the bruised reed"
in which Sennacherib compared the power of
Egypt (2K.18.21; Ezk.29.6.7). The dry culms
of this huge grass are in much demand for fish-
ning-rods, walking-sticks, etc., and may be the
"measuring reed" of Ezk.40.5. Some kind of
fragrant reed is denoted by the word gânê
(Is. 43.24; Ezk.27.19; Can.4.14), or more fully by
gânê bosom (see Ex.30.23), or by gânê kattôbôb
(Je.6.20); which A.V. renders "sweet cane"
and "calamus." It was of foreign importation
(Je.6.20). Some writers have sought to iden-
tify the gânê bosom with the Acorus calamus, the
"sweet sedge." Dr. Royce refers the καλάμος
ἀρωματικος of Dioscorides to a species of Andro-
pogon, which he calls A. calamus aromaticus, a

CYPERUS PAPYRUS.
plant of remarkable fragrance, and a native of Central India. The *gyné bosem* or *kathphāb*, may be this κάλαμος ἀρωματικός of Dioscorides; or it may be the *Andropogon schoenanthus*, the lemon-grass of India and Arabia. Pliny speaks

of the "sweet calamus, and also squinanch or *Juncus odoratus*, the sweet-rush." The former, he says, grows within Arabia and is "common to the Indians and Syrians likewise," while both occur in the Lebanon. The latter is the more valuable. Neither was observed by Tristram. [H.C.H.]  

**Reelaiah**¹, one of the children of the province who went up with Zerubbabel (Ezr. 2:2), in Ne. 7.7 called *Raamiah*, and in 1Esdr. 5.8 *Reesatās*.  

**Reel'ius.** This name occupies the place in 1Esdr. 5.8 of *Bigvai* (Ezr. 2.2; Ne. 7.7).  

**Reesal'as** (1Esdr. 5.8) = *Reelaiah* (Ezr. 2.2) or *Raamiah* (Ne. 7.7).  

**Reflner.** [Handicrafts, (2).]  

**Refuge, Cities of.** [Cities of Refuge.]  

**Re'gem, son of Jahdai** (1Chr. 2:47).  

**Re'gem-me-lech** one of a delegation sent on behalf of some of the Captivity to inquire of the priests whether the fast in the fifth month in memory of the destruction of the temple should continue to be observed (Zech. 7.2). The meaning of the passage is doubtful. See R.V. and Smith's *D.B.* (4 vols., 1893), s.v.  

**Region-round-about.** The *γῆ τῆς γεωργίας*. Used in O.T. by the LXX. as the equivalent of the Heb. hakkikkār (lit. the round Plain), or Jordan Valley. In Mt. 3.5 and Lu. 3.3 it denotes the region which contained Jericho and its dependencies, in the Jordan Valley. [Cities of the Plain.] The Gk. term is also applied to the district of Gennesaret (Mt. 14.35; Mk. 6.55; Lk. 7.17). [C.R.C.]  

**Rehabiah**, the only son of Elizeriah, son of Moses (1Chr. 23.17, 24.21, 26.25).  

**Rehob.**—1. Father of Hadadezer king of Zobah (2Sam. 8.12).—2. A Levite who sealed the covenant (Ne. 10.11).  

**Rehob** (broad place).—1. Place near the "entering in to Hamath." (Num. 13.21) visited by the spies of Moses. It is difficult to understand how they could have reached this place, so far N., and returned to Kadesh-barnea in 40 days (ver. 25). The description is perhaps an ancient gloss, and the original description may have referred to explorations from Zin on the E. to Rehoborn on the W., in the wilderness, before approaching Horem from the negheb (ver. 22). There was a Beth-rehob near Dan (Judg. 18.28; 2Sam. 10.6) called also Rehob (ver. 8); but this lay in quite another direction, near Hermon.—2. A town of Asher given to the Levites (Jos. 19.32, 21.31), the site of which is unknown.—3. Apparently another town of Asher (19.30). One of these remained Canaanite (Judg. 1.31). [C.R.C.]  

**Rehoboam** (? the people is enlarged), son of Solomon by the Ammonite princess Naamah (1K. 14.21, 31), and his successor (1K. 11.43). From the earliest period of Jewish history there is sight that the confederation of the tribes was imperfectly cemented. The powerful Ephraim could never brook a position of inferiority; while, as early as the time of the Judges, when the northern tribes made common cause against their oppressors, Judah stood apart. The same spirit was shown by the two rebellions in David's reign (2Sam. 15-20), in spite of his transference of the capital from Hebron northwards to Jerusalem (2Sam. 5.4). The forced labour imposed by Solomon intensified political dissatisfaction, and, his strong rule ended, the crisis at once came. At Shechem in Ephraim, the chief religious centre of the northern tribes, Rehoboam was scornfully compelled to demand for a remission of exacting burdens. His hearers' reply was the song of insurrection heard once before (2Sam. 20.1), when the tribes quarrelled after the return from the war with Absalom. Adoram (Adoniram), sent by Rehoboam to quash the rebellion, was slain, and the king fled to Jerusalem. Jeroboam assumed the government of the northern kingdom. Rehoboam assembled an army of 180,000 men from the two faithful tribes of Judah and Benjamin, in the hope of reconquering Israel. The expedition, however, was forbidden by the prophet Shemaijah (1K. 12.24); still, during Rehoboam's lifetime peaceful relations between Israel and Judah were never restored (2Chr. 12.15; 1K. 14.30). The pure worship of God was maintained in Judah; but Rehoboam did not check the introduction of foreign abominations into his capital. The lascivious worship of Ashtoreth was allowed to exist by the side of the true religion, images were set up, and the worst immoralities were tolerated (1K. 14.22f.). These evils were punished and put down by the terrible calamity of an Egyptian invasion. In the fifth year of Rehoboam's reign the country was entered (1K. 14.25) by Shishak (Sesoonchis), the first king of the 20th dynasty, invited very possibly by Jeroboam, as
having been the latter's Egyptian patron. Of the fifteen fortresses built by Rehoboam (2Chr. 11.6-10), all but one lie S. of Jerusalem. This protecting line, however, was forced, Jerusalem itself was taken, and Rehoboam had to purchase an ignominious peace by delivering up all the treasures with which Solomon had adorned the temple and palace, including his golden shields, 200 of the larger and 300 of the smaller size (1K.10.16f.). Shishak's success is commemorated by sculptures discovered by Champollion on the S. wall of the temple of Amon at Karnak, where in the long list of places subjugated are found the names of towns even in the N. of Palestine, e.g. Megiddo. This suggests that Jeroboam, at the price of Shishak's assistance against the king of Judah, became vassal to the former. After this great humiliation the moral condition of Judah sank and the Edomites were again permitted to pass through on their way to Sheba (Jos.13.21). This may explain the Edomites' boyish boasting that they were the allies of the S. (2K.9.25). The Edomites may have thriven by forcing the Edomites to pay a toll for passing through their territory, or by receiving tributes from them. It is true that after the death of Sargon, the Assyrians were unable to maintain their supremacy, and the Edomites again seemed to be able to pursue a policy of independence. But the death of Sargon seems rather to have caused a decline in the power of the Assyrians, and Judah was able to drive them out with the aid of the Philistines (2K.18.15f.).

Rehobo'ath (broad places).—1. The place where Isaac dug his third well, and said to be so named because the Lord hath made broad the way for peace (Gen.26.20). Eshek and Shizma in the valley of Gerar, since Isaac's herdsmen "removed thence" (Gen. 26. 19-23), and "went up" thence to Beer-sheba. It is probably the present Ruheibeh, 25 miles S.W. of Bir es Seba; and an ancient well still exists on N.E. side of the valley, which Robinson, visiting the ruins on the opposite side, overlooked. (Robinson, Bib. Res. i. p. 197; Palmer, in Surv. W. Pal. volume of Special Papers, p. 31). This site is probably also the Rahebu of the list of Thothmes III. (No. 87) in 16th cent. B.C., and the Rehoboth noticed a cent. later, by the Mohar traveller, in connection with Gaza (same vol. pp. 174, 193).—2. The city Re'photh, "by the river" (Gen.24.9) is generally supposed to lie in Assyria, near Nineveh, and for this view see next art.; but perhaps the wording of the passage would allow of its being one of the sites next noticed, for Nimrod, ruling first in Chaldea, "went forth out of that land to Assyur, and builded Nineveh and the city Re'photh."—3. "Rephoboth by the river" (Gen.36.37) is supposed to mean "by the Euphrates" (River), and in this case is either Rababah on the W., 3 miles from the Euphrates, below the junction of the Khabur, or Rabahab-malek, some 4 miles S. of the preceding, on E. bank. It would seem, if this view is correct, that Edom was ruled by a Babylonian king, who fetched up a name Saul about a century before the accession of Saul in Israel. [A.W.S.]

Rehoboth, The city, one of the four cities built by Ashur (R.V. by Nimrod) in Asshur or Assyria (Gen.10.11). Fried. Delitzsch makes this city to be the Reḥiḥ Nūmā of the Hebrews, or a town near the Egyptian temple of Sargon, lay N.E. of Nineveh, stretching towards Khorsabad. Possibly it was an immense suburb consisting of many open spaces, hence the Assyrian name, which means "broad spaces of Nineveh," whilst the Heb., Rehoboth-ir, signifies "broad spaces of the city." Excavations on the site will probably determine the correctness of this theory. For other suggestion, see preceding art. [T.R.P.]

Rehum'.—1. One of the "children of the province" who returned with Zerubbabel (Ezr. 2.2).—2. "The chancellor," who, with others, wrote a letter to Artaxerxes against the rebuilding of Jerusalem (4.8,9,17,23).—3. A Levite who helped to repair the walls (Ne.3.17).

Re'kem. One of those who signed the covenant (10.25).—5. A priestly family, who returned with Zerubbabel (12.3).

Rei', a man of influence (probably an officer of the royal guard) who remained loyal to David when Adonijah rebelled (1K.1.8). The reading is uncertain. Ewald suggests that Rei is identical with Raddai. [H.C.B.]

Reins, i.e. kidneys, from L. renes. In the ancient system of physiology the kidneys were believed to be the seat of desire and longing, hence they are often coupled with the heart (Ps.7.9,26f.; Je.11.20,17,10, etc. [Soul].

Re'kem. One of five kings or chieftains of Midian slain by the Israelites (Num.31.8; Jos.13.21).—2. Son of Hebron, and father of Shammah (I Chr.2.43,44).

Rem'amon, one of the towns of Benjamin (Jos.18.27). The site is unknown, unless we should read Dekem, which would be Beit Duquq, near Bezel and Mozah, with which it is noticed. [C.R.C.]

Remal'lah; father of Pe'kah (2K.15.25ff., 16.1,5; 2 Chr.28.6; Is.7.1-9,8,6). [C.R.C.]

Re'meth (Jos.19.21) = Ramoth.

Remmon ('mehoth'ar) (2K.25.21) a place which formed one of the landmarks of the E. boundary of Zebulun (Jos.19.13 only). mēθhōṯār does not form a part of the name; but should be translated (as in A.V. marg.), "Remmon which reaches to Nahal." Now the ruin Kumāmeh, 6 miles N. of Nazareth and the E. border of the tribe. [C.R.C-to]

Remph'an (Ac.7.42, A.V., but R.V. Réphan): so Coptic [Memphitic] here and in Am.5.26, Itala Réphān and Raiphān following the LXX. spelling, Nestlé Rōphān, Westcott and Hort and Weiss Rompa, Vulg. Rempphan) is read in the LXX. of Am.5.26 for the Heb. Chiam (kīyūn), and hence quoted in Aets. The LXX. evidently used the name Réphān (the correct Coptic form) instead of the Heb. name of the same god (1) in order that readers in Egypt might know who was meant, and (2) to avoid using a word which would sound obscene in Egypt (as Kōm in Coptic = pudendum virile, while Ken = 'bosom,' Aeg. qeïna, cf. Arab. kāïn, also an indecent word), through kīyūn (or better kēwān) has not this latter sense in Heb. Réphān is the Coptic name of the planet Saturn, according to Kircher, though he spells it Réphan, and this suits the passage well, as kīyūn (kēwān) is the Heb. form of the name of that planet. It is difficult to give the etymology of Réphān or Réphān, but it seems to be for ré (or rē): both Mem-
phitic forms) + pha + en, Aeg. Kâ-pa-ân, "Ra the bearer." If so, Saturn must have been identified in later times with Râ, who, as sun-god, carried the justified dead through the sky in his bark Sektet (Book of the Dead, cap. xv.). Otherwise the word might = Aeg. rephî, prince. The m in such forms as Remphan or Romângûr is usually created in; cf. Aeg. rephî, rephît, "vegetables." whence Aeg. remphî, "year," in Coptic romphî. Another alternative: Wilkinson (Manners and Customs of Anc. Egyptians, vol. ii. plate 69; cf. Bunsen, Egypt's Place, vol. i. pp. 411, 412) mentions an Assyric god Rempa, apparently a war-god, was depicted on a tablet of the 18th dynasty; perhaps from Ar. 'rânâphî, in conj. iv. = "to hasten." If this is so, the L.XX. blunders in using the name here as = Kâwân. The Heb. text of Am. 5.26 (with the transposition of one word, for which we have the support of the L.XX.) runs thus: "[an] Assyry, carry Sikkuth [= Mars] your king and Kéwân [Sakkut], the star of your god (= your star-god), your idols which ye have made unto you." kéwân (Chium) is the Syric (Peshittû) form of the name of the planet Saturn, in Arab. Kâwân, from Assy. Kâwânû, a title of Nîrgal, god of spring (who was god of that planet, as was his "doppelganger" Ninâdur (otherwise Ninip or Adar) of Mars. The latter was also known to the Akkadians as Sûkkûth (whence the sikkûth of the Heb. Massoretic text, wrongly rendered šmwy) by the L.XX. "the chief of destiny." Like his classical parallel, he was a war-god. In Rawlinson's Canonform Inscriptions (vol. ii. p. 57, cols. 3 and 4, l. 40) Sûkkûth is given as = Nînîp, so the meaning of the word, which puzzled all the ancient translators, is now clear, and we see that Qimhi (Kimchi) was right in rendering the beginning of Am. 5.26 thus: "Ye did not accept, but ye shall accept and hearken to the voice of Sîkkûth, of your king." Rashi also saw that Sîkkûth must be a name of a deity. The passage does not refer to any idolatrous worship offered by the Israelites in the wilderness, but to their yet future (in Amos's time) slavery to idolatry during the Babylonian Captivity, as is clear from the use of the name Ninip (= of Sûkkûth in Am. 5.26) of Kéwân (either from Assy. Kânû, "to be," or from Assy. Kânû, "to stand," cf. Arab. Kânû and gûm, = "the firm") by his apparently slow motion, just as in Sanskrit the same reason caused him to be known as Sûnti (the slow) and Mûndra (the tardy). The old derivation of the name from the Assyric Kârî, Kâvan, Kâvana (imperial, royal), is impossible, not only because this word in Pahlavi becomes Kâwân, not Kâwûn, but because the word Kâwûn (Arab., in Mod. Pers. Kâwân), if of Persian origin, could not have denoted Saturn (as it does), but must have meant Venus, as does Kârî (a patronymic of King). Kâwûn, the usual name of the latter planet in the cognate Sanskrit. Of Assyris origin, the title Kâwânûn or Kâwûn (in Assy. m and w are practically interchangeable, owing to Akkadian influence) became the name of the god in Palestine (cf. Sukkûth, originally a title and then a name), and the word was received among the Arabs as the name of the planet and thus introduced into Persia, instead of having originated in the latter country. Jerome rendered kiuwûn by "imaginem," and has misled, some later translators. Hommel, Die Altsyr. Ueberfiihrung; Kircher, Lingua Aeg. Rest. p. 49; Schrader, Die Keilschrifttexte u. d. A. T.; Budge, Book of the Dead, Aeg. Text and Voc.; Migra's Gedanik, Warsaw ed.; Sayce, Higher Crit. and Monuments; Tattam's ed. of Coptic XII. Prophetae Minores. [wst. c.t.] Repentance. The divine part in salvation has been treated in Salvation, Saviour. The new attitude of God to man is connected with a new attitude of man to God. The first stage towards occupying this new attitude is repentance. The goodness of God leads to repentance. What is repentance? Not merely a sorrow for having done amiss, though this is its first beginning, if it be "the godly sorrow that worketh repentance" (2 Cor. 7.10); still less a mere change of heart, as some con- tend, but, as the Gk. imports, a change of mind, and a turn to one's previous acts not merely as having such and such consequences, but in themselves. Cf. Tertullian, Adv. Marcion, ii. 24, "In Graeco sermone poenitentiae nomen non est ex delicti confessione, sed ex animi demutamento et conversione. Ex iniuria mens recta, sive, after- wards imply a change of conduct, "works meet for repentance" (Acts 26.20). Repentance is a necessary condition of salvation, for to be saved from sin we must desire to depart from sin, and repentance is, in fact, this desire. Hence in N.T. repentance is constantly preached as essential to salvation (Mark 9.13; Luke 23.47; Acts 20.21, and passim). This insistence is not arbitrary, for the morality of forgiveness is grounded in repentance. Forgiveness prior to repentance is actually the condenmation of sin, but as the recognition of repentance— "if he repent, forgive him"—it is not only a preparation for efficacy, but St. John tells us that "if we confess our sins He is faithful and just to forgive us our sins," implying that, if God did not forgive, He would be unjust, as not regarding the vital difference that must ever exist between a sin that is heartily abandoned and a sin that is retained. Hence we are told again and again, in context, that repentance is the first step, repentance dissociates a sinner from his past and puts him "on the side of the angels," and while it cannot undo what is done, in all or most cases, yet, if combined with restitution and amendment, it is the best that under the circumstances is possible; and, as Butler says, "Christ not merely inflicts part of justice, but renders it of the efficacy which it is by what He did and suffered, and obtained for us the benefit of having our repentance accepted unto eternal life." (Analogy, ii. v. 19). [Faith.] [M.S.] Rephael, a gate-keeper of the tabernacle; son of Shemaiah; 1 Chr. 26.2. Rephaim, a son of Ephraim (1 Chr. 7.25). Rephan, 3. Son of Remphan. 4. Son of Rephael appear among the descendants of Zerubbabel in 1 Chr. 3.21. — 2. A Simeonite chieftain, one of those who smote the Amalekites in mount Seir in the reign of Hezekiah (4.42). — 2. Son of Tola the son of Issachar (7.4). — 4. Son of Binea, and descendant of Saul (9.43). — 5. Son of Hur, and
ruler of a portion of Jerusalem. He assisted in the repair of the walls (Ne.3:6).  
Rephaim.  
Rephaim, Valley of, a deep valley (‘êmeq), having its head at the hill to its N., which lay W. of the valley of Hinnom (Jos.15.8,18,16), but running W. so as to be near Adullam also (2Sam.5.18-22;23.13; 1Chr.11.15,14,19). This applies to Wûdy el Werd, rising near Jerusalem on S.W., and joining the valley of Sorek, 7 miles N. of Adullam. The LXX. and A.V. render the name "Valley of Giants"—referring perhaps to the Philistine giants or Rephaim (1Chr.20.4). Isaiah speaks of this valley as producing corn, wine, and oil (17.5,6), which applies to its lower course. [c.r.c.]  
Rephidim (refreshments), the place where Moses struck the rock in Horeb" (Ex.17.1,6,8), and consequently in the region of Sinaï, which was the next stage in the journey of Israel (19.2; Num.33.14,15). It is consequently supposed to be the present Wûdy Feiran [Paran], which now has a good stream, with open space for camps (Robinson, Bib. Researches, 1857, p.357). It is about 15 miles. of S.W. from Jerusalem, and on the broad plain where Israel next camped "before the mount" (Ex.19.2). [c.r.c.]  
Res-en (Gen.10.12) was one of the four cities built by Asshur (R.V. by Nimrod), and lay "between Nineveh and Calah" (Koyunjik and Nimrud). It is probably not the Rûṣīs, 'Rûṣīs-hātha' [Rushah] mentioned by Sennacherib as the place from which he made conduits to the cities of the district, as that seems to be Rûṣ-al-'Ātin, a little N. of Nineveh. It has been suggested that the Biblical Resen is the rather extensive ruins near the modern Salamis, which really lie between the two points named, on the E. bank of the Tigris. The explanation "the same is the great city" probably does not refer to Resen alone, but also to Rehoboth the city and Calah, which, with it, might possibly be regarded as having been suburbs of Nineveh. [T.G.P.]  
Re-sheph, apparently a son of Ephraim and a captain (1Chr.7.25).  
Resurrection [Future Life; Phari-sees.]

Resurrection of our Lord.  
The earliest personal testimony is St. Paul's (1Cor.15.4-8), recorded within 30 years, experienced possibly within one year, of the Ascension. His summary of the appearances is the most ancient and most official of the records we possess, being evidently derived from the older apostles (ver. 3). St. Mark (if we exclude the last 12 verses) mentions the vacant grave, but no appearance of the risen Lord. St. Matthew and St. Luke add independent features; so also St. John. The fact of the Resurrection formed the basis of the earliest apostolic preaching. The earliest gospel presupposes the Resurrection. There would be no Gospel conceivable without it. If the details are difficult to harmonize, "the uncertainties which attend the Synoptic accounts are not greater than we might have expected, and cast no shadow of suspicion on the general truth of the narrative" (Swete, The Appearances of our Lord, p. 12). Two series of appearances are recorded, divided by locality. The original Mark implies, but does not re-
Reu, son of Peleg and ancestor of Abraham (Gen.11.18ff.; 1 Chr.1.25).

Reuben [behold a son], the eldest son of Jacob and of Leah, named from his mother's exclamation at his birth (Gen.29.32). He is said to have eaten a particular apple (Gen.35.22) and later to have been cursed by his

brothers. Among the later passages (Num.16.10, 16, 30, 10.18) the tribe furnished Shammua as a spy (13.4). Its numbers [Palestine] decreased (1.21, 2.7) by 2,770 men before the conquest of Palestine, and some of the Reubenites perished when joining the conspiracy of the Levite Korah against Moses (Num.16.1; Deut.11.6). The tribe chose the mishör plateau in N. Moab as their lot, on account of their cattle (Num.32.1-38), but crossed Jordan to aid Joshua, returning after the conquest of the W. (Num.26.7-10; Jos.4.12, 32). Their lot on Eden took the curses (Deut.27.13). They remained by their distant borders (R.V. Judg.5.15, 16) while Barak strove against the Canaanites, but were renowned for fighting prowess and for swiftness in their contest with Hagarites to the E. of their lot (1 Chr.5.18) till taken captive by Tiglath-pileser in 734 B.C. (ver. 26), after they had already been smitten by Hazael of Damascus (2 K.10.33). The tribe is last named in Ezek.48.6,7,31, Rev.7.5. The ethnic name Reubenite occurs in 18 passages of O.T. Among these was Adina (1 Chr.11.42), a Reubenite captain under David, and others (12.17) connected with his descendants (cf. 20.5; 27.16). The Tribal Lot of Reuben coincided with the kingdom of Sihon the Amorite, including the plateau of Moah from Jaazer to the Arnon, and the Jordan Valley E. of the river and immediately N. of the Dead Sea. They rebuilt, and in some cases renamed, six cities (Num.32.37), and within their border Gad re-built Dibon, Ataroth, and Aroer (ver. 34). Besides these and other cities in the plateau (Jos.13.15-21), Reuben held Beth-Jeshimon in the Jordan Valley (vv. 20, 23), but Beth-aram (ver. 27) belonged to Gad. [c.r.c.]

Reuel and Raguel [friend of God]: Heb. r*"ud' for both renderings. —1. A son of Esau, and father of four "dukes" (calliph = "leader") of Edom (Gen.36.4,10,13,17; 1 Chr.1.35,37).

—2. The father-in-law of Moses, and a priest of Midian (Ex.2.16,18). In Num.10.29 A.V. gives Raguel (like Gaza for Heb. 'aza), but the Heb. is the same as Hobah in this passage, and (as noted under Hobah) there is no sound reason to suppose that Reuel is also called Hobah in O.T., though the names "friend of God" and "friend" (hôbâb) are alike.—3. A man of the tribe of Gad in the time of Moses (Num.2.14).—4. A Benjamite, the son of Binjah, whose name was found in the book of the kings of Israel and Judah (1 Chr.8.22).—5. A man of the book of Kings, indicating independent information possessed by the author of Chr. —5. Raguel (Ragôwîl), a pious Hebrew of Ecbatana in Media (Tob.3.7,17; see ver. 16), father of Sâra. For the difficulty of the double name Jethro = Reuel, see Jethro.

Revelation, the son-in-law of Abraham's brother (Gen.22.24). Revelation. (1) We usually use the term "revelation" of any knowledge which appears to come to us otherwise than by our own mental processes; sometimes, therefore, (a) of ideas about a thing which either suggest themselves (as an inspiration, or a happy thought) or are suggested by a book or teacher; more strictly (b) of some manifestation of the thing itself. While the former give us only a limited number of ideas, the second provides an opportunity of learning an indefinite number, and also of verifying them. The first leads to opinion or belief; the second is the ground of what we call real knowledge. Psychologically, faith—i.e. the confidence to act upon beliefs—comes of the latter only. (2) The same holds equally of objects. We call gravitation an abstraction, for its whole meaning is confined to the one limited idea; but a man is real, for in him are indefinite potentialities. Between real knowledge and mere ideas there is a very close connection. Upon outside knowledge of formal actions we base an opinion, but only personal intercourse justifies us in saying that we know a man. The difference is of kind and not of degree; our knowledge may be real without being extensive, and the man may be "real" to us, even if our knowledge is slight. (3) Natural or heathen religion is based on abstract inference. To the primitive or uncivilized man, considering only the affairs of his own tribe (monolatry), the god seemed real enough. With a wider intercourse and outlook, polytheism, polytheism, polytheism (cf. 26.13-15, 27.16). The Tribal Lot of Reuben coincided with the kingdom of Sihon the Amorite, including the plateau of Moah from Jaazer to the Arnon, and the Jordan Valley E. of the river and immediately N. of the Dead Sea. They rebuilt, and in some cases renamed, six cities (Num.32.37), and within their border Gad re-built Dibon, Ataroth, and Aroer (ver. 34). Besides these and other cities in the plateau (Jos.13.15-21), Reuben held Beth-Jeshimon in the Jordan Valley (vv. 20, 23), but Beth-aram (ver. 27) belonged to Gad. [c.r.c.]
do not guarantee, but constitute, the revelation. (Psychologically, phenomena are always "ruptive"—i.e. they break into the evolution of thought after the fashion of a miracle.) The difference between the two stages follows on the difference of the revelation claimed. (ii) The Jews believed that God had revealed Himself to them in certain real events or acts of His own, which thus constituted a basis of real knowledge and of faith as in a reality. Early Judaism has much of the naive reality common to all monolatry, but in a higher degree, and this stage is prolonged, partly by political, partly by deliberate, religious isolation. With increased intercourse, it was impossible to ignore other religions; but the Jehovah Who had been known could not be made one factor in a system of notions, and no religion has ever grown out of a confused knowledge and a fantasy. It was only possible, therefore, either by apostasy to adopt an alien religion, or to accept the inference of the prophets that the true God was also One, the God of the whole earth. The acts, however, by which He was known to them, being of a purely national character, did not provide a revelation of contact and applicability. There was something yet to come. (6) The Christians asserted that God had made Himself known in a life by assuming humanity, not in the limitation, and therefore imperfection, of a single human personality, but, as God only could do, in the wholeness of the nature. Since humanity is the utmost of human capacity. The ideas of the early Christians, as of the early Jews, about God were often defective, and in this respect both had much to learn (cf. rise of Alexandrian theology) from the philosophers; but while to the latter He was an abstraction and a thing, to the Christians He was a reality. Philosophers and Roman politicians recognized that there was a difference of kind and not of degree. (7) The sense of reality found in Mohammedanism was derivative, and not original. It represents an attempt to make a religion out of a substratum of human thought, and only, without any phenomenal manifestation of God. As miraculous and not merely inferential, it provides a basis of something like faith; but (i) the ideas so given are inevitably fixed, incapable of development, and cannot be adequate for all minds and all times; (ii) since God is not personally known, He is not an object of love, and obedience can only be fear or pride. (8) Summarily, heathenism had thought about God, but had no means of getting beyond opinions. Mohammedanism only added that certain opinions had been authenticated by a revelation. The Jews claimed that God had made Himself known to them in certain mighty works; the Christians, that He had made Himself known for all men by the Incarnation. There is a constant tendency in the human mind to regard the actual opinions held as representing the true substance of knowledge, but it is obvious that the principles underlying opinions and the seconds are fundamentally different. [H.R.K.] Revelation of St. John. Canonical Authority. This should be carefully distin-
guished from the question of authorship. Reception into the Canon is matter of fact, authorship matter of presumption. For the former, evidence is exact; for the latter, it requires careful weighing. At the time of composing and summarizing the evidences of canonicity we necessarily include the external evidences of authorship. The facts are as follows: (1) 2nd cent. Papias (c. 115), the "hearer" of St. John, pronounces Rev. "credible" (according to Andreas of Crete, c. 650). Justin (c. 150) says that it was written about the Apocalypse, but makes a serious misquotation. Melito (c. 165) wrote a treatise On the Apocalypse of John. The Muratorian Fragment (c. 170) refers to the Apocalypse of John as canonical. The epistles of the churches of Lyons and Vienne (c. 177) quote it as Scripture. Irenaeus (c. 180) speaks of St. John as "author of the Lord" as the author, and identifies him with the evangelist. Tertullian and Clement of Alexandria (c. 200) cite it as Scripture and attribute it to the apostle. On the other hand, the book was rejected along with the Fourth Gospel by Marcion (according to Tertullian) and by the bishop of Antioch, Gains in Rome (c. 210) rejected with scorn both the contents of the book and the attribution of it to an apostle; he was answered by Hippolytus, who maintained that it was by the apostle John, and henceforward we hear of little further opposition in the West. It is received by Irenaeus of Lyons (c. 180), who ascribes it to "John the son of Zebedee who lay on the breast of the Lord." Dionysius of Alexandria (c. 255) marks a new epoch. He held that Rev. was inspired, but written by a non-apostolic "John" (the apostle being the author of the Fourth Gospel). He bases his view on the marked difference in thought, style, and general character between the book of the gospel of St. John, and mentions in support of it the interesting fact that there were two reputed tombs of John in Asia Minor. Dionysius' criticism appears to have stimulated opposition to Rev. in the East, though Alexandria itself did not generally reject the book. (3) 3rd cent. The controversy was continued to the canonicity of Rev., and again we have the suggestion of a non-apostolic John as the author, who may, he says, be a certain "John the Elder" mentioned by Papias. Cyril of Jerusalem wished the book excluded from use. Arian canons of this period ignore it. Amphilochius of Iconium states that "most say it is spurious." In Eastern Syria the Peshîtta version omits it, and sets a precedent followed even down to the 13th cent. In Western Syria, where the authority of the book had in the 2nd cent. been fully recognized, we now find a growing dislike to it, sufficient to keep it among the Antilegomena until the 9th cent. [CANON OF N.T.—Date. The traditional date is c. 93–96. "It was seen," says Irenaeus, "at the close of Domitian's reign." (Dr. Chase, quoted by Dr. Swete, suggests that the meaning is that St. John was seen at that time.) But the traditional date is well supported apart from Irenaeus' testimony. On the other hand, two Syriac versions assign St. John's banishment to the reign of Nero, Epiphanius to that of Claudius, and other writers to that of
Trajan. The last seems excluded by, e.g., 13. 13-17, which is unlike what we know of the persecution under Trajan. On the whole, the internal evidence corresponds with the traditional date. The "seven churches" do not seem to be infant communities, and in particular an earlier persecution is referred to (2.13). Moreover, Domitian seems to be introduced (13.3,12,17.8-10). The interpretation of these passages seems to be that Nero (the fifth emperor) and Domitian (the eighth, not reckoning the three ephemeral reigns of 68, 69) are to be regarded as both heads and embodiments of the "beast from the sea" (= the world-power of the Roman empire). Domitian, moreover, is thought of as a second Nero (cf. Juv., Sat. iv. 38, "calvisus Nero"), and so, though "in eight," he is one "of the seven": and there appears to be an allusion to the rumour that Nero was not really dead at all. So far there seems a clear case for dating Rev. in the reign of Domitian. On the other hand, 17.10 professes to be written in the reign of Domitian; but (the passage inserted in the passage, but more probably it is simply a case of ante-dated prediction in the well-known apocalyptic manner. 13.18 appears to refer to Nero. 11.1-13 also seems to be earlier than 70 A.D. in origin, but the figurative use made of it suggests a later date. Consequently, also, the assertion that the "Apostolic Father" is of a very remarkable character. Prima facie it appears full of elementary mistakes in grammar, besides its many unusual phrases and constructions. On closer examination we are struck by the fact that many of these peculiarities are evidently deliberate, and, moreover, that they do not detract from the lucidity and literary power of the book. We may conceive that they are consciously or unconsciously intended to reproduce the effect of the Heb. prophetic style, or to give the vivid effect of a series of interjections. With Zahn we may suppose that the seer actually wrote his document in interludes, and with Bousset we may look for parenthetic comments of the writer himself, or attempt to set obscure passages right by altering the punctuation. But when all has been said and done, we are still without a completely satisfactory account of the linguistic peculiarities of the book.—Authorship, (1) For external evidence, ride supra. This evidence is even stronger than it seems, for the objections felt in the East to an apostolic origin rested on dogmatic considerations. (2) Internal evidence, (i) Its relation to the Fourth Gospel. We can hardly deal with the question of the authorship of Rev. until we have given some provisional account of that of the Fourth Gospel. (a) If we believe that the gospel comes straight from the pen of the apostle, there are serious difficulties in supposing that Rev. does the same. In spite of quite distinct affinities in vocabulary, grammar, and style, the contrast in each respect is very remarkable, and no explanation of the peculiarities of Rev. hitherto suggested seems sufficient to overcome it. Nor can it be accounted for simply by the difference between the traditional style of narrative and apocalypse. The cleavage is far deeper, e.g., as Dr. Swete points out, than that between the apocalyptic portions of Thess. and 2Pe. and the rest of those epistles. Nor can the point be raised that the title "Revelation" appears in both books held to outweigh all their differences (Zahn). Westcott, it may be noticed, urges the earlier date for the Rev., on the ground that it could not have been written after the Fourth Gospel by the same author. (b) If we believe, with the author of the Muratorian Fragment, that the Fourth Gospel was dictated by the apostle and revised by others, it becomes much easier to accept the apostolic authorship of Rev. (c) If the apostle's authorship is rejected in the case of the gospel, the linguistic difficulty in assigning Rev. to him of course disappears. But in that case some weight will probably have been allowed to Papias's statement that the apostle was killed "by the Jews" (i.e. before 70). This would all but exclude the earliest possible date for Rev. (ii) Other internal evidence leads us to believe that the book is at any rate by some "John" who knew the Asian apologises. There are many similar characteristics, and an anonyous author would have claimed apostolic rank more decidedly. It does not, of course, follow that this person is the apostle. We must keep open the possibility that when "John the disciple" is mentioned as residing in Asia and being exiled to Patmos and living very close to that event he means the apostle who is meant, and that the two are identified by a later confusion. The only 2nd cent. evidence which plainly states that the apostle resided in Asia Minor is the "Acta Johannis"; and the evidence for his exile in Patmos is chiefly Western, and begins with Clement of Alexandria. On the other hand, the tone of the book is just what we should have expected from St. John as he is depicted in the gospels, and the only serious difficulty in ascribing to him is that of language.—Unity and Use of Other Literature. (i) The general unity of Rev. is clear from the evidence of the plan. At the very face of the book. It is part of a somewhat broken character, as if the available material did not always fit the scheme quite readily. (ii) Closer study shows that the same hand has written 1-3 and 20-22, and has also been active throughout. (2) What sources can be distinguished, and how are they used? (i) The O.T. We observe extraordinary dependence, but no citation; and the seer does not tie himself to the O.T. language, except where it suits his purpose. (ii) Extant non-canonical apocalypses. Little direct use appears to be made of these. (iii) Lost apocalypses. Some (e.g. Spitta) suppose Rev. practically made up of these; but such a view ignores the general unity of the book, and is quite contrary to the observed facts of our author's use of those sources which are known to us. (iv) Apocalyptic tradition. Gunkel supposes a common stock of traditional material on which the seer has drawn, and supposes that his composition proceeds from his own reverence for these traditions. In ch. 12, e.g., we are to find what was originally a Babylonian sun-myst, describing the victory of Tiamat over Marduk. Whatever may be thought of such theories, it is clear from the writer's use of the O.T. that he never permits himself to be bound to the
thought or language of his source.—Inter-
pretation. For more than 200 years a literal and "futurist" interpretation prevailed, ex-
cept at Alexandria, where all Scripture bore a mystical sense. The 1000 years" of 
triumph were looked forward to as equivalent to the Second Coming; hence came the term
"Chiliasm" to express the tendency of the time. With the triumph of the Church came new methods. Tyconius (end of 4th cent.) suggested that "the genus is hidden in the species," i.e., that the contexts and struggles of the Bible of the 20th century are the vehicle of good and evil. This view was developed by Augustine, who saw in the 1,000 years simply the reign of Christ in the kingdom of God in his own day. In the 9th cent. Berengaud made the first effort after a "continuous historical" interpretation, which was carried much further by Joachim (c. 1200), and was developed and improved by the capaple of the Re-
formation controversies. The Jesuit Alcacer (17th cent.) was the first to adopt a frankly "preterist" view, seeing in the last chapters the present triumph of the Church, and in the greater part of the book simply an account of the age of persecution. M. Munin interpreted the proph-
ecies as "preterist," for the most part, or "contemporary historical," seeking a meaning in every case suitable to the historical circumstances of the writer's times. It is generally felt that the schemes of the "continuous historical" school are little more than a reducio ad absurdum of its methods. They furnish no clue to the true spirit of prophecy. But we are not on that account debared from reading into the seer's words, with Tyconius and Augustine, a meaning which no age and no partial fulfilment can exhaust. Swete, Apoc. of St. John; Scott, "Revelation" in Century Bible; Milgrom, Lect. on Apoc.; Benson, A.J.; art. "Revelation" in Hastings, D.B. (5 vols. 1904).

[REVISED VERSION. [VERSION, REVISED.]

Re'ze'ph. one of the places which Scnmaacher mentions, in his taunting message to Hezekiah, as having been destroyed by his predecessor, with whom he was identified by Ptolemy (v. 15) under the name of P'tro'apa. Now Re'safa. S. of Tiph'sah, which is on the Euphrates N.E. of Hamath. Rezeph is noticed in the list of Thothmes III. (No. 348) in 16th cent. n.c., and a century later it probably appears as Ar'azpi in one of the Amarna letters (Berlin 10).

Re'zia. S. of Ulla (1 Chr. 7.39).

Re'zin.—I. A king of Damascus, who, in alliance with Pekah, king of Israel, attacked 
Jotham (2 K. 15.37); but his chief war was with 
Ahaz (c. 741 n.C.). The combined army un-
sucessfully besieged Jerusalem, where Ahaz was (15.7-1: 2 K. 16.5); but Rezin "recovered 
Etham, Syria" (2 K. 17.4). Soon after, he was 
attacked, defeated, and slain by Tilgath-pileser II., king of Assyria (2 K. 18.0; cf. Tiligath-pile-
ser's own inscriptions, where the defeat of Rezin 
and destruction of Damascus are distinctly mentioned) —II. One of the families of the 
Nethinim (Ezr. 2.38; Ne. 7.50). The modern town, Rez'zab, and a vassal of 
Hadadezer king of Zobah, when the latter 
was defeated by David (2 Sam. 8.3-12), Rezon 
 fled from his master and put himself at the 
head of a band of freebooters, and eventually, 
at Solomon's accession, established himself as 
kings in Damasc. During his own lifetime 
he was "an adversary to Israel all the days of 
Solomon," and the subsequent kings who 
claimed descent from him were amongst the 
most troublesome of Israel's enemies (1 K. 11. 
23-25). [HEBRO'S.] [H.C.B.]

Rhe'glo'm. This Italian town which was 
situated on the Bruttian coast, just at the 
entrance of the Straits of Messina, was men-
tioned incidentally (Ac. 28.13) in the account of St. Paul's voyage from Syracusa 
to Puteoli, after the shipwreck at Malta. 
By a curious coincidence the figures on its 
coins are the "twin brothers" which gave 
the name to St. Paul's ship. It was originally 
a Greek colony, but later largely developed 
by Dionysius of Syracuse; from Augustus 
it received advantages which combined with 
its geographical position in making it important 
throughout the duration of the Roman empire. 
The modern Reggio is a town of 10,000 inhab-
itants. It is about 6 miles across the straits from 

Rhe'sa, son of Zorobabel (Luz. 3.27).

Rh'o'da, a maid who announced Peter's 
arrival at the door of Mary's house after his 
miraculous release from prison (Ac. 12.13).

Rhodes. St. Paul touched at this island, 
so illustrous in ancient history, on his return 
voyage from the third missionary journey 
(Acts 21.1). Rhodes is only 28 miles as the 
great Carian and Lycian headlands at the 
S.W. extremity of the peninsula of Asia Minor. 
Its real eminence began (about 400 B.C.) with 
the founding, at its N.E. extremity, of the city 
which is still the capital. After Alexander's 
death it entered on a glorious period, its 
material prosperity being largely developed, 
and its institutions deservedly obtaining 
great esteem. As we approach the time 
of the consolidation of the Roman power in 
the Levant, we have a notice of Jewish 
residents in Rhodes (1 Mac. 15.23). The 
Romans, after the defeat of Antiochus, 
were the first to exploit the high Carian and 
Lycian headlands on the mainland. Its Byzantine 
history was also eminent. Under Constantine 
it was the metropolis of the "Province of the 
Islands." It was the last place where the 
Christians of the East held out against the 
advancing Turks; and was famous as the 
home of the Knights of St. John.

Rh'od'oes, a Jew who betrayed his country-
men's plans to Antiochus V. (2 Mac. 13.21).

Rhod'us (1 Mac. 15.23) = Rhodes.

Riba'i, father of Ittai the Benjamite of 
Gibeah (2 Sam. 23.29; 1 Chr. 11.31).

Ribband of blue (p'hilî l'khêdîth, 
properly speaking, a cord of blue entwined 
with material of purple) (ac. 19.39), is still observed by all orthodox 
Jews. [HEM OF GARMENT.] [W.O.E.O.]

Riblah (fertility), a town on the border of the land of Israel [Shepham] and of Ha-
math (Num. 34.11; 2 K. 23.33), where Nebu-
chadnezzar made his headquarters in 588 B.C. 
(2 K. 25.6, 20, 21; 2 Chron. 39.8, 10, 11, 20, 28) 
it now a mud village on W. bank of the Orontes,
about 35 miles N. of Baalbek, N. of Riblah the great battle at Arjau was fought (Syria) in 853 B.C., and one of the Syrian princes then defeated was "Ahab of Rib-lai" (probably not Sir-lai, as some read it) assisting Hadad-er II. He has been taken for Ahab of Israel, who reigned nearly half a cent. earlier, in the time of Benhadad I. (1 Kings 20:29), causing much confusion in O.T. chronology. [See The Interpretative Allusion in the Prophetic Literature of Nebuchadnezzar (J.M.S.)].

**Riddle** (Heb. hidhäm; cf. Arab. idla = to twist or knot; 1 Corinthians 13:12, anagwma). On account of its derivation, the Heb. word has several senses, and is translated by different Eng. words, according to the nature of that obscurity which is the fundamental idea in all. It is used in Daniel 8:23 of double dealing; of obscure utterance (Num. 12:5), of allegory and figurative language (Ezek. 17:2; Prov. 1:6; Ps. 78:2 — "parables"), perplexing questions used by the queen of Sheba for testing Solomon (1 Kings 10:1; 2 Chronicles 9:1), and of a riddle in the modern sense, something of which the answer has to be guessed (Judges 14:12). The interpretation of riddles mentioned in the Prologue and Parables of Proverbs is perhaps intended to understand allegory and metaphor. The primitive mind loves allegory; it is its substitute for abstract thought. Hence ability to interpret it is regarded as a sign of wisdom, and this probably accounts for Solomon's reputation, which neither his proverbs nor his poetry justified. Some think that the form of the proverb was originally similar to that of our modern riddle: e.g., "What is better than that man who honoureth himself and lacketh bread? He that is not esteemed, but hath a servant." (See Prov. 12:9).

The transition from these dark sayings to the parables of N.T., which were intended both to conceal and reveal, is obvious. [PARABLE.] The visions of Daniel and all apocalyptic literature are parabolic in this sense. The word "enigma" (anagwma), which occurs only in 1 Corinthians 13:12, has also this connotation of dark saying. It is the parable, under the outward form of which the spiritual reality is hidden. Every parable may be regarded as an "enigma" to some sense a "riddle," the interpretation of which has either to be guessed or supplied. The "number of the beast" in the Apocalypse has been called "the unsolved enigma of the N.T." [NUMBER.] The one definite instance of riddle in the modern sense is the famous parallelism of judges, propounded by Samson to his wedding-guests. Hebrew humour was apparently of a somewhat grim type, and the interpretation of "the strong" and "the sweet" was obviously impossible to any one who had no knowledge of the special circumstances which gave rise to the association. The Arabs were fond of propounding similar riddles and ingenious devices, books of which are still extant. [H.F.S.]

**Rie** (Heb. kussemeth) occurs in Ezekiel 9:32; and Isaiah 28:25 (margin, spelt). It is probable that by kussemeth "spelt" (as R.V.) is intended. Triticum speltum is a hard, coarse, bearded wheat, much cultivated formerly for fodder; the θεία of the Greeks, the χορὸς or χοροί of the Romans. It is a winter wheat. [Bread; Corn.]

**Right hand.** Frequent in O.T. of God, symbolically representing His (1) creative might, (2) protecting or avenging power, (3) overruling providence, (4) presence, (5) fatherly love, (6) the "right hand of God," (7) power, etc.

**Rimmon** (Heb. RIMMON), a Benjamite of Beeroth: father of Rechab and Baanah, the murderers of Ish-bosheth (2 Samuel 4:3, 5, 9).

**Rimmon**.—1. A city of Zebulun belonging to the Merarite Levites (1 Chronicles 6:77). *Dimnah* (Joshua 21:35) appears to be a clerical error for *Rimmon*. A town in the Shephelah of Judah (Joshua 15:32), allotted to Simon (Joshua 19:7, R.V.; 1 Chronicles 4:32). In each of the above lists the name follows that of Arvah, in the catalogue of the places reoccupied by the Jews after the return from Babylon (Nehemiah 11:29)
the two are joined, as En-rimmon. The probable site is the ruin *Umm er Rimāmīn*, 10 miles N.N.E. of Beer-sheba.—3. The Rock Rimmon was a cliff where the 600 Benjamites who escaped the slaughter of Gibeon took refuge (Judg. 20.4, 5, 47, 21.13). It is described as the "wilderness." Now the village *Rūmmān*, 3½ miles E. of Bethel, on a conical hill commanding a fine view, with rugged valleys to E. and S. in the desert W. of the Jordan Valley. There are many caves in the rocky hill side. [c.r.c.]

**Rimmon-pārez**, a place in the wilderness (Num. 33.19, 20); probably "height of the cleft." It lay some 20 miles N.E. of Hazeroth, but the site is unknown. [c.r.c.]

**Ring**, the ring was (1) the symbol of authority, and as such was presented by Pharaoh to Joseph (Gen. 41.42), by Ahasuerus to Haman (Esth. 3.10), by Antiochus to Philip (1 Macc. 6.15). (2) As an ornament it was worn not only by men, but by women (Is. 3.21). The signet was worn by the priest on his breastplate (Jeh. 13.18). We may conclude, from Ex. 28.11, that the rings contained a stone engraven with a device or with the owner's name. In N.T. a ring is mentioned in Jas. 2.2. [ORNAMENTS, PERSONAL.] Many Heb. signet-rings have been found by Warren, Bliss, and others, in excavations in Palestine, and are accordingly (judging from the characters) as old as c. 700 B.C. They present familiar Heb. names, such as Shebni and Azariah (at Jerusalem; Perrot and Chipiez, *Hist. de l'art*, iv. p. 439), Jeremiah (at Taanach), and (somewhat later at Jerusalem) Haggai (Warren), Ishmael-neriah, etc. (Bliss).

**Rinnah**, a son of Shim'on in the genealogy of the descendants of Judah (1 Chr. 4.20).

**Riphath**, second son of Gomer, and brother of Ashkenaz and Togarmah (Gen. 10.3). The Heb. of 1 Chr. 1.6 gives the form Diphath, but many MSS. read Riphath. The name itself has often been assumed to be of Syro-Phoenician or Phthiotic origin (cf. the Riphanean mountains, the river Rhébas in Bithynia, the Rhibii, a people living eastward of the Caspian Sea, and the Riphians, the ancient name of the Paphlogionians).

**Rissah**, a station in the wilderness (Num. 33.21, 22). It was apparently some 20 miles S.W. of Saphir (Tell el Asfar) but the site is unknown. [c.r.c.]

**Rithmah**, a march-station in the wilderness (Num. 33.18, 19), probably about 10 miles N.E. of Hazeroth. The name means "broomy," from the white broom which grows in the desert. [c.r.c.]

**River**, the word is used in various passages so renders six different Heb. words. (1) nāḥār, a term applied to large rivers, though the Arab. nahr is used of smaller streams. The four rivers of Eden, including the Euphrates and Tigris (Gen. 2.10-14), are so called, and the Nile (Ex. 7.19), and rivers of Cush (Zeph. 3.10; L.V. *Ethiopia*), Gozao (2 K. 17.6), Chebar (Ezk. 3.15), and Don (Ezek. 1.7), as also the Jordan (R.V. Ps. 66.6). In 70 chapters of O.T. the A.V. renders the word as "river," but also as "flood" (24.2, etc.). "The River," however, appears always to mean the Euphrates (Gen. 31.21; Ex. 23.31; Num. 24.6; 2 Sam. 10.16). (2) nahal (torrent) is rendered "river" by A.V. in 23 chapters. [Vale.] (3) y̓ dār is usually a term for the Nile, but also for the Tigris (Dan. 12.5), and even for channels cut among rocks (Job 23.10). Rendered "river" by A.V. in 48 cases, but also "flood" (Je. 46. 7, 8; Am. 8.5, 9, 5), and "brook" (in plur.) referring to the Nile branches (Is. 19.6, 7, 8). The word was used in the Egyptian language, and is especially frequent in reference to Egypt (Gen. 41; Ex. 1.17 in 29 instances); but it may be a Semitic word borrowed in Egyptian, like many others in and after the Hyksos period. It does not refer to rivers in Egypt as used by the Assyrians in 703 B.C. (2 K. 19.24), for they had as yet not conquered the Nile valley, and the word is also Assyrian. [JORDAN; SEMITIC LANGUAGES.] (4) y̓ bhaul (Je. 17.8), or abhal (Dan. 8.2, 3, 6), is rendered "river" in A.V., and means a "stream." (5) peleg signifies an "irrigation channel," but is rendered "river" by A.V. in Job 29.6, Ps. 1.3 ("streams" in 46.4—proceeding from a nahār at Jerusalem), 65.6, 119.20 (of streams in the wilderness (Je. 43.4)). We may conclude, from Ex. 28.11, that the rings contained a stone engraven with a device or with the owner's name. In N.T. a ring is mentioned in Jas. 2.2. [ORNAMENTS, PERSONAL.] Many Heb. signet-rings have been found by Warren, Bliss, and others, in excavations in Palestine, and are accordingly (judging from the characters) as old as c. 700 B.C. They present familiar Heb. names, such as Shebni and Azariah (at Jerusalem; Perrot and Chipiez, *Hist. de l'art*, iv. p. 439), Jeremiah (at Taanach), and (somewhat later at Jerusalem) Haggai (Warren), Ishmael-neriah, etc. (Bliss).

**River of Egypt.** Two Heb. terms are thus rendered in A.V. (1) *whar mirayim* (Gen. 15.18), "the river of Egypt," that is the Nile, and here the Pelusiac or easternmost branch. (2) *nahal mirayim* (Num. 34.5; Jos. 15.4, 47; 2 K. 24.7; and Is. 27.10), "the stream of the Arabians," which appears to have been held that this designates a desert stream on the border of Egypt, still flowing after rains in the valley called Wādī el 'Arish. The stream is first mentioned as the point where the S. border of the Promised Land touched the Mediterranean, which formed its W. border (Num. 34.3-6). Later, we find Solomon's kingdom extending from the "entering in of Hamath unto the river of Egypt" (1 K. 8.65), and Egypt limited in the same manner where the loss of the E. provinces is mentioned (2 K. 24.7). In certain parallel passages the Nile is distinctly specified instead of "the nahāl of Egypt" (Gen. 15.18; Ex. 5.12, 3, 5).

**Rizpah**, concubine to king Saul, and mother of his two sons Armon and Mephibosheth. She is called (2 Sam. 3.7, 21.8) the daughter of Aiah, perhaps = Ajab, which may imply that she was a Hivite, a descendant of Zibeon the grandfather of one of Esau's wives (Gen. 36.2, 24). Her name is first mentioned in connexion with an accusation levelled at Abner by Ishbosheth (2 Sam. 3.6-11). When, at a later period, seven of Saul's sons were hanged, or rather, "exposed" after death on the top of the sacred hill of Gibeah, as an act of atonement for Saul's persecution of the Gibeonites whom Israel had sworn to protect (Josh. 9.3-27),
ROBBERS OF CHURCHES

Ripzah, the mother of two of them, watched over the bodies day and night, and "suffered neither the birds of the air to rest on them by day, nor the beasts of the field by night." When at length David heard of her devotion, he gave them honourable burial, along with the bones of Saul and Jonathan. The victims were sacrificed at the beginning of barley harvest, and Ripzah remained at her post until "water dropped upon them out of heaven," i.e., probably, until the drought was over, an evidence to all that the sacrifice was effectual (2Sam.21.1-14).

Robbers of churches (i.e., robbers of temples, sacrilegious). The word occurs in Ac.19.37, in the description of the famous scene at Ephesus. The charge of sacrilege was a serious one, but there were degrees in the offence. Of a lighter kind was the crime of embezzling the sacred property, but the most heinous consisted in an act of desecration. The punishment for this was death. On the authority of the town-clerk, St. Paul and St. Barnabas had done and said nothing directly that could be twisted into a charge of sacrilege, though Demetrius had played upon his fellow-craftsmen's fears lest, as the company of St. Paul was preaching, "the temple of the great Artemis be made of no account." [A.R.]

Roboam' (Eccles.47.23; Mt.1.7) = Reho- boam.

Rock, the translation of several Heb. words with different ideas, whether sand (N.T. σπόρος), or stone (N.T. ἅρμα), were the underlying ideas, is that of inaccessibility or height, or āllāmīmīsh (Is.51.1), where the idea is that of hardness or firmness. The general Heb. word is šār, and whilst the others are merely used figuratively of God (e.g. 2Sam.22.2), šār is often so employed (e.g. Deut.32.4,15,18, etc.) that it has been suggested that the word has the sense of a proper name. In N.T. the word "rock" always represents the Gk. nēpta (e.g. Mt.16.18). [PETTR.] [S.N.S.]

Rod. The rod or staff was the symbol of travel in the East. Typical instances of this idea are found in Ex.12.11, 2K.4.29. The staff also served as a means of support. The Shepherd of the Bible carries both rod and staff (cf. Ps.23.4). Here the rod (šēbēl) is a club or mace, with a rounded head, a weapon of defence against robbers or wild beasts (in other places a symbol of authority, Judg.5.14 [see R.V.], 6.21, etc.), the staff (mish'nēb) is a pole, like an alpenstock, for climbing, clearing a way through undergrowth, or for dealing with refractory animals. The rod of Jesse (Is.11.1; R.V. a shoot out of the stock of Jesse) expresses the figure of a tree-stump out of which springs a single living shoot. In Lev.27.32 and Ezek. 20.37 the expression "the rood under the rod" (hashēb) refers to the shepherd's club, used for counting the flock as it passed in and out of his fold. [AARON'S Rod.] [S.N.S.]

Roe, Roebuck. This deer is known in Palestine, but the Heb. word (rō'hi m., rō'hiyya fem., Rōebh) is the gazelle (Gazella dorcas), still found in numbers in the plains. It has always in the E. been a type of beauty (Can. 2:9,17,8:14), famed for its swiftness (2Sam.2:18; 1Chr.12:8) when hunted for food (Deut.12.15, 22; Is.13.14; Pr.6.5). The three species of game for Solomon's table (1K.4.23) were the fallow deer (ayyāl; A.V. HARK) or Dama vulgaris, still found in the woods of mount Tabor; the gazelle (A.V. roebuck); and the roebuck proper (yahmūr; A.V. Fallow Deer). In 1872 the present writer found that the roebuck is still hunted on mount Carmel, and still called yahmūr. In 1882 he found it known in the woods of Gilead as the hamūr, and it has also been found in Lebanon. The two species of A.V. (fallow deer and roe), though misapplied to the Heb., thus exist; but the hart or red deer does not occur in Syria. [c.r.c.]

Gazelles (G. dorcas and G. arabica) are for the most part relatively small and delicately built antelopes, easily recognized by their ridged lyrate horns, and the parallel fawn and white face markings. The usual colour of the upper parts is sandy, though the anucleated forms are a darker flank-band and a white rump-patch. [R.L.]

Rogelim', the residence of Barzillai the Gileadite (2Sam.17.27,19.31) in the highlands of E. of Jordan. Nothing is said to indicate its situation.

Rohgah', an Asherite; son of Shamer (1Chr.8.33).

Ro'imus (1Esd.5.8)=Rehum, r.

Roll (Heb. w'ghildil, from gāil, "to roll," strictly addressing to the Lat. volumen, whence our volume). The roll was usually written on one side only, and hence the particular notice of one that was written within and without (Ezk.2.9,10). The writing was changed in columns. The term in Is.8.1, rendered in A.V. "roll," means tablet. [WRITING.]

Rolls, House of. [TREASURE-HOUSE.]

Romam'ul-ezer, son of Heman and head of the 24th course of singers (1Chr.25.4,31).

Roman Empire. A. Rome and the East before and after Christ. The notices of Roman history in the Bible are confined to the last cent. and a half of the commonwealth and the first cent. of the imperial monarchy. The chief prophetic notices of the Roman Empire are found in the book of Daniel. According to some interpreters, the Romans are intended in 118 B.C. in Deut.32.17. The first historic mention of Rome in the Bible is in 1Mac.1.10. About 161 B.C. Judas Maccabaeus heard of the Romans as the conquerors of Philip, Perseus, and Antiochus (8.1,5,6). To strengthen himself against Demetrius, king of Syria, he sent ambassadors to Rome (8.17), and concluded a defensive alliance with the senate (8.22-32). This was renewed by Jonathan (12.1) and by Simon (15.17). In 65 B.C., when Syria was made a Roman province by Pompey, the Jews were still governed by a Hasmonaeian prince. Aristobulus had lately driven his brother Hyrcanus from the chief priesthood, and was attacked by Aretas, king of Araba Petraea, the ally of Hyrcanus. Pompey's lieutenant, M. Aemilius Scaurus, intervened (64 B.C.), and in 65 B.C. Pompey marched into Judaea and took Jerusalem. From this time the Jews were practically under the government of Rome. Hyrcanus retained the high-priesthood and a titular sovereignty, subject to the control of his minister Antipater, a partisan of the Romans. In 40 B.C. Antipater's son,

Roman Empire

Herod the Great, was made king by Antony's interest, and confirmed by Augustus, 30 B.C. The Roman empire, including the territories of Rome, and their princes were under control, not merely in their foreign relations but even in their domestic policy. On the banishment of Archelaus (6 A.D.), Judaea became a mere appendage of the province of Syria, and was governed by a Roman procurator, who resided at Caesarea Maritima. After the death of the Jewish people to the Roman government when the N.T. history begins.—B. A brief general account of the position of the emperor, the extent of the empire, and the administration of the provinces in N.T. times, is necessary to illustrate the sacred narrative. I. Position of Rome and Caesar. The Roman empire was simply the first citizen of the republic, entrusted with temporary powers to settle the disorders of the state. The old magistracies were retained, but the various powers and prerogatives of each were conferred upon Augustus. Above all, he was the emperor (imperator). This word, used originally to designate any person with the rank and authority of a king or full military authority, acquired a new significance when adopted as a permanent title by Julius Caesar. By his use of it as a constant prefix to his name in city and in camp, he openly asserted a paramount military authority over the state. The empire was nominally elective, but practically it passed by adoption; and till Nero's sort of hereditary right seemed to be recognized. II. Extent of the Empire. Cicero's description of the Gr. states and colonies as a "fringe on the skirts of barbarism" has been well applied to the Roman dominions before the conquests of Pompey and Caesar. The Roman empire was still confined to a narrow strip encircling the Mediterranean. Pompey added Asia Minor and Syria. Caesar added Gaul. The generals of Augustus overran the N.W. portion of Spain, and the country between the Alps and the Danube. The boundaries of the empire were not, however, confined. The territories on the Euphrates on the E., the deserts of Africa, Cato, North Africa, the Nile, and Arabian deserts on the S., the British Channel, Rhine, Danube, and Black Sea on N. The only subsequent conquests of importance were those of Britain by Claudius and of Dacia by Trajan. The only important independent powers were the Parthians on the E. and the Germans on N. The population of the empire in the time of Augustus has been calculated at 85,000,000; and it is noteworthy that this vast population or confederacy was kept under control by the trifling military force of some 25 legions, massed for the most part on the frontiers of the Rhine, Danube, and Euphrates. Thus a total force of some 350,000 sufficed for the preservation of order in an area now suffering under militarism and racial envies and suspicions. III. The Provinces. The usual fate of a country conquered by Rome was to become a subject province, governed by officers sent from Rome. Sometimes, however, petty sovereigns were left a nominal independence. There were differences, too, in the political condition of cities within the provinces. Some were free cities—i.e. governed by their own magistrates, and exempt from occupation by a Roman garrison. Other cities were "colonies"—i.e. communities of transplanted Roman citizens. Augustus divided the provinces into two classes: (1) imperial, (2) senatorial; retaining in his own hands those provinces where the presence of a large military force was necessary, and committing the peaceful and unarmed provinces to the senate. The imperial provinces: the provinces of Augustus—Catalaunum, Lusitania, Syria, Phoenicia, Cilicia, Cyprus, and Egypt; the senatorial—Africa, Numidia, Asia, Achaia and Epirus, Dalmatia, Macedonia, Sicily, Crete and Cyrene, Bithynia and Pontus, Sardinia, Baetica. Cyprus and Gallia Narbonensis were subsequently given up by Augustus, who in turn received Dalmatia from the senate. Many other changes were made afterwards. The N.T. writers invariably designate the governors of senatorial provinces by the correct title of "dux proconsulatus, pro-consuls (A.C. 13.7.18.12, 19.38, R.V.)." For the governor of an imperial province, properly styled "Legatus Caesaris," the word "dux imperator" (governor) was the proper term. Under the empire, the governors received a fixed pay, and their term of command was prolonged. The condition of the Roman empire at the time when Christianity appeared affords obvious illustrations of St. Paul's expression that the "fulness of time had come" (Gal. 4.4). The general peace, the formation of military roads, the suppression of piracy, the march of the legions, the voyages of corn fleets, the general increase of traffic, the spread of the Latin language in the W. as Greek had already spread in the East, the external unity of the empire, offered facilities hitherto unknown for the spread of a world-wide religion. The tendency, too, toward increased trade and the ease of the Roman empire to reduce all its subjects to an equitable level was a powerful instrument in breaking down the pride of privileged races and national religions, and familiarizing men with the truth that "God hath made of one blood all nations on the face of the earth" (A.C. 17.24,25(i.c., General View of the Roman Empire and the Gospels). The assumption of the direct control of India by Queen Victoria (1857) forms an almost perfect analogy to the policy of Augustus and his successors. Hitherto, both empires had suffered from fiscal oppression and private avarice. The provincials were exploited by merchant-princes, and the law gave no remedy. It is obvious from the later history of the republic that the senate (or oligarchy of "Venetian" nobles) neither desired nor exercised any control over bad governors. Malversation was connived at; and redress was impossible, in spite of excellent enactments which remained unenforced. The decline of the republic at the time of Actium the fortune of the world was decided. The question lay between the frank selfishness and cupidity of Antony (supported by the Oriental traditions of a Macedonian military monarchy), and a far more serious conception of responsible sovereignty. The empire might indeed be termed a reaction of the provinces against a careless and unprincipled governing caste. Augustus stood for honest and untiring work and for the general welfare. The provinces benefited enormously by the
change. The East has neither before nor since known such good government. The characters of Roman soldiers, and for the most part of Roman governors and administrators, form a more impertinent rule in N.T. the West—in which the best features of military training and discipline, frankness, vigour, and equity, a sympathetic treatment of alien creeds and races, a sense of the limits of imperial interference with local custom and law, an almost chivalrous pity for inferiors, a constant reference to the great impartial rule at Rome, are never rivalled, and not often surpassed, by the British officials of our own day. But the Romans under the empire far surpassed ourselves in the art of exciting the affection as well as the respect of the provincials. The permanent camps of the legions were popular with the inhabitants; and soon became centres of sober domestic life and a hereditary defensive caste. Gradually the distinction between Roman and provincial faded; and the empire found its stoutest champions among the newest additions to the great family. The worship of the emperor, or cultus, was a central feature of devotion for the complex and hostile local cults. The various revolts which disfigure later history were due largely to provincial protests against those who abused or perverted the traditions of the Roman heritage. Rebellion was always directed against the person, never the system; the resentive system may be said to be overshadowed in the provincial assemblies for the imperial worship; and the usurpers or pretenders never failed to pose as the true "Roman emperors," as the restorers of the ancient paths. The democratic source of power was never forgotten; and a decaying dynasty was set aside by a popular election. Under such a system the provinces exerted ever more and more influence. Soon Spaniards, Asiatics, and Africans sat on the throne, and represented or gave effect to certain phases of public opinion. For something like three centuries the hardy and industrious provincials provided a series of emperors who cannot, whether as generals or administrators, be surpassed in any annals. The ruling class had no privilege or monopoly; and though the basis of society was plutocratic, merit and good service had far fewer barriers to recognition than exist to-day. The emperor chose his executive without "respect of persons." Taxation (according to the most recent research) was moderate; and local liberties and municipal rights well respected. Only when dishonest officials had introduced confusion into city finance did the Roman government interfere; and the later centralizing, with its unhappy results, was due far more to the incompetence of the provincial and his inaptness for self-government than to any deliberate encroachment by the centre. During the epoch of the N.T. a hierarchy of Roman governors and officials spread a slender but effective network of order over the countries of the Mediterranean world; it was neither costly nor numerous. It was thus free from the chief objections which are urged to-day against popular government and the bureaucracy which invariably accompanies it. The

"Roman Peace" restrained and finally extinguished the unmeaning feuds of neighbours, which had been the common lot of the East during the dominance of the city-state, or the Macedonian and Persian empires. We find all the clearly the indications of popular influence in the N.T. As a rule the people made their wishes felt and their voice heard far better than in the so-called democratic systems of recent days. The later persecutions of Christians were mainly sporadic outbursts of local resentment toward a new form of esoteric doctrine, horrid rites, and unpatriotic abstention from civil interests. It will be noted that the order to persecute comes but rarely from above; the governors are far more humane than the governed. St. Paul, proud of his position as Roman citizen, shows a touching confidence in the final equity of the imperial tribunals, stretching up to the ultimate court of appeal, the emperor himself. It may be doubted if the guidance of loyalty and obedience in Romans were uttered during the famous "quinquennium Neronis," before the fatal seeds of family madness had been transmitted into the central foundations of devotion for the complex and hostile local cults. The various revolts which disfigure later history were due largely to provincial protests against those who abused or perverted the traditions of the Roman heritage. Rebellion was always directed against the person, never the system; the resentive system may be said to be overshadowed in the provincial assemblies for the imperial worship; and the usurpers or pretenders never failed to pose as the true "Roman emperors," as the restorers of the ancient paths. The democratic source of power was never forgotten; and a decaying dynasty was set aside by a popular election. Under such a system the provinces exerted ever more and more influence. Soon Spaniards, Asiatics, and Africans sat on the throne, and represented or gave effect to certain phases of public opinion. For something like three centuries the hardy and industrious provincials provided a series of emperors who cannot, whether as generals or administrators, be surpassed in any annals. The ruling class had no privilege or monopoly; and though the basis of society was plutocratic, merit and good service had far fewer barriers to recognition than exist to-day. The emperor chose his executive without "respect of persons." Taxation (according to the most recent research) was moderate; and local liberties and municipal rights well respected. Only when dishonest officials had introduced confusion into city finance did the Roman government interfere; and the later centralizing, with its unhappy results, was due far more to the incompetence of the provincial and his inaptness for self-government than to any deliberate encroachment by the centre. During the epoch of the N.T. a hierarchy of Roman governors and officials spread a slender but effective network of order over the countries of the Mediterranean world; it was neither costly nor numerous. It was thus free from the chief objections which are urged to-day against popular government and the bureaucracy which invariably accompanies it. The
of to-day or of any other age. To judge Roman society by Tacitus, Suetonius, and Juvenal is to estimate modern standards by the onslaughts of the pulpit or the press upon the acknowledged evils of wealthy and irresponsible idleness. The careful hearing given to the emissaries of the Gospel bears witness, indeed, to the decay of religious beliefs (which had been long oblique, but not to the decay of religious instinct or interest. Nor must it be supposed that the Gospel provided an entirely new code of morals. Rather, it reinforced, with the sanctions of a new revelation of man’s nature and destiny, the old instinctive morality of custom, the wholeframe of the simple tics, the lawly and unoccupied, which, in the moribund civilization of classic paganism, had lost cogency, charm, and vitality. So far from introducing ascetic despair and proud repression (already present in one form or other in Stoic and Epicurean), Christians gave new meaning to virtue when St. Paul abandoned the passions from his haughty disdain, and made the slave contented with the “day of small things,” seen in the light of eternity. Indeed, asceticism formed an integral part of every substitute proposed for the Gospel, either by thought or feeling; and the Gospel came just in time to combat a dangerous intellectualism, the cult of intellectualism, which, combined with an instinct to the inner circle, and left the ignorant without guide or solace. The weakness of the Roman empire did not lie in its political system, but in the decay of its social enthusiasm. The upper classes became extinct, in rigorous or voluptuous celibacy; and the Gospel trained and upheld the provinces as an example, and taught the abiding value of each soul.

F.W.B.

Romans, Epistle to the. I. THE CHRISTIAN CHURCH AT ROME had been in existence a considerable time when St. Paul wrote to it (1:8-13, 13:11,15), and probably organized like other churches (12:ff., and perhaps 16:5). In the spirit of the church, St. Paul was supposed as something well known (Ac.28:15), and the author had no reason to narrate its origin. There was movement, however, to Rome from all parts of the empire; and amongst other immigrants were Jewish and Greek Christians. Who was the organizer of the church or the founder of its congregational life is quite unknown. Roman tradition says St. Peter, and fixes his arrival in the second year (or about the beginning) of the reign of Claudius, c. 41 A.D., saying that he stayed there twenty-five years till his death, and was the first bishop. But in the year 44, and at the death of the apostolic council in 52 A.D., Peter was still living in Jerusalem (12:4,15; 20:7). Later, when St. Paul was living at Ephesus, St. Peter had not been labouring at Rome, because (Ro.15:20; 2Cor.10:16) St. Paul made a rule of not interfering with another’s field of labour; and had St. Peter been in Rome when St. Paul wrote to the Romans, he would have been saluted before all others, for the numerous salutations in Ro.16 presuppose an accurate acquaintance with the teachers then in Rome. St. Peter cannot have been in Rome at all before St. Paul was brought there, otherwise, as apostle to the Jews, he would have brought Christianity into closer contact with the Jewish population than can be allowed from Ac.28:22. It is also most improbable that St. Peter could have been in Rome before the writing of the epistle to the Philippians—the only one certainly written by St. Paul in Rome, or at the time; for it is quite inconceivable that St. Paul should not have mentioned a fellow-apostle, especially when complaining so deeply of being forsaken (Ph.2:20). Therefore St. Peter’s arrival in Rome (certain from Dionys. of Corinth, in Euseb. ii. 25; Caius, in Euseb. ii. 25; Origen, in Euseb, iii. 1; Irenaeus, Tertullian, etc.) could only be at the end of St. Paul’s captivity, after the epistle to the Philippians. It is highly probable that a Christian church was founded in Rome after St. Paul had come to Europe; if it had been before, there would surely have been something like it in the nearer cities of Macedonia and Achaia, but of that there is no trace. The special inspiration of this letter to the Romans became the apocryphal basis for St. Paul’s被捕 after his conversion, so far as the eye of the Christian world is concerned, there may have been a tendency to introduce the Roman church at this time. Of these Aquila and Priscilla are an example; they emigrated as Jews to Corinth, lived there with St. Paul more than a year and a half, and at the date of Romans had settled again in Rome, where, as in Epheus (1Cor.16:19), they are teachers and possessors of a house where the Roman church met (Ro.16:3). They receive St. Paul’s first salutation, more lavatory than any others. Christianity, having taken root first among the Jews, made all the more way among the Gentiles because paganism had fallen into contempt, inducing despair both among cultivated and uncultivated classes. He e, inclination to monotheism was general, and the number of Jewish proselytes was great (Juvenal, Sat. xiv. 96; Tac. Ann. v. 44; Hist. v. 5; Seneca, in Augustine De Civ. Dei vii. 11; Josephus, ant. iii. 5). These were fertile soil for the liberal Pauline theology of Aquila and others. Paul’s salutation to the Church at Rome (16), from the approval given to the doctrine the Romans had received (16:17, 16:17), and from the fact of the letter itself (no extant letter of Paul’s is directed to a non-Jewish church), it is certain that Pauline Christianity preponderated in Rome; and a second certain inference is that a very important part of the Roman church’s presentation of the Gospel was determined by St. Paul’s—indeed, this must have been the preponderating and chief constituent element, since St. Paul repeatedly designates the Romans as belonging to the ἐββύγιος, Gentiles (1:5,6, 13,11,13), and insists on his calling as Apostle of the Gentiles (15:12,13,16,14,20). In accordance with the apostolic agreement in Gal.2, St. Paul would not have written a doctrinal epistle to the Romans, especially containing his whole Gospel, if they had been in the main a church of the Circumcision. Even when he says, “I speak to them that know the law,” and the numerous references to O.T.,
and proofs from it, do not mean Jewish pre-
dominance, but are explained by the fact that
in the apostles' or Christian knowledge
as conveyed through the O.T., that this ac-
quaintance grew through the O.T. being read in
the assemblies (cf. Gal. 4:21), and that the com-
mingling of Jews and Gentiles in the churches
led to a still closer use and understanding.
This preponderance of Gentiles is further illus-
trated by a fact that when St. Paul arrives in
Rome, and wishes to make himself ac-
quainted with the Jewish leaders, they do not
allude to the existence of an organized Chris-
tian congregation, however small, as they must
have done had Jews preponderated, but
merely say that the sect is everywhere spoken
against (Ac. 28:22). They do not say anything
about it for the present till St. Paul has ex-
plained himself; but clearly their relation to
it is far from close.—11. Occasion. Long
before writing (“these many years,” Ro. 15:23),
St. Paul had a longing desire (Ac. 19:21) to
preach the Gospel in Rome (Ro. 1:11), where
the leaders and teachers of the church were
of his school, and where he had many friends
and fellow-labourers (16). His other official
labours had prevented this hitherto (1:13, 15,
22). Now he hoped to come, but must first
take the collections to Jerusalem (15:23-25);
and as Spain rather than Rome was to be his
ultimate goal (15:24-28), he could not be in
Corinth a long stay at the capital. So he
wished no longer to delay a written com-
munication of his full message, and also so
to prepare the way for his arrival that a pro-
longed stay would be unnecessary. Such was
the occasion; and the journey of the Corin-
thish deaconess Phebe to Rome (16:1) was the
opportunity. He knew the circumstances of
the church through his relation to the teachers
(ch. 16), and the active intercourse between
Corinth and Rome (cf. the indications in 12,
14, 15). Of all his letters this sprang least out
of special casual circumstances. Baur's sug-
agement that the whole letter was occasioned by a
Jewish-Christian polemic against St. Paul for
working amongst Gentiles rather than Jews
receives no probability from the epistle. We
see his polemical treatment in Galatians and
and 2 Cor.; here the method is not pole-
ematic, but theological.—III. Object. Obvi-
obious is to explain a system, but an exposition of the
document of redemption. St. Paul wished to lay before the
Romans in writing, for their Christian edification (1.11, 16:23), his evangelical
document—the doctrine of the sole way of salvation
given in Christ—viewed in its full specific character of the superseding of Judaism, in
such a way as the necessities and circumstances of the church demanded, and as he would have
preached it amongst them, had he been pre-
sent in person (1.11). The importance of the
Roman church made it desirable to set this forth in the entire connexion of its con-
stituting “fundamental principles.” If there
was a polemical purpose, it was against all
legal righteousness whatsoever; but the
dangers of the church were more moral than
dogmatic, and are touched upon in 13:1 ff.,
14:1 ff., 16:1 ff. It was a very partial view of
Augustine, Theodoret, Melancthon, and others
to see in the epistle mainly the refutation of
Jewish arrogance; or a chief purpose of con-
frontation between Jewish knowledge and Gentile
Gentiles (Hug); or a personal apologetic from St.
Paul himself (Sabatier).—IV. Contents.
(1) Introduction (1.1-15). (a) Salutation (1-7).
(b) St. Paul and the Roman church (8-15).
(2) Theoretic or Doctrinal (1.16-11.36), main
thesis. Problem: How is righteousness to be
attained? Answer: Not by man's work, but
by God's gifts, through faith, or loyal attach-
ment to Christ (1.16, 17). (a) The necessity
of this plan of salvation: required by the
whole human race, Gentiles and Jews alike.
The Jews, even according to their own law,
are guilty before God, and cannot attain to
righteousness (1.17-3.20). (b) The nature
of this plan of salvation: righteousness really,
and only, comes by faith: specially obviously
from the justification of Abraham (3.21-4.25).
(c) The blessed results of this plan of salv-
ation: partly, the blissful inward condition of
the justified before God (5.1-11); partly, that
external condition through which the uni-
versally effective as Adam's fall was once
universally destructive (5.12-21); and partly
that true morality is not only not endangered
by the manifestation of grace in Christ, but is
infinitely promoted and quickened by it (ch. 6),
and made free from the fetters of the law (7.
21-26). (d) By this assertion of the de-
defence of the law as that which is in itself
good and holy, but was abused by the sinful
principle in man, against his own better will,
to his destruction (7.24-5); a sad variance
of man with himself, which could not be removed
through the law, but only through Christ,
Whose Spirit produces in us (cf) the freedom
of the new divine life, (ii) the consciousness
of adoption, (iii) the assurance of future glory
(ch. 8). (e) From the lofty description of this
blessed and newly revealed connexion with
Christ, St. Paul passes by contrast to the
saddening thought that a great part of that
same church was in the power of every human
vain principle, a principle not sanctioned by
God, has rejected the finally developed and
crowning message of salvation; and therefore
he develops in full a doctrinal theory with
regard to the exclusion, apparently irrecon-
cilable with the divine promises, of so many
members of the theocracy from the attain-
ment of the spendable doctrine, the sal-
latory (12-15.13). The essentials of the
Pauline ethical system: partly general ex-
hortations (12.1-21, 13.8-14); partly in some
special discussions deemed necessary in the
circumstances of the Romans (13.1-7, 14.1-
15.13). (4) Conclusion. (a) Corresponding to the
introduction (1.8-15), personal explana-
tions with regard to Paul's intended journey
by way of Rome to Spain (15.14-33). (b) Re-
commendation of Phebe (16.1, 2). (c) Salu-
tations (16.3-6). (d) Warning, with a closing
wish (16.17-20). (e) Some supplementary salutations, with a second closing wish (16.21-
24). (f) Concluding doxology (16.25-27).—V.
TIME AND PLACE OF COMPOSITION. St. Paul,
when composing this letter, was about to
convey to Jerusalem the proceeds of collec-
tions made in Macedonia and Achaia (15.15,
27), intending to journey thence by way of
Rome to Spain (15.28; Ac. 19.21); therefore
ROME

we arrive at his last sojourn (three months) in Achaia (20.3). He intended to go direct from Achaia to Syria for Jerusalem, but, owing to Jewish plots, turned aside to Macedonia (20.3). This change had not been made when he wrote, or he would have mentioned it in Ro. 15, in connexion with vv. 25 and 31. Therefore it must have been written before he left Achaia. St. Luke mentions no particular city for that stay, but probably the greater part was at Caesarea by principal mother-church, and dear to St. Paul from his former labours. Also from 1 Cor. 16. 1-7, 2 Cor. 4, 12-20, 13. 3, it is clear that he was lively travelling from Macedonia to Achaia St. Paul chose that city for his stay, with a view to completing the collection and starting for Jerusalem. The proof is completed by the choice of Phebe of Cenchreae (the seaport of Corinth) as messenger (Ro. 16. 1, 2), and the salutation of his host Gaius (16. 23; 1 Cor. 1. 14).

The time is 59 A.D., when St. Paul regarded his ministry in the East as closed, and (Ro. 15. 23) saw a new and vast scene of action opened up to him in the West, of which Rome should be the metropolis. The idea of the whole work is a threefold development of the Gospel story. IV. Genuineness. Decisively attested by the witness of the orthodox Church (first express quotations, Irenaeus, Haer. iii. xvi. 3, 9; echoes of language and traces of use, Clem. Cor. i. 35; Polycarp, Ad Phil. i. 6; Theoph. Ad Autol. i. 20, iii. 14; Letter of Churches of Verona, whose luxury and prudery were supported in idleness by a miserable system of public gratuities. There appears to have been no middle class and no free industrial population. Side by side with the wretched classes just mentioned was the comparatively small body of the wealthy nobility, of whom Augustus, in his new population, was the patron, and whom even many of the heathen writers of the time. Such was the population which St. Paul would find at Rome at the time of his visit. — 2. The localities in and about Rome especially connected with the life of St. Paul, are-(1) The Appian Way, by which he approached Rome (Ac. 28. 15); (2) "the palace," or "Caesar's court" (Ph. 1. 13). This may mean either the great camp of the Praetorian guards which Tiberius established outside the walls on the N.E. of the city, or, more probably, a barrack attached to the imperial residence on the Palatine. — 3. The connexion of the localities of SS. Peter and Paul rest only on traditions of more or less probability. We may mention—(1) The Mamertine prison or Tutillanum, built by Ancus Martius near the Forum. It still exists beneath the church of S. Giuseppe dei Falegnami. Here it is said that St. Peter and St. Paul were fellow-prisoners for nine months. The story, however, of the imprisonment in the Mamertine prison seems inconsistent with 2 Tim., esp. 4. 11. (2) The chapel on the Ostian road which marks the spot where the two apostles are said to have separated on their way to martyrdom. (3) The supposed scene of St. Paul's martyrdom, viz. the church of S. Pietro in Montorio, on the Janiculum. (5) The chapel "Domine quo Vadis," on the Appian road, the scene of the beautiful tradition of our Lord's appearance to St. Peter as he was escaping to the country, and to the places where the bodies of the two apostles, after having been deposited first in the catacombs, are supposed to have been finally

(28. 17). It is in connexion with St. Paul that Rome comes before us in N.T. Hence it is necessary to give some account of Rome in the time of the apostle, and that in connexion with St. Paul when he appealed, and in whose reign he suffered martyrdom.— 1. The city that at that time was a large and irregular mass of buildings unprotected by an outer wall. The visit of St. Paul lies between two famous epochs in the history of the city, viz. its restoration by Augustus and its restoration by Nero. Augustus boasted "that he had found the city of brick and left it of marble." The streets were generally narrow and winding, flanked by densely crowded lodging-houses (insulae) of enormous height. St. Paul's first visit to Rome took place before the Neronian confiscation, but even after the subsequent restoration of the city many of the old evils continued. The population of the city has been variously estimated: at 500,000, at 2,000,000 and upwards, and even at 8,000,000. Probably Gibbon's estimate of 1,200,000 is nearest the truth, and perhaps one-half of the population consisted of slaves. The larger part of the population were tenant-farmers supported in idleness by a miserable system of public gratuities. There appears to have been no middle class and no free industrial population. Side by side with the wretched classes just mentioned was the comparatively small body of the wealthy nobility, of whom Augustus, in his new population, was the patron, and whom even many of the heathen writers of the time. Such was the population which St. Paul would find at Rome at the time of his visit. — 2. The localities in and about Rome especially connected with the life of St. Paul, are—(1) The Appian Way, by which he approached Rome (Ac. 28. 15); (2) "the palace," or "Caesar's court" (Ph. 1. 13). This may mean either the great camp of the Praetorian guards which Tiberius established outside the walls on the N.E. of the city, or, more probably, a barrack attached to the imperial residence on the Palatine.— 3. The connexion of the localities of SS. Peter and Paul rest only on traditions of more or less probability. We may mention—(1) The Mamertine prison or Tutillanum, built by Ancus Martius near the Forum. It still exists beneath the church of S. Giuseppe dei Falegnami. Here it is said that St. Peter and St. Paul were fellow-prisoners for nine months. The story, however, of the imprisonment in the Mamertine prison seems inconsistent with 2 Tim., esp. 4. 11. (2) The chapel on the Ostian road which marks the spot where the two apostles are said to have separated on their way to martyrdom. (3) The supposed scene of St. Paul's martyrdom, viz. the church of S. Pietro in Montorio, on the Janiculum. (5) The chapel "Domine quo Vadis," on the Appian road, the scene of the beautiful tradition of our Lord's appearance to St. Peter as he was escaping to the country, and to the places where the bodies of the two apostles, after having been deposited first in the catacombs, are supposed to have been finally
buried—that of St. Paul by the Ostian road; that of St. Peter beneath the dome of the famous basilica which bears his name.—4. We must add, as sites unquestionably connected with the Roman Christians of the apostolic age—(1) The gardens of Nero in the Vatican, not far from the spot where St. Peter’s now stands. (2) The catacombs. These subterranean galleries, commonly from 8 to 10 ft. in height, and from 4 to 6 in width, and extending for miles, especially in the neighbourhood of the old Appian and Nomentan ways, were unquestionably used as places of refuge, of worship, and of burial by the early Christians.

Roof. [House.]

Room, employed in A.V. of N.T. as the equivalent of no less than eight distinct Gk. terms. The only one, however, which needs notice is παρολαια (Mt.23.6; Mk.12.39; Lu.14.7,8,20.46), which signifies the highest place on the highest couch round the dinner or supper table—the “uppermost seat,” as it is more accurately rendered in Lu.11.43.

Rome, or Roman, with Withs.]

Rose (Heb. ḫabbāceleh; Can.2.1; Is.35.1.). There is much difference of opinion as to what particular flower is here denoted. Tremellius and Diosdatis, with some of the Rabbins, believe the rose is intended, but there seems to be no foundation for such a translation. Several wild roses occur, but none are conspicuous. A philological objection to this translation is, however, the chief stumbling-block, since the Heb. word may contain the root בֶּכֶל, i.e. bulb. Hence the argument of Gesenius and others in favour of the autumn crocus (Colchicum), the asphodel, or the narcissus. The Aram. Targum on Can.2.1 has μαργις (“narcissus”) for “rose.” In 6.2 it renders “ilies” by ραῦριν (Arab. Bered), “roses.” Narcissus tazettae is a most attractive flower in the early floral display of Judaea. The narcissus and lily (Lilium candidum) would be in blossom together in the early spring, while the Colchicum is an autumn plant, deserving of beauty and colour. The narcissus abounds in Faira and in the Tabor. Though the rose is apparently not mentioned in the Heb. Bible, it is referred to in Eccles.24.14 (cf. also 39.13,50.8; Wis.2.8). [n.c.h.]

Rosh, a son (LXX. grandson) of Benjamin (Gen.46.21). It is extremely probable that “Ehi and Rosh” is a corruption of “Ahiram” (cf. Num.26.38).

Rosh (Ezk.38.2,3,39.1.). The first passage, rendered by A.V. “Gog, the land of Magog, the chief prince of Meshech and Tubal,” is in R.V. “Gog of the land of Magog the prince of Rosh, Meshech, and Tubal.” Gesenius says of Rosh: “Undoubtedly the Russians, who are mentioned by Byzantine writers of the 9th century under the name of פַּכַח.” They are noticed also by Ibn Foslan as Rūsh, living on the Volga in the same age. [G.E.C.]

Rosin, properly “naphtha,” as it is both in the LXX. and Vulg., as well as the Pesh.-Syri. In the Song of the Three Children (23), the servants of the king of Babylon are said to have “ceased not to make the oven hot with rosin, pitch, tow, and small wood.” Many mentions naphtha as a product of Babylonia, and to this reference is here made. It is a liquid hydrocarbon, now more commonly called petroleum, and as a natural product is obtained largely, among other places, at Baku, on the Caspian Sea. [NAPHTH.]

Rubles (Heb. וְנִיַּיִם, וְנִיּוֹמִים). It is highly improbable that “rubies” is the correct rendering of this word, for the Hebrews could hardly have been acquainted with this gem (the word is derived from the red corundum of coromandel—carnelian), since it is chiefly found in Ceylon and Burma. In Job 28.18, Pr.3.15.8.10,20.15.31.10 something of high value is evidently denoted, and in Pr.20.15 is coupled with gold. In Lam.4.7 it is said, “The Nazarites were purer than snow, they were whiter than milk, they were more ruddy in body than וְנִיּוֹמִים.” Here so highly coloured a stone as the ruby can hardly be intended. Coral has been suggested, but another Heb. word is supposed to denote this. Bochart takes it to mean pearls, which is open to the same objection, and his explanation of the above-named ruddiness—that the original word means “bright in colour” or “colour of a reddish tinge”—though the latter can be shown by pearl, is not very satisfactory. Carnelian and a rather pale garnet are possible, but nothing is certain except that the plur. word suggests something usually seen more than one at a time. [T.G.B.]

Rufus, one of the two sons of Simon of Cyrene (Mk.15.21). In Ro.16.13 St. Paul salutes “Rufus the chosen in the Lord, and his mother and mine.” St. Mark would scarcely have described Simon as “the father of Alexander and Moses, the brother of Rufus.” It is not possible that Rufus is the son of Simon which he himself has expressed in the former. The name was so common that it cannot be taken as certain. “Chosen in the Lord” seems to imply some special distinction; while the following phrase means that the mother of Rufus on some occasion had shown motherly kindness to St. Paul. [SIMON, IT.]

[R.U.H.]

Ruhamah, i.e. “having obtained mercy” (Ho.2.1, A.V. marg.). This figurative name, applied to Israel, contrasts with Lo-ruhamah (Ho.1.6), the name given to the daughter of the prophet Gomer, to denote that the brightness of her mercy was turned away from Israel (cf. Ammi).

Ruler of synagoge. [SYNAGOGUE.]

Ruler of thousands. [JUDGE.]

Rulers of the city (πόλις, Ac.17.6-8), the special local title of the 5 or 6 magistrates of the “free city” of Thessalonica. Of 17 inscriptions containing it, 13 belong to Macedonia, 5 to Thessalonica itself. [H.S.]

Rumah, mentioned once only (2K.23.36). It has been conjectured to be the same place
RUSH

as Arumah (Judg. 9:41). Probably Rimeth, a ruin in Galilee 6 miles N. of Nazareth, noticed by early Jewish travellers. There is another Rimeth, a ruin 13 miles N.E. of Acco. [c.r.c.]

Rush. [Reed; Meadow.]

Ruth is one of the 5 women reckoned by St. Matthew in the genealogy of Christ. The other 4 are: Thamar, Rachab, Bath-sheba, and the Virgin Mary. The story of Ruth is regarded as the most beautiful and the most humane of the Psalms. It is full of pathos in the land of Judah compelled Elimelech, a native of Bethlehem-ephrahath, to go into the land of Moab, with his wife Naomi and his two sons Mahlon and Chilion. Mahlon married there Ruth and Chilion married Orpah, both women of Moab. Mahlon and Chilion died childless in the country of Moab. After ten years, Elimelech being dead, Naomi, having heard that there was plenty again in Judah, resolved to return to Bethelhem, and Ruth returned with her, while Orpah was induced to remain in Moab. Naomi and Ruth arrived at Bethelhem just at the beginning of barley harvest, and Ruth went out to glean in the field of Boaz, a very wealthy man of the tribe of Judah and near kinsman of Elimelech. Upon learning who Ruth was and of her kindness to her mother-in-law, Boaz treated her with the utmost consideration, and sent her home laden with corn which she had gleaned. Encouraged by the favour which Boaz had shown, Naomi instructed Ruth to cleave to him, and perform the part of her husband's near kinsman, by purchasing the inheritance of Elimelech and taking her to be his wife. This she did. Their son Obed was father of Jesse the father of David. [c.h.h.w.]

Ruth, Book of. This book, which gives an account of the ancestry of David, is in the Heb. canon one of the five megilloth, or "rolls," which formed part of the third and last portion of the Heb. sacred writings, termed in the Heb. The Writings or in the Gk. transl. the Hagiographa or Holy Writings. That division commences with Psalms, Proverbs, Job, Song of Songs, and then Ruth. In the Talmud, however, Ruth is reckoned as the fifth book of the Hexateuch, and Josephus places Ruth immediately after Judges, which, historically regarded, is its correct position. The events recorded took place a century before David, with whom the genealogy at the end of the book ends. The book records intermarriages of Hebrews with women of Moab, upon which intermarriages no slight whatever is thrown. Such facts would not have been looked upon with favour after the days of the Exile. This helps to confirm the historical character of the book, and the connexion is agreeable to the close intercourse between David and the king of Moab recorded in 2 Sam. 22:3,4. The law of the Levirate (Deut. 25:3-5) is not the law recorded in Ruth, and Reuss has fallen into a great mistake by supposing that through the working of the levirate law David came into possession of property in Ephraim. This is a confusion of the names Ephraim and Epherath. The most important literature on this book includes Schmidt (1660), Tychazov (1723), Rossmüller Berthanan (1846), Keil, Metzger (1856), P. Cassel (1887), C. H. H. Wright (1864), Morison in the Pulpit Comm., Lord A. C. Hervey in Speaker's Comm. (1872), and Oetli (1875). [c.h.h.w.]

SABBATH

Sabaeth. [Hosts, Lord of.]

Sa'bat—1. Sons of Sabat were among the sons of Solomon's servants who returned with Zerubbabel (1 Esd. 8:34 only).—2. (1 Mac. 16:14)=Sebat. [Month.]

Sabate's (1 Esd. 9:48)=Shabbethai. Sabat's son.

Sab'han (1 Esd. 8:63)= Binnum, r.

Sabbath (shabbath). There is no question that the meaning of the word is "to cease," and that is the primary idea of the institution. The sabbath was to be a day on which the business of life ceased. Why this was to be on the seventh day is a matter of considerable dispute. What suggested the number seven which is so prominent in religion? It has been thought that the "seven planets" of the Babylonians, or the seven stars of the Great Bear (Arcturus), or the Pleiades, may have done so. It is more probable that the lunar revolution of 28 days (roughly), which was naturally divided into parts, was the origin of the sabbath; in fact, the institution of the latter may be a reaction against the tedious and superstitious Egyptian system. Many scholars, however, believe that the sabbath has a Babylonian origin. The arguments are put as strongly as possible by Sayce (Higher Crit. and Monuments, pp. 74-77; Early Hist. of Hebrews, p. 193; Religion of Ancient Babylonians, pp. 70-77). The matter, as yet, depends upon a fragment of a Babylonian tablet (photographed in Pinches' O.T. and Hist. Records of Assy. and Bab. p. 49, in which the words im niš luḫubib "day of rest of the heart," are explained as equivalent to sapatbaum (from the Sumerian sa-bat "heart-rest"), which is often taken as the origin of the Semitic word sabbath. The difficulty, as pointed out by Dr. Pinches, op. cit., is that the sapattum was the 15th day of the month. The 7th, 14th, 21st, 28th, and 19th were, among the Babylonians, days of holidays, and there is no evidence yet of the 7th being considered as a day of a week or a definite period of time. We are led to the conclusion that the Babylonian origin of the sabbath is not proved, though it is likely that astronomical knowledge had suggested to the Babylonians divisions of 28. It is also to be noticed that the observance of the sabbath dates from a time when Babylon had least influence by Babylon. The question when the sabbath was instituted is rather a subject of bygone controversy, which practically terminated in Hessey's Bampton Lectures, 1860, Sunday, in which he strongly advocates the Mosaic origin. The sabbath is not mentioned in Genesis except in the first account of the creation (2:3), and in the present attitude of scholars towards that chapter evidential use of it would scarcely be considered. The strongest evidence of an earlier institution is the first word of the fourth commandment, the past
SABBATH

application of which has not been explained away.—The objects of the institution of the sabbath are very important matters, raising it at once out of the sphere of all other "sacred" days of other peoples, for it is evident that the institution was of divine origin. The general object, which it shared with many other peculiar ordinances, was to keep the Hebrew people separate from the rest of the world. Within this general object were many others of a particular character. (1) The sabbath was a day of worship; it was to be kept holy. Time is a matter over which man has no control at all; the Almighty took the mysterious seventh as a constant reminder that time belongs to Him, which was emphasized by His claim that labour on the other days was also a service to Him, a truth the people failed to understand. (2) It was a day of rest; rest was a command, for their people. The morning and evening penalty. Why does God command rest? The stars never rest, nor does He (Is.46.28; Jn.5.17). But He has imposed rest on man, not idleness, which is never rest, but a period of recuperation, the necessity for which man shares with nature, but for him the need has spiritual as well as physical aspects. (3) The sabbath was a period to God's Hebrews in later times. Philo called the sabbath the imagining out (iskagewc) of the beginning, and the great Rabbis (e.g. Abarbanel, Aben-Ezri) taught that whose breaks the sabbath denies divine creation. History of its observance. At the institution the chief object was worship; cessation of labour was primarily for that purpose. It was also a day of rest, as seen by the early Hebrews in Lev.25.8. The priests' courses changed in later times on this day (2K.11.6), and there is evidence of special musical observance of the sabbath (cf. Canon Cook's note, Speaker's Comm., etc.). It is well as of spiritual instruction by the prophets (2K.4.23). One is struck by the comparative absence of reference to the sabbath in purely historical portions of the Bible till after the Captivity, and by the tone of reproof which characterizes the prophetic utterances on the subject—facts which suggest that the observance was not popular, but liturgical and hierarchical; in fact, the attitude of the people towards the sabbath seems to be summed up in the words of Amos (8.5), "When will the sabbath cease, that we may set forth wheat?" Jeremiah, too, expressly states that the sabbath had not been observed (17.23), and in his timidity only insists upon the most crude observances of the holy day (vv. 21,22), which is significant from a priest speaking ad populum. Isaiah (1.13) speaks of their observance of the holy day as something that the Almighty rejected; and Hosea (2.11) states that the sabbaths were not observed, if at all, in what, to use modern phraseology, we should call the continental fashion. There is nothing in O.T. to show that the Israelites ever rose to the high significance of the day as first instituted; indeed, it is plainly stated by Ezekiel (20.13,16,21,24,22.8, 26,23,38) that the sabbath was profaned, polluted, and despised. After the Captivity the observance of the sabbath began to be more strictly insisted upon. It was an important "point" in the covenant of Nehemiah (10.31), and when the people did not keep the covenant, but bought wine, fish, etc., from the Tyrians in Jerusalem, he closed and guarded the gates all the sabbath (13.15-22). In 1Mac.2.32-41 we read how 1,000 people were massacred rather than defend themselves on the sabbath—conduct that was not approved by Mattathias and his friends, who decreed that the people should defend themselves on the holy day. Still, the Jews observed the sabbath often to their loss in warfare, as they did at the siege of Jerusalem. The rigid formalism which our Lord condemned began in the 3rd cent. B.C. and increased after 220 B.C., when the harassing and ridiculous distinctions began to crystallize in the Mishna, the depository of traditional teaching. It is unnecessary to dwell on the casuistic trivialities into which tradition developed (such as it being lawful to write seven names of God on one piece of paper), but it is also strange that the Jews had almost forgotten the sabbatical year, and the Jubilee entirely. This subject produced the most prominent attack of our Lord on the religion of the time—not only did He condemn its abuse by word, but He also attacked the very character, as a matter of plucking corn, immediately followed by His first miracle on a sabbath. His five miracles of healing on that day were, with the possible exception of the man with the dropsy, cases where haste was not necessary. His first attack was provoked by the question, Is it lawful to heal on the sabbath days? (Mt.12.10), and as St. Mark tells us (3.5) it produced an unmistakable exhibition of anger (περὶ ἑλέφαντος αὐτοίς μετ' ὀργῆς). This and the healing of the infirm woman (Lk.13.10-17) and the dropsy (14.1-6) were wrought in Galilee. The other two, the impotent man and the man born blind, were at Jerusalem (Jn.9.8). In them our Lord's rejection, or very limited attempt, of the absurd law is clearly shown. He begins the attack Himself. The miracles, moreover, were worked in the most public way, in the most crowded part of Jerusalem. First He sends a man carrying his bed through the streets. Then He sends another well-known man, with lumps of clay on his eyes to attract notice, from the very gates of the temple, who also would attract more notice when he returned seeing. These miracles broke the traditions against carrying burdens and preparing medicine. In the matter of plucking corn (Mt.12.1-8) the disciples broke two traditions by reaping and preparing food. Our Lord's two attacks on this subject centres round two statements of His. (1) The sabbath was made for man, etc. (2) The Son of Man is Lord also of the sabbath (Mk.2.27,28). The first was a condemnation of the Jews' method of keeping the fourth commandment in the letter: the second was a prophecy. He intended to fulfil the command by resting in the grave on the last sabbath that was binding, and changing it on the next day into
the Lord's day. The Jews fully recognized the significance of our Lord's claim to authority over the day, and that no law is part of divinity; therefore, they tried to stone Him. After the gospels the sabbath fades out of sight, the apostles were never charged with breaking it, nor did they ever suggest that it should be observed by Christians; in fact, St. Paul even indicates the opposite (Col. 2:16). The word in Heb. 4:9 has a different meaning. See further Lord's Day.

**Sabbath day's journey** (Ac.1:12), the distance of walking permitted on Sabbath day. The Mosaic injunction with reference to the manna, "Let no man go out of his place on the sabbath day." (Ex.16:29), was interpreted by the Rabbis as prohibiting to go beyond the limit of the city or place of residence. Taking his place as a centre, any one may walk on the sabbath within a circumference of the radius of which is 2,000 cubits. This measurement is based on the distance of the boundaries around the cities given to the Levite (Num. 35:1-6). Under the Roman authority, the distance permitted was 12 miles, being the area of the Israelitish camp in the wilderness; while some Rabbis regard Mosaic law as a mere enactment pro re nata in relation to the gathering of the manna at that time, and having no bearing on the sabbath day's rest or on the state of affairs subsequent to the journey through the wilderness (Lam. 1:5). (J.D.T.)

**Sabbathe'sus** (1 Esd.9:14) = Shabbethai.

**Sabbatical year**, the seventh year, or septennate, during which the land was to be fallow, field and vineyard resting from all tillage or cultivation. The natural products and spontaneous yield of the septennate were not to be gathered by the owners into storehouses, but to be shared as food by all members of the community—the owners, his slaves, and strangers, men and beasts alike. To meet the needs of the people, God would cause the land to bring forth upon itself, so as to suffice until the harvest of the eighth year could be reap'd (Ex.23:10,11; Lev.25:1-7, 20-22). A most important clause in this law is the release of all monetary obligations or quit-claim (Heb. שׁמותח), the creditor being legally barred from collecting a debt contracted by a brother Israelite. Yet this exemption must be held in consideration when extending a loan to help the needy (Deut.15:1-9). This septennate provision acted as a statute of limitation or law of bankruptcy for the discharge of all prior debts. At the end of the sabbatical cycle, during the celebration of the feast of Tabernacles by all Israel at God's chosen place, the whole law of Moses was read before the assembly, men, women, and children (Deut.31:10-12). Apparently the septennate began and ended on the seventh month (Tishri), when the feast of Tabernacles occurred. After seven septennates, the jubilee year was observed. The intention of the law is: (1) to symbolize the "Sabbath of the Lord" (as each seventh day for men, so each seventh year was to be a rest for the land); (2) to check and limit private ownership; (3) to confer a physical benefit to cultivation by a periodical rest. The law became obligatory 14 years after the entrance into Palestine, allowing these years for the conquest and settlement of the tribes. The observance of the jubilee was at times relaxed. The Rabbis calculated that the Israelites neglected the law of the septennate and also of the jubilee in the aggregate 70 years, for which they paid the penalty of exile 70 years. "until the land had enjoyed her sabbaths." (2 Chr.36:21), referring to Lev.25:34. Evidently the Israelites disobeyed this law for 400 years. These are made up of 390 years of the iniquity of Israel and 40 years of Judah (Ezk.4,5,6), and the balance during the rule of the judges. According to rabbinical calculation [Jubilee, Year of], the first septennate was observed in the year 2510 of Creation (1350 B.C.). The exile of Judah and destruction of the first temple occurred in the year 3338 (422 B.C.), or 835 years after the settlement. During that time were 117 septennates and 16 jubilees; deducting 70 (i.e. 62 septennates and 8 jubilees) would leave 55 septennates and 8 jubilees actually observed. After the return from captivity, the jubilee was discontinued, but the septennate appears to have been observed (1 Mac.6:53). Alexander the Great is said to have exempted the Jews from the sabbatical year. The Mishna says that witnesses in criminal cases were asked to give the exact date, specifying in which septennate (shabbath's), year did the murder took place (Sanhedrin v. 1). The law of the septennate remained in force even after the destruction of the second temple (69 A.D.). The quit-claim clause, however, was so modified by legal means that it became obsolete. The land rest on the septennate is still observed in Palestine among the Jewish colonists of to-day, the current septennate being held in the year 5663 of Creation=1902-1903 A.D. (J.D.T.)

**Sabeus** (1 Esd.9:32) = SheHEMAIAH, 14.

**Sabeans** (Is.45:14); see SEBA. In Job 1:15 the Heb. is SHEBA. (G.R.G.)

**Sabi**, "the Scythian, his habitation", stands in 1 Esd.5:34 for "children of Phostereth of Zabez" in Ezr.2:57.

**Sahat** (Gen.10:7), or Sabta**'** (1 Chr.1:9), the third in order of the sons of Cush. The statements of Pliney (vi. 32, § 155, xli. 32), Ptolemy (iv. 10), and Anon. Peripl. (27), respecting Sabbatha, Sabota, or Sabotea, metropolis of the Atramitae (probably the Chatramottae), seem to point to a trace of the tribe which descended from Sabatha, always supposing that this city Sabbatha was not a corruption or dialectic variation of Saba, Seba, or Sheba. Ptolemy places Sabbatha in 77° long. 16°3' lat.: that is, in S.E. Arabia. It was an important city, containing no less than 60 temples. Gesenius has no doubt that Sabatha should be compared with Σαβάτ, Σαβάτ, Σαβατιος, an Aethiopic city (Strabo xvi.) on the shore of the Arabian Gulf, situated just where Arkiko is now. Josephus (Ant. vi. 2) understands the people called Asatha by the term the Sabatha or Sabatecha (Gen.10:7 1 Chr.1:9), the fifth in order of the sons of Cush, whose settlements would probably be near the Persian Gulf. According to Gesenius, the Targum on the passage reads Zingai,
SACRIFICE

referring to the Zingatani on E. borders of Ethiopia.

— 1. A Hararite, father of Ahasuera (1 Chr. 11.35), called Sharaar in 2 Sam. 23.33.

2. Fourth son of Obed-edom (28.4).

Sackbut (Dan. 3.5, 7, 10, 15), the rendering in E.V. of the Aram. sabbôrkâ. If this instrument be the same as the Gk. σαμβόκη and Lat. sambuca, the Eng. translation is entirely wrong. The sackbut was a wind-instrument; the sambuca was played with strings. Mr. Chappell says (Pop. Mus. i. 55), "The sackbut was a bass trumpet with a slide, like the modern trombone." The sambuca was a triangular instrument with four strings played with the fingers. [SEMITE LANGUAGES.]

Sackcloth, the dress of the very poor, of a coarse texture and dark colour, made of goats' hair (Is. 3.24, 50.3; Rev. 6.12), and resembling the cîlicitium of the Romans. It was used (1) for making sacks (Gen. 42.25; Lev. 11.32; Jos. 9.4), and (2) for the rough garments used by mourners, worn in extreme cases next the skin (1 K. 21.27; 2 K. 6.30; Job 16.15; Is. 12.2), and this evening (1 K. 18.39), but at other times over the coat (Jon. 3.6).

Sacrament. [BAPTISM; EUCHARIST; MYSTERY.]

Sacrifice. A. In O.T. (1) Introductory. The sacrificial system of O.T. in its fully developed form has behind it a long and complicated history. This is clearly shown from Scripture itself, where sacrifice can hardly be said to be exhibited as the outcome of special revelation. In its earlier phases it is presupposed as something already existing, and as such is regulated and ordered, invested with higher sanctions, and gradually purified and made the vehicle for the expression of higher religious ideas. The essential ideas implied in the various systems of sacrifice may be grouped as follows. The sacrifice is regarded (a) as a means of communion; (b) as an offering (gift or tribute); and (c) as a means of purification of the offender (d) is undoubtedly the most primitive conception. In its simplest and most undeveloped form pagan sacrifice is a means of instituting fellowship between man and spirits. The underlying idea is that the worshippers and their god are united as kinsmen, are members, in fact, of one organic community. It was only later that the conception of sacrifice as a gift or tribute seems to have been evolved. This notion springs from the idea of property—an idea that obviously belongs to a comparatively late stage of social evolution. When men look upon their god as king or lord (ba'ãn) of the land, they approach him with a tribute (or present). This may be regarded as the prevailing conception of sacrifice in O.T. Within the period subsequent to the settlement of the Israelitish tribes in Palestine, the revolution effected by Josiah's enforcement of the Deuteronomical law of the one central sanctuary, and the consequent suppression of local "high places" and centralization of the cultus in Jerusalem, had momentous consequences. For one thing, it diversified the slaughtering of animals for food from the sacrificial accompaniments that had been customary in the earlier period (cf. 1 Sam. 16.24), and W. R. Smith, Semites, p. 219; but see art. Butcher). In the later (esp. the post-Exilic) period, also, the regulation of the sacrificia by the more fixed and elaborate; greater emphasis was laid on expiatory sacrifices, and the minuittae of the ritual as well as the organization of the priesthood were more carefully observed in the practice. The most important terms employed in connexion with the subject were depicted under discussion may be distinguished as follows: The term sacrifice may be used in a general sense of all offerings to God. More specifically it denotes such offerings as involve the slaying of a victim, and is equivalent to the Heb. zebhâh (lit. slaughter). The wider and more general meaning of the Heb. term minhâh may be represented by offering, it is applied to offerings of grain, bread, meal, oil, etc. Another comprehensive term is qôrân, which may be rendered oblation. Burnt-offering = Heb. 'ôlâ (holocaust); peace-offering = šelem; sin-offering = háttâh; and trespass-offering = 'âshâm. (2) Early History of Sacrifice in O.T. The institution of sacrifice is probably as old as the human race, existing from the earliest times. In Gen. 4.4, Cain and Abel are represented as offering sacrifices, the one a vegetable and the other an animal offering. Here the term applied to both is minhâh, which originally possessed the general meaning of "present" or "gift." The same word, e.g., is used elsewhere of a gift to a friend (Gen. 33.13), of something given as an act of homage (1 Sam. 10.27), of tribute (1 K. 4.21[5.1]), etc. In the technical language of the fully developed ritual minhâh specifically means the meal offering (see below). After the Flood, Noah's sacrifice "of every clean beast and of every clean fowl" is offered at an altar (Gen. 8.20). In this passage occurs the first mention in O.T. of an altar. The building of such by the patriarchs is frequently referred to (cf. Gen. 12.7, 8, 13.4, 18, 26.23, 32.20, 35.7). Ancient altars were of earth or of unhewn stone set up on a low place or on an elevation (high place; Heb. bôâmd). Specimens of such ancient altars have been recovered recently in the excavations at Gezer (cf. Pal. Expl. Fund Statement, 1903 and following years). One of the most ancient kinds of sacrifice which have survived in the O.T. systems is the offering of the firstlings of animals (b'khoroth), all that "opens the womb" (cf. Ex. 13.2, 12, 15, 34.10). This in all probability goes back to the nomadic stage, when wealth consisted in flocks of small cattle. Abel—who is represented as a shepherd—offers "of the firstlings of his flock, and of the fat thereof." (Gen. 4.4.) In the legal codes all firstlings are with great emphasis claimed as belonging to God (cf. Ex. 13.2, 12-15, 22.29ff., 34.15); Lev. 22.27, 27.26; Deut. 15.19-23, etc. (cf. No. 10.36). The ancient rule was to sacrifice the animal shortly after birth (in Ex. 22.30, on the 7th day). According to Num. 18.16 the day fixed for the redemption of such firstlings (including the firstborn of man) as were not to be sacrificed. The narrative of the sacrifice of Isaac in Gen. 22 may possibly stand in some relation to the custom of sacrificing the firstborn son to a deity (cf. Driver, Genesis, pp. 221f.). The
point of the narrative is to show that Jehovah does not require an actual sacrifice of such a kind. This custom was practised amongst the Phoenicians and other neighbours of Israel (cf. 2K.3.27,17.31), and is attested in the case of other nations of antiquity (e.g. the Carthaginians). That it prevailed at various times in Israel appears from the references to it as rite in the reigns of Ahaz and Manasseh (cf. 2K. 16.3,21.6,23.10; and also Is.57.5; Je.7,31.19,5; Ezk.16.20,21,23,37). (Cf. also the story of Jephthah's daughter, Judg.11.30-40.) It is emphatically forbidden in the law (Lev.18.21,20.2-5; Deut.12.21,18.10) and by the prophets (cf. Mi.6.7f.). Of public festivals the Passover has retained in O.T. the most markedly primitive features. In the account given in Exodus this festival (Heb. haggh; the term is used of the great pilgrimage-feasts which annually brought multitudes together) is represented as the establishment of a public institution (cf. Ex.5.1,10.9). The season for its observance was the spring (Nisan=Abib=March-April). It is noticeable that the victim was to be eaten roasted (not raw, nor boiled like other sacrifices: Ex.12.9). The modern Samaritans roast the Passover lambs in trenches. The family was supposed to remain in their tents and eat bread and bitter herbs, all having staves in their hands. The people dip their hands into the blood of the victims and besmeared with it the foreheads and arms of their children. The feast was held at night at full moon; the participants were in every-day garb, and ate with hands, at the door of their dwellings. (When the first flesh remained over, it was to be consumed by fire before morning. But the most remarkable feature of all is the direction as to the use of the blood. The elders are bidden to take sheep or goats, and, after slaughtering them, " to take a bunch of hyssop and dip it in the blood and strike the lintel and the two side posts with the blood. . . . For when [the Lord] sees the blood upon the lintel and the two side posts, . . . He will not suffer the destroyer to come in unto your houses to smite you" (Ex.12.22f.). According to primitive notions, "the destroyer" would mean the Angel of Death. The widespread and universal belief against such evils as these that the sprinkled blood gives protection. In the developed ritual legislation this primitive usage is modified. The sprinkling of the blood is there essentially a priestly function, and the slaughtering has to take place in the sanctuary. The rites of the "Egyptian Passover" are not fully maintained, and the whole feast becomes an agricultural one, essentially bound up with the offering of the first-fruits. It marks the beginning of the barley harvest. [PASSEOVER.] Other kinds of sacrifice offered in the early period may have been of wild animals taken in the chase, and of the spoils of war. In forming a mental picture of popular sacrificial worship as it existed in the earlier period that followed the settlement in Palestine, it is necessary to remember its prevalingly joyous character. There was little (if any) developed sense of sin. Doubtless in times of misfortune effective sacrifices were offered, but the general spirit of the people towards Jehovah was one of loyalty and gratitude. But such occasions were few and far between (cf. for an instance 2Sam.24.18ff.).

It was only later (after the Exile), apparently, that public rites of this kind became a fixed and regular institution in practice. The Deuteronomic phrase " to eat and rejoice before the Lord your God" (Deut.12.7, etc.) sufficiently well describes the character of ancient Israelitic worship down to the end of the kingdom. The family, village community, or clan were the regular participants. Each village had its altar (Heb. misbê'â'h; lit. place of slaughter). At places of special sanctity like Bethel the clan or tribe (or tribes) would assemble for particular feasts. During the monarchy special temples or shrines were built at these spots by the (Israelitic) kings, and attached to them, of course, was a local priesthood (cf. Am.7.9f.). Large numbers resorted to these famous shrines, especially at the autumn festival. Of fixed public feast there were the three great agricultural festivals at the beginning of each end of the grain harvest and at the close of the vintage (Unleavened Bread, Weeks, and Tabernacles). With the first of these the ancient Passover celebration was intimately associated. On these three occasions all males were required to appear before the Lord (Ex.23.17), with, of course, an offering. Other festivals for local celebrations were the sheep-shearing (1Sam.25.11), and especially the New Moon. On the festival of the new moon Saul expects his dependents to court to be present at the feast (cf. 1Sam.20.5, " Behold, to-morrow is the new moon, and I should not fail to sit with the king at meat."") But Saul also was a festival-day (cf. 2K.4.23). The occasions for sacrifices were many and various. Events in family life would afford such, as the circumcision and weaning of a son, marriage, occasions such as the completion of a compact or covenant, the consultation of an oracle, the coming of a traveller, the inauguration or close of a campaign, the accession of a king, the dedication of a temple, the staying of a plague—these would all be marked by the offering of sacrifices. Of private sacrifices a large number were offered in fulfilment of vows. This form of sacrifice has been popular and has been used in all periods of Israel below under Peace-offering). The participants in the sacrifice were required to prepare themselves for the due celebration of the rites in various ways. This preparation is described as "hallowing" or "sanctifying" (cf. 1Sam.16.5, "Sanctify yourselves, and come with me to the sacrifice "; Num.11.18, etc.), and an important part of it consisted in abstinence from marital intercourse (cf. Ex.19.15) and in various ablutions and washing of the garments (cf. Ex.19.10f.). Festal garb was put on, esp. the white robe (so the Samaritans of to-day; cf. Ezk.16.12f.). Numerous instances occur in the earlier historical books of laymen officiating at sacrifices, especially at those offered for the household (cf. 1Sam.20.6, e.g.). In such and similar cases the father would offer for the household, the "elders" for the village community, the commander for his soldiers, the king for his people (cf. the case of Saul at Gilgal). It was in pursuit of the Philistines, 14.32-35; also of Solomon in the temple, 1K.9.25.) It was at the holy
SACRIFICE places that the priests (a resident body)
customarily officiated, or at least participated,
in the sacrifices (cf. 1 Sam. 2.13f.). It appears,
however, that the most important functions of the
sacrifice (offering) were rather of the nature
of giving oral advice and instruction (torâ =
originally the oral instruction of the priests,
later the written law), esp. concerning such
subjects as purifications, expiatory rites, and
such like. The kinds of sacrifice in vogue
during the period under review were the
miqûl offerings which consisted of bread, meal, oil, etc. (vegetable offerings),
the animal sacrifices consisting either of the whole
burnt-offering ('olâ) or holocaust, in which the victim
was wholly consumed by fire, or of the
ordinary sacrifice (zebâhîm), in which after
certain parts had been burnt upon the altar
the flesh was eaten. These are the main
varieties. There were besides, of course,
some sub-varieties of these main kinds, with
peculiar or distinctive features dependent
upon the particular occasion or aim of the
sacrifice, such as, e.g., the covenant-sacrifice
(Gen.15.1f.; cf. Ex.34.18). One very old
and widespread type of sacrifice was the so-called peace-offerings (Heb. skelâmîm).
In several passages these are coupled with whole
burnt-offerings, esp. in connexion with great occasions: cf. Ex.20.24;32.6; 2 Sam.6.17;24.25; 1 K.3.15;9.25, etc. In exactly the same
way sacrifices and whole burnt-offerings are
depicted in other passages, and the peace-offerings
(skelâmîm) were by far the commonest kind of sacrifices (zebâhîm).
Probably "sacrifices" without further qualification
must be understood to refer to peace-
offerings. In this connexion it should be
noted that the expression "sacrifices of peace-
offerings" sometimes occurs (Heb. zîbhî skelâmîm:
 cf. 1 Sam.10.8). The exact significance
of the term skelâmîm is uncertain. Not
improbably it = dues (cf. shilûm "to require,"
"pay"), and would denote sacrifices paid
to God as an obligation or for benefits received.
This would accord with the idea of sacrifice as it
has been preserved in Palestinian and Syrian
cultus, Primitive Semitic Religion To-day, ch. xxii). The whole burnt-offering = Heb., 'olâ =
that which [all] comes up [upon the altar];
another [rare] term for this sacrifice is kâtilî,
a technical sacrificial term in Phoenician also, =
whole: (cf. Deut.33.1o; t Sam.7.9; Ps.51.2o);
this is not so prominent in the ancient period.
It appears to have been exceptional—an extra-
ordinary offering made on special occasions by
great personalities—and is mentioned, as a rule,
in conjunction with other sacrifices (zebâhîm or
skelâmîm). It is only rarely mentioned
alone (cf. Gen.8.20;22.13; 1 Num.23.11f.;
Judg.6.26; 2 Sam.6.13; 1 K.8.5,18,38).
In the temple at Jerusalem the daily burnt-offering
(2 K.16.15) was the king's daily sacrifice.
It was followed by ordinary sacrifices
(zebâhîm) for other persons. In all the
sacrifices enumerated above the blood of the
violences was poured or smeared on the sacrificial
stone; in the case of the sacrifices and
peace-offerings certain parts, esp. the "fat"
(cf. 1 Sam.2.15f.) were then burnt upon the altar
[of stone or earth]. This burning (Heb.
qâîfer, hûqîr) was regarded as a method of con-
voying the sacrifice to God (in the form of the
"sweet smoke"). The flesh was boiled (1
Sam.2.31f.; 1 K.19.21), and served to provide
a feast for the offerer and his friends (cf. 1 Sam.
11.12f.). This was a rather formal offering.
Bread was largely restricted to the proper
(zebâhîm) the offerings of agriculture
—bread, wine, and oil—had a place in the
feast (cf. 1 Sam.1.24). Agricultural offerings
were, of course, often made independently.
Such offerings were partly obligatory—first
fruits, tithes, etc.—partly voluntary. From
Am.4.5 it may be inferred that part of the
bread so offered was burnt on the altar (i.e.
given to God). Similarly a libation of wine
would be "poured out" to God (cf. Ho.9.4).
The bread offered, though sometimes un
leavened (Feast of Unleavened Bread),
would usually be leavened. It is probable that in
the case of the burnt-offering also, in the earlier
period, the blood was treated in the same
way as in the "sacrifices." The carcass was
first of all cut up into pieces, and these were
then burnt (cf. 1 K.18.23). No part fell to
the offerer, and apparently the hide only was
reserved for the priest. Possibly the oldest
and archaic in the sacrificial themata was therefore,
the so-called "burnt-offerings," consisting either
of meat or meat drippings only, burnt upon
the hearth or in a pit, and not on an altar.
As has already been indicated, a large proportion
of sacrifices consisted in the produce of agricul-
ture. Such were the offerings of FIRST
FRUITS (e.g. the first sheaf of barley "waved"
before Jehovah; cf. Lev.23.10f.). The offering
of such commodities is mentioned by judges of
the 8th century B.C. (zîbhî skelâmîm) is attested for the earlier period as existing
at Nob (1 Sam.21.1-6) and later at Jerusalem (1
K.7.45). Thanksgiving offerings of the fruits
of the land, to be presented at the sanctuary
in a basket, are referred to in Dent.26.1f.
This was followed by a feast. As has already
been pointed out, libations of wine were made
at the sacrificial feasts. (3) The Developed
Jewish System. The cultus in its full develop-
ment is largely the outcome of regulations
embrided in the Pentateuch. The priestly
legislation of the latter—mainly set forth in
Leviticus, but supplemented by the tradition of
other periods of usage in Palestine, as for
example, by the works of N.T. Josephus, Philo,
and the earliest traditions of the Jewish schools—undoubtedly contains
a considerable amount of ancient and tradi-
tional material. But whatever be the age
of the compilation in its present form, the system
was certainly not reduced to practice, as a
whole, until after the return from Babylon.
It was at its height during the century that
preceded the destruction of Jerusalem in 70
A.D. by Titus. As compared with the earlier
period, the most striking new feature of the
developed system in practice was, perhaps,
the number and arrangement of the public
sacrifices. These were no longer the concern
of the monarch, as of old, but of the entire
Jewish race, both within and outside of Pales-
tine. Every Israelite, however remote from
Jerusalem, had a personal share in the main-
tenance of the cultus through the contribu-
tions to the temple—levied all over the
world—out of which were borne the expenses
of the public sacrifices, e.g. the daily holo-
casts, and those specially offered (also the
sin-offerings) on sabbaths, new moons, and
the feasts. It is thus easy to see how the
SACRIFICE

interruption of the daily burnt-offering in the sanctuary at Jerusalem would appear to be an unspeakable calamity to the whole Jewish people (cf. Dan.11.31,12.11). During the later period, also, expiatory rites were much more prominent than in the earlier. (i) The names of sacrifice. Besides those already specified, the following terms call for notice here. (a) qorbin, an offering or oblation (L.XX. always ὑπὸς), lit. something brought near. (The corresponding verb [Hif. ḫiqriḥ] is also used in the technical sense of presenting, dedicating, or offering to God.) ḫiqriḥ is a general term, and is applied to all kinds of offerings (animal, vegetable, and material). In O.T. it only occurs in Ezek., Lev., and Num. (b) The minḥa-offering, which in the earlier period possessed a general connotation, now acquires a restricted meaning = the offering of flour and oil (or of cakes made of these ingredients), the meal-offering. (c) Another general term is the burnt-offering (Heb. ḫiskḥ); this is used chiefly of offerings of animals, but also of the minḥa (Lev.2.11), and of the sacred bread and frankincense (Lev.24.7,9). The word occurs very rarely outside the priestly legislation of the Pentateuch. (ii) The three great classes of sacrifice, as enumerated, e.g., in Lev.3.22, are the sin-offering, the burnt-offering, and the peace-offering. (a) The sin-offering (Heb. ḫa'īṭḥ, L.XX. ἁπέι ἀμαρίας, Vulg. pro peccato). Perhaps here should also be reckoned the trespass-offering (Heb. qorbin ḫiskḥ); there is apparently some confusion between the two classes in the ritual legislation. The sin-offering assumes great prominence in the post-Exilic period, though its existence in some form is attested in the earlier period by such a passage as Ho.4.8. (b) The burnt-offering (Heb. ḥdq, L.XX. ὄλοκλαθμα, Vulg. holocaustum); a poetical synonym in Hebr. is kallī. With the burnt-offerings were always offered the meal-offering (Heb. minḥa) and the sin-offering (Heb. ḥiqriḥ, L.XX. σώμα). (c) The peace-offering (Heb. šlāmim or zeḇaḥa šlāmīm, i.e. slain victim of the peace-offering, L.XX. τὸ τοῦ σωματοῦ, Vulg. pacificum). As has already been pointed out, the Heb. word šlāmīm may really = ducis (vows). Under this head must be included some special varieties of sacrifice—viz. the, the, the, and the treason-offering (Heb. nedher, L.XX. εὐγένεια, and the freewill-offering (Heb. ṣdāhāh, L.XX. δῶρων ἐκόσιων, Vulg. oblatio sponte; cf. Lev.7.16). [A fourth class (d) may be grouped under the general heading of oblations.] (iii) The main divisions of sacrifice. The sacrifices fall into two main divisions—viz. (a) public and (b) private sacrifices. (a) Public sacrifices are either fixed or occasional: they consist, as a rule, of burnt-offerings or sin-offerings. The trespass-offering was always a private sacrifice. The only public peace-offerings were the two lambs at Pentecost (Lev.23.19). The fixed public sacrifices are: (a) The regular daily sacrifice of burnt-offerings, morning and evening (Ex.29.38-42; Num.28.1-8). (b) The additional sacrifices (burnt-offerings) on sabbaths, new moons, and yearly festivals (cf. Num.28.9ff. and 29.1ff., the festivals being Passover, Pentecost, New Year, Day of Atonement, and Tabernacles). (b) The sin-offerings at new moons and festivals (Num.28-29 passim). (b) The goat of the Day of Atonement (Lev.16.15). The occasional public sacrifices are the sin-offerings of the congregation and of the anointed priest (whose public office puts his sin outside and apart from the regular affairs of the congregation; cf. Num.15.22ff.; Lev.4.13ff.; 4.32ff.). Here also belong sacrifices of consecration (for the temple and altar; cf. Lev.8.14ff.), and at the installation of priests, esp. the high-priest (Ex.29; Lev.8). (b) Private sacrifices might consist of any one or more (in combination) of the kinds enumerated above. They are divided into prescribed and voluntary. Prescribed sacrifices of this kind are: (a) Sin-offerings, trespass-offerings, and purifications of various kinds. (b) Sacrifices prescribed for all who appeared at the temple during a festival season. Voluntary sacrifices might consist of votive, freewill, or praise offerings. (iv) Characteristic features of the various classes of sacrifices, e.g., the features enumerated above. (a) Presentation by the offerer at the door of the court. (This may be taken to imply willing intention.) The victim would usually be without defect ("blameless"). (b) Imposition of hands by the priest, e.g., Lev.4.5. (c) The phrase ἀλαμά ταὺς ἀμαρίας = "to lean or press the hand heavily upon." Both hands were pressed heavily upon the victim's head. This action would seem to suggest a very intimate connexion between the offerer and the victim—a dedication of the victim to a representative function; it was accompanied by confession and prayer. (d) Slaying by the offerer as a private petition (or sometimes) as representative of the nation (cf. Lev.6.11). The priests did not usually perform this office (public sacrifices, however, were slain by priests, and also always that of the leper), which apparently was regarded as an ignoble one. It was carried out at the N. side of the temple, near the court of the priests, the N. being constantly connected in O.T. with the idea of punishment. According to the Mishna (Zeb. v. 1 ff.), peace-offerings might be slain in any part of the court. (d) The use of the blood. The blood was the appointed means of atonement, and was applied by the priest. The blood, being regarded as containing the essential life of the animal (Gen.9.4), was treated with the utmost care. It was possessed of a mysterious potency either (if used aright) for blessing (sacificial atonement), or (if misused) for a curse (cf. Lev.7.26; 17.11-13). The sacrificial blood was caught by the priest in a bowl and incessantly stirred to prevent its coagulation. In the case of birds it was squeezed out at once by the priest on to the altar. It could only be presented by the mediation of a priest. The mode of treatment varied. (a) In the burnt-offering the blood was thrown or dashed against (Heb. zārāt) the sides of the great altar. (b) In the case of the ordinary sin-offering (for a private person) it was sprinkled on the horns of the altar. (c) In the case of the sin-offering for the "anointed" priest or
SACRIFICE

for the whole congregation it was carried into the holy place, and sprinkled seven times before the veil (possibly upon it), and on the horns of the little incense altar. (b) On the Day of Atonement it was carried within the veil, and sprinkled on and before the mercy-seat seven times. The use of blood in sacrifice goes back to a venerable antiquity. In the most primitive form of sacrifice the blood was consumed by the worshippers, what was split being the food of the god. Sometimes the stone or pillar was daubed with blood, the latter being regarded as a sacred cement. Later the belief grew up that the blood was too sacred to be eaten, and it was made over to the victim. This naturally led to the total disuse of blood for food. In Ps.50.13 blood libations are referred to as essentially offensive to God. The use of wine in libations may have taken the place of blood in the earlier system. (c) Burning on the altar. The victim was flayed by the offerer, and cut up into portions which were washed and salted. The priest (as has been pointed out) received the blood, and carried it to the altar. Certain portions (in the case of sin- and peace-offerings) or the whole (in the case of burnt-offerings) were burnt upon the altar (the Heb. word for burn, kippir = to cause to smoke or steam). The use of fire (cf. Lev.6.17-19) was a noticeable feature. It was a later mode of disposing of the flesh which superseded the ancient usage of consumption by the worshippers (in certain kinds of sacrifice). In the case of animals offered for sacrifice (the ox, the sheep, and the goat), as is well known, the **intestinal fat**, together with the **fat tail** (that of the sheep of the country, was forbidden to be eaten, and had to be burnt on the altar (cf. Lev.4.31,35). The prohibition of **fat**, as of blood, really goes back to primitive practice. The **fat** was also regarded originally as a special seat of life, and therefore sacred. In the priestly legislation the eating of fat by the Jews entailed the death penalty (Lev.7.25). (v) The ritual of the three main types of sacrifice. (a) The ritual of sin-offering. The victim was specified, and differed in different cases: for the high-priest or congregation a young bullock; for the people on the Day of Atonement a goat; for an ordinary Israelite on an ordinary occasion a goat or ewe (Lev.7.7); for a Nazirite on release from his vow a yearling ewe-lamb; for a Nazirite on release from his vow a yearling ewe-lamb; for the purification of women a turtle-dove or brace of pigeons; for the very poor fine flour (Lev.5.11). In the case of the **trespass-offering** only one victim was allowed—viz. a full-grown ram. An exception was made in the case of a Nazirite whose vow had been interrupted, and a leper (cf. Lev.14.12; Num.6.12). The main idea underlying the **trespass-offering** (l'sham), as distinct from the sin-offering, seems to be a breach where material reparation was possible. Five distinct cases are enumerated in Lev. (5.5ff., 6.1-7, 19.20-22, 14.12) and Num. (6.12). One form of the trespass-offering was the case of the sin-offering, probably over the victim's head (cf. Lev.5.5; Num.5.6,7). (For the formula of confession cf. Edersheim, Temple, p. 88.) The blood was sprinkled (see above, 3.d) and the **fat** burnt. The rest of the victim's carcase was disposed of in various ways (for the **anointed** priest or whole congregation it was taken and burnt outside the camp, being too holy for human consumption; cf. Lev.4.12). Ordinary sin-offerings were eaten by the priests in the court (cf. Ho.4.8) — a relic of the sacrificial (communion) feast, but restricted to the priests. In considering the sin-offering care must be taken not to read into the ritual directions later Christian ideas as to sin. The sins contemplated were mainly and primarily breaches of ritual laws (sometimes involving a moral element) or failure to keep the prescriptions of the law. Venial **sins**, sins of ignorance or infirmity, are alone contemplated. For open (presumptuous) breaches of the law there was no availing sacrifice. They were punishable by death (cf. Num.15.30). (b) The ritual of the burnt-offering. The victim was always a male from the flock or herd, or of the fowls (turtledove or pigeon). After inspection by the priest (to see if it was healthy) the burnt-offering was carried up. It was then cut up, washed, and (after being salted probably) was burnt entire. The main idea which came to be associated with it seems to have been that of grateful tribute to God as King. The chief act of national worship in Israel was the daily (continuous) burnt-offering of a lamb and the various rites embodied in that. This offering was doubled on the sabbath and greatly enlarged on the high festivals. The evening oblation took place "between the two evenings"—i.e. according to the view adopted in practice (the Pharisaic), between the decline and setting of the sun; the morning sacrifice was offered, according to the Mishna (Talmud iii. 2), at dawn as soon as it was light. With this burnt-offering always went a **minhá**, or meal-offering, which usually consisted of fine flour and oil, unleavened and salted. A portion was burnt on the altar and was called the memorial (Heb. azēkād, cf. Lev.2.2). Another portion accompanied the eaters of the sacrifice (Heb. nedēkah). The **minhá** offerings (vegetable offerings) generally accompanied animal sacrifices, though in rare cases (that of the priest's offering, Lev.7.12, and of jealousy, Num.5.13) they might be presented by themselves. It should be noted that when other sacrifices were brought, portions were burnt on the altar, the breast and shoulder belonged to the priests. All that remained was eaten by the offerer and his friends on the day of sacrifice; the participants were bound to be "clean." This, the sacrificial meal, was the great feature of the offering. God was regarded, as it were, as the host; the offerers, as his guests, sat at His table and shared His bounty. After presentation the sacrifice was absolutely the property of the Deity. Here we have a vivid type of communion between God and His worshippers. What was called the wave **breast** belonged to the whole body of priests; the **heave shoulder**, or rather **thigh**,
SACRIFICE

was assigned to the officiating priest. To heave (Heb. ħérerin) = to lift off something from the offering, separate it. The heave-offering so called (Heb. tūnōth, LXX. ἀφαίρεσα) is the term applied in connexion with animal sacrifice to the priest’s share (the heave thigh) referred to above. The term tūnōth also has a much wider connotation, being applied to contributions of various kinds (e.g. priests’ share of Levites’ tithe). See Oxf. Heb. Lex. s.v. The original significance of wave-offering (Heb. ἀνατίθημι, LXX. ἄφαιρεσα) was to denote the primary share of the sacrificer (i.e. moved toward altar and back) “in token of its presentation to God and its return by Him to the priest” (Oxf. Heb. Lex. s.v.). But the term received other applications where the original significance is lost. The peace-offering was the most joyous of the sacrifices. It is often referred to in the book of Psalms (e.g. 54. 6; 56.12, 116.17, 18). Special varieties of the peace-offering were the praise- or thanksgiving-offering (Lev. 7.12), the vow- or volente-offering (very common), and the freewill-offering (unblemished victim not absolutely required in this case). In Deut. 16 these offerings are enjoined as specially appropriate to the Feast of Weeks. — CORBAN; D. J. CURTIS, De Sacrificis. Of older treatises the most important are Spencer, De Legibus Ritualibus (1675), bk. iii.; J. D. Michaelis, Mosaicum Arhetum (2nd ed. 1775). More recently Kurz, Sacrificial Worship of O.T. (Eng. trans. 1865); Bähr, Symbolik des mosaischen Cultus (1857). Of modern archaeological works of Novat and Benzinger (1894), the arts of “Sacrifice” in Encycl. Brit. (by Robertson Smith), Hastings, D.B. (5 vols. 1904), Cheyne-Black, Encycl. Bibl. (very important), and Jewish Encycl. The most important treatise dealing with the subject in recent years is Robinson Smith’s Religion of the Semites, cf. S. J. Curtis, Primitive Semitic Religion To-day. [II. B.]

In the New Testament. I. The sacrifices of the O.T. and of contemporary usage, both Jewish and pagan, are naturally presupposed and alluded to in N.T. The primeval sacrifices of Cain and Abel are noticed, and the acceptableness of Abel’s attributed to his faith (Heb. 11.4); and Abraham’s offering of Isaac is twice used in evidence of his faith (11.17; Jas. 2.21). In the ep. to the Hebrews data from the O.T. are combined with details derived from tradition: the tabernacle is shortly described (Heb. 9.1ff.); and besides the general summaries of sacrifices as ἄφαρεσα τε καὶ θυσιά (5.1, 8, 3; cf. 9.9) in the definition of the specific function of the priesthood (cf. 7.13), and as θυσιὰ ταύτῃ προσφορὰ ἔλθον ταιρίαται καὶ πτηματα (10.5-7 from Ps. 40.6), special sacrifices are particularly referred to—the fundamental covenant-sacrifice of Ex. 24 (Heb. 9.18ff.) and the great annual sin-offering of the Day of Atonement are shortly described (9.7, 11, 13, 11); the daily sacrifices (7.27, 10.11) and the sin-offering (5.3, 10.26) are noticed; the original counterpart with the sprinkling of the blood (11.28), and the shewbread (9.2) are mentioned in passing; as well as the sacrificial principle of cleansing by the application of the blood (9.22). The fully developed Levitical system of the Herodian temple lies in the background of the historical books. There is the temple (τὸ ἱερὸν, Mt. 4.5, Ac. 3.1ff.) and its sanctuary (ὁ ναός, Lu. 1.1, etc.); the great altar of burnt-offering (Mt. 5.23, 23.19; cf. 15.29; LXX. altar outpoured at the foot of the altar is covertly alluded to); the temple-market for the sale of victims and the counters for the exchange of foreign money for the coin of the sanctuary, which alone could be tendered for sacrificial purposes (Mt. 11.15; Jn. 2.14ff.); and the treasury, where the.tithes of the sacrifices were deposited (Jn. 8.20; Mt. 12.41). Besides general allusions to various sacrifices (Mt. 5.23, 23.18-20; Mt. 12.33; Lu. 13.1), there are noticed the sacrifices of redemption of the firstborn, as offered for our Lord at the Presentation (Lu. 2.24), the shewbread (Mt. 26 and parallels), the double sacrifices of the Sabbath (Mt. 12.9ff.; cf. the declaration of the leper’s recovery (Mt. 1.44 and parallels), the sacrifice of the paschal lamb (Mt. 14.12; Lu. 22.7), and on one interpretation the paschal highḥighā (Jn. 18.28). In His teaching our Lord requires charity as the condition of acceptable sacrifice (Mt. 5.23ff.), and twice uses His sacrifice to enforce the priority of moral to ceremonial obligations (Mt. 9.13, 12.7), while He approves the statement of the same principle by the scribe (Mt. 12.33). [SALVATION.] In the Acts the Nazirites’ obligation on the completion of their vow is noticed (Ac. 21.26; cf. Num. 6.13ff.); and in 1 Cor. 9.13, 10.13 St. Paul alludes to the sacrifices of the offerings by the priests. Otherwise the allusions to Jewish sacrifice are of a kind to be referred to in the following sections. Pagan sacrifice appears in Ac. 14.13, where the Lydia prepare to sacrifice to St. Paul and St. Barnabas; in the discussion of εἰκονολοθέτη (1 Cor. 8-10; cf. Rev. 2.14, 20); and in the course of St. Paul’s argument where the cup of devils are contrasted with the Eucharist (1 Cor. 10.21).—II. The essential place and importance of sacrifice in N.T. lies in its application to the interpretation of the life and death and resurrection of our Lord. To the Jews our Lord, whatever else might be true of Him, was one Who had died upon the cross; the “death which He had been described as the Messiahship must be made for Him. Accordingly in his speeches in Ac. 2-5 St. Peter’s task had been to vindicate our Lord’s Messiahship in spite of the cross, to interpret His death as consistent with His Messiahship. And this he had done by three lines of argument: (i) that at least He had been manifestly approved by His miracles; (ii) that His death was foreknown and determined by God, as proved by prophecy; and (iii) that it had been reversed by the resurrection, also in accordance with prophecy. But there is no attempt to interpret His death in
itself, except as the necessary condition of the triumph of the resurrection. To the faithful, on the other hand, the cross and passion was an incident in the life of the Lord of glory, with Whom they lived in fellowship and through Whom their life was lived; while at the centre of their common life was a rite instituted by Himself, in its form thoroughly sacrificial, and embodying His own interpretation of His death—the Eucharist. Accordingly, throughout the apostolic writings our Lord's person in respect of His death and resurrection and ascribe the propitiatory and expiatory value of sacrifice; the Atonement is conceived and stated in terms of sacrifice, and by the aid of Is. 53 (Mt. 8.17; Ac. 8.32ff.; Ro. 3.25; Heb. 9.28; 1Pe. 2.22-25; cf. Lu. 22.37). At the same time this is not the only category that is applied to it, and in treating of sacrifice here it is not required to construct a theory of the Atonement, but only to attempt to collect and classify the passages which more or less distinctly treat it from the sacrificial point of view. But, on the other hand, there is no doubt a tendency in N.T. to incorporate other points of view with the sacrificial; or, to express it otherwise, not only to regard our Lord's person and acts as sacrificial, but also to interpret sacrifice by His person and acts. Besides this, it must be remembered that the idea of sacrifice is to us dim and difficult to grasp, and it has been variously conceived; so that in fact we have at least as much to attempt to understand the idea of sacrifice through the Atonement, as to understand the Atonement through the idea of sacrifice. The epistle to the Hebrews stands apart from the rest of N.T. in the fulness with which it treats of our Lord's sacrifice and in the precise form in which it states it. It is desirable therefore to notice the Hebrews separately. (1) Outside the Hebrews the statements about sacrifice through the Atonement, as here exposition or interpretation. (a) Our Lord "sacrificed Himself for us as a sacrifice and oblation to God, for a sweet-smelling savour" (Eph. 5.2), where θυσια και προσφοριν seems to represent θυσιαν και προσφοριν (Ps. 40.6) of the bloody and the unbloody offering, and δια την ευανετος = δια την ευανετον, the Levitical expression for the acceptableness of such sacrifices or parts of sacrifices as were given over to God by burning (Lev. 1.9, etc.). He is the Lamb, whether of sacrifice in general, or the Paschal Lamb in particular (1Pe. 1.19; Jn. 1.29; Rev. 5.6); while in 1Cor. 5.7 He is explicitly the Paschal Lamb. He is the sin-offering (παραθηκη, Ro. 8.3, cf. 1Pe. 3.18; διανος, 1Jn. 2.2, 3; Ro. 3.13). He "offered our sins in His own body on the cross" (1Pe. 2.24), where ανθρωπιας, though derived from 15.53.12, seems to be applied in the usual sense of ανθρωπιας, as applied to the burnt-offering (Lev. 14.20, etc.). (b) In two places St. Paul suggests an interpretation of the sacrificial significance of our Lord's death. (i) In Ro. 3.25ff. the cross is the exhibition of the sinfulness of sin, which is measured by the fact that it slew the Lord of glory. It makes it possible therefore for God to justify us—i.e. to forgive our sins—without the danger of its being supposed that this forgiveness is the result of moral indifference; through it He may be seen to be Himself righteous while He forgives our unrighteousnesses. (ii) In 2Cor. 5.21 our Lord was "made sin for us" in His death; which seems to mean at least this, that "He Who" in Himself knew He was accepted to His stainless conscience the burden of the sin of the race in which He had involved Himself, and did the ultimate penance for it. (c) But the significance of sacrifice centres in the blood; the purpose of the death is to liberate the blood, which sums up and contains the significance of the death. Hence (i) our Lord's death and its significance from this point of view is expressed by "His blood." He made "peace by the blood of His cross" (Col. 1.20; cf. Eph. 2.16); "justified in His blood" is parallel with "reconciled by His death" (Ro. 5.9, 10; cf. Col. 1.20, 22). He was set forth as a propitiation (Rom. 3.25); His blood (Ro. 3.25); we were "redeemed by the precious blood" (1Pe. 1.19); and He "loosed us from our sins in His blood" (Rev. 1.5). But (ii) the blood of Our sacrifice is not merely His death; it was not merely shed in the past; it is a present fact. The Church has it and drinks it in the Eucharist (1Cor. 11.25f.). it is sprinkled on us (1Pe. 1.1); the sacrifice of the Mass is white in the blood of the Lamb (Rev. 7.14), and His blood cleanses the faithful from all sin (1Jn. 1.7); or, as it is otherwise expressed, "Our sacrifice" (not what He did or His death) is "not was" the propitiation for our sins (1Jn. 2.2); but "His blood, the 'Lamb. (Col. 1.22), to 'make peace' (Col. 1.20), to 'make us nigh' (Eph. 2.13). (2) In the epistle to the Hebrews there is more detailed exposition, but the treatment is not systematic; it is not an interpretation of the Levitical system as a whole in relation to our Lord, but an interpretation of our Lord's person and acts. The object of the sacrifices included in the Levitical system, of which a detail may be used for the special purpose in hand in a sense which does not seem logically coherent with the general exposition (Heb. 13.1ff.). (a) Our Lord is the ideal high-priest. Who, as such, fulfils on a higher plane the type of the Aaronic priesthood, and so surpasses it and its activities. As a high-priest "He must have somewhat to offer" (8.3; γη θυσια αυτω, 9.26; cf. 5.1.3); and that "somewhat" is "Himself" (9.14), His "body" (10.10), His "blood" (9.7, 12); He "offers Himself" (ανθρωπιας λαβον, 7.27; ανθρωπιας = ημιω of the burnt-offering; προσφοριν λαβον, 9.14, 25); He "is offered" (προσφορινεσ, 9.28). In particular, as "the mediator of a new covenant" (9.15, 12.24) and "surrety of a better covenant" (7.22; cf. 8.6), He is also the covenant-sacrifice (9.15f.) and His blood is: "the blood of the new (9.20, 10.29) and "eternal" (13.20) covenant." He fulfils the type of the Day of Atonement, entering into the archetypal SACRIFICE.
sanctuary (8.2, 9.11). “through His own blood” (9.12). Himself at once the “minister of the sanctuary” (8.2, 9.11) and the sin-offering which He offers (13.11, 12). (b) In the Levitical system the death of the victim is not in itself the sacrifice, but only incidental to it. The offering is of the life, and the purpose of the death is to enable the life to be dealt with sacrificially; and since “the life is the blood” (Gen. 9.4), or “in the blood” (Lev. 17.11), the essential sacrificial act is the manipulation of the blood. And the slaying of the victim is not the function of the priest (except in cases where the priest is also the offerer, whether for himself or as representing the priesthood or the community); the offerer brings the victim, lays his hand on it and slays it, and the priest only then deals with it when it has so been prepared for sacrifice. Accordingly, in the epistle to the Hebrews, while the Passion is necessarily implied in the sacrifice (Heb. 9.26, 13.12), it is not dwelt upon in this relation. And on the other hand, our Lord’s high priestly sacrifice was “of the life” of Christ. He is never regarded as a priest in “the days of His flesh,” and in fact it is expressly said that “if He were on earth He would not be a priest” at all (8.4). From the present point of view the significance of our Lord’s death would seem to be threefold: (i) His life is of course essential in order that the covenant sacrifice be instituted once His moral perfection and His priestly consecration; and His passion and death is the climax of His discipline, in which the moral reality of priesthood, obedience to the Father and sympathy with men, is finally proved, that so He might become morally what He was by nature (2.14, 5.8), the one mediator, perfected through the sufferings (2.10). (ii) The victim must be without blemish (αἱμων, Lev. 1.4, etc.). The discipline of His life was the testing of His spotlessness; which was not an untried innocence, but He was “in all points tempted like us apart from sin” (Heb. 4.15); and death was the last and culminating temptation, in which the perfection of the human nature and the depths of an ideal human discipline (5.8, ἐμφάνιζεν τὴν ὑπεραυξήν), and proved “without blemish” (9.14; cf. 1 Pe. 1.19), “holy, harmless, undefiled, and separated from sinners” (Heb. 7.26). (iii) His life was the continuous surrender of Himself to the Father. He came to do the Father’s will, and a body was prepared for Him that He might do it (10.5). His life of obedience was the bringing of the victim to the door of the tabernacle (Lev. 1.3); its discipline, the laying of His hand upon it to make It his own; and the death, in which the obedience and discipline of life culminated, was the ultimate sacrifice, an offering of the life of the victim, and a presentation of the body of Jesus Christ once for all (Heb. 10.10), the offering of Himself “through eternal Spirit” (9.14, on which see commentators), in which He prepared Himself as victim that as priest He might minister His blood within the holiest. In 13.1 we our Lord’s death is paralleled with the burning of the bodies of the highest class of sin-offerings outside the camp; but this interpretation is isolated and is not easy to adjust to the general representation. (c) As high-priest our Lord ministers His blood. (i) “Brought again from the dead in the blood of the eternal covenant” (13.20). He “entered into the holy place through His own blood” (9.12), and accomplished what in the type is represented by the offering of the blood (9.7) or the sprinkling of the mercy-seat (Lev. 16.14). The author avoids saying that He carried His blood with Him even that He offered it, since this might obviously be open to misunderstanding, as if our Lord’s blood were something separate or separable from Himself; and in fact He describes the type in such terms as to suggest the necessary limitation of the correspondence between it and the antitype (Heb. 9.7, 9.12). That” (13.12, 2), by which we have our hearts sprinkled from the altar, is obviously intended. The blood of Christ is “the blood of sprinkling” (12.24), by which we have our hearts sprinkled from the altar, is obviously intended. The blood of Christ is “the blood of sprinkling” (12.24), by which we have our hearts sprinkled from the altar, is obviously intended. The blood of Christ is “the blood of sprinkling” (12.24), by which we have our hearts sprinkled from the altar, is obviously intended. The blood of Christ is “the blood of sprinkling” (12.24), by which we have our hearts sprinkled from the altar, is obviously intended. The blood of Christ is “the blood of sprinkling” (12.24), by which we have our hearts sprinkled from the altar, is obviously intended. The blood of Christ is “the blood of sprinkling” (12.24), by which we have our hearts sprinkled from the altar, is obviously intended. The blood of Christ is “the blood of sprinkling” (12.24), by which we have our hearts sprinkled from the altar, is obviously intended. The blood of Christ is “the blood of sprinkling” (12.24), by which we have our hearts sprinkled from the altar, is obviously intended. The blood of Christ is “the blood of sprinkling” (12.24), by which we have our hearts sprinkled from the altar, is obviously intended. The blood of Christ is “the blood of sprinkling” (12.24), by which we have our hearts sprinkled from the altar, is obviously intended. The blood of Christ is “the blood of sprinkling” (12.24), by which we have our hearts sprinkled from the altar, is obviously intended. The blood of Christ is “the blood of sprinkling” (12.24), by which we have our hearts sprinkled from the altar, is obviously intended. The blood of Christ is “the blood of sprinkling” (12.24), by which we have our hearts sprinkled from the altar, is obviously intended. The blood of Christ is “the blood of sprinkling” (12.24), by which we have our hearts sprinkled from the altar, is obviously intended. The blood of Christ is “the blood of sprinkling” (12.24), by which we have our hearts sprinkled from the altar, is obviously intended.
"SACRIFICE: the Lam."

"whatsoever"

The following points may be noticed in the terms of the institution: (a) "Broken" (καταπτημονον) is probably no part of the true text (1Cor.11.24), but a liturgical interpolation. In any case, it refers to the breaking of our Lord's body as bread, for distribution (Is.58:7; 1Lam.4:4), not to a breaking of the body in death. This interpretation suggested by nothing in N.T. or in early Christian literature, and not corresponding to the facts of the Passion. The liturgical fraction is not the commemoration of the Passion. (b) "Eκχυσθησον, if it means "shed," yet must mean "shed" sacrificially, as the first stage in the "outpouring" (ἐκχύσει Λευ.14:18, etc.) and in the application of it to us, timelessly and continuously. In Lu.22.20 it is not the blood that is shed, but the cup that is outpoured. (c) Παρεστης has often been interpreted in the sacrificial sense of ἀναμηνος in the LXX. (Ex.10.25, etc.; cf. ἐκτίνως, ἐπαριν.). This is very questionable; but to the passages in Just. Mart. Trypho 41, 70, commonly quoted, may be added the normal liturgical formula: τοῦτο παρετεῖ εἰς τῷ ἐμῷ ἀνάμηνος. μεμηνόμην οὖν . . . προσφέρωμεν. (d) It has been debated whether ἀνάμηνος implies commemoration in the New Testament. Before God, whether it is man or God who is reminded. The question seems unnecessary, because in the nature of things "to remind God" can only mean "to remind ourselves that God remembers," and "to remind ourselves" in the presence of God is what we mean by reminding God. And correspondingly, the Eucharist with the Peace-offering is obvious on the surface; but allusions in N.T. relate it to other types of ancient sacrifice. (a) "We have an altar, whereof they have no right to eat who serve the tabernacle" (Heb.13:10)—whatever be understood by the "altar," and no doubt in the last resort it is the person of our Lord—evidently refers to the Eucharist, and relates it to the Sin-offering, as that in which we do our priestly part in the sin-offering of the Lord. (b) "This is My blood of the covenant" (Mt.26:28) echoes the words of the Covenant-sacrifice of Ex.24, which are quoted in this form (τοῦτο, for ἐδοθ) in Heb.9.20. The Eucharist is thus related to the sacrifice of the New Covenant, as that in which the covenant relation is continuously renewed and sustained in us. (c) "My commemoration" in the paschal context of the institution is naturally related to the "memorial" of the Paschal sacrifice (Ex.12.14). (d) In 1Cor.10.18-21 St. Paul asserts the parallelism between the Eucharist and pagan sacrifices, on the ground of the identity of principle embodied in them—that they who eat the sacrifices have communion with the altar (i.e. with God, Who is represented by the altar); to partake of the cup and the table of the Lord is to have communion with God, as to partake of the cup and the table of the gods is to have communion with them (i.e. with devils). (e) It has been pointed out in the former section of this article that a fundamental conception of sacrifice appears to be that of a meal shared by God and man, by which the fellowship between God and man is renewed and sustained: the sacrifice is the "bread of God" (Lev.21.6, etc.) placed on the "table of the Lord" (Ex.21.22, 44:16; Mal.1.7, 12) for Him to consume, and also partaken by the worshipper. Whether or not "the bread of God" in Jn.6.33 bears this meaning of food consumed by God, our Lord as the "beloved Son in Whom" the Father is well pleased (Mk.14.62), what follows is "the parallel" (Col.1.13) offered for "a sweet-smelling savour" (Eph.5.2) and returned in His perfected humanity to the bosom of the Father, satisfies this conception of the "bread of God." And this "bread" (i.e. food), the flesh and blood of the Son of Man, is given to us to eat and to drink in the Eucharist that thereby we may have communion with God (1Cor.10.20, 21) and with one another (ib.16f.), a communion of life (Jn.6.53, 57). (j) In the Eucharist, therefore, the Church in thanksgiving (Mk.14.22, 23 and parallels; 1Cor.10.16, 11.24, 14.16, 17) commemorates our Lord in His historical acts. These acts, through the Eucharist, can be said — "He offered Himself for us, as an act done "once for all" (Heb.7.27, 9.26, 10.10), and are past; so that as acts they can only be commemorated. But they had value only as expressing and "perfecting" His will, and they live eternally in the will expressed and "perfected" through them; so that He offers Himself for ever. Through the celebrative thanksgiving the Eucharist operates with the eternal act of His will and offers Him to the Father, and so, doing what He did in the original Eucharist, effects the consecration of its thank-offering of bread and wine to be His body and His blood, as apart from His body and blood (i.e. showing the Lord's death, 1Cor.11.26), and by feeding on them as the "bread of God" fulfils its part in the sacrifice and is knit up into communion of life with God.—IV. Sacrifice and the Christian life. The Christian life in the N.T. is, among other aspects, represented under that of a continuous service on the part of a holy body, and which, in Jesus, to offer up acceptable to God through Jesus Christ (1Pe.2.5), a "pure and undefiled worship" of which the ceremonies are acts of charity and self-discipline ( Jas.1.27). (i) We are to present ourselves to God as alive from the dead and our members as instruments of righteousness to Him (Rom.12.1). As our bodies a living sacrifice, holy, acceptable to God—our reasonable worship (Ro.12.1). Hence an element in the "pure worship" is to keep ourselves unspotted from the world (Jas.1.27), since the victim must be "without blemish." And since the victim must be slain, we have to "offer ourselves, being conformed to the Father who is on the earth" (Col.3.5), "to resist unto blood, striving against sin" (Heb.12.4). (j) As Christ loved us and surrendered Himself for us an offering and a sacrifice to God for a sweet-smelling savour, so we are "to walk in love" (Eph.5.2), "doing good and communicating," with such sacrifices God is well pleased (Heb.13.16; cf. Ph.4.18), and, as a second element in the "pure worship," "visiting the fatherless and widows" (Jas.1.27). (k) We are to offer the sacrifice of praise to God continually, that is, the fruit of lips giving thanks to His name" (Heb.13.15); "whenever we do in word or deed, doing all in the
name of the Lord Jesus, giving thanks unto God and the Father through Him" (Col. 3.17; Eph. 5.20); having our "speech seasoned with salt" (Col. 3.17), like the sacrifice (Lev. 2.13; Mk. 9.49), that it "may minister grace" ( Eph. 4.29) as we "speak as oracles of God" (1Pe. 4.11). Lastly (4), St. Paul represents himself in his apostolic life and ministry as, like his Lord, a suffering and victim. He is "a minister [λεγόμενος] of Jesus Christ unto the Gentiles ministering [ἐρωτόμενος] the Gospel of God, that the oblation [κοινωνία] of the Gentiles may prove acceptable, being sanctified by the Holy Ghost" (Ro. 15.16). He interprets his own sufferings as his share in the Passion of Christ, in which he is "filling up on his part in his flesh for Christ's body's sake, which is the Church, what is still lacking [ρά ἔστερον] of the afflictions of the Christ" (Col. 1.24), which are incomplete until all who are or shall be in Him "know the fellowship of His sufferings and are conformed to His death" (Ph. 3.10). And the apostle's death is the outpouring of the libation (στέρνονος) of his life "over the sacrifice and service [τῷ θυσία καὶ λειτουργίᾳ] of the flesh" of His churches (2.17; 2Tim. 4.6). 

Saddamias (2Esd. 1.1) = Shallum, 6.
Sadas (Esd. 1.5-13) = Aszad.
Saddeus (Esd. 6.45), or Daddeus (8.46), a corruption of Iddo, 6.
Sad'ude (Esd. 8.2) = Zadok, 1.
Sadducees (Mt. 22.23, 34; Mk. 12.18; Lu. 20.27; Ac. 4.1; 5.17; 23.6, 7), a religious party or school among the Jews at the time of Christ.—Origin of the Name. Their Heb. name in the Mishna is סדַדְהוֹנ, the plur. of סָדַדְהוֹן, "just," or "righteous." The Jewish statement is that they are named from a certain Zadok, a disciple of the Antigonus of Socho who is mentioned in the Mishna as having received the oral law from Simon the Just, the head of the school and party. R. Zadok is said to have led practical reforms. R. Epiphanius states that the Sadducees called themselves by that name from "righteousness," the interpretation of the Heb. סדַדְהוֹן; but adds, "There was likewise anciently a Zadok among the priests, but they did not continue in the doctrines of their chief." We have this two alternatives—either the name was thought to be descriptive of their tenets or their practice, or else it referred to some one who was regarded as in some sense their founder. As the Sadducees were so much more prominently a political than a religious party, we must seek for the origin of the name in the history or thought of the party rather than in its doctrines. The next question then is, Which Zadok is referred to? The most famous person who bore that name was the high-priest, the contemporary of David, from whom all the subsequent high-priests claimed descent. The fact that the Sadducees were the priestly party has led to it being assumed that "Sadducee" meant "Zadokite." Against this is the fact that the Hasmonaeans, if generally in alliance with the Sadducees, were sometimes in antag- onism to them. There remains only that they derived their name from Zadok the ob- scure disciple of the nearly as obscure Antig- onus of Socho. If the sect really arose with him, it is easily understood how the greater Zadok displaced the less known; and as the Samaritans maintain that they are called Shomerim not from Shimron (Samaria), but because they guarded (שומר) the law, so the Sadducees claimed to be the "true righteous ones" as against the puritanism of the Phari- see. Historically the Sadducean sect make their appearance in history in the reign of John Hyrcanus as an already fully formed party. Alexander Jannaeus not only supported the Sadducees but persecuted the Pharisees; following his deathbed advice, his widow Alex- andra, who succeeded him, reversed this policy. The struggle between her sons, John Hyrcanus II. and Aristobulus, was very much one between the Sadducees and the Pharisees. As a rule the business of the State was carried on by the Sadducees. This led to another characteristic—although in some things very conservative, they yielded much more than others did to the Hellenizing influences to which the Gentiles, and even the whole Jew- nation. Although (from the support which Herod's father Antipater gave to Hyrcanus II., the Pharisee candidate for the high-priesthood) the Herodians must at first have been in antag- onism to the Sadducees, latterly they appear to have coalesced with them. (1) As a religious party the distinctive doctrines as the Sadducees consisted mainly of negations. As the Pharisees asserted, so the Sadducees denied, that the Israelites were in possession of an oral law transmitted to them by Moses. It is proper to bear in mind how destitute of his- torical evidence was the doctrine which they denied; although it is now maintained all over the world, by orthodox Jews. The Sadducees rejected the theory of oral law, divinely settled by Moses, but did not reject all traditions and decisions in explanation of passages in the Pentateuch; on the contrary, they probably, in numerous instances, fol- lowed the Pharisee tradition. Thus the Sadducees on the written law there is a total absence of any direct assertion by Moses of immortality or resurrection of the dead. This fact is presented to Christians in a striking manner by the well-known words of the Pentateuch which are quoted by Christ in argument with the Sadducees on this subject (Ex. 3.6, 16; Mt. 22. 31, 32; Mk. 12.26, 27; Lu. 20.37). It cannot be doubted that in such a case Christ would quote to his powerful adversaries the most cogent text in the law; and yet the text actually quoted does not itself do more than suggest this great doctrine inferentially. Hence, as the Sadducees disbelieved the transmission of any oral law by Moses, the striking absence of that doctrine from the written law freed them.
from the necessity of accepting the doctrine as divine (Ac.23.8). (3) They likewise denied that there was "angel or spirit." A perplexity arises as to the precise sense in which this denial is to be understood, since in the Pentateuch there are references to "the angel of the Lord." Two principal explanations suggested are, either that the Sadducees regarded the angels of O.T. as transitory unsubstantial representations of Jehovah, or that they disbelieved, not in the angels of O.T., but merely in the system of an angelic hierarchy developed in the popular belief of the Jews after their return from the Babylonian Captivity. Perhaps, however, another suggestion is admissible. The Sadducees may have disbelieved in the occurrence of any such phenomena in their own time, while accepting all the statements respecting angels in O.T.; and thus the key to the assertion in Ac.23.8 that the Sadducees denied "angel or spirit" would be found in the 9th verse. (4) The Sadducees, apparently, but not precisely (Clement), denied the doctrine of divine fore-ordination held by the Pharisees. Possibly the great stress laid by the Sadducees on the freedom of the will may have had some connexion with the fact that so many of the criminal judges were selected from among them. (5) Some of the early church writers (e.g. Epiphanius, Origen, Jerome) attribute to the Sadducees the rejection of all the sacred Scriptures except the Pentateuch. This, however, is doubtful; the writers mentioned may have confused the Sadducees with the Samaritans. It is an important fact that Josephus is wholly silent as to any antagonism on this point between the Sadducees and the Pharisees, and he would scarcely have been so had it existed. The fact that in arguing with the Sadducees on the doctrine of a future life, Christ quoted from the Pentateuch only, though there are stronger texts in favour of the doctrine in other books of O.T., has probably had more influence than anything else in occasioning this misconception; but the Sadducees held the Torah in much higher respect than they did the works of prophets or psalmists; hence our Lord drew this proof from it rather than from other Scriptures. (6) The Sadducees rapidly disappeared from history after their defeat therefrom among the Jews the opinions of the Pharisees exclusively predominated. The Talmud is the work of Pharisees. Two circumstances contributed indirectly, but powerfully, to produce this disappearance: first, the state of the Jews after the capture of Jerusalem by Titus; and secondly, the growth of the Church. It is not difficult to estimate the consternation and dismay which the destruction of Jerusalem occasioned in the minds of sincerely religious Jews. In this their hour of darkness and anguish, they naturally turned to the consolations and hopes of a future state; and the doctrine of the Sadducees that there was nothing beyond the present life would appear to them cold, heartless, and hateful. Again, while they were sunk in the lowest depths of depression, a new religion which they despised as a heresy and a superstition was gradually making its way among the subjects of their detested conquerors, the Romans. One of the causes of its success was undeniably the vivid belief in the resurrection of Jesus, and a consequent resurrection of all mankind. Conscious, therefore, or unconsciously, these circumstances combined to induce the Jews who were not Pharisees, but who resisted the new heresy, to rally round the standard of the oral law, and to assert that their holy legislator, Moses, had transmitted to his faithful people by word of mouth the revelation of a future state of rewards and punishments. This doctrine, the pledge of eternal life to them, as the resurrection of Jesus was to Christians, is still maintained by the majority of our Jewish contemporaries.

**Sa'doc.—[2 Esd.1.1] = Zadok, 1.—2.** A descendant of Zerubbabel in the genealogy of Jesus Christ (Mt.1.14).

**Saffron** (Can.4.14) correctly renders the Heb. karkōm. The similar Aram. word kārūm denotes the Crocus sativus or 'saffron crocus.' Saffron is made of the stigmas of the flower. Saffron is esteemed as a perfume as well as a dye: "it was used for the same purposes as the modern pot-pourri" (Rosenmüller). The word saffron is derived from Arab. ḥafrān, "yellow" and to the Arabs its successful cultivation in Europe (Span. azafrán) is due. Pliny said, "To plant it within any garden in Italy is held no good husbandry, for it will not quit cost." A quaint attempt to identify the saffron of the Bible with turmeric (Curcumena longa) has recently been made by Prof. Henslow. [n.c.n.]

**Saints.** (1) In O.T. (A.V.), speaking generally, this word is used of (a) angels (Isa. 33.2; Ps. 89.5, 7, etc.); (b) of men (Deut.33.3; Ps.15.3, etc.) collectively, and especially of Israelites—not of individuals. The word represents two Heb. words, g’dōshīm (Gk. κακοί) and ḥāsḏīm (Gk. ἅσδες); but only the former of these is applied to angels. The distinction between the two, as applied to men, is that between the word usage and probability, when the clause "between consecration "by calling and election" and consecration of the heart responding thereto. In R.V. the word "saints" is usually replaced by "holy ones." (2) In N.T. both A.V. and R.V. render ἁγιαί by "saints" (haiai in the O.T. sense never occurs), and the "gloss of the 19th cent., and the" (the and the other means of grace) have made "their calling and election sure" in Christ—i.e. are true members of His Body, the Church. The confining of the word to those who have been conspicuous for personal sanctity and holiness is non-Scriptural, nor was it contemplated (in all probability) when the clause "the communion of saints" was added to the Apostles' Creed (7 in the 5th cent.). See Swete's Apostles' Creed, pp. 82 ff. [c.e.f.]

**Sa'lah or Sala, the son of Arphaxad and father of Eber (Gen.10.24,11.12-14; Lu. 3.35). The name is significant of extension, thus seeming to imply the historical fact of the gradual extension of a branch of the Semitic race from its original seat in N. Assyria towards the river Euphrates.

**Sal'amis, a city at the E. end of the island of Cyprus, and the first place visited by SS. Paul and Barnabas, on the first missionary journey, after leaving the mainland at Seleucia.
Here, alone, among all the Gk. cities visited by St. Paul, we read expressly of "synagogues" in the plural (Ac.13.5). Hence we conclude that there were many Jews in Cyprus: and this is in harmony with what we read elsewhere. Jewish residents in the island are mentioned during the period when the Seleucidae reigned at Antioch (1Mac.15.23). At a later period, in the reign of Trajan and Hadrian, we read of dreadful tumults here, caused by a vast multitude of Jews. Salamis was not far from the modern Famagousta. It was situated near a river called the Pedias (or Cisamos) on low ground which is in fact a continuation of the plain running up into the interior towards the place where Nicossia, the present capital of Cyprus, stands.

**Salasa'dai** (1Th.3.1), an ancestor of Judah = Zurishaddai.

**Salathieh** (the anglicised form of PHALTIEL).--

**Sal'a-thiel.**—1. The father of Zerubbabel (1Esd.5.3,45,56,62; Mt.1.12; Lu.3.27). The A.V. has Salathiel in 1Chr.3.17, but everywhere else in O.T. SHEALTIEL. See ZERUBBABEL.--2. Another name of Esdras (2Esd.3.1, R.V. only) = Salathiel  

**Sal-cha'h.**--1. A place of the S.M. also Salchah, a city named as the extreme limit of Bashan (Deut.3.10; Jos.13.11) and of Gad (1Chr.5.11). The name seems to denote a district as well as a town (Jos.12.5). It is doubtless identical with the town of Shilhah, or Shilhah, at the S. extremity of the Jebel Haurán, about 20 miles W. of Forsan or Forsah (the ancient Ennoch). Immediately below Shilhah commences the plain of the great Euphrates desert. The town lies 2 to 3 miles in circumference, surrounding a castle on a lofty isolated hill. The Roman eagle occurs on several doorways. Arab. texts belong to the mediaeval fortress. The Gk. inscriptions are mainly Christian texts of the 4th or 5th cent. [G.R.C.]

**Sal-eem** (safety, peace).--1. Used for Jerusalem, "the city of peace" (Ps.76.2).--2. The city of Melchizedek (Gen.14.18), which the Jews (see Josephus, Ant. x. 2; 7 Ant. iii. 2) have always identified with Jerusalem, and the Samaritans with Jerusalem (Salom, i.Km. 4), of Shem (see Jth.4.4).

**Salim** (Jn.3.23), the present Salim, E. of Shechem. [SHALEM; AEON.] [G.R.C.]

**Salla'ia.**--1. A Benjamite who settled in Jerusalem after the Captivity (Ne.11.8).--2. The head of a course of priests which returned with Zerubbabel (12.20).

**Sal'lu.**--1. Son of Meshullam, 5; a Benjamite (1Chr.9.7; Ne.11.7).--2. (Ne.12.7) = SALLAI, 2.

**Sal'lu'mus** (1Esd.9.25) = SHALUM, II.

**Sal'ma** or **Sal'mon** (Ru.4.20,21; 1Chr.2.11,51,54; Mt.1.1,5; Lu.3.32), son of Nahshon, prince of Judah; probably one of the two spies sent to Jericho, as on the entrance of the Israelites into Canaan he married Rahab. For chronological difficulties see, see GENALEGY of J.C. He became father of Boaz, and ancestor of David. Perhaps Salmon's inheritance was Bethelhem-ephrahath, part of the territory of Caleb, the grandson of Ephraim, of which Caleb was reckoned the son of Caleb. [C.R.D.B.]

**Sal'mana'sar** (1Esd.13.40) = SHALMANESER.

**Salmon** (Ps.68.14).--1. The word means shady, or shadowy, and is (Heb. Sal'mon) rendered Zalmon in Judg.9.48: both being apparently mountains, though not of necessity the same. Mount Zalmon was near Shechem, and had trees or bushes on it: but the name has not been recovered. In Arab. it would appear as Duld or Shulm. The Salmon of the psalm is mentioned in connection with a defeat of kings by the addhony (Ps.68.11), or "lord," who rescued Israel in Bashan (vv. 18,22), in an age when all Israel, under its princes, used to gather in the temple at Jerusalem (vv. 24-27). If the reference be to David's conquests in Bashan, and at Damascus, it seems possible that this dark mountain covered with snow (ver. 14) was HERMON; but it is also possible that a march through central Palestine, in winter, may have led by Mount Zalmon; and snow sometimes covers the summits of Ebal and Gerizim. [C.R.C.]

**Salmo'ne**, the E. point of the island of CRETE (Ac.27.7).

**Sa'lom, the Greek form of--1. Shal-lum, 6 (Ba.1.7).--2. Salu (1Mac.2.26).

**Sa'lo-me.**--1. Her name is only found in Mk.15.40,16.17, where she was the wife of Zebedee, and possibly, if we accept the Peshița version of Jn.19.25, the sister of Mary the mother of Jesus. When her two sons were called from their work as fishermen, she also followed Jesus, ministering to Him of her substance (Mt.27.55 ; Mk.15.41) as well as to her sons, Zebedee and James, who she bestowed herself on the last journey up to Jerusalem (Mt.20.20). She was present at the crucifixion (Mk.15.40), and was one of the first to visit the tomb from which Jesus was found to have risen (Mk.16.1-8).--2. The daughter of Herodias (Mt.14.6; Mt.6.17-22), who, from the Gospels, would only be known as her mother's plant child. [HEROD.] [C.R.D.B.]

**Salt** (Heb. melah; Arab. milh). As a preservative salt became the emblem of constancy; as the Arab still says, "He has eaten my salt." Hence a "covenant of salt" (Lev.2.13; Num.18.19; 2Chr.13.5) was binding, and the meal offering (A.V. meat offering) was to be made salted. Some enemies of the Jews professing loyalty to Persia said, "Because we eat the salt of the palace" (R.V. Ezr.4.14). It was also a very widely spread custom to rub infants with salt, among Celtic peoples and Hindus, as well as Hebrews (Ezk.16.4), probably to preserve their flesh. Salt was an emblem of life and vigour (Mt.5.13; Lu.14.34,35); but salt earth produced nothing, for the salt is not "fit for the land." Hence the sites of cities when destroyed were sown with salt (Judg.9.45). It was used with food (Job 6.6) and with fodder (Is.30.24; R.V. savoury, marg. salted), and is still given to horses and cattle at Jebel Usdum on S.W. shores of the Dead Sea, whence it is still brought by the Arabs. This is called in the Talmud (Tal. Bab. Holin 105b) the "salt of Sodom." It was probably made also from sea water by evaporation for salting fish (cf. Ne.13.16), and salt-pans used at the 13th cent. A.D. are still at the mouth of the Crocodile River, N. of Caesarea, where the ruin el Mellaḥ represents the old
The City of (Jos. 15.62), in the desert was probably at Tell el Milh (the mound of salt), often wrongly supposed to be Moladah; in 4th cent. A.D. it was called Malathia. It lies 13 miles E. of Beer-sheba. [c.r.c.]

Salt Sea. The name in O.T. it is known as the Salt Sea (Gen. 14.3; Num. 34.3, 12; Deut. 3.17, 18; Josh. 15.62; 16.12, 13, 15, 18, 19); the sea of Arabah (A.V. plain, Deut. 3.17; Josh. 3.16, 12, 3; see R.V.); the East Sea (Ezk. 47.18, cf. 8; Jl. 2.20; Zech. 14.8, R.V.); the Sodomitishe Sea (2 Esd. 5.7); also called the Asphatic Lake in Dion. Sic. ii. 48, xix. 48; and Josephus, r Ant. i. 1; 4 v. 1; 9 x. 1; 1 Wars xxiii. 5; 3 x. 7; 4 xii. 2. The name Dead Sea appears first to have been used by Pausanias, Galen, and Justin in the 2nd cent. The Arab. name is Bahr Lüt, "the sea of Lot." The sea lies N. and S., about 46 m. in length and 9 m. in width. In the northern portion, for about 25 m., the shores shelf down steeply, and the greatest depth is 2,000 ft. or more, the water containing about 25 per cent. of chlorides, especially salt, and its specific gravity is very high. The remaining 20 m. to the S. is not a lake, but a vast shallow, composed of lagoons and marshes—a district of desolation, with hot springs, beaches of sulphurous incrustation, and huge saline deposits. The difference of 1,000 ft. of the average point to the fact that the waters of the sea rise and fall from year to year many ft., according to the rainfall over the collecting-ground. The principal tributary is the river Jordan, with its affluent en route. The Kerak, Möjib, and Zerqa Mā'in add other waters from the E.; from the S. and W. several wadis add their waters during the rainy season; and there are the waters of many small springs along the seashore. To the S. of the sea is an extensive tract, formed of morass, pastures, and scrub, broken up by flood waters, gradually rising for about 500 ft. This is conjectured to be the "shelves" of Genesis (Deut. 3.13, 17, 18).—Geology. From the sources of the Jordan (near mount Hermon) to the mouth of the Gulf of 'Aqaba, is a deep fissure on the earth's surface, running from N. to S., forming the vale of Siddim, where the valley of the Jordan and the Dead Sea are situated. Commencing at the level of the Mediterranean Sea, near Hermon, this fissure gradually descends until the surface of the Dead Sea is 1,300 ft., and the bottom 2,600 ft., below the level of the ocean. The level of the sea of Tiberias is about 680 ft. below the ocean. The ridges or tableland of the mountains E. and W. are about 3,000 ft. above the ocean; so that the surface is about 5,600 ft. deep at the deepest point. The method in which this fissure is assumed to have been formed is as follows: At the close of the Eocene period, the long era of rest and deposit of strata was followed by one of movement and rupture of the crust. After coming to perpetual pressure, acting eastward and westward, the land (now forming Palestine) was forced into a series of synclinal and antclinal curves at right angles to the line of pressure, with fractures and displacements where there were lines of weakness. Such a line of weakness was that of the Jordan Valley and Dead Sea. As the land gradually emerged from the sea, the tablelands of Judaea and Arabia were more and more elevated, and the waters of the Jordan and the line of the Jordan and Arabah "fault" accompanied by much fissuring and crumbling of the strata. The tablelands of Judaea and Moab may, then, be considered as anticlinal (or arches), and the Jordan Valley as synclinal (or a trough), which would be occupied by salt water remaining from the ocean itself, and invaded by the waters of the sea. As the lands on either side of the trough rose, the bed of the trough (owing to continued subsidence) became deeper over the area now occupied by the Dead Sea; and into this gulf all the waters flowing from the bordering lands would necessarily empty themselves (Surv. W. Pal., Geology, p. 108). During these displacements there has been a fracture of the crust, and displacement of the strata, in the line of one main fault along the eastern side of the Jordan and Dead Sea; so that the formations on the E. shores of the Dead Sea do not correspond with those on the W. On the western side of the gulf, the waters of the ocean have filled up the eastern edge of the sea, whilst on the eastern side there are very ancient volcanic rocks at the water-level, overlain successively by carboniferous and older cretaceous beds, and only surmounted at about 3,000 to 4,000 ft. by the cretaceous beds which are at the water-level on the western side. During the latter period of subsidence, the beds of cretaceous limestone, which are nearly horizontal in Central Palestine, are tilted up along the western side of the line of faulting. If the flow of water into the fissure had been (at any time) sufficient to fill it, it would have run over either through the gulf of 'Aqaba or by the plain of Esdraelon—probably by the latter; but there is no evidence that this took place, except that the mouths of the various wadis debouching on the valley turn rather northward. It appears, however, that at an early epoch the waters rose sufficiently to have formed a lake some 200 m. from E. to W.; then (or later) they were drawn off. The waters of the Dead Sea are very briny, extending some miles S. of the Dead Sea, and about 10 m. wide on an average. As time went on, the shrinking of water due to evaporation became great, and continued until the lake was reduced to its present dimensions at the close of the Miocene period. At the commencement of the Pluvial period the waters again rose, till there was a depth of 2,000 ft.; but it was still a closed lake. During this time, and shortly before the advent of man, a great outbreak of volcanic action occurred, owing (it is supposed) to the waters of the inland sea penetrating the interior along the great line of fissure of the Jordan Valley and its branches, and reaching the internal heated masses, and setting in action the subterranean laboratories, which afterwards gave such striking evidence of their proximity in the great sheets and streams of lava which have overflowed the regions on both sides of the Jordan. The waters of the Dead Sea shrank, and became saturated with salt, and deposited it, as at J belt.
Usdüm; and there is reason to suppose that at the time when Abraham arrived in Palestine the level of the Dead Sea was much the same as it is at present.—Fauna. Throughout Palestine this belongs to the Mediterranean section of the Palearctic type, with traces of boreal fauna in the N. and a large infusion of Ethiopian and some Indian types in the Jordan Valley. These exceptions show that the glacial period has left traces not wholly obliterated, while the preceding period of warmth had left yet larger proofs of its former northern extension in the unique tropical outlier of the Dead Sea basin. The Ethiopian and Indian types of avifauna are almost exclusively confined to the deep depression of the Dead Sea basin, which (with the exception of some winter migrants) affords very few Palearctic species. This basin is decidedly distinct and typical in its species. An examination of the reptilian, fluviatile ichthyological, and invertebrate fauna leads to similar conclusions.—Flora. Although the Dead Sea flora bears a general similarity to the flora of Arabia Petraea, it is distinct from the adjacent flora E. and W. of it. Out of 160 plants 135 are Ethiopian, scarcely any of them extending into Europe, and many are local. Calotropis procera and Salvadora persica are never found, except close to the Dead Sea, at Engedi, Safiyeh, and Seisa-bân; and are separated by many degrees of long. and lat. from their other known habitats. The flora of the Dead Sea is remarkable for a small average number of species distributed through a large number of orders. We find in this isolated spot, comprising but a few...
SALT SEA

square miles, a series of forms of life differing decidedly from the species of the surrounding region, to which they never extend, and having a strong affinity to the Ethiopian region, with a trace of Indian admixture. Here is a patch of tropical character, containing southern forms so unique and peculiar that we cannot connect their presence in it with any existing causes or other transporting influences. The solution appears to be that, during the Miocene and Pliocene periods, the Jordan basin formed the northernmost of a large system of freshwater lakes, extending from N. to S., including perhaps, the Red Sea; the Nile basin; Nyanza, Tanganyika, Nyasa lakes; and feeders of the Zambesi (Sirw. W. Pal., Fauna and Flora, p. xx).—Climate. The climate of the neighbourhood of the Dead Sea is unique, in consequence of its peculiar position and depression of 1,300 ft. below the ocean. Whilst there are absence of life: but about February, when gentle showers fall for several days together, the salt is washed away from the surface of the rocks, and little plants spring up and cover the ground, perhaps for only a few hours, even within a few feet of the Salt Sea itself.—Hot Springs. One of the characteristics of the Jordan Valley is the series of hot springs which line the "faults" from N. to S. Many of these springs are highly sulphurous, and they are now (and have been from early historical times) used as medicinal baths. The hottest springs are those of Tiberias, and Callirhoë (near Machaerus), on the N.E. side of the Dead Sea. Springs are found both warm and hot, at different points round the Dead Sea.—Minerals. Sulphur is found on W. and S. of Dead Sea, and a sulphur incrustation on the surface of the beach (Rob. i. p. 312). Nitre is found in small quantities (Rob. i. p.

SALT SEA

snows on all the surrounding mountains of Palestine, the temperature about the Dead Sea is more than tropical. Josephus says that while the hills are covered with snow, the inhabitants of Jericho went about clad in linen only (4 Wars viii. 3); and in the rainy month of February, usually the coldest month in the Jordan Valley, the climate is sultry about the Dead Sea. The heat about Jericho is tropical, as is evidenced by the productions of former days—palms, and sugar, and indigo, and cotton at the present day. But the climate of the Dead Sea is equatorial—probably the most heated moist atmosphere in the world. It approaches very much to the climate of the Straits Settlements; but the thermometer has a much greater range, and the atmosphere is far more oppressive. During the summer-time the temperature continues at 110° F. during the night, the air being laden with moisture. During the greater part of the year the vicinity of the Dead Sea, except close to the springs, is a scene of desolation, aridity, and

THE DEAD SEA. (As seen from the S.E. of Taylibeh.) (From an original sketch by Col. Conder.) W.G.A.

---

513.—Salt. To the S. of the Dead Sea are the salt hills known as Jebel Usdûm, the Mountain of Sodom, the Salt Mountain. It is about 7 m. long and 1½ m. wide, and stands 600 ft. above the level of the Dead Sea, the upper portion being formed of beds of rock-salt, gypsum, and marl. It is a mass of lacustrine strata, formed at a time when the waters of the Salt Sea were 600 ft. higher than they are at present.—Bitumen. Josephus (4 Wars viii. 3) speaks of the masses of bitumen (used for calking ships) cast up on the surface of the Dead Sea. Strabo (xiv. ii. 32) states that this sea abounds with bitumen. At the present day it is found occasionally floating on the surface of the Dead Sea, and is sold in the market at Jerusalem. Canon Tristram found large masses of bitumen mingled with gravel, over a stratum of sulphur.—The Dead Sea and the Cities of the Plain. When Lot looked from the highlands of Bethel southward over the vale of Siddim, he saw that it was well-watered everywhere, before the Lord destroyed Sodom and Gomorrah, even as the
garden of the Lord, and Lot chose him all the plain of Jordan (Gen.13.10). This description may, perhaps, be considered to indicate that the position of these cities was N. of the Dead Sea; but, on the other hand, it may mean only that the land N. of the Dead Sea was rendered barren by the same agencies that destroyed the Cities of the Plain elsewhere. The Salt Sea is first mentioned when the kings of the cities of the plain went to fight with Chedorlaomer, king of Elam, and his colleagues, in the vale of Siddim, which is the Salt Sea (14.3). The vale of Siddim appears to have included both the Jordan Valley and the Dead Sea, and was full of bitumen pits (14.10). In consequence of the view Geologists have taken of the overthrew of this sea, it is supposed that the overthrew of these cities may have been due to underground reservoirs of inflammable gases and petroleum escaping through a fissure along an old line of "fault," causing bitumen and sulphur to rain upon the city. Blankenhorn (Zeitschrift d. Deutschen Palastina-Verins, p. 1-50) from the view Géorg. en,</s>
SALVATION

(Gen.33.3). Mordecai refused to prostrate himself before Haman (Esth.3.2). Certain formulae of salvation were in common use. Such are the following: "God be gracious unto thee" (Gen.43.29): "Blessed be thou of the Lord" (Ru.3.10; 1Sam.15.13): "The Lord be with you" (2Sam.12.4): "Blessing be upon thee, and upon the regignent of the Lord be upon you: we bless thee in the name of the Lord" (Ps.129.8), and the liturgical formula and its response, "The Lord be with thee," "And with thy spirit." Similar to these are the epistolary salutations found in N.T. The shalom, or salutation at parting, "Go in peace" (1Sam.17.20.42; 2Sam.15.9) finds its place in the greetings of the Pauline epistles. The invocation of "peace and grace from the Father and our Lord Jesus Christ" is the commonest Pauline salutation. A form for use in pastoral visitation is given by our Lord to the disciples in Lu.10.5, "Peace be to this house." Of the kindred of love better known in the two next centuries there is little mention in Scripture. In O.T. it is found in Can.1.2 and in Pr.7.13. There is no reference to this use of it in N.T. [T.A.M.] 

Salvation (cf. Saviour). As is noticed under Saviour, the idea underlying salvation includes the whole work of Christ for man. This may be divided into justification and sanctification. By the former we mean the remission of sins, by the latter the implanting and nurture of a new nature. Some have attempted to explain the former by stating that Christ died in man's stead, bearing man's punishment and even guilt. Against this view, it may be pointed out that the teaching of innocence and of innocence to sin, there are insuperable moral objections. Merit and guilt are incapable of transference, nor would such a transaction manifest God's justice, rather His injustice. The satisfaction rendered to the broken law of God was that of obedience unto death, enduring and dying as the perfect obedience and devotion to the law and will of His Father so displays the inherent righteousness of that will, to establish which Christ died, that it becomes possible for the Father to forgive without dispensation of His righteousness. He can "afford to forgive," for he is the victim of the bloody sacrifices, their blood figuring in the life devoted (Lev.17.11); and in them the offerer was enabled to present to God something which should represent himself not as he was, stained by sin, but as he would have been if not for his sin. The idea of substitution has arisen from a misunderstanding of the nature of the Jewish sacrifice, the true idea of which is that the offerer's inward devotion was expressed by his outward offering. This was especially the case with the bloody sacrifices, their blood figuring in the life devoted (Lev.17.11); and in them the offerer was enabled to present to God something which should represent himself not as he was, stained by sin, but as he would have been if not for his sin. The moral principle of sacrifice consists not in the substitution of the victim for the offerer, but in their identification. This principle is manifested in Christ's Atoneinent, and His acts are ours in proportion as we partake of His Spirit. Thus we are atoned, or at-one-ed, to God in, and not merely for the sake of, Christ. Bp. Westcott, in a private letter dated 1555, wrote: "To me it is always most satisfactory to regard Christ—absolutely one with Him, and then he does what Christ has done; Christ's actions become his, and Christ's life and death in some sense his life and death. This seems the real answer to the difficulties of the notion of sacrifice and vicarious punishment." (This subject is continued in Repentence, Faith, Conversion, etc.) [M.S.]

Samuel (Ith.8.1; R.V. Samiel) = Shemuel.

Samaria, Samartans. Samaria was the capital of the northern kingdom of Israel, from the time of its builder Omri. It is consequently not noticed in the Pentateuch, Joshua, Judges, or Samuel, but appears first in Kings and in the writings of the prophets of 8th cent. B.C. It is noticed in 42 chapters of the Heb. O.T., especially in Kings: in 8 chapters of the Gk. Apocrypha. Eusebius (Pc. ii. 7) says reference to it (it was the capital); and in N.T. in 6 chapters, the reference (except in Ac.8.5) being also to the later province. In 1K.13.32, where the name first occurs, the "cities of Samaria" are mentioned by anticipation. Omri bought the kâr shômorôn from its 'âdôn Schemar, for two talents of silver, or about 4,000 (1K.16.24), and fortified it. The walls and gate are specially noticed (22.10; 2K.6.16; 2Chr.18.9), and a pool (1K.22.38). Abah here built a temple to Baal of Sidon, with an ivory shrine, and an 'âshêrâ, or sacred artificial tree (16.32-33; 23.39). The trade relations with Damascus entitled a Syrian of Sidon or of Sin, the capital of which site was very strong, and was twice attacked in vain by Benhadad I., in the reigns of Ahab and Jehoram (20.1; 2K.6.24). It resisted the Assyrians also for three years (17.5). The Baal temple, with its "post" (ma'âcêbêh) of Baal, and other "posts," apparently of wood, was destroyed by Josiah. The city was attacked by Shalmaneser IV. of Assyria (18.9), and taken after three years (vv. 10, 11) by a "king of Assyria," whom we know to have been Sargon, the successor of Shalmaneser IV. Its inhabitants were carried captives—according to the usual cruel and short-sighted practice of Assyria—by orders of the Assyrians (17.16), and were replaced by Syrians and Babylarians (17.24). Others were sent by Esar-haddon and by Asnapper (Ezr.4.2,10), who was probably Assurbanipal. In 2 Chr. we have an incident recorded, in the reign of Pekah (28.6-13), to which the book of Kings makes only a passing allusion (2K.15.37; 16.5; 17.4-9); and it appears that 200,000 women and children of Judah were taken captive to Samaria, till rescued by the prophet Oved. In the time of Nehemiah, Sanballat the Horonite (perhaps from Bethhoron) was a foe of Judah, with the "army of Samaria" (Ne.4.1); and a meeting between the two leaders, at the border town of Ono, was suggested (6.2). Isaiah foretold the ruin of Samaria (7.8,9) by the Assyrians (8.4), who apparently regarded its carved images as inferior to those of Syria (10.16), and its gods as powerless (36.10). Jeremiah speaks of the prophets of Baal (26.24), and of Samaria (53.3), and of the return of the remnant of Israel to the city (31).
1-9). In his time worshippers from Samaria, coming up to Jerusalem (41-5) with offerings and incense, still observed the old practices of Baal worship, though Josiah had destroyed the bāmōth (2K.23.19); only a few out of the remnant of Israel had attended the great passover of Hezekiah (2Chr.30.6,10,11). Ezekiel says that Judah will not return till Samaria receives her captives back (Ezk.16.46-53; see 23.4-33). Hosea, shortly before the fall of the city, speaks of its wickedness, and of its calf image at Beth-aven near Bethel, with its servility to Assyria (Ho.7.1,11,8.5,6,10,5,7,15.16). Amos, rather earlier, in the time of the powerful king Jeroboam II. of Israel, describes its luxury (8.12), and its slave conditions (8.2,3). Possibly its great size is already implied (2K.15.19; see 15.3). Amos, as a prophet, says (like Jeremiah and Caesarea) that Israel must have had an area of 300 acres. A long double line of monolithic columns appears to have formed a street with a stream; so that the valleys might be flooded (as in 129 B.C.) by damming the waters. There is also plenty of space on the hill for a city such as Josephus describes, which (like Jerusalem and Caesarea) must have had an area of 300 acres. A great mound probably covers Herod's temple. At the foot of the hill to N. is a flat quadrangle, with pillars, which may have been a hippodrome. In the village is the ruined 12th-century church of St. John Baptist, built over a Heb. tomb (supposed to be his), with a remarkable inscription at the door. Among the buildings of Samaria, and Micah (1.1-6) compares its ruined walls to the stone terrace walls of the vineyards which fall into the valley. —History. The monu-
timate notices of Samaria begin with Jehu's tribute to Shalmaneser II. of Assyria, c. 840 B.C. [RIBlah.] The Assyrian record (Black Obelisk) says, "The Province (Habur) of the Assyrians is Samaria, and the Menahem (like descendent) of Omri." [CHRONOLOGY.] Tiglath-
pileser III., a century later, mentions Men-
ahem and Pekah, who sought (like the party in Judah whom Isaiah opposed) to get help from Egypt; and he claims to have set up Hoshea instead. Sargon records the fall of Samaria (722-721 B.C.), when 27,290 captives were taken away, and a force of 50 chariots left as a guard. In 715 B.C. he sent Arabs to colonize the vicinity. Sennacherib, in 703 B.C., received tribute from a certain Menahem (not the king so named in 738 B.C.—see 2K.15.19), who was then ruling Samaria. Eusebius says that Alexander the Great settled Macedonians in Samaria and Apamia in another province (1Mace.2.26). The later history includes the siege of the city by John Hyrcanus, in 129 B.C., in revenge for Samarian cruelties at Marissa. [MARESHAH.] He surrounded it by a double siege wall, said to have been 10 miles long, and took it after a year, flooding the valleys (Josephus, 13 Ant. x. 2, 3), and enslaving its inhabitants (1 Wars i. 7). Pompey, in 63 B.C., restored Samaria to its people, and Gabininus rebuilt it (14 Ant. iv. 4, v. 3). Herod the Great built a wall 20 furlongs long round the city (15 Ant. viii. 5), and called it Sebastē (Augusta in Latin), in honour of Augustus, to whom he here dedicated a temple. The modern name is still Sebastiak, in consequence. In the time of our Lord it was a great city, with a pagan shrine in it. Coins of the time of Nero and Geta are known, and yet later those of Julia Domna, bearing the legend Col. Sebastē (Robinson, Bib. Res. ii. p. 310). The modern Sebastiak is a large village, on E. brink of the hill (Surv. W. Pal. ii. pp. 160 ff.), in a remarkably strong site, 5 miles N.W. of Shechem. The hill has a flat surface of 500 acres, 1,450 ft. above sea-level, with terrace sides 500 ft. above the surrounding valleys (N. and S.), which join on the W., while on E. a saddle, 200 ft. lower than the hill, joins it to the chain of Ebal. The N. valley expands into a small plain, and that to S. is also broad. The Mediterranean is visible from the hill top, and main roads E. and N. pass by the city. There are two springs, that on the S. ('Ain Ḥarūn, or "Aaron's spring") having a stream that turns a small mill, and the second to the E. ('Ain Keẓ Rihāma, or "spring of the Roman, the gale") which may be noted that six kings of Israel were buried in Samaria—namely, Omri, Ahab, Jehu, Jehoahaz, Jehosh, and Jeroboam II.; but this sepulchre is perhaps rather later than their time. A Heb. weight, inscribed in letters of c. 800 B.C., was found at Samaria. [WEIGHTS.] The Samaritan alphabet is said to have been invented by Antiochus Epiphanes, and to have been used by the Israelites living in Samaria after the separation from Judah (2K.23.18,19; c.23.29: cf. 2K.9.27). In two pass-
gages it would seem that we should read "in," rather than "from," to make sense. Thus the prophet (2K.23.18; see 1K.13.11), who lived in Bethel—which was then within the Samaritan border (1K.15.29,13.32,15.17)—is probably said to have come "into Samaria"; and the hired Israelite soldiers, disbanded by Amaziah (2Chr.25.13), "fell upon the cities of Judah in Samaria" (such as Bethel, Mizpah, etc.), "even unto Beth-horon." In the Apoc. Samaria may mean the city in some cases (Esd. 2.16; Jth.1.9,4,4), but usually refers to the province (1Mace.2.26; Apocr. Mac.15.1); and in N.T. the word always means the province of Samaria (Lu.17.11; Jn.4.40; Ac.1.8, 8.1,9,14,9,31,15,3), except when the "city of Samaria" is noticed as evangelized by Philip. Our Lord reproved the disciples whom the na-
tives of a "village of the Samaritans" had re-
pulsed (Lu.9.52). He healed the Samaritan leper (17.16); and taught the great parable of the good Samaritan (10.33), at a time when the Jews certainly had "no dealings with the Samari-
tans" (Jn.4.9), though the Sinaic MS. omits the clause (see Mt.10.5; Jn.8.48). In His time the province of Samaria practically coincided with the lot of Joseph W. of Judaea and S. borders have already been described [Galilee; Judea]: they extended to the Mediterranean and to the Jordan. Carmel was in Samaria (Josephus, 13 Ant. xv. 4), and the old Castra Samaritorum, at its W. foot, re-
tains its name as Kefr es Simir. Caesarea was in Samaria (Ac.12.10,21,22), and Antipat-
ris was on the border. Caphar-saba also was in Samaria (Tal. Jer. Demai ii. 2), while on the E. Beth-shean, which Josephus (Vita, 6) calls heathen, was not within the Holy Land (Tal. Bab. Holin, 5b). The oil of Regueb (Rūḥāb) was rendered impure because the road to Jerusalem
ran through the S.E. corner of Samaria (Tal. Jer. Hagigah iii. 4), which is thus shown to have included the central part of the Jordan Valley W. of the river. There is still a ruin called " of the Samaritans " just S. of Beisan.—The Samar- itans. When Israel was taken away in 722 B.C. the Heb. population was replaced by people from Babylon, Cuthah, Ava, Hamath, and Sepharvaim (2K.17.24). Sargon placed them under an Assyrian governor, and sent Arabs to Samaria 6 years later. In like manner Tiglath-pileser, 40 years earlier, had transplanted strangers to Simyra and Arqa in Syria; and Sargon himself removed the Hit- ites from Carchemish. The new colonists worshipped foreign gods. The Babylonians made Succoth-benoth (" booths of girls "—devotees of Istar); the men of Cutha adored the Akkadian god Nergal; and the men of Hamath worshipped Ashima (Eshmun). The Avites adored deities who, like Nergal, were of Akkadian origin — Nib-Hazz (" the divinity of judgment ") and Tart-Ak (" the judge "—a name probably of Ea, the god who judged the dead under the ocean). The people from Sepharvaim worshipped the Babylonian deities and Ashima; and it is evident that an Amaranthine (and perhaps also a non-Semitic) population was thus introduced into Samaria. But, when the ruin caused by war led to the appearance of lions, the Assyrians supposed the local deity of Samaria to be offended; and the king of As- syria ordered a priest to be sent back, to teach the colonists " the manner of the god of the land " (2K.17.25-34), or of some kind of worship of Jehovah, in addition to that of their own gods (ver. 33). The people whom we now call Samaritans are relatives of their priests, who claim descent from Levi, and from those (prob- ably) who came back to Bethel (ver. 28). Sanballat, whom the Samaritans call " the Levite," was connected by marriage (Ne.13.28) with a Heb. priest, but Josephus places him (apparently in error) in the time of Alex- ander the Great (11 Ant. vii. 2); and Tobiah was, in the same way, connected with the high- priest Eliashib, and had a chamber in the temple (11 Ant. vii. 2). The Samaritans are remarkable for their Heb. cast of beauty, and may be descendants, not of the Cutheans, but of the Israelite priests—as they claim to be. The old jealousy between Judah and Joseph, which we trace to the time of David (2Sam.19. 40-43), was increased by the separation of the kingdoms, and was bitter in Nehemiah's time (Ne.4.1.6.t, etc.). The rival temple on Gerizim, whether built in his age or in that of Alexander (11 Ant. viii. 2), was hateful to the Judaean, and was destroyed two centuries later (13 Ant. ix. 1). Josephus is hardly to be trusted when he speaks of the Samaritans, whom the Pharisees specially hated. He refers to this population usually as Cutheans (e.g. 9 Ant. xiv. 3); and says that they claimed to be Sidonians (12 Ant. v. 5), though they said also that they were Hebrews (11 Ant. viii. 6). He accuses them of polluting the Jerusalem temple (e. 6 A.D.) with dead bodies (18 Ant. ii. 2), and of killing Galilean pig- mies (18 Ant. i. 4). He says they were under the Great they paid for the privilege of worship in their temple (13 Ant. iii. 4). He seems to be rather pleased at their sufferings under Pilate (18 Ant. iv. 1, 2) and Vespasian (3 Wars vii. 32). So also, in the Wisdom of the son of Sirach (c. 200 B.C., Ecclus.50.26) we read of the " foolish people that dwell in Sichem." The Rabbis are equally bitter. They accuse the Cutheans of lighting false beacons to con- fuse the reckoning of the new year (Simeon, Rosh hash-Shannah ii. 2), and say that they worshipped a dove (Tal. Bab. Aboda Zara 26 b), perhaps on account of their legends of messenger doves. They are accused—by Pharisees—of denying the resurrection of the dead (Siphri on Numb.15.34), which the Sadducees also denied, and of saying that Ashima was Elohim (accord- ing to Ibn Ezra in our 12th cent.). The latter statement is a perversion of the fact that Sam- maritans say Ha-Shem (" the name "), instead of reading Jehovah; just as the Jews say Adonai (adonay). On such assertions the Jewish pilgrims of the Middle Ages harp, when they mention the Samaritans. On the other hand, we find that modern Samaritans pre- serve three ancient copies of the Pentateuch (Schechen; Samaritan Pentateuch), in an ancient Heb. alphabet [Writing] and dialect [Semitic Languages]. They observe the Pass- over more strictly than the Jews, and keep the great fast of Atonement, and all the feasts of the law. Their five tenets are purely Jewish, except the fifth; for they believe in one God, in Moses, in the law, in a day of retribution, and in Gerizim as the sacred mountain [MORIAD]. They are now about 1589, reduced to about 170 survivors, who live in great poverty, clinging to their old faith and books, and still distinguished by the crimson turbans which they are forced to wear (Surv. W. Pal. ii. pp. 218-220). In the 5th cent. A.D., according to the Jews (Tal. Bab. Gittin, 45 a), they existed even in Babylon; and about the same time, under the Goths, they were found even in Rome (Nutt, Sam. Hist. p. 27). Eusebius (Onomasticon, s.v. " Thersila ") mentions them in Bashan. Edrisi (12th cent.) speaks of them on the shores of the Red Sea, whither they fled from Egypt in 638 A.D. They had a synagogue in Cairo as late as 1589 A.D., and in the time of Ben Elia, of Cairo, in 1671, only 30 families at Shechem. Their history after Vespasian is frag- mentary. In 135 A.D. they are said to have aided Hadrian against the Jews, and their temple was allowed to be restored. They seem to have flourished under the emperors of our 2nd and 3rd centuries, but (like the Jews) were persecuted by the Christian emperors of the E. and W. Laws against them were made by Honorius in 404 and 418 A.D., and by Theodo- sius II. in 426 and 439 A.D. They revolted against Zeno in 484 A.D., and were cruelly crushed by Justinian in 529 A.D. In 1163 A.D. Benjamin of Tudela speaks of 200 Samaritans at Cesarea (where they existed in the Herodian age), 100 in Shechem, 300 in Ascalon, and 400 in Damascus. They were attacked by the Khazarim Tartars at Shechem in 1244 A.D., and nearly exterminated; though Isaac Khelo, in 1333, says there were many Samaritans and by 1465 there were 120. The Samaritans are still under Apana, and are supposed to be of Arabian stock, having about a dove idol. In 1480, Zunz found 50 families in Egypt. Scaliger began the learned correspondence, which has con-
SAMARIA, SAMARITANS

tiuned at intervals since, between European scholars and Samaritan priests, in 1589. Samaritan literature, from 1853 A.D., (a Commentary on Pent. in Bodleian), is voluminous, but unfortunately of very little historic value. Their Targum, in Samaritan dialect, appears to be later than 632 A.D. They have written many hymns and liturgical works, but their chief productions are three chronicles, including their "Book of Joshua." There is no doubt that they borrowed much, without acknowledgment, from the Jewish books. Thus their legend of the miracle occurring when Israel crossed the Arnon is found in the Babylonian Talmud (54a), and in the Talmud of Tiberias (135b), about Alexander the Great in the same (Tamid 32a) and in the Jerusalem Talmud (Aboda Zara iii. 1). The Samaritan Chronicle (Toli-doth) was translated by Neubauer in 1869, from a copy in Samaritan and Arabic made by Jacob ben Aaron, their high-priest, in 1859. The original (by Eleazar ben Amram, in 1419) was consulted by Jacob ben Aaron, the later, and other high-priests made further notes. It is quite unworthy for history, but interesting for geography, and represents the Samaritans under Baba the Great (apparently 250 A.D.) as living not only at Shechem, but at Tiberias, in Jordan Valley, in Galilee, Philistia, S. of Gaza, and at Ache, Tyre, and Sidon. The actual wording of its allusion to the Crucifixion is as follows: "In the time of Jehonathan was put to death Jesus, son of Mary, son of Joseph the carpenter, a son of wonders, among the cursed ones of Salem, in the reign of Tiberius, by Paltah his governor." The second chronicle, by Leon, in 1335 A.D., is more legendary, and borrows from Jewish literature and from the Samaritan Book of Joshua. The latter—published by G. J. Juynbour in 1848, from a copy in Samaritan and Arabic—was sent to Scaliger in 1584. It is called "The Book of Joshua son of Nun"; and then it appears to be a copy of what is called the book in the square form, which was probably 50 or 60 open to the inspection of scholars in Europe and America. When the first codex arrived, Europe was in the throes of the Thirty Years' War, and every literary discovery was pressed into the conflict between Protestant and Roman Catholic. R.C. divines hailed the Samaritan as having differences (apparently as they were) as evidences of the necessity of the infallible decision of the Church to settle what was Scripture. On the other hand, Protestant theologians maintained the immaculate correctness of the Massoretic text, some holding (as the younger Buxtorf) that Moses wrote the Scripture. The arguments were, to a great extent, a priori—therefore for scholarship of little value. In 1815, nearly two centuries after Della Valle had sent home his codex, Gesenius treated the question as one purely of scholarship, in his treatise De Pentateuchi Samaritani Indole, Origine et Quaestione. It is a very patient, careful piece of work; but its logic is not equal to its learning. He, to some extent, unconsciously assumes the correctness of the Massoretic text, and always regards the Samaritan as varying from it. He classified the differences of the Samaritan from the Massoretic; but neither his classification nor his arguments are under eight hundred years hence. One difference, the 3rd pers. pronoun נִשָּׁן is common in the k'tibh : in the q'rî there is a difference of vocalization—Samaritans pronounce it nasidated, as in later Heb. So with נֶקֶד "a youth." In more ordinary Heb. the fem. is indicated by ה being appended. In the Massoretic the word is common; in the

SAMARITAN PENTATEUCH

Asiatique, Dec. 1869); and Nutt's Sketch of Samaritan History, 1874. The geography was specially studied from the two works first cited by the present writer (Surv. W. Pal., vol. Special Papers, pp. 216-231) in 1876. A Hebrew version of the Sam. Book of Joshua, of which the Arabic book is a paraphrase with additions, was found by M. Gaster in 1907. The part borrowed from O.T. Jos. follows the Massoretic text (see Journal R. As. Soc. 1908, pp. 795-809, and our next art.). [G.R.C.]

Samaritan Pentateuch. This is the recension of the Torah used by the Samaritans; it is essentially identical with the Massoretic, save in minute points. The earliest MS. of it is preserved in the Samaritan synagogue at Nablus, in a silver case. There are now a very considerable number of codices, more or less complete, to be found in various libraries in Europe and America. Though it was referred to respectfully by the fathers (e.g., George Syncellus, S. of Syria), and was used in the Talmud, it disappeared from knowledge till (in 1616) Pietro della Valle sent to Europe a copy, which he had purchased from the community of Samaritans which then still survived in Damascus. The number of codices available has since increased. Kenmott collated 18, and lists in which six were the oldest. They are probably 50 or 60 open to the inspection of scholars in Europe and America. When the first codex arrived, Europe was in the throes of the Thirty Years' War, and every literary discovery was pressed into the conflict between Protestant and Roman Catholic. R.C. divines hailed the Samaritan as having differences (apparently as they were) as evidences of the necessity of the infallible decision of the Church to settle what was Scripture. On the other hand, Protestant theologians maintained the immaculate correctness of the Massoretic text, some holding (as the younger Buxtorf) that Moses wrote the Scripture. The arguments were, to a great extent, a priori—therefore for scholarship of little value. In 1815, nearly two centuries after Della Valle had sent home his codex, Gesenius treated the question as one purely of scholarship, in his treatise De Pentateuchi Samaritani Indole, Origine et Quaestione. It is a very patient, careful piece of work; but its logic is not equal to its learning. He, to some extent, unconsciously assumes the correctness of the Massoretic text, and always regards the Samaritan as varying from it. He classified the differences of the Samaritan from the Massoretic; but neither his classification nor his arguments are under eight hundred years hence. One difference, the 3rd pers. pronoun נִשָּׁן is common in the k'tibh : in the q'rî there is a difference of vocalization—Samaritans pronounce it nasidated, as in later Heb. So with נֶקֶד "a youth." In more ordinary Heb. the fem. is indicated by ה being appended. In the Massoretic the word is common; in the
Samaritan the ordinary usage is followed. In the Massoretic recension there are survivals of case endings; these are omitted in the Samaritan. There is further in the Samaritan a greater sense of artistic propriety; especially the proneness to insert *taq in holem. As the different codices vary, the Nablius roll would have to be carefully examined and photographed column by column, to settle many of the questions involved. The above are differences between the Samaritan and the Massoretic, but in many cases the *qm and the Samaritan are in agreement. If, as has been thought, the *qm represents another MS. from which the MS. slavishly copied in the *ketibh was corrected; then, so far as those grammatical differences are concerned, the Samaritan is closer to it. The differences may, in some instances, have been caused by blunders in the Massoretic. (b) *Logical differences. These are cases where one recension represents greater completeness of thought than the other. Of the two, the Samaritan usually represents the more expanded form. Although in ordinary circumstances short recensions is to be regarded as the primitive, yet repetitions (e.g. a command is given, and the narrative of the fulfilment repeats the terms of the command) are a sign of very primitive ideas of composition. Still, the pleonasm is, on the whole, an indication of a secondary formation. (e) *Doctrinal differences. Most of these consist of the insertion of "Gerizim" where the Massoretic has nothing. Thus Ex.20.17, after the statement of the "Ten Commandments," there is inserted from Deut.27.2 the command to set up stones, on which are to be engraved the words of the law, and they are to be set up in Gerizim. (2) Unintentional differences due to mistakes of sight, of hearing, and of memory. (a) *Mistakes of sight, by which letters resembling each other in appearance were mistaken. Thus, in the square character (as in the angular), י and י are liable to be confused. (b) *Mistakes of hearing; Letters resembling one another in sonant quality were apt to be confused; e.g. in copying MSS., the common practice was for one reader to dictate to a dozen or a score of writers. Thus arose not only mistakes as to the letters in the MS., but also mistakes due to indistinctness in pronunciation. (c) *Mistakes due to memory. The scribe, forgetting the clause he had just heard dictated, and recalling a similar one which ended somewhat differently, might write the latter instead. Of these (a) is the most important as an aid to approximating to the date of the recension. The script in which the MSS. of the Samaritan are written is older than the square; chronologically it is between the latter and the angular found in the inscriptions. As few, if any, of the variations of the Samaritan from the Massoretic can be traced to analogies of letters similar in the Samaritan script, but are due to letters similar either in the square or in the angular, the mother MS. of the Samaritan was probably of the Massoretic; or it is possible that the Nablus roll was copied in, the last resort, the MS. brought by the priest who was sent by Esar-haddon to teach the colonists the "manner of the God of the land." In regard to this, cf. Deut.12.21 in the Samaritan with the Massoretic versions. There is a targum in Samaritan Aram. frequently written in columns parallel with those of the Heb. It is, on the whole, close to the text; and its alleged dependence upon Onkelos is not obvious. Of this targum there are several recensions, presenting slight differences, with a general resemblance. Sometimes along with the turgum, some of the older letters are also preserved. This also varies somewhat in different codices; it is attributed to Abu Said, and dated in the 11th cent. There are references in the fathers to a Gk. version of the Samaritan recension, but no portions of it survive. The relation of the Samaritan to the LXX. has been discussed by many. In general the LXX. agrees with the Samaritan. From this it has been argued that the LXX. was translated from the Samaritan. This appears the more plausible, since some of the variations of the LXX. from the Massoretic are explicable as the confusion of letters similar in the Samaritan script. But on careful study it is found that the differences between the LXX. and the Samaritans are as numerous and important as the agreements. As the Samaritan script is older than the square character, the MSS. from which the LXX. was translated might be written in Samaritan characters through the intermediary of the LXX. Many of these must regard the LXX. and the Samaritan as quite independent. (Shechem.) Gesenius, de Indole, etc., Pent., Sam.; Kohn, de Pent., Sam.; Frankel, Einfluss. Text: Walton's Polyglot; Blayney's transcription in Hebrew characters useful, though not always accurate. Brill's transcription of the Samaritan Targum is indispensable to the student.—As we are going to press we learn of the discovery of the Hebrew text of the book of Joshua in Samaritan characters, by M. Gaster. He tells us (in his article in the Zeitschrift der Deutschen Morgenländischen Gesellschaft, Band 26, Heft 2) that "the copyist names himself in the epilogue, Abisha, son of Pineshas, son of Ithqaz the priest, the Levite, sacristan of the synagogue in Shechem, and that he has made the copy in the year 1323 Hej (1905 A.D.)." The extremely recent date at which this copy has been executed renders it almost equally accessible, and before any definite judgment is pronounced it is necessary to see whether the original may not be collated. M. Gaster thinks that Josephus must have had "a text before him at least as
SAMATUS

much in agreement with the Samaritan re-

cension as with the Massoretic." [J.E.H.T.

Samatus, one of the "sons of OZORA" who

have been mentioned, is in the corrupt list of 1Esd.9.34 (cf. Ezr.10.34-42).

Same'us (1Esd.9.32) = Shemaiah, 13.

Samgar'-nebo' (Je3.39). By comparison with

ver. 13 there would appear to be some

primitive confusion of the text (Zimmern, p. 408), Nergal-sharer occurs twice.

Most moderns read as ver. 13, and strike out

the first Nergal-sharer and with it "Sam-

gar," as a corruption of Rab-mag, "chief of the magi, or king's council" [Magi], and join Nebo

with the following "Sarsechim," reading as ver.

13, Nebu-shasban (Nabū-sēṣīb-anni, "Nebo delivers me!" or "deliver me"). Passers by Ephesus, who probably retain the

Nergal-sharers, the one, Samgar, "cup-

bearer" (?), the other "Rabmag." The varia-

tions in the LXX, MSS. indicate consider-

able corruption. For another suggestion, see

Sarsechim; and for the alternative inter-

pretation of Rab-mag, see Nergal-sharer

and the visit with it. We have the names of high Babylonian officials. [F.E.S.]

Sa'mi (1Esd.5.38) = Shobai.

Sa'mis (1Esd.9.34) = Shime, 15.

Samlah' of Masrekah; a king of Edom, successor to Hadad or Hadar (Gen.36.36,37; 1Chr.1.47,48).

Sam'th' according to (1Esd.9.43) = Shema, 3.

Sam's, a famous Greek island off the part of Asia Minor where Ionia touches Caria. Samos is a very lofty and commanding island. The Ionian Samos is mentioned in the account of St. Paul's return from his third missionary journey (Ac.20.15). He had been at Chios, and was about to proceed to Miletus, having there visited and, according to the

topographical notices given incidentally by St. Luke are most exact. In the time of Herod the Great, and when St. Paul was there, it was politically a "free city" in the province of Asia.

Samothr'cia. The mention of this island in the itinerary of St. Paul's first voyage to Europe (Ac.16.11) is worthy of careful

notice, for being a very lofty and conspicuous island, it is an excellent landmark for sailors, and must have been full in view, if the weather was clear, throughout that voyage from Troas to Neapolis. Moreover, this voyage was made with a fair wind: only not are we told that it occupied only parts of two days, whereas on a subsequent return-voyage (Ac.20.6) the time spent at sea was five; but the technical word here used implies that they ran before the wind. Now, the position of Samothrace is exactly such as to correspond with these notices, and thus incidentally to confirm the accuracy of the unstudied nar-

rative. St. Paul and his companions anchored for the night off Samothrace. The ancient city, and therefore probably the usual anchor-

age, was on the Nick, which would be sufficiently sheltered from a S.E. wind. In St. Paul's day it was the resort of sailors on their way to the Black Sea, and Pliny, the privileges of a small free state, though it was doubtful considered a depend-

ency of the province of Macedonia.

Samp'sames (1Mac.15.23), the name probably not of a sovereign, but of a place, which Grimm identified with Samson on the coast of the Black Sea, between Sinope and Trebizond.

Samson (the sunny; Judg.13-16), son of Manoah, of the tribe of Dan. He was dedicated as a perpetual Nazirite by the angel who predicted his birth. He was brought up at Zorah "in as fair a nursery for boyhood as you could find in all the land" (G. A. Smith, Hist. Geog., p. 224). He was predestined to begin the deliverance from the Philistines, and the Spirit of the Lord came early upon him in the camp of Dan. His recorded exploits start with his desire to marry the Philistine woman of Timnah (14.1). Manoah objected to alliance with an alien, and Samson appears not to have jumped at the idea, however the Sadiqa Marriage, vide W. R. Smith, Kinship and Marriage.) Moore plausibly argues for omitting "and his father and mother" (ver. 5) and "his father" (ver. 10). The narrative of the lion then becomes clear, also why the 30 comrades were not kinsmen but Philistines, and the reason why they waited the lion with his horns, found the honey in the dried-up carcase on his journey home-wards, and subsequently propounded his riddle at the marriage-feast. Having no other riddles to compare with it, we cannot decide on its fairness. Having to pay the forfeit, he went to Askelon, and, in the course of a year, killed 30 Philistines. Their festival garments probably indicate a feast at the place. In anger he refused to go in to his wife, and her father, to avoid disgrace, gave her to the "best man." This Samson had not expected, and he refused the second daughter, who was offered probably in fulfilment of the contract. In revenge he caught 300 javelins, made a windmill out of a single lion and fastened it with a torch between, and then set them free in the closely-own Philistine plain (cf. G. A. Smith, op. cit.), whereupon the Philistines burnt the woman of Timnah and her father, and in his turn Samson smote the Philistines. He then retired to E'tam (perhaps Arq Is'mn, near Zorah; see G. A. Smith, op. cit.) and, almost to a vertical cliff with a well-nigh inaccessible cave. The Philistines marched to Lehi, in Judah, demanding that the bandit should be given up. Samson surrendered himself to the men of Judah on condition that they would not hurt him themselves. They brought him to the camp of Lehi, but the "Spirit of the Lord came upon him." Possessed with demoniac fury, he burst his bonds, and seized a jaw-bone of an ass. The superstitious Philis-

tines were panic-struck, and slain. In the couplet that celebrates his triumph, he puns upon homér = a heap, and hámor = an ass, on 'eleph = 1,000 and 'eleph = an ox. A thirst after his exertions, he called upon God, who clave a hollow place in Lehi (R.V.) into which water flowed. [En-hakkō're.] Samson's next exploit was to carry off the gates of Gaza and set them on a hill facing towards Hebron. The traditional spot is a quarter of a mile from Gaza. Samson's love for Delilah, who betrayed him. Thrice he deceived her. Thrice there were tiers-in-wait to seize him, but Samson probably believed that Delilah was only prompted in her experiments by feminine
curiosity. The fourth time he told his secret. His seven braided locks were worn. He was surprised, blinded, and carried to Gaza to grind corn in the prison mill. His hair had grown again before the Philistines celebrated their success by a sacrifice and feast in Dagon's honour. Samson was brought out to be mocked, but was allowed to rest between the central pillars that supported the temple roof. Then he prayed for strength to be avenged of the Philistines for one of his two eyes (Judg. 16. 28, R.V. marg.). Then crying, "Let me die with the Philistines," he pulled down the pillars, the roof fell, and he was killed with his enemies. His kinsmen came and buried him in Manoah's tomb, between Zarah and Eshtaol. Attempts have been made to identify him with Hercules, but there are as many dissimilarities as resemblances. He has also been treated as a solar myth, but his story is racy of the soil, the geography is accurate, and so are the references to the Philistines. Moreover, the whole interest of the story depends on the character of the hero. In Heb. 11.32 his faith is referred to, and it is noteworthy that this wild, self-willed man, ruined by his passions, kept a Nazirite's vow inviolate, prayed and believed that in God was his strength. The narrative, as we have it, is of extreme antiquity, but fragments of verse and passages derived from poetry (e.g. Judg. 15.14, 16.9) show earlier authorities. That he became the subject of ballads, and that the ballads are quoted, in no way militates against the historical character of the narrative. Oriental exaggerations like 15.16 must be allowed for. See Judges for bibliography. [Manoah; Delilah.] [H.M.S.]

Samuel (whose name means "heard of God") [Keil] or "name of God") was one of "the samuels" (cf. Judg. 3.9, 15) whom Jehovah raised up among His people, the last of the judges, and the unwilling founder of the Heb. monarchy. He was a Levite by descent, born at Ramathaim-zophim (1Sam. 1.1), "the two heights of the descendants of Zuph, or Zophai," a Levite family, and belonging to the hill country of Ephraim, afterwards called the "height" Ramah. After the destruction of Shiloh, he made this place his home. To it he retired, and in it he was buried, with national lamentation (25.1), "(1) His early life. Because this is truly an idyll, it by no means follows that it is not historic. A universal historic experience shows such idyls in periods the most confused and corrupted. Like the instances which Neander collected from the Early and Middle Ages, and called "light in dark places," the story of Ruth, and of the child Samuel, together with many a hint of straight line and simple faith which shines out incidentally in Judges, show that the succession of faithful men and women has never wholly failed (1K. 19.18). Elkanah, Samuel's father, followed Jacob's precedent of two wives, and was equally unhappy in it. The type of monogamy towards which the best in Israel gravitated is shown to be original by the constant failure and miscarriage of its transgression (Mt. 19.4). The family attendance at the feasts, and the beauty of Hannah's piety, imply the source from which they and all the higher forms of godliness in Israel proceeded. We need not picture the boy Samuel as sleeping "in the temple" (the word is used first here of "the tent of meeting"), though the simplicity of the record lays it open to this misinterpretation. We discover from 1Sam. 3.15 that its station for many generations at Shiloh had involved structural changes in "the tent," apparently to increase its stability. Round it, in all probability, were rooms, or buildings, where Eli and Samuel and the priests lived. The pathos of the boy Samuel's relation to the weak, old, but true-hearted Eli is drawn with a master hand. The boy's first message is terrific, is delivered with reluctance, and received with exemplary gentleness (ch. 3). We see Eli, who was kind to the mother, tender to the son who grew up with him. The convincing proof of the external voice of Jehovah accords with that constant and continuous objective divine communication which, if we
tear it out of Israel's history, leaves it maimed and unintelligible. Samuel wore a linen ephod or ministerial garment (less costly than that of priest or high-priest, worn by David, 2Sam.6.14), and the little outer robe which his mother made and brought him from time to time when she came up to the feasts with her husband, shows him not forgotten at home and not entirely separated from his mother. From first to last in Heb. history no shr is put upon the family. It is a picture of a dedicated life, as distinguished from the ascetic or anchorite. Samuel "grew up with Jehovah" (1Sam.2.21, Heb.). "The lad Samuel grew on and was in favour both with Jehovah and also with men" (2.26). (2) His function as prophet, priest, and judge. Samuel's position was extraordinary. He was raised up for a crisis. It would be a mistake to judge by him the ordinary tenour of Heb. law and life. It is also probably an error to see in him the founder of the prophetic "colleges." It is probably certain that a new era existed more or less always. But Samuel's times saw a revival of them, which he directed and informed, as Elisha after him (9.9). He began his career as a prophet recognized in all Israel (3.10-21). His strong intercession for his people and the king is marked (7.8,12-23) and is remembered (13.1-5). As "the spokesman of Jehovah" he delivered his message publicly and privately, and established the unique relation of the prophet as the fearless adviser and rebuker of kings, which continued, with great advantage to freedom and religion, to the times of Jeremiah. He it was who laid down the great prophetic principle which, by no means ignoring sacrifice, sets obedience and piety higher (1Sam.15.22), and which is expanded and applied by prophet and psalmist after him. It is probable that on his retirement from the growing madness of Saul, he founded and presided over a special school or community of prophets, afterwards called Bethel, Gilgal, Mizpah, and Ramah as the centres of his assize. Though a man of peace who only drew sword once (15.33), his lofty faith and courage (ch. 7) relieved Israel from the Philistine oppression all the days of his life as judge (7.13), but that oppression revived in his old age, when he appointed his unworthy sons his successors at Bethel (8), and had to bid his successors (8.1-5). (3) His function as king-maker. When, in his old age, his sons forsook his way and sold justice for bribes, the elders of Israel came to him to Ramah and pressed for a king, "as all the nations" (8.5). He reluctantly assented, for though, as a statesman, he was taught to regard it as a necessity, as a patriot he considered it a falling away from the theocracy. Moses had foreseen the hearing of a national wish for a king, and had arranged for it (Deut.17.14f.). Samuel, in accordance with this, first pointed the moral of the lesser freedom of the change (1Sam.8.11-22), and then publicly arraigned it as an apostasy from a divine ideal (ch. 12). But he set the type of the kingdom in Israel—a monarchy strictly limited by dependence on Jehovah, and responsibility to His law, and therefore not removed from a sense of brotherhood (ch. 12). The true king was "the light of Israel" (2Sam.21.17). This type he emphasized by his inspired, but none the less courageous, prophetic history as a failure, and by cutting off the succession from his sons. Saul he had privately anointed, and after his election he had publicly ratified and proclaimed him (1Sam.10). So, at personal risk and by the leading of Jehovah, he privately anointed David to the succession (12.24, 16), and, after he became king, he was called from the grave to confirm the stern words of his life (ch. 28). He may have written "the history of Samuel" (1Chr.29.29). There is an important, if sometimes fanciful, delineation of Samuel and his times in Stanley's Lect. on Jewish Church. [E.S.] Samuel, Books of. We can have no better witness than Ewald as to the character of the Hebrew of these books. He groups together Judges, Ruth, Samuel, and Kings, and says that "this great book of the Kings is distinguished on the whole by a peculiar cast of language. Many fresh words and expressions become favorites here, and supplant their equivalents in the primitive history; others that are thoroughly in vogue here are designedly avoided in the primitive history, and evidently from an historical consciousness that they were not in use in the earliest times. I have no hesitation in saying that the established usage of centuries must have sanctioned for the primitive historian a little of what he knew and a cast of language utterly different from those customary in the history of the Kings" (History, p. 133). Ewald gives a true account of the facts, but his explanation is improbable. The ordinary literal inference is that the younger style proves the books of the older style to have been written generations before. Further, the picturesque manner of Judges and Samuel grows less marked in the Kings, as the political horizon enlarges. It reappears in prophetic and personal anecdotes, but not quite in the earlier manner. (2) Text. The text is doubtless replete in places, and the Gk. translation (LXX.) hundreds of years before the Massora, is of varying value for restoring it. But the traditional text is earlier than the attempt to settle it, and is manifestly faithful enough to have preserved most interesting traces of original and contemporary writing. Many have undertaken the restoration of the text, and have sometimes provided a warning rather than an example. The sounder critics are agreed against unnecessary alteration, for a relative presumption is in favour of the difficult reading (see König, Introduction, p. 130). There is a primitive confusion in 2Sam.12.31 (see R.V. marg.), and its parallel
1 Chr. 20:3. By change of a letter we have the Chronicler's false reading, "cut" or "tortured with." The manifestly old text of Sam. may be restored by change of single letters. David set "the Ammonites "upon "or "at" tools, of which the only remaining trace is in stone masonry (1 K.7.9), and made them serve in brick moulding. The usage of the preposition is possibly antiquated, but it cannot mean "under." After the precedent of the Gibonites, they were set to do the hard work of the building, which was characteristic (2 Sam. 5.11,7.2) of David's reign. On the other hand, the Chronicler restores (1 Chr. 20:5) the true text of 2 Sam. 21:19, "Lahmi the brother of Goliath." The early confusion of the text of Sam. appears from the insertion of "weavers" after "Jair," which gives an improbable personal name. The source of the confusion is the comparison of Lahmi's spear to a "weaver's beam," as before of Goliath. This may point to a Bethlehemite origin for the text, Lahmi being probably a palace weaver. (See Smith's D.B. 1st ed. i. p. 202.)

(3) Historical Value. The books of Samuel, though by a right instinct separated, form a continuous narrative, of which the first part continues Judges, the latter part shows slight traces of the style of Kings. We owe every consideration to the creators of history, some 500 years before Herodotus. The Hebrew way of telling a story should be diligently noted. As Gassner has well pointed out, the Hebrew annalist has a purpose unique in literature, and his steadfastness in it is the measure of his inspiration. The monumental records of Babylon, Egypt, Assyria aim at the egotistical glorification of kings and conquests. Herodotus wrote to interest and instruct; Thucydides to point the human causes of events. But our writer selects, from an astonishing mass of vivid contemporary tradition, what we may call sun-pictures of character. Their refer- ence and standard of expression is their relation to the Lord of Hosts, which name occurs first in Samuel. They form an instruction in God's progressive dealings with men. The advance of events is in the background. The finest evidence of the truth of these delineations is the indifference of the writer as to what are regarded as the discrepancies of his nation or his heroes. The difficulties occur not in the development of character, which is always consistent and concatenated, but in numbers, in which a later tendency to exaggerate sometimes creeps into the text, and in the external subsidiary events. No little difficulty arises from the writer's desire to present his picture in one view. To suppose, e.g., two discrepant accounts of David's first relations with Saul is to suppose a remoteness from trustworthy tradition contrary to the evidence. 2 Sam. 17:15 shows David backward and forward from Saul's surroundings, and tending his sheep, when he met Goliath; 16:21-23 adds residence and appointment at court, which belongs later, to complete the picture. With regard to the sources of Samuel, we cannot accept the positive conclusions of scholars. The hypercritical attack upon the historical character of the O.T. tradition, distinguished as it is by the extraordinary richness and weight of its constituent elements," says Gassner, "has its ground in defective points of view, in fundamental principles and presuppositions, arising not from the facts, but brought to them." What Lohr says of a part of Samuel applies to the whole. From the living portraits, chronologically appendant, we are forced to the conclusion that he who could carry out his work, as we find it, must have stood the nearest possible to the things themselves" (p. Lxviii). Men's memories were fresher in these old times, and the historical sense was highly developed in the Hebrew people. 2 Sam. 11:12 alludes to the manner of Abimelech's death, two generations before, as well recollected. With so much lost evidence, absolute conclusions are beyond the grasp of scholarship. But careful study seems to lead to the view that the "colleges" of the prophets, which we meet with in 1 Sam. 10.5.10, and from which which Nathan and Balaam were marked by "the Spirit of the Lord," entered into collecting and preserving the traditions of their nation. These colleges had their origin before Samuel (Num. 11.29). From this prophetic school of history Judges and Samuel came. That there was one method and method seems probable. A similar handling of material, and the similar unchronological appendices at the end of both Judges and Samuel, that the final editor found traditions already in writing seems probable from favourite words, which mark parts of them. The unity of Samuel, on the other hand, seems clear from its pervading purpose, which was to show that the new departure of God's kingdom on earth in a theocratic monarchy was based upon heroic personality (Lohr, p. Lxiv). The vividness with which the first heroes of the monarchy stand out, both in faults and virtues, seems to belong to an age before the material greatness and cosmopolitan horizons of Solomon had dimmed the earlier and proper understanding and patriotism. With this agrees the archaic geography (notice, e.g., 2 Sam. 17:15-21), in the midst of which the story moves securely. A note such as 1 Sam. 27:6 may well have been added later. (4) Contents. (i) 1-12. The story begins with the failures of Egypt, and puts David to be the large-minded mediator of the new regime. (ii) 13-31. The painful falling away of Saul, and the rise of David and his sufferings. The conflict with Goliath and the pathetic friendship of David and Jonathan, cemented by the sympathy of equal faith and equal courage, are incidents here. (iii) 2 Sam. 1-15. The formal establishment of David, first as king over Judah, and then (5-10) over all Israel. (iv) 11-20. David's sin, chastisement, and restoration. (v) 22-23. David's great "song," which, like that of Moses, attributes all to Jehovah; and his "last words," where (23.1) "pleasant in the psalms of Israel" refers us to those noble poems, often with ancient historical inscriptions, which give his inner biography. Usage rules out the rendering "darling of Israel's songs," and the meaning suggested by the Oxf. Dict. seems also unsatisfactory. (vi) Before and after the parable of the blind man and the two sons. Distracted from the historical narrative, throwing
additional light on Saul's character and David's life; and a list of those men whose bravery for the Lord had given security to the kingdom. And there was a law of above all, that when an account of the plague, which chastened the temptation of David and the people to trust in man. The poems in the books are: (a) Hannah's "prayer," (b) David's "elegies" over Saul and Jonathan and over Abner (1.17-27, 3.33.34). The former elegy was probably known as "the bow" by Jonathan's prowess with the bow (ver. 22 and 2Sam.20.36), and Saul's death by archers. (c) David's "song of praise," and his "last words." There are also popular songs and sayings, and a probable snatch of a soldier's song (see Klostermann on 2Sam.23.8). The palindrome and still literature of Isaiah is a wonderful study of the history bears witness to the authenticity of the poems. The early variation of the text of the "song" in 2Sam.22 and Ps.18 argues so far an ancient independence of the tradition, as also does "the bow" being in the lost song-book of Jashar. The suitable nature of Hebrew "philistines kindred" historical presentation of character is manifest. The fancy portrait of David as a primitive and half-heathen savage is shattered upon the elegant taste and generous tact of "the bow" song, which critics agree is his. Some find two discrepant stories (i) of David's adventures with Saul, and (ii) of the wilderness and Saul's death. In (i) there are essential differences, indicating that there were two separate pursuits. In (ii) the Amalekite was a liar. He did not kill Saul, but found the corpse and despoiled the regalia. It is the simple confidence of the writer which sets the stories side by side. (g) Relation to the History of Worship and the Hagiography. A careful study of Judges and Samuel shows it to be most precarious to assume that a thing did not exist because it is not mentioned. Men and women are drawn with unequalled precision and felicity. Things and sometimes events are the subject only of incidental allusion. We only find from the twenty singularities and consistent absence from the later wars. The spoiling of Saul's character by his elevation is forcibly delineated, but the increase in his regal state and the gradual organization of a standing army we derive only from incidental allusions. Many hints of the same kind become indelible without the background of the Mosaic covenant, e.g., the existence of the tabernacle at Shiloh, altered and strengthened; coming up to the feasts (1Sam.1.3); high-priest, ephod (passim), and priests (3, et passim); incense (2.28); differing kinds of sacrifice, shewbread (21.4); the "breach of Uzah" and "the bearers" of the ark after it (2Sam.6.7, 13; 1Chr.15.13), "Levites," who are mentioned in 1Sam.6.15, 2Sam.15.24; priest's portion of sacrifice (1Sam.9.24); the grief of Eli and his daughter on the loss of the ark (4.18-22); the dwelling (or sitting) of Jehova upon (or among) the cherubim (4.4; 2Sam.6.2); theHALPERN. The total destruction of Shiloh by the Philistines, the massacre at Nob (1Sam.22.19), and the disturbed state of the times made normal customs of worship well-nigh impossible, but David's heart is set upon a central sanctuary as soon as "it can be had" (2Sam.7); and there is a probable allusion to the timeworn and exhausted temple (1Sam. 16.21, 4.32). Note the rise of king's law, differentiated 1Sam.30.25 i.e. not "for ever." The existence of a preceding literature and history is similarly made clear. There is public allusion to it by the unknown "man of God" (2.27), by Samuel (15), and by Nathan (2Sam.7.6). The argument is not that Saul was conscious of his own lack of accuracy (1Sam.4.8, 6.6). There are reminiscences in Hannah's prayer of Deut.32; in David's song of Ex.15 and Deut.32 and of Sinai. These allusions to Deut. are so much acknowledged that some critics use them as an argument for the spuriousness of the song. In Deut. David's "last words" are a perfect quota of clear reminiscences of Balaam's poems. Finally, there are favourite words, lists of tools and utensils, and of foodstuffs, a detailed list of the recipients of David's presents from Philistine booty (1Sam.30.26), a curious symbolic action of "pouring out water before the Lord" (7.5; 2Sam.23.16), all peculiar and characteristic of these books. These things increase our feeling of nearness to the times. See LÖHR'S edition of Themisius (Leipzig), to be read with caution, but valuable in exegesis and textual criticism; Klostermann, in Strack-Zöckler, critical emendations mostly wrong, but independent and suggestive; Keil, in Keil and Delitzsch (T. & T. Clark), the commentary not out of date, but not always right; KIRKPATRICK, in Camb. Bible. For text: Driver's Notes; Kittel's Heb. Bible (Nutt), very valuable, but often with unnecessary changes. General: Ewald, History; Stanley, Lect. on Jewish Church; Milman, Geikie—all still useful; GASSER, Das A., T., u. d. Krist (Stuttgart, 1906) has valuable remarks and copious bibliography. GIRDLESTONE, Deuterographs (Clarendon Press), and Wood, Heb. Monarchy (Eyre & Spottiswoode), give the parallel texts. For geography: BUHL, Geographie (Leipzig); STANLEY, Palestine; Smith, Historical Geography, and the arts, in this Dict. on each site. For Septuagint [Samaritans]. Sanabassar (1Esdr.2:12,15) or Sanabas'sar (6.18,20) = SHESHBAZAR. San'asib. The sons of Sanasib were priests who returned with Zerubbabel (1Esdr.5:24 only). Sanballat, called the "Horonite" (Ne.2.10, 19, 13.29), a Moabit of Heronaim (Gesenius) or possibly a name of Bethhoron (E.F.L.J.) [Samaria]. Sanballat held, apparently, some civil or military command in Samaria, in the service of Artaxerxes (4.2), and on Nehemiah's arrival in Judaea he became one of the chief
opponents of the Tirshatha. His companions in this hostility were Tobiah the Ammonite and Geshem the Arabian (2 Esdr. 4:4). Cf. Nehemiah; Nehemiah, Book of; and Ne. 6. There was a Samaritan faction also in Jerusalem itself bitterly opposed to Nehemiah, a prominent supporter of which was the high-priest Eliashib, whose grandfather had married Sanballat’s daughter (13:28). [N.C.B.] Sanctification. [Holy; Justification.] Sanctification, the rendering of two cognate words in Heb. (1) gōdheš, the common word for “holiness,” is applied to the tabernacle and to the temple, or to portions thereof. (2) miq̄dāš, “holy place,” the more expressive and prevalent word, applied also to both. It is also applied to old Canaanite and heathen sanctuaries (e.g. Is. 16:12). It is not correct, however, to say (as is said in Hastings, D.B. iv. 395 note) that miq̄dāš was synonymous with bāmā, or “high place,” as if any and every bāmā might be called a miq̄dāš. In Am. 7:13 the king’s “chapel” (A.V.) is a miq̄dāš, “sanctuary” (K.V.). [Critics apply the term “sanctuary” to these places of worship, in which the Israelites fought to time but never became a “sanctuary.”] The Sand, familiar to all residents in Palestine and Egypt, hence used figuratively in several passages of Bible—Gen. 22:17, etc.—generally to describe numerical extent or greatness. In Jos. 6:3 and Pr. 27:3 used of heaviness, or despondency. [S.N.S.] Sandals (na’ālyāyim). These were made of leather, and attached to the feet with leather thongs (Gen. 14:23). They were not worn indoors, nor in the sanctuary (Lu. 7:38; Ex. 3:5; Jos. 5:15). To go about barefoot was a sign of mourning (2 Sam. 15:30; Ezek. 24:17, 17:23). The symbolic action of giving a sandal to any one denoted a declining of a duty or right (Deut. 25:10; Ru. 4:7, 8); and the phrase “to cast the sandal [or shoe] over” meant “to take possession of” (Ps. 60:8). [Law in O.T.] Shoes, as distinct from sandals, appear as worn by Jews in Assyrian monuments.

Sanhedrin. This term (which is borrowed from the Gk.; hence Sanhedrin is an incorrect form) is first used by Josephus (14 Ant. v. 4; 1 Wars viii. 5) in connexion with the councils appointed by Gabinius in 54 B.C., one in each of the five provinces into which he divided Palestine. A few years later Herod was summoned to appear for trial before the Jerusalem Sanhedrin (14 Ant. ix. 3-5), an indication that it was firmly established at that time. But there was a Council of the Sanhedrin in Jerusalem in the time of Antiochus the Great (12 Ant. iii. 3), 223-187 B.C., the members of which, with the priests and scribes, were exempted from certain taxes. [Synagogue, The Great; Elder.] According to Jewish tradition Joseph ben Josèr and Joseph ben Johanan, c. 170 B.C., were the first president and vice-president of the Sanhedrin, and formed the first of a line of duumvirates which ended with Hillel and Shamshai in the second half of the 1st cent. B.C. The chain of tradition is carried back from Josè through the Men of the Great Synagogue, the prophets, the elders, and Joshua, to Moses, who is said to have organized the first Sanhedrin (Pirke Abot i. 13; Sanh. i. 6; and Gemara). This tradition supports the theory that from the time of Moses there was always a representative body (though not in session at all periods) which represented the ancient and igneous High Priestly Order. It had a life of its own, and was preserved from the time of Moses until the destruction of the temple, though it was never a regular governmental body. The members of the Sanhedrin were the High Priest, the Elders of the Great Synagogue, and the Elders of Jerusalem (yeporot), and finally the Sanhedrin, the one merging into the other. Some (e.g. Lauterbach, in Jews, Eneyed.) assume two councils in Jerusalem: a political Sanhedrin of Judaea, and a religious Sanhedrin of Judaea, which administered the criminal law, and was presided over by the high-priest, and a religious Sanhedrin, which had control of matters pertaining to the temple service, sacrifices, the priesthood, etc. (cf. Ac. 5:21, where both the Sanhedrin and the Gerusia are mentioned).—I. The Great Sanhedrin. (1) Composition. The Great Sanhedrin was composed of priests, elders, and scribes, in what proportion is not known. It was presided over by the Nasi (prince, or patriarch), assisted by a vice-president, the Ab Beth Din (Father of the House of Judgment), making a total of 71 members, 23 from the local council of Elders (Sanh.), and 48 from the Sanhedrin, 50 of whom were secretaries, one to record acquittals and the other condemnations (iv. 3). Vacancies were filled up from among those who had held office in each of the lower courts in succession (see II.). A man was not elected to membership unless he was faultless morally and physically, versed in language, and possessed such knowledge as would qualify him to decide cases of witchcraft, etc. (Menach. 65a; Sanh. 17a). (2) Functions, etc. The Sanhedrin met in the Lishkath ha-Gazith (Hall of Hezen Stones) within the temple area (Sanh. xi. 2), and was in session every day except sabbath and festivals, between the hours of morning and evening sacrifice (Sanh. 88b). It was the supreme Jewish tribunal, deciding questions religious, criminal, and civil. On the destruction of Jerusalem the seat of the Sanhedrin was transferred to Jabneh, and finally to Tiberias, where it gradually lost its distinctive character, and became extinct c. 425-11. The Lesser Sanhedrin. (1) There were courts of three in all parts of the country, the members of which were appointed and ordained by delegates from the Great Sanhedrin (Sanh. 88b; Maim. Sanh. ii. 7, 8). The cases to be brought before these courts are
enumerated in Sanh. i. 1-3. (2) Towns with not less than 120 representative men had a small Sanhedrin of 23 members, also appointed by the Great Sanhedrin. The power of the lesser Sanhedrin was also limited, but extended to capital causes in certain cases (Sanh. i. 4). There were two of these Lesser Sanhedrins in Jerusalem (Sanh. xi. 2). [COUNCIL.]—Buchler, Das Synk. in Jerusalem, etc.; Bacher, in Hastings, D.B. (5 vols. 1904); art. Synhedrin; Ginsburg, in Kitto's Cyc. of Bib. Ltd.; Mathews, in Rev. J. [h.h.]

Sannah', a town in the S. of Judah (Jos.15.31 only). The word means "palm branch." The site is unknown. [C.R.C.]

Saph (2Sam.21.13). [SiBBECAI.]

Saphat (1ESd.5.9) or Saphat'as (8.34) = Saphat'ahiah, 2.

Saphir (R.V. Shaphir), one of the villages addressed by Micah (1.11), not elsewhere mentioned. By Eusebius and Jerome (Onomasticon) it is described as "in the mountain district between Eleutheropolis and Ascalon." Three villages called Çš Siphër (plur. of Siphër) exist: a hill near Beersheba, Saphir of Ashkelon. This site is apparently the Isphar of the list of Thothmes III. (No. 78) in Philistia, noticed in 16th cent. B.C. [C.R.C.]

Saphir'ah, wife of Ananias, 2, and participant in both his guilt and his punishment (Ac.5.1-19).

Sapphine (Heb. sappir), a precious stone, apparently of a bright blue colour (see Ex.23.10); the second in the second row of the high-priest's breastplate (28.18). It was extremely valuable (Job 28.16); and one of the precious stones of the king of Tyre (Ezk. 28.13). It is mentioned altogether eleven times in O.T., once in N.T., and once in Apocalypse. Notwithstanding the identity of name in Heb., Gk., Lat., and Eng., it is practically certain that the ancient sapphire was not the stone which we denote by that word, viz. the blue (dark or light) variety of corundum. As the best examples of these come from Ceylon, Cashmere, and Burmah, and might be readily to have been brought to the Jews prior to the days of Alexander the Great; and besides this, it is clear that the sapphire described by Theophrastus and Pliny is the lapis lazuli. It is fairly hard, but can be engraved without much difficulty, takes a good polish, and has been for long, as it still is, much valued for decorative purposes, the best specimens being obtained in, and to the E. of, Persia. It was so employed in Egypt; was known to, though apparently not common among, the Assyrians and Babylonians when they appear in Biblical history; was occasionally engraved in pre-Roman Greece; and has since then been largely used. [T.R.G.B.]

Sara.—1. Sarah, wife of Abraham (Heb. 11.11; rPe.3.6).—2. The daughter of Raguel. She had had seven husbands (Tob.2.7ff.), and was afterwards married to Tobias, who drove away the wicked spirit which had slain her previous spouses (7,8).

Sareah (2Sam.21.13) = Sareah, 1.

Sarah.—1. The wife of Abraham, and mother of Isaac. Her name is first mentioned in Gen.11.29. According to 20.12 she was Abraham's half-sister, the daughter of his father, but not the daughter of his mother. Jewish tradition identifies Sarai with Iscah, the daughter of Haran and sister of Lot. The name "Sarah" signifies 'princess,' but the meaning of "Sarai" is still doubtful. The change of names was made thirteen years after the birth of Ishmael, when the covenant of circumcision was given and a son was promised to Sarah (17.15,16). The incidents of her life have already been related in connexion with Abraham, Hagar, Isaac, and Ishmael. She came with Abraham from Ur to Haran, from Haran to Canaan, and accompanied him in all the wanderings of his life. Her only independent action is the demand that Hagar and Ishmael should be cast out. The times in which she plays the most important part in the history are when Abraham was sojourning, first in Egypt, then inGerar, and where Sarah shared his deceit towards Pharaoh (12.11-15) and towards Abimelech (20.9-11). She died at Hebron at the age of 127 years, 28 years before her husband, and was buried by him in the cave of Machpelah. Imperious, harsh, and jealous, it is said of the times of Sarah's life she was meek and quiet spirit, she is held up to us as pattern for wife and mother. Sarah is alluded to only once more in O.T. (Is.51.2), where she is spoken of as the mother of the chosen race. In N.T. she is referred to as a type of conjugal obedience in rPe.3.6, and as one of the types of faith in Gal.3.6, and he is mentioned in St. Paul in Ro.4.19,9.9, and the story of Sarah and Hagar is treated allegorically in Gal.4.21-5.1 to illustrate the privileges of Christians, the children of promise.—2. (Num.26.46) = Sareah, the daughter of Asher. [h.c.b.]

Sara', the original name of Sarah, wife of Abraham. It is always used in the history from Gen.11.29 to 17.15, when it was changed to Sarah.

Sarai—as. 1. (1ESd.5.3) = Saraiah, 2.—2. (1ESd.8.1; 2ESd.1.1) = Saraiah, 7.

Sarac. The A.V. treats this word as the name of a place (1Mac.14.28); but it seems that the Gk. left an untranslated expression (ἐν Σαρακέω), which is afterwards translated, when speaking of the great gathering which elected Simon the Hasmonaean to govern Israel in 140 B.C. The Arab. sirm, "army," and sārem, "sword," suggest that the "host of God," or army of Israel, is meant. [C.R.C.]

Saraph. Mentioned in 1Chr.4.22, among the descendants of Shelah the son of Judah.

Sarcebonas, a collateral form of the name Esarhaddon (Toh.1.21).

Sarde'sus (1ESd.9.28) = Aziza.

Sardine, Sardius (Gk. sardion; Lat. sarda; Heb. 'ādhem), occurs in Ex.28.17,39.10 as the first stone in the first row of the high-priest's breastplate, and among the treasures of the king of Tyre in Ezk.28.13. In Rev.4.3 He Who sat on the heavenly throne "was to look upon like a jasper and a sardine stone." A sardius (Rev.21.20) was the sixth foundation of the wall of the heavenly Jerusalem. The sard, of which Theophrastus and Pliny give descriptions, must not now be cleared from its bright clear red chalkedony, pale to deep in shade, which is not uncommon and is obtained in many countries. It was often engraved by Greek and Roman artists, and is sometimes
used for Assyrian cylinders and Phoenician scarabs. As the Heb. "dāhem" may come from a root meaning "redness," it probably denotes the same stone. [T.R.G.B.]

Sardis, a city about 3 miles to the S. of the river Hermus, rises below the range of the Tmolus (Bos Diğāh), on a spur of which its acropolis was built. It was the ancient residence of the kings of Lydia. Sardis was in very early times, because of the extremely fertile character of the neighbouring region and its convenient position, a mart of importance, until the invasion of Asia by Alexander. The art of dyeing wool is said by Pliny to have been invented there; and at any rate Sardis was the entrepôt of the dyed woollen manufactures. It was also the place where the alloy ectrum was procured; and thither the Spartans sent, in the 6th cent. B.C., to purchase gold to gild the face of the Apollo at Amyclea.

It recovered the privilege of municipal government (and, as was alleged several centuries afterwards, the right of a sanctuary) upon its surrender to Alexander the Great, but its fortunes for the next 300 years are very obscure. It changed hands more than once in the contests between Roman and Parthian conquests which arose after the death of Alexander. In the year 214 B.C., it was sacked by the army of Antiochus the Great. After the fall of Antiochus it passed, with the rest of Asia on that side of Taurus, under the kings of Pergamus, whose interests led them to divert the course of traffic between Europe and Asia away from Sardis. Of the few inscriptions which have been discovered, all, or nearly all, belong to the time of the Roman empire. Yet there still exist considerable remains of the earlier days. The massive temple of Cybele still bears witness in its fragmentary remains to the wealth and architectural skill of the people that raised it. On the N. side of the acropolis, overlooking the valley of the Hermus, is a theatre near 400 ft. in diameter, attached to a stadium of about 1,000. This probably was erected after the restoration of Sardis by Alexander. The modern name of the ruins at Sardis is Sarıhisar, which is to be explained by the appearance of the locality, on approaching it from the N.W., as a complete solitude. The Pactolus is a mere thread of water, nearly dry in summer. The Wādī-i-tchāi (Hermus), in the neighbourhood of the town, is between 50 and 60 yds. wide, and nearly 3 ft. deep. In the time of the emperor Tiberius, Sardis was desolated by an earthquake, which is said to have changed the whole face of the country. The calamity was increased by a pestilential fever which followed. In the time of Pliny, Sardis was included in the same conventus juridicus with Philadelphia. Sardis is only mentioned in the Bible in Rev.3:1-6. Sardîles, The (Num.28:26). [Sered.]

Sardonyx (Rev.21:20 only). The sardonix, like the sard [Sardine], is a variety of Agate, and consists of "a white opaque layer, superimposed upon a red transparent stratum of the true red sard." (King, Antiquie Gems, p. 266.) It is frequently employed by engravers for the purposes of a signet-ring.

Sare'a, one of Ezra's swift scribes (2 Esdr. 14:24).

Sarp'tn (Lu.4:26), Gk. for Zarephath.

Sargon (Is.20:1), in Assyrian Sargina or Sarru-Riunu, succeeded Shalmaneser IV. in 722 B.C. (Tebet 12). His origin is unknown, but he claimed descent from an early Assyrian ruler named Bēl-bālī. Samaria, the siege of which began in the preceding reign, he claims to have taken, carrying 27,290 people into captivity. More important was Sargon's conflict with Hamunābi, of Elam and Merodach-baladan of Babylon, but the result of his battle with the allies at Dēr seems to have been doubtful. In 720 B.C. took place the revolt of Yau-bridi, or Ilu-bi'di, of Hamath, in league with Arpad, Damascus, Samaria, etc., ending in their defeat at the battle of Qarqar. Hanun of Gaza, who seems also to have been one of the league, was defeated, with his supporter Šib'e (So or Sabaco), at Raphia. In 719 came the invasion of Ararat, and the following year (718) Kiakki of Tutor was captured and brought to Assyria. The same fate overtook Pisiris of Carchemish, which then became an Assyrian province (717). In 716 B.C. Sargon went against Rusā of Ararat, and, entering Media, received the tribute of 23 Median chiefs. Dayanku (Dejoices) of Minni, urged by his Assyrian allies, attempted in 714 to make an expedition against Meliddu, and besieged Tīgarrimine [Togarmah], which was captured, and its king carried away to Assyria. In 711 B.C. the expedition against Ashdod took place. Sargon had deposed king Azuri, and set his brother Aji-miti in his place, but a revolt took place under the leadership of Yawaini, whereupon Sargon, having recaptured the city, annexed the district to Assyria. Philiistia, Judah, Edom, and Moab seem to have encouraged this revolt, possibly supported by Merodach-baladan, against whom Sargon had carried on war. The expedition to Melid, besieging Babylon, the Chaldean took refuge in the marshes of Bit-Yakin, the seat of his tribe, and Sargon became king of Babylon. Sar-gon's generals were likewise successful against Moschi and Ararat, and, hearing of this, the kings of Cyprus sent gifts, and Sargon caused to be set up at Idalium the stele which is now at Berlin. Comagene was annexed to Assyria about 708 B.C., and a dispute with regard to the succession in Ellipi led to a conflict with Elam in 707, after which the history of his reign is doubtful. His death, apparently by assassination, took place in 705 B.C., when his son Senacherib became king. He is re-nowned as the builder of Dūr-Sargina (Khorsabad, also known as Sarghum), a model fortified palace, adorned with inscriptions and sculptures, and provided with a noteworthy temple-tower. See The O.T. in the Light of the Records, pp. 362 ff.; and Winckler, Die Keilschrifttexte Sargons (first ed.).

Sarid (Jos.19:10,12), on S. border of Zebulun, W. of Chisloth-tabor. Possibly for Shadid (LXX. Sédouk). The ruin Tell
SARON

Shadid, at the foot of the hills of Zebulon, is 4½ miles W. of Isreal or Chishloth-tabor. [c.r.c.]

Sharon (Ac.16.35 only), the SHaron of O.T.

Sarothieh's sons, among the sons of the servents of Solomon who returned with Zerubbabel (Ez.5.34 only).

Sarsechim (Je.39.3) arises probably from a primitive confusion in the text of ver. 3, which should be conformed to ver. 13. The correction proposed under Samgar-nebo has some probability, as no meaning is assigned to Sarsechim, and the LXX. joins it to the preceding Nebo. An alternative explanation, suggested by Col. Conder, regards Sarsechim as a plural title of Nergal-sharzer and Samgar-nebo, possibly borrowed from the Akkadian sarサ, “king's son.” [F.e.s.]

Sarpuch (Lu.8.35) = SERUG.

Satan, the name of the principal evil spirit. —Development of the doctrine. (1) The pre-captivity books of O.T. characteristically refer little, except in Gen.3 and Lev.16, to Satan and evil spirits, for their aim was to establish mono-theism, to the exclusion of the popular worship of evil, etc. O.T. Companions of evil spirits were stigmatized as superstition, and punished as crime (Deut.18.10; Lev.19.31, 20.6, 27; 1Sam.28.3; 2K.21.6, 23, 24; Is.8.19, 19.3; 1Chr.10.13; 2Chr.33.6). The drawback of this virtual ignorance of evil spirits was that it resulted in an apparent ascription of evil to God, e.g. Deut.2.30; Jos.11.20; Judg.9.23; 1Sam.26.19; 2Sam.16.10, 24.1, 10; 1K.22 = 2Chr.18). In all these cases later writers would have said that the evil was due to Satan, and was permitted by God (see 1Chr.21.1, and contrast 2Sam.24.1, 10). (2) The Captivity saw a development of views about Satan, which does not necessarily demand Babylonian or Zoroastrian influence to explain it, resulting in a definite Jewish demonology and angelology (Dan.10, etc.). The problem of the sufferings of the righteous became more insistent. The solution of the Psalmist (Ps.37) no longer seemed adequate. The sufferings were now explained as disciplinary, or atoning (Is.53); and it was suggested that there is a life beyond the grave, in which all earthly wrongs are righted (Job 19.25; Dan.12.2). But these explanations failed completely to satisfy. Gradually the conviction grew that there existed a malignant power, the enemy of man, and the persistent opponent of the Creator's benevolent designs. This supposition also served to account for temptation, which it was now felt could not be ascribed to an all-holy God (Eccles.15.11, 12). These ideas first found clear expression in the book of Job, and thence the transition to the full N.T. doctrine is easily traced (Zech.3.1, 2; Wis.2.23; Eccles.21.27; Ba.4.7, 35; Tob.3.8, 17, 6.7, 14-17, 8.3). —Names and Titles. “Satan” in O.T. usually has the article, haddān (so Job 1.6, etc.; Zech.3.14). It occurs once anarthrous, as a proper name, sālān (1Chr.21.1). In N.T. it is Sarαν, also very frequently translated as ὁ διάβολος, and once as ὁ κατηγορός (so Alex.MS., followed by West Hors.); a rabbinical form of κατηγορός (Rev.12.10). The word signifies adversary (Num.22.32; 1K.11.14), also accuser (Ps.109.6). As applied to the evil one, the latter sense predominates—as is evident from Job 1.9, 24; Zech.3.1, 2; and from N.T. translations διάβολος (malicious accuser, calumniator), and κατηγορός (accuser). Thus Satan, according to the etymology of his name, is he who calumniates God's name (Gen.3.15), and man to God (Job 1.9), with the object of setting them at variance. His other titles are “the evil one,” ὁ πανοχος (about 14 times), “the tempter,” ὁ πει σάρων (Mt.4.3; 1Th.3.5); “the enemy,” ὁ ἐχθρος (Mt.13.38); “the prince of the [or, this] world,” ὁ ἄρχων τοῦ κόσμου [τοῦτων] (Jn.12.31, 14.30, 16.11; cf. 1Cor.2.8); “the god of this age,” ὁ θεὸς τοῦ αἰωνος τούτων (2Cor.4.4); “the prince of the demons,” ὁ ἄρχων τῶν δαμαίων (Mt.9.34); “the prince of the power of the air,” ὁ ἄρχων τῆς ἐξουσίας τοῦ θεοῦ (Eph.2.2) “the dragon,” ὁ ἄρχων (2Cor.12, 14, 15, 10.20); Beelzebul or Beelzebul [Baalzebul] (Mt.10.23, etc.); Beel, or Belial (2Cor.6.15); possibly also Aza- zel (Lev.16.8), and Asmodeus (Tob.3.8, 17), and Apollyon, i.e. “the destroyer” (Rev.9.11); not, however, Lucifer, for the application of Is.14.12 to him is due to a confusion of names. The title is a piece of mistaken exegesis.—Personality. Every attribute of personality is repeatedly ascribed to Satan in N.T. The only question is, whether this language may not possibly be figurative—evil being personified to express vividly its seductive power. This is hardly possible; possibly Satan, who is often regarded as the accuser in O.T., is realized vividly the personality of demons; and had this view been seriously incorrect, He would hardly have used language calculated to confirm it. (ii) The theory of an impersonal devil presents greater difficulties to faith, than the theory of a personal one. Evil is not merely negative; it opposes itself actively to God, and to all that is good. It is much easier to conceive a rebellious being willing to do this, than a rebellious force. Resistance to God by anything infra-personal is, to modern minds, almost unthinkable (see the present writer’s Pro Fide, pp. 223, 224).—The Position of Satan in the Universe. It is generally supposed that Satan is presented in Scripture as exceedingly great. He is the “ruler” of this world, and its “god” (Jn.12.1, 31, 14.30, 16.11; 2Cor.4.4). It is even said that “the whole world lieth in the evil one” (εἰς τὸν πανοχον κεῖται, 1Jn.5.19). All the kingdoms of the earth and the glory of them are his to bestow (Lu.4.5). Mankind, through sin, has come under his power; and it is he who inflicts death upon men (Heb.2.14). His followers are apparently more numerous than the true children of God (Mt.7.13, 14). Through his wiles and subtlety (Eph.6.11; 2Tim.2.26), whereby he even transforms himself into an angel of light (2Cor.11.14), he is able to deceive the world. He also has at his command the power to pass the destruction of the very elect (Mt.24.24). Sometimes he controls the elements (cf. Mt.8.26), and inflicts disease, not only by way of actual “possession,” as in the case of the gospel demonsiacs [DEMONIACA1 POSSESSION], but also in ordinary cases (e.g. fever, Lu.4.39; sin, Lu.5.21; crooked bodies, Lu.13.10; Lou.11.14; blindness, Mt.12.22; epilepsy, Mt.17.15; sore boils [elephantiasis?], Job 2.7; “a thorn in the flesh,” 2Cor.12.7). He
SATAN can also inflict other forms of physical evil, such as imprisonment (Rev. 2:10), and loss of life and property by lightning, tornado, or robbery (Job 1). The power of Satan extends beyond this earth, and disorders those higher spheres. The existence of the Holy Scriptures, "heavens" (shâmâyim, öpovaoi; both forms are plur.). In O.T. he occasionally appears in the highest heaven (1 K. 22:21; Job 1.2). In N.T. he is called "the prince of the power of the air," i.e. of the super-terrestrial regions or "heavens," where he rules over a hierarchy of evil angelic powers (Eph. 6:12; 2) [Diss.]. It is perhaps because the things in the heavens have been polluted by the presence of Satan's evil hierarchy, that they, as well as the things on earth, require to be reconciled to God by the blood of Christ's cross (Col. 1.19,20). But Satan's power, though great, is neither original nor absolute. He is no eternal, unrecreated being, as is the Zoroastrian Ahura, but a creature. This is obvious from the book of Job, where he attends the court of heaven as one of the "sons of God" (1.6.2.1). His power, therefore, is delegated and, moreover, strictly limited. The subordination of Satan to God is most distinctly marked in O.T. than in N.T. In O.T. it is almost complete (see 1 K. 22:20-23; Job 1.12,2.6). In N.T., Satan seems to assume a more independent attitude, and, we may add, an attitude of greater malignity. It is as if, along with the manifestation of the absolute good, evil also was allowed to manifest itself in darker colours and in more irreconcilable opposition in N.T. than in ancient and arranges against the kingdom of God a kingdom of Satan—against the hierarchy of good angels a hierarchy of evil ones. Even in N.T., however, the ultimate subordination of the devil to God is a familiar truth. Thus, at our Lord's temptation, Satan, while boasting of his power, yet confessed that it was delegated (Iouc- oivopóAovav, Lu. 4.6). The devils recognized the power of Jesus, and came out at His word (Me. 1.24,34.5.11, etc.). They feared lest He should send them to "the abyss" for punishment (Lu. 8.31). If Satan is "the strong man," yet there is a Stronger, Who can bind him? Who can arrest and arranges against the kingdom of God a kingdom of Satan—against the hierarchy of good angels a hierarchy of evil ones. Even in N.T., however, the ultimate subordination of the devil to God is a familiar truth. Thus, at our Lord's temptation, Satan, while boasting of his power, yet confessed that it was delegated (Iouc- oivopóAovav, Lu. 4.6). The devils recognized the power of Jesus, and came out at His word (Me. 1.24,34.5.11, etc.). They feared lest He should send them to "the abyss" for punishment (Lu. 8.31). If Satan is "the strong man," yet there is a Stronger, Who can bind him? Who can arrest and arranges against the kingdom of God a kingdom of Satan—against the hierarchy of good angels a hierarchy of evil ones. Even in N.T., however, the ultimate subordination of the devil to God is a familiar truth. Who can arrest and arranges against the kingdom of God a kingdom of Satan—against the hierarchy of good angels a hierarchy of evil ones. Even in N.T., however, the ultimate subordination of the devil to God is a familiar truth.
SATHRAZAN

Saul is an angelic being of great power and wisdom, to whom was entrusted at the creation an extensive authority over the universe, analogous to that which man exercises over nature; that he was subjected to a probation, in which he was found wanton, and, rebelling against God, introduced sin and disorder into the universe. It is generally supposed that his period of probation is already over; but the toleration which God extends to his evil-doing would be more intelligible, if it is permissible to suppose that it extends to the Last Judgment. There seems no adequate ground for hoping (much less believing) that he will ever repent and be pardoned. The only passages which seem to favour this view (1 Cor. 15:28; Col. 1:19, 20) are obscure, and can be otherwise explained.

Rather does Holy Scripture seem to regard the punishment of Satan as already nearly at an end (255, A. V. recto, verso), its nature we cannot only dimly conjecture. Perhaps an essential part of it will be the loss of free-will—degradation from the rank of a free agent. This view provides for the final extinction of moral evil. (5 vols. 1904); works of systematic theology.

Sathrabuzanes (1 Esd. 6:3, 7, 27) = Soter-Pharnazoal.

"Sathrabuzanes" (Heb. s *irmim), the rendering in A.V. of the Heb. plur. noun, which, having the meaning of "haire" or "rough," is frequently applied to "he-goats." The s *irm of Is. 13:21 and 34:14, where the prophet predicts the desolation of Babylon, have, however, probably nothing to do with goats, either wild or tame. According to the old versions, and nearly all the modern ones, "sathrabuzanes," and the word refers to mythical creatures, or "satyrs"—that is, demons of woods and desert places, half-men and half-goats (cf. Lev. 17:7; 2 Chr. 11:15). On the other hand, it has been suggested that s *irm may refer to dog-faced baboons, of which one species (Papio ursinus) is found in Egypt and Arabia, while a second (P. arabicus) inhabits S. Arabia. Both have a mantle of long hair on the shoulders, and the former, like the thoth (P. thoth), is commonly represented in Egyptian frescoes and sculptures. Since, however, no member of the group is found in Syria or Palestine, the proposed identification cannot be regarded with much favour, especially as Biblical writers would be likely to take their similes from familiar animals, mythical or otherwise.

[R.I.L.]

Saul, more accurately Shaul. — 1. The sixth in a list of eight Edomite kings, apparently elective, and successor to Samlah, grandson of Canaan (as in 1 Chr. 1:48, R.V. has Shaul). As belonging to "Rehoboth by the River" (i.e. Euphrates), he seems to have been of foreign origin.—2. The first king of Israel, the son of Kish, a Benjamite, and grandson of Abiel (1 Sam. 8:1, 2, 14, 51), or, if we accept the genealogies in 1 Chr. 8:33, 9:9, 39, this Saul was probably the son of Nahash, where was Kish's sepulchre (2 Sam. 21:14) was probably Saul's birthplace. His family was of little importance (1 Sam. 9:1, 21). Saul's character is illustrated by the fierce, wayward, fitful nature of the tribe, and in part accounted for by the struggle between the old and new systems in which he was involved. To this we must add a taint of madness, which broke out in violent frenzy at times, with long, lucid intervals. He was remarkable for strength and activity (2 Sam. 1:23), and (like the Homeric heroes) of gigantic stature, taller by head and shoulders than the rest of the people, and of that beauty denoted by the Heb. for "goodly" (1 Sam. 9:2); cf. the description "glory [or, beauty] of Israel" (2 Sam. 1:19). Kish sent his son Saul in search of a drove of asses, gone astray on the mountains (1 Sam. 9:3-10). In this search Saul seeks Samuel's aid (9:5, 6). Samuel had received (cf. 8:7-9) a divine intimation of the approach and future destiny of the king of Benjamin, and Saul, his great-grandson, an adventuring stranger, and next morning poured over Saul's head the consecrated oil, and with a kiss of salutation announced to him that he was to be the ruler and (LXX) deliverer of the nation (9:25-10:1). Saul returned to Gibeah by a route for which see Ziph; its incidents contrasting with that of his predecessor, which may be called the private, inner view of his call. The outer call, setting its seal on the former, follows: An assembly was convened by Samuel at Mizpeh, and lots were cast to find the tribe and family which was to produce the king. Saul was named, and (by a divine intimation) found hidden among "vagabonds" of a thousand, the king of Ammon's gilead. "The Spirit of the Lord came upon him," as on the ancient judges. Three (or six, LXX.) hundred thousand men followed from Israel, and thirty (or seventy, LXX.) thousand from Judah: and Jabshe was rescued. The punishment of the murmurers was demanded, but renounced by Saul; and the murmurers who were enumerated anew at Gilgal (11: 1-15). He still, however, so far resembles the earlier judges, as to be virtually king only of his own tribe, Benjamin, or of the immediate neighbourhood. But this limitation was soon to cease. The Philistines would naturally oppose the quickening of their neighbour's national life, and in the second year of his reign Saul began to organize an attempt to shake off their yoke. A Philistine garrison had long been stationed even in his own home (10:5, 13:3). An army of 3,000 was formed; and Jonathan, apparently with Saul's sanction, rose against the garrison and smote them (13:2-4). This roused the whole force of the Philistine nation against him. The spirit of Israel was completely broken. In this crisis, Saul found himself on the very confines of his kingdom at Gilgal, longing to exercise his royal right of sacrifice, yet deterred by his sense of obedience to the prophet. The sacred offering was on the point of being burned when upon Samuel arrived, and pronounced the first curse on his impetuous zeal (13:5-14). Meanwhile the adventurous

SAUL 791
exploit of Jonathan at Michmash brought on the crisis which ultimately drove the Philistines back to their own territory. It was signalized by two remarkable incidents: the first appearance of Saul's madness in the form of fitful roaring, from which all but cost him his life, and the erection of his first altar, built either to celebrate the victory, or to expiate the savage feast of the famished people (14.35). The expulsion of the Philistines (although not entirely completed, 14.52) at once placed Saul in a position higher than that of any previous ruler of Israel. The warlike character of his reign naturally still predominated; and he was now able to attack the neighbouring tribes of Moab, Ammon, Edom, Zobah, and finally Amalek (14.47,48; cf. 15.1-9). The chief connexion of the war against Amalek with Saul's history lies in the disobedience to the prophetic command of Samuel shown in the sparing of the king, and the retention of the spoil. This second act of disobedience called down the second curse, and the first distinct intimation of the transference of the kingdom to a rival. The struggle between Samuel and Saul in their final parting is indicated by the record of Samuel's own words (15.30-35), with which he himself finally, from Saul's grasp (for the gesture, see Josephus, 6 Ant. v. 5), and by the long mourning of Samuel for the separation (15.35,16.1). The rest of Saul's life is one long tragedy. The frenzy, of which indications had occurred before, now at times took almost a realistic session of him. Inter-tribal jealousies, all the stronger because Saul's own tribe was one of the smallest, may well have been an important cause of this frenzy. It is described as "an evil spirit of God" (much as we might speak of "religious madness"), which, when it came upon him, almost choked or strangled him by its violence. In this crisis David was recommended to him by one of the young men of his guard. From this point their lives are blended together. [DAVID.] In Saul's better moments he never lost his strong affection for David. Occasionally his prophetic gift returned with his madness: acts of fierce, wild zeal increased. At last the dynasty, which he had established, came to an end through his weakness. The Philistines, keen to keep open the commercial route by which the Euphrates trade passed through their country to Egypt, after a course of border warfare occupied in large force the plain of Esdraelon. Their camp was pitched on the S. slope of the range now called Little Hermon, by Shunem. Opposite, on mount Gilboa, was the Israelite army, clashing as usual to the heights which were their safety. The heart of the king, as he pitched his camp, "greatly trembled" (1Sam.28.5). Having lost all the usual means of consulting the divine will, he determined, with that wayward mixture of superstition and religion which marked his whole career, to apply to a necromancer at En-dor, on the other side of Little Hermon, who had escaped his persecution. The obvious meaning of the narrative tends to the hypothesis of a partition against that of a simple imposture. The woman recognizes the disguised king first on the appearance of Samuel, seemingly from his threatening aspect or tone towards his enemy. Saul apparently saw nothing; but she described a supernatural figure of an aged man in prophetic garb. On hearing the denunciation which the apparition conveyed, Saul fell full length on the ground, as if the spirit and remained motionless till the woman and his servants forced him to eat. Dismayed by Samuel's summons to a fatal tryst, he entered the next day on the battle. The Israelites were driven up the side of Gilboa. The three sons of Saul were slain (1Sam.31.2). Saul, with his armour-bearer, fell by the archers and charioteers of the enemy (31.4; 2Sam. 1.6). He was wounded. His shield was cast away (2Sam.1.21). According to one account, he fell upon his own sword (1Sam.31.4). According to another, an Amalekite who came up at the moment of his death-wound, and found him "fallen," but leaning on his spear, at his own request put him out of pain, and carried the news to David (2Sam.1.7-10). [SALOMON, BOOKS of.] His body and those of his three sons were stripped, decapitated, and exposed on the wall of Beth-shan, whence they were secretly carried off, and burnt by the grateful inhabitants of Jabesh-gilead (2Sam.1.19). The commander of their remnant, his body being that of the ancestral sepulchre at Zelah in Benjamin (2Sam.21.14).—B. The Jewish name of St. Paul. The best conjecture as to the double name is that Paulus was the apostle's Roman name as a citizen of Tarsus, naturally adopted into common use by his oratorical giftedness and his labours among the heathen communities (Ac.13.9).  

Sav'aran, an erroneous form of the title Avaran, borne by Eleazar, 8 (1Mac.6.43).  

Sav'i-as (1Esd.8.2) = Uzzi, 7.  

Saviour. (Five articles are closely connected and by the same writer. Saviour and Salvation deal with the divine part in man's restoration; Repentance, Faith, Conversion with the part of man.) The name Saviour, to which (cf. Mt.1.21) Jesus is equivalent, was the human name of the Christ. The name defines the mission, "to save His people from their sins." We must be careful not to limit the wide significance of the word. It is used to express recovery from sickness, protection, assistance, deliverance, and the result of such relief in happiness and security. The name "saviours" is applied to the judges, and to the deliverer of the people from the Syrian yoke (2K.13.5). It was frequently included in Jewish names as a word of good omen, e.g. Joshua (Gk. Jesus), Josheba, Ishi, Isaiah. The word was raised by the prophets from a temporal to a spiritual meaning, and applied to God Himself (Is.45.21, "A just God and a Saviour"). We must be careful not to insert a but, as if it were part of salvation to deliver from the justice of God. So far from this, God saves by and to righteousness. In many passages of Isaiah righteousness and salvation are equivalent, and the "robe of righteousness" is the "garment of salvation" (cf. Is.51.10). The same spiritual meaning is constant in the Psalms. The term Saviour has also connected the kind of appearance and partition as against that of a simple imposture. The woman recognizes the disguised king first on the appearance of Samuel, seemingly from his threatening aspect or tone towards his
but of His teaching, example, and church. When there is any distinction made between Jesus and Christ, the former refers to the person, the latter to the name of Jesus in common use among the Jews, but found its full meaning only in the Saviour. [m.s.]

Saw. In ancient Egyptian saws, as in modern Oriental saws, the teeth usually incline towards the handle, instead of away from it like ours. They have, in most cases, bronze blades, apparently attached by horn or thongs: but some of those in the British Museum have blades let into handles, as our knives have. A double-handed iron saw has been found at Nimrud. No evidence exists of the use of the saw applied to stone in Egypt, but we read of sawn stones used in the temple (1K. 7.5). The saw under, "or in," which is said is to have placed his captives were of iron.

Scape-goat. [Atonement, Day of; Demon.]

Scarlet. [Colours.]

Sceptre. The original of the sceptre was the short club, with bulging head, used by shepherds for the purposes of defence and guidance as characteristic of the shepherd's life (Lev. 27.32; A.V. rod); while he, defending his flock by its means, becomes a figure of God's defence of His people (Ps. 23.1; Mi. 7.14). Thus it became a symbol of authority in general (Judg. 5.14, R.V.), and of the king's in particular (Am. 1.5; Esth. 4.11). The king's sceptre used metaphorically to express the prerogative of the royal tribe of Judah (Gen. 49.10), the future dignity of Israel (Num. 24.17), the rule of the wicked, whom Jehovah will overthrow (Is. 14.5), and, supremely, the rule of God Himself (Ps. 45.6), interpreted in N.T. of the rule of the eternal Son (Heb. 1.8). [c.v.d.]

Schools of the Prophets. The expression is not found in the Bible—in fact, the word occurs in none of the O.T. passages, it arose from the Targum of Jonathan interpreting Naioth (1Sam. 19.18ff.) as house of learning, which in later time was the equivalent of school. This interpretation, however, is very doubtful. There is no evidence that Samuel founded schools of the prophets, but that there were communities or guilds of prophets is certain. They are first mentioned 10.5, and existed at Ramah (19.19), Bethel (2K. 2.3), Jericho (2.5), Gilgal (4.38), and in a place unknown (6.1). Between Samuel and Elijah these "sons" of the prophets are not mentioned, which does not warrant us in thinking that they did not exist, for in Elisha's time they were flourishing, and looked upon that prophet as their master, as Samuel had been treated before. There were married men amongst them (2K. 4.1). No doubt they were associations for the purposes of worship and learning, but there is no evidence that they too were healed. They were evidently in existence in the time of Amos (7.14). Some modern criticism has seen in these "schools" a body of men to whom the editing, or even writing, of many of the books of O.T. might be attributed. The question as to how far there may be any truth in this conjecture is discussed under the books concerned. [B.R.]

Science. [R.V. Scarcity.]

Scorpion (Heb. qərāḇāh). Scorpions are twice mentioned in O.T. (Deut. 8.15; Ezk. 2.6), and four times in N.T. (Lu. 10.19,11.12; Rev. 9.3,10); the wilderness of Sinai being alluded to as the resort of scorpions at the time of the Exodus, as it also is at the present day. Scorpions, of which several species inhabit Palestine, are generally found in dry and dark places, under stones and in ruins, chiefly in warm climates. They are carnivorous, and move in a threatening attitude with the tail elevated. The sting, situated at the extremity of the tail, has at its base a gland secreting a poisonous fluid, which is discharged into the wound through two orifices; and often occasions much suffering, and sometimes alarming symptoms. The "scorpions" of 1K. 12.11, 14 and 2 Chr. 10.11, 14 indicate some instrument of scourging—unless indeed the expression is allegorical. Celsius believed the "scorpion" scourg to be the spiny stem of the egg-plant (Solanum melongena esculenta), known to the Arabs as hedeq. Scorpions are not insects, but relatives of spiders, with which they constitute the class Arachnida. [r.l.]

Scourging. [Crimes.]

Screech-owl. [Owl.]

Scribe. A. Older use of the word. (1) sōpēr (the usual word), lit. writer or perhaps enumerat- lor, stands in Judg. 5.14 (cf. Je. 52.25 = 2K. 25.19; 2 Chr. 26.11) for a high military functionary, perhaps a mustering officer (R.V. marshal, scribe). It also denotes a royal officer or minister, distinct from the recorder or chronicler, probably the chief secretary of state (2 Sam. 8.17 = 2 Chr. 18.16; 2 K. 18.18, 37 = Is. 36.3, 22; 2 K. 19.2 = Is. 37.2; Je. 36.10, 12, 20, 21, 37.15, 20), who also acted at times as chancellor of the exchequer, and chief paymaster (2 K. 12.10, 11 = 2 Chr. 24. 17; 2 K. 22.3ff. = 2 Chr. 34.15ff.), and was sometimes a Levite (1 Chr. 24.6). Solomon's great empire required two such officers (1 K. 4.4). In Esther, sōpēr stands for the secretary of the Persian king (3.12, 8, 9). (2) sōhēr (also a frequent word), lit. writer, or possibly organiser, arranger (R.V. officer, overseer), is a term for
any minor official—judicial, civil, military, or industrial (Ex.5.14; Jos.1.10,3.2; Deut.1.15; 1Chr.27.1; 2Chr.19,11,34,13, etc.). (3) ἱσθάρ, lit. tablei-master, scribe (R.V. marshall, scribe), occurs only Le.51.27; Na.3.17 (see R.V. marg.). (4) ἡρίον, lit. engraver, writer (R.V. magician, sacred scribe; only pl.), is used of the magicians or wise men of Egypt (Gen.41.8; Ex.8.3ff.,9.11), and of Babylon (Dan.2.2). For another derivation of this word, see SEMITIC LANGUAGES.—B. Later use. After the Captivity sōfer, almost always denotes a professional student of Holy Scripture, especially of the Mosaic Law. The Gk. equivalents are γραμματεύς, “scribe” (67 times in N.T.), νομικός, “lawyer” (10 times), νομοδοκαλος, “doctor,” “teacher” (L.2.46). Josephus also uses λέγοντας ἱσθάρ, “sacred scribe,” σοφοτής, “learned man,” μαθητής, and ἐγγυτήρ τῶν πατρών, “interpreter of the ancient laws.” “The wise” (hákkhámim) of the Wisdom literature (Pr.1.6,22.17; Ec.9.17, etc.) may perhaps be scribes, but more probably their early predecessors, not yet entirely devoted to legalism. Scribes were addressed respectfully as rabb, “master,” or rabbî (rabbé), “my master” (16 times in N.T., also frequently in translation as ἀρχισύντροφος, “architrumpeter”), which title even the scribes accorded by courtesy to our Lord (Mt.12.38, etc.), Who was generally regarded as a scribe with a school of pupils. The Aramaic equivalent, rabbôn or rabbûni (pajzgiwv), also occurs (Mk.10.51, see R.V.; Jn.20.16). The scribes in our Lord’s time were greedy of titles of honour, and sought and received the honourable designations of abbâ = ṣâḥîm, “father” and wâd = καθηγήτης, “teacher,” “guide” (Mt.23.9,10). Already in N.T. times, or a little later, rabbh, rabbî, and rabbôn were prefixed as titles to scribes’ names (Rabbi Zadok, Rabban Gamaliel, etc.), and a distinction was drawn among them: “greater than rabbh is rabbî, and greater than rabbî is rabbôn (rabbé)” (Mishnah (2.1)). ἱσθάρ (ἡσαθάρ, “scribe” in the singular) calls the ancient scribes σοφρῖμιν, but those of its own age ἱακκῆμιν, “the wise.” (i) History. The transformation of the O.T. religion into orthodox legal Judaism, a process which, beginning with the Captivity (536–538 b.c.) or a little earlier (cf. E.8.6), received an enormous impetus from the labours of Ezra (445) and Nehemiah (445), and was finally consummated in the age of the Maccabees (175–135), when the nation, rising in arms against a persecuting paganism allied with an apotheosizing aristocracy, became inspired with an inflexible and fanatical enthusiasm for the letter of the ceremonial law, was mainly the work of the scribes, an organized body of professional students of the law, who, when prophecy failed, gradually established themselves first as the accredited teachers, and afterwards as the real rulers of the nation. To these scribes, the prophets, our Lord alludes when He says, “All that came before Me are thieves and robbers” (In.10.8). Siding in the Hasmonaean age with the Hasideans (Heb. ḫâsidhim, lit. pious ones, cf. Ps.149.1,5,9, etc.), a zealous sect of “mighty men who offered themselves willingly for the law” (1Mac.2.42,7.13; 2Mac.14.6), and sharing with them the glories of death and martyrdom (see the account in 2Mac.6.18ff. of the torture and death of Eleazar (78-69 b.c.)), they formed, after the foundation of the Hasmonaean state, an intimate and enduring alliance with the rising party of the Pharisees, who, inheriting the inflexible principles of the Hasideans, acquired in the reign of John Hyrcanus (135–76 b.c.) their distinctive character as a sect of the Mosaic law ("separated ones"). [PHARISEES.] Persecuted by him in his later years, and also by his son and successor Alexander Jason (104–78), who favoured the Sadducees, they triumphed with the Pharisees under his widow and successor Salome Alexandra (78–60). She had indeed, remarks Josephus, “the name of queen, but the Pharisees had all the authority” (13 Ant. xvi. 1). The leading scribes in the Sanhedrin formed, until the extinction of the Jewish state (70 A.D.), a distinct and most influential class alongside the chief priests and elders (cf. Mt.2.4,16,27,20.18,26,57; Ac.4,5,23,9). As the recognized spiritual guides of the well-meaning Pharisees, as the学堂 the nation was almost unlimited. Only a very few of them adhered to the Sad- ducees or were neutral (Mk.2.16; Lu.5.30; Ac.23.9). Priests and Sanhedrin obediently adopted the decisions of the scribes, who, when the Sanhedrin fell, became in name as well as in fact the supreme rulers of the nation. Of individual scribes before our Lord’s time we know but little. The first known name is Ezra, though he seems to have had predeces- sors, whom Jeremiah denounces quite in the N.T. manner for falsifying and evading the law (Je.8.6ff., R.V.). Ezra is “the priest, the scribe, even the scribe of the words of the commandments of the Lord, and of His statutes to Israel” (Ezr.7.11); and “a ready scribe in the law of Moses, which the Lord the God of Israel had given” (7.6). Already “scribe” was a technical word, used as a title in formal legal documents. The term “scribe” and the law by Ezra, and its acceptance by the people, 444 B.C. (Ne.8.1ff.), marks an epoch. From this time, for an Israelite, religion meant not so much spiritual communion with God (the ideal of the prophets), as a legally correct walk before Him (the ideal of the scribes). The ceremonial law was regarded as God’s greatest gift to Israel, and to obey its every precept, down to the minutest detail of ritual observance, was the whole duty of man. In such an atmosphere of formalism and legalism did scribalism originate, develop, and mature. The early scribes, such as Ezra (Ezr.7.11), Zadok (Ne.13.11), and Simon the Just, 300 B.C. (see Ecc15.50), were priests, but soon after the last date the scribes were clearly differentiated from the priesthood as a body of professional, but lay scholars, who claimed the exclusive right, even as against its original guardians the priests, to interpret the Scri- pers. Henceforward a priest, unless he was also a scribe, was not an accredited teacher of religion. So far the O.T. Apocrypha, and Josephus. Additional facts (unfortunately contaminated by fiction) may be gleaned from
the Mishna (200 A.D.). The Mishna characteristically represents Moses as the first scribe. He delivers the scribal traditions to Joshua, Joshua to the elders, the elders to the pupils of Hillel, and the pupils of Hillel to the Mishna laid down these rules: Be careful in pronouncing judgment; bring up many pupils, and make a fence about the law. Simon the Just said: "The world subsists by three things: by the Law, the worship of God, and benevolence," and delivered the tradition to Antigonus of Socho, he to Josaph ben Joeser of Zereda and Josaph ben Johanan of Jerusalem; they to Joshua ben Perachiah and Nithai of Arabela; they to Judah ben Tabbai and Simon ben Shetach; they to Shemaiah and Abtalion (perhaps the Sameas and Pollio of Josephus, 15 Ant. ix, 4, etc.); they to Hillel (the elder) and Shammai; and Shammai laid down the rules. Hillel, a man of rigid temper, to aggravate it, Hillel had emigrated from Babylon to Palestine, and was long before the Mishna written, He was so poor that he was obliged to hire himself out as a day-labourer, to defray the cost of his education at the Rabbinical schools. His mitigating interpretation of the law is well illustrated by his important decision that Deut.15.1-11, which requires a release of all debts every seventh year, should, on account of its great inconvenience, be evaded by a characteristic scribal artifice (cf. Mk.7.11). The questions disputed between the schools of Hillel and Shammai were for the most part trivial—e.g. whether an egg laid upon the sabbath day might be eaten, or whether it must be removed (see Deut.19.20) against the former. Hillel, who was short, says the Mishna, "there has been no more reverence for the law; and purity and abstinence died out at the same time." His moderation and commanding personality are well illustrated in Ac.5.34-40. His son Simon was also a famous scribe. He lived at the time of the destruction of Jerusalem (Josephus, Ant. 18.2, 7). After the fall of Jerusalem (70 A.D.), the headquarters of the scribes were transferred to Jamnia (Jabneh), Tiberias and Lydda being subordinate centres. During the 2nd cent. A.D. the traditions of the scribes, previously transmitted only orally, were written down and collected in the Mishna (150-200 A.D.). The Mishna, though unreliable, is valuable for the early and trustworthy authority for the time of Christ. The later scribal compilations (the Jerusalem Talmud, 4th cent., and the Babylonian Talmud, 5th cent.) contain more legendary matter, and require to be used with greater caution. (ii) Functions. The functions of the scribes were three: (1) to interpret and develop the law; (2) to train students of the law; (3) to act as judges. In strict theory the written law (Torah) was exalted as supreme, and the scribes' whole duty was to interpret it. This process, called midrash, from midrash, "to seek, to consult," involved not only the fixing of the meaning of each precept of the Torah, and the explanation of all apparent discrepancies, but also the drawing of all possible inferences from it; and inasmuch as these inferences were often of a very arbitrary kind, the scribes became in fact, if not in intention, legislators. They were thus legislated. To prevent a danger of a breach of the letter of the Torah, they "made a fence round the law," i.e. they forbade all actions which in their opinion could possibly lead to inadvertent transgression. They also legislated, when they declared (as they frequently did) a prevailing custom or tradition to be binding. The original traditions were subject to various, intricate, puerile, and burdensome (Mk.7; Mt.23; cf. Ac.15.10). About fifty of them were supposed to be Mosiac, but the great bulk were admitted to be only ḏbhสาเหตุ sōpherim, "ordinances of scribes." Yet even these they declared to be as important as, or more important than, the letter of the Torah—"An offence against the sayings of the scribes is worse than one against Scripture." "The sayings of the elders have more weight than those of the prophets." Ordinances which the scribes regarded as binding were called kāldākā (lit. walk, custom). hāldākā embraced (a) the rules of the teachers, and (b) the scribes' interpretations (midrāshim) thereof, (c) the scribes' customs and traditions. Whether a midrāsh or a tradition was binding was decided by a majority of the scribes, and decisions were, as a rule, unalterable. Those scribal interpretations of Scripture which were not binding were called ḥaggiddē (or ḥagiddē, plural, "narrative," "story," from higgādāh, "to tell." haggādāh attached itself mainly to the narrative portions of O.T. The books of Chronicles are a scribal midrāsh or recension of the earlier books of Kings (2 Chr.42-47). In these the haggadic element is kept within moderate and edifying limits. But haggādāh was frequently extravagant and unedifying. The stories of the Creation and of the patriarchs and heroes of the O.T. were often spoiled by puerile and superstitious additions. For examples of haggādāh in the N.T. see Ac.7.22-33; Gal.4.21ff.; 1 Cor.10.14; 2 Tim.3.16-17; Jam.1.25; Heb.11.1ff.; Talmud.1 (2) in their "houses of teaching" the scribes assembled young men, called "disciples of the wise," whom they trained in the oral and written law. The teacher sat on a raised platform, and the pupils sat on the ground at
his lect (cf. Ac. 22.3). The teaching was in theory gratuitous to the teacher, maintaining himself by some trade, but there is good reason to believe that substantial fees were often exacted. The chief qualification of a pupil was a retentive memory. He was to be "like a well lined with cement, which loses not one drop. The scribe recited the exact words of his own teacher, and its pupils repeated them after him until they knew them by heart. When fully trained, the pupils were solemnly ordained with laying on of hands (simkhah) in the presence of at least three scribes. The Sanhedrin was recruited from the most promising pupils of the scribes. (3) Laymen could be judges, but the professional training of the scribes specially fitted them for the exercise of this office, both in the supreme Sanhedrin at Jerusalem and in those of the local synagogues. Judicial work was unpaid. (iii) Our Lord's attitude towards the scribes, which was unfavourable, may be gathered from Mt. 15.2-6; 16.12; Mk. 7 and parallels. (Mt. 13.32, 23.34. He uses the word, in a good sense, of Christian teachers. The Mishna, ed. Surenhusius (contains Lat. trans.); Eder, Life and Times of J. the Messiah; Schürer, History of the Jewish People; Taylor, Sayings of the Jewish Fathers; The Jewish Encycl.; Weber, Jüd. Theologie auf Grund des Talmud. [C.H.]

Script (yqāḏ), used in 1 Sam. 17.40 as a synonym for the bag in which the shepherds of Palestine carried their food or other necessities. The scrip of the Galilean peasants was of leather, used especially to carry their food on a journey, and slung over their shoulders (Mt. 10.10; Mk. 6.8; Lk. 9.3, 22.35). The English word "scrip" is probably connected with scrape, scrap, and was used in like manner for articles of food; it is thus an extremely close equivalent for the Heb., which means "collec-

Scripture, Holy. This phrase in its modern sense is hardly represented in the earlier books of O.T., and only in late writings do we come to the equivalent phrase. "As it is written" (e.g. 2Chr. 30.5, 18). This is in accordance with what we should expect before the formation of the Canon of O.T. in the Hellenistic period. The "scribbling" (Greek kthbhmm writings) was confined by later Jews to one particular portion (the Hagiographa) (Canon or O.T.); hence migāḍ (reading; cf. Ne. 8.8) became the general collective term, and equivalent to the γαπαδί of N.T. usage, which is constantly used with a sense of authority and sacredness (cf., e.g., Mk. 12.24, 15.20; Lk. 24.26; Acts 2:36; 1Pet. 1.3, 26; 2Tim. 3.15, 16, besides many citations of O.T. passages as "scripture "), and is applied in N.T. to all the several Jewish divisions of O.T., and in 216.3.16 even already includes the epistles of St. Paul. (1) A religion is, strictly speaking, a practice. In the art. Revelation we have shown that there are two distinct types. Those classed as heathen represent the various notions evoked by generalization from the common experience of nature and of men's own lives, of which, therefore, they are only a reflection. Judaism and Christianity are based upon a revelation of God Himself, given in the phenomenal facts which belong to a personal Presence. The distinctive character which ensues only becomes permanent through the embodiment of those phenomenal facts in a fixed form or record, which thus constitutes a secondary basis for other than the original observers. The "word of God uttered in the ages (Heb. 1.1) is set before us in Scripture. The myths of heathenism are after-thoughts, attempts to make fiction (which is the expression of our notions) do duty for the missing facts (which are the basis whence notions should be derived). The narratives of Scripture are fundamental. Yet, however far we may be carrying it, we are not the discoverers but the heirs also of that teach-

Europe...
in the history of Moses does not concern us here, for the subject of the Pentateuch is not the revelation of Moses but of God. (3) The word "inspiration" in regard to Scripture must bear the generic meaning it has in all other correct us, but it has also a specific meaning. The personal presence of God in Christ, in the miracle, in the sacrament, His voice in Scripture, are given that His presence in every man, in the whole world, in every action, in every true word uttered, may be more than a vague sentiment; they are the very means by which abstract belief becomes knowledge.

Through selected wisdom may be the result, test, and apply ideas: but the latter are not themselves results of any logical process. If original, we can only say, "They came as an inspiration"; and of expression that it is a gift. These are not separate; for what a man expresses is the idea conveyed by it. This must not, however, blind us to the great fact that an inspiration is often curiously limited to the one thing given, so that a man may be ignorant of all else, and even stupidly indifferent to its significance. In any case, his meaning can never be rightly limited to what he would himself recognize as such at the time. The divine guidance appears in the wisdom with which what is thus necessary is selected and set forth. The idea of inspiration belongs more properly to the teaching. Through the essential limitation of the individual mind no system of ideas can comprehend the infinity of truth. The prophets and apostles, however, do not give us systems, but principles in their application to the actual crises or questions which confronted them. It was this which gave their work permanence. The form of all questions varies greatly from day to day, but the substance is the same; for that belongs to human nature. Principles only appear in a system of thought in the form of notions apprehended by the mind, and they change as the apprehension does; real principles appear in real things, and do not change, for they belong to God. In enunciating principles St. Paul has no hesitation either in what he is saying or in his authority for saying it. On matters of expediency he can only give his own opinion. (5) Finally, therefore, we have to remember that Christianity is not made up of doctrines; it is a Doctrine. Similarly, under all varieties of appreciation and vision the Bible is one book, prepared of God for the presentation of His character. The knowledge of the worship of God) is the first necessity of salvation; i.e. deliverance from ourselves, from the worship of our own notions and our own moralities; but the only faith ultimately possible for all men is the worship of the Unity in Trinity. It is thus altogether necessary to such salvation that a man believe in the Incarnation of our Lord Jesus Christ, God and Man, in Whom alone God is made known and has joined us to Himself. To set this forth, in all the variety by which the complexity of human nature and need was brought to apprehend it, is the one object of Holy Scripture, and there is no other (Jn. 1.1-3). The world has never found, never pretended it had found, an alternative. It has only asserted that it preferred its own notions. [Bible; Canon.] [H.H.K.]

**Scroll.** [Book; Writing; Roll.]

**Scyrus.** [Medicine.]

**Scythian** occurs in Col.3.11 as a general term for rude ignorance. The same view of Scythian barbarism appears in 2Mac.4.47 and 3Mac.7.5. The Scythians dwelt mostly on the N. of the Black Sea and the Caspian, stretching thence indefinitely into inner Asia, and were regarded by the ancients as very uncivilized.

**Scythopolis** is probably the "city of the Scythians," occurs in A.V. in Jth. 3.10 and 2Mac.12.29 only. The LXX renders Beth-shean in Judg.1.27 "Baithsan which is Skthòn-polis"; Josephus (12 Ant. viii. 5, 13 Ant. vi. 1) says the same. This may refer to the invasion recorded by Herodotus (1.103-106), when the Scythians, after their occupation of Media, passed through Palestine on their way to Egypt (c. B.C. 620). Scythopolis was a city of the Decapolis, the only one of the ten which lay W. of Jordan. It became the seat of a Christian bishop, and its name is found in the lists of signatures as late as the Council of Constantinople in A.D. 536. The latest mention of it under the title of Scythopolis is probably that of William of Tyre (xxii. 16 and 26). He mentions it as if it was then actually so called, explaining that it was formerly Beth-shean. [C.R.C.]

**Sea** (Heb. ymd, pl. yammim; Gen.1.10). "From sea to sea" (Ps.72.8) meant from the Red Sea to the Mediterranean. The Hebrews called also of great lakes with crocodiles (Job 41.32), as the Arab. Bahr (sea) is also used. The O.T. refers often to the sand on the sea shores, to waves and billows, and hovens or harbours. [Isle.]. In Ac.27.41 the meeting of two "seas" refers to cross currents. [Melia.] The Hebrews called the West the "sea" quarter, which sometimes creates a wrong impression when a W. boundary parallel to the Mediterranean, not one reaching to the sea, is described. A.V. renders the word "sea" in 56 passages of O.T. Thus W. Palestine was on the seaward side of Jordan (Jos.5.1) and the ambush on the seaward side of Ar (8.9.7). It should be rendered in Jos.16.3 ("at the west"), 16.6 ("west of Michmethan"), 16.8 ("at the west"), 18.14 (referring to N.W. corner of the tribe, at Beth-horon), 19.11 ("towards the west"), when in each case A.V. reads sea.

The Great Sea (Ex.15.4-21) is the Mediterranean; the Salt Sea (Num.34.12) is the Dead Sea;
the name is also applied to the fresh waters of the lake of CHINNEKEITH (Num. 34.11; Jos. 13.27): it even applies to the great reservoir in the temple (1 K. 7.23; 2 Chr. 4.15); but in Job "Am I a sea, or a whale? " (7.12) is perhaps better rendered "Am I a mulle, or a wild beast? " [c.r.c.]

Sea, Former and Hinder (Zech. 14.8; R.V. eastern and western), the Salt Sea and the Mediterranean respectively. Cf. " utmost sea " (J. 2.20; see Nebo), and Great Sea.

Sea, Great. [Great Sea.]

Sea, Hinder. [Sea, Former.]

Sea, Molten. To replace the Laver of the tabernacle, Solomon caused another to be cast, which from its size was called a sea. It was made partly or wholly of the "brass" (properly, copper) which had been captured by David from "Tibhath and Chun, cities of Hadarezer, king of Zobah" (1 K. 7.23-26; 1 Chr. 18.8). Its dimensions were: height, 5 cubits; diameter, 10 cubits; circumference, 30 cubits; thickness, 1 handbreadth; and it is said to have been capable of containing 2,000 (or, according to 2 Chr. 4.3, 5, 3,000) baths. Below the brim there was a double row of "knops," 10 (i.e. 5 + 5) in each cubit. These were probably a running border or double fillet of tendrils, and fruits, said to be gourds, of an oval shape. The brim itself, or lip, was wrought "like the brim of a cup, with flowers of lilies." i.e. curved outwards like a lily or lotus flower. It stood on twelve oxen looking outward, three towards each quarter of the heavens. It was mutilated by Ahaz, who replaced the oxen by a stone base, and was finally broken up by the Assyrians (2 K. 16.14, 17, 25.13). Josephus says that its form was hemispherical, and that it held 3,000 baths; and he elsewhere tells us that the bath was equal to 72 Attic εἴσται, or 1 μετρητῶν. To reconcile the contents of the laver with its dimensions, the Jewish writers supposed that it had a square hollow base for 3 cubits of its height, and 2 cubits of the circular form above. A far more probable suggestion is that of Theinius, in which Keil agrees, that it was of a bulging form below, but contracted at the mouth to the dimensions named in 1 K. 7.23.

Sea monsters (Lam. 4.3). [Whale.]

Sea of the Philistines (Ex. 23.31). [Great Sea.]

Seab. In the East no document is regarded as authentic without a seal, and the use of some method of sealing is of remote antiquity. Among those used in Egypt at a very early period were engraved stones, pierced through their length and hung by a string or chain from the arm or neck, or set in rings for the finger. The most ancient form was the scarabaeus, formed of precious or common stone, or even of blue pottery or porcelain, on the flat side of which the inscription or device was engraved. The use of clay in sealing is noticed in Job 38. 14, and the signet-ring in Gen. 39.18. The Babylonians used cylinders of hard stone for sealing a clay tablet, rolling them over it before it was baked. One of the Amarna letters (Brit. Mus. 58) is so sealed. Similar cylinders (about an inch, or less, in length) are found in Phoenicia, and in the earliest strata at Lachish, Gezer, etc. The Canaanites thus evidently used them. The Gezer examples include a tablet of 649 B.C. and another representing the symbols of 12 gods. The cylinder was inscribed in cuneiform, or in Phoenician alphabetic letters, with the owner's name, to which is commonly added a mythological design, or the figure of the god whose name the "writer" (dub-sar or "tablet-master") bore. [Writing; Ornaments, Personal.]

Seal. [Laying on of Hands.]

Seal. [Agriculture; Rain; Year.]

Seat. The words signifying seats in Heb. do not throw much light upon the subject. The poorer people of the Jews were accustomed to squat upon the floor, whilst the richer classes used a divan or couch. An honoured guest was provided with a "stool" (2 K. 14.10), the word signifying elsewhere a throne or chair of state. Chairs are noticed, as presents sent by kings, in the Amarna tablets of 14th cent. B.C., and actual examples of early date are found in Egypt. They also appear on Hittite and Assyrian bas-reliefs. Sennacherib (702 B.C.) mentions chairs sent to him by Hezekiah. A teacher or Rabbi used a seat, whilst his pupils stood or crouched in front of him. Hence the expression is used to express the authority or office of a teacher, or judge; see Mt. 23.2, 3; Job 29.7; Rev. 2.12, 13, etc. [S.N.S.]

Seba. (Heb. סבָּא), a son of Cush (Gen. 10.7; 1 Chr. 1.9), and thus of non-Semitic race. The kings of Seba and Sheba offer gifts to Solomon (Ps. 72.10); Isaiah also connects Seba with Cush (43.3), and with Egypt. Josephus places Saba near Meroe (2 Ant. x. 2), in Upper

SUGGESTED RESTORATION OF THE LAVEN. (Keil.)

THREE-LEGGED STOOL, FROM THEBES. (Brit. Mus.)
Egypt; perhaps, however, referring to the Sheba Arabs who, before his time, had crossed from Yemen into Abyssinia. The ethnic form Sabaens occurs in Is.45.14, also connected with Egypt and Cush; and they are described as tall men (Sheba), which still applies to the Abyssinians. Ezk.23.42 speaks of them as coming from the desert, with crowns and bracelets as ornaments. In Job 1.15 the A.V. renders Sheba by Sabaens; but the words Sheba and Seba have no connexion. The latter refers to a race—probably Akkadian—entering Arabia, and passing on to Africa. It is remarkable that the word has no appropriate Semitic derivation; but the Akkadian sib (rendered sib) Assyr.) means a "shepherd." [c.r.c.]

Sebat. [Month.] Seccach, one of the six cities of Judah which were situated in the mithdrar (wilderness)—that is, the tract bordering on the Dead Sea (Jos.15.61). Its position is not known.

Secheni as.—1. Shechaniah, 2 (1 Esd.8.29; cf. Ezr.8.3).—2. Shechaniah, 3 (1 Esd.8.32).—3. Shecaniah (Es.2.5).—4. Shechach (Ezr.8.20).—5. Shechah (Ezr.8.3).—6. Shechah (cf. Ezr.8.14).—7. Shechach (Ezr.2.57).—8. Sechach (iSam.23.28), a place with a great well, between Ramah and the Naioth near Ramah, which Saul passed by. There is a ruin called Swsitekah just S. of Beeroth; but this is perhaps too far N. [c.r.c.]

Second coming of Christ. [Coming, Second.] Secundus, one of Ezra’s swift scribes (2 Esd.14.24).

Seleus as (1 Esd.9.34) = Shelemiah, 2.

Seleucia, near the mouth of the Orontes, was practically the seaport of Antioch. The distance between the two towns was about 16 miles. We are expressly told that St. Paul, in company with Barnabas, sailed from Seleucia at the beginning of his first missionary circuit (Ac.13.4); and it is almost certain that he landed there on his return from it (14.26). This strong fortress and convenient seaport (Seleucia Pieria) was constructed by the first Seleucus, and here he was buried. It retained its importance in Roman times, and in St. Paul’s day it had the privileges of a free city. The remains are numerous, including those of a harbour about a mile in diameter, with a narrow entrance, and of a rock-cut channel for a stream, N. of the port. The site is now called es Suwediyeh. [c.r.c.]

Seleucus IV. [Philopator] succeeded his father, Antiochus the Great, as king of Syria, 187 B.C. He is called “king of Asia” (2 Mac.3.3), and the title was claimed by the Seleucidae even when they had lost their footing in Asia Minor (1 Mac.8.5,11.13,12.39,13.32). His reign was undistinguished. He inherited from his father the responsibility for paying the annual tribute to Rome, which was imposed for 12 years by the victors at Magnesia in 190 B.C. To Rome also he was forced to send as a hostage his young son, afterwards Demetrius I. (Soter). On one occasion, induced by a temple official named Simon (Simon, 3), he attempted to carry away the treasures of the temple; but his agent Heliodorus was stopped, it was said, supernaturally (2 Mac.3.4-28). Apart from this, he continued his father’s conciliatory policy towards the Jews, bearing much of the expense of the temple services (5.2,3,6). In 176 B.C. he was...
"destroyed, neither in anger nor in battle" (Dan.11.20), but poisoned by Heliodorus.

Sem (Lu.3.30) = the patriarch Shem.

Semachiah, son of Shemaiah, 9 (1Chr. 26.36).

Sem'ei.—I. (1Esdr.9.33) = Shimei, 14.—2. (Est.Apoc.11.2) = Shimei, 16.—3. Father of Mattathias in the genealogy of Jesus Christ (Lu.3.26).

Semel'lius (1Esdr.2.16,17,25,30) = Shimea, 13.

Semitic Languages. References to language are not numerous in O.T., because the Hebrews lived surrounded by nations who spoke tongues closely akin to their own. In Genesis the nations are divided into three families by their "tongues" (Gen.10.5,20,31), answering to the three families of speech commonly called Aryan, Turanian, and Semitic. Somewhat later, in speaking of Babylonia (11.6), we are told that "the whole land was of one language," and this we now know to have been the Akkadian (the parent of pure Turkish), an agglutinative Turanian tongue, which alone appeared on the earliest known texts. The Semitic speech of Laban (31.42) differed from the Heb. of Jacob; and this passage would imply that the differences had arisen in three generations, which cannot be said to be impossible; for—among illiterate peoples like the Bechuanas in S. Africa—yet greater variations, in the speech of tribes of one stock, are well known to have arisen within a century, when they were separated from each other. The Hebrews were shepherds, and very probably illiterate in the time of the patriarchs, although the Canaanites were not [Writing]; for there is no allusion to Hebrews writing till Moses, and the language of Genesis, at earliest, cannot be supposed older than his time. On the other hand the literary languages—such as the Babylonian, and the Heb. of the O.T.—changed very slowly indeed, being preserved by their sacred writings. The only allusion to an "interpreter" (Gen.42.23) refers to the Egyptian language, and Joseph, Semitic speech was used in Egypt: the Hyksos being Asiatics. Thus Jacob and Joseph may have been able to speak direct to the Pharaoh, but Joseph's brethren supposed him to be a native Egyptian who did not understand them. In Deut.28.49 the invasion of Palestine by a people of unknown language is predicted, which may refer to the Akkadian, or to the later Mede, which began to be known, as that of tribes at the "end of the earth," even a century before Isaiah, who alludes to foreign languages of a barbarous tongue without meaning, i.e. to Hebrews (Is.33.19). He also predicts (19.18) a time when the language of Canaan—or of the Palestine plains—will be spoken in Egypt, which came about with the Assyrian conquest, and with the spread of Phoenician trade. In the time of the judges the Heb. dialects E. and W. of Jordan already differed (Judg.12.6), just as the Arab dialects of these regions now differ. In Hezekiah's time educated Hebrews understood the "Aramæan" (2 K.18.26), by which the Assyrian language appears to be intended. The Aramaic proper was known to Jeremiah, after Syrian tribes had been brought to Samaria (J.e.10.11; see note in R.V. marg.). In Nehemiah's time the "speech of Ashdod," which was mixed up with Heb. (Ne.13.24), must have been a Semitic dialect; and the Philistines are alleged (and, in monuments) to have spoken a Semitic tongue in 1500 B.C. and afterwards. In N.T. the linguistic evidence shows that Aram. was the language of the Jews in the time of our Lord, Heb. being a dead tongue and a sacred language. Most of the Semitic words mentioned in the Bible are very clearly Aram. words, and, at Jerusalem in this age, we find the tomb of the Beni Hezir [Kidron] inscribed in Heb., whereas another semi-Gk. tomb, N. of the city, bears a short Aram. text. Aram. was then the prevailing Semitic tongue—from Persia to Asia Minor, and from Armenia to Egypt, among traders and rulers alike. The N.T. words include amin ("truly" = "amen"); mammona ("wealth," Mt.6.24); sabakhtahi-ni ("thwarted me," 27.46; from an Aram. rendering of the Heb., Ps.22.1); talitha ("lamb," or "child," Mk.5.41), where the Semitic MS. shows ignorance of Semitic grammar. In (7.34), which seems to mean "be whole," rather than "be opened"; rabboni (10.51, cf. R.V.: Jn.20.16), "my Lord"; abba, "father" (Mk.14.36; Ro.8.15; Gal.4.6); mana, "measure" (Lu.19.13); maran-atha, "come, O Lord" (Cor.16.22); luna, "twice" (Jn.11.16); and (ab-ba, "father," Acts.9.36). These words prove that the authors of the four gospels and of Acts, and St. Paul also, understood Aram. The Semitic languages form a distinct family of speech in W. Asia, distinguished from others, and connected among themselves, by laws of syntax, and structure, no less than by vocabulary. The only language which agrees with them in its grammatical structure is the ancient Egyptian (see Renouf, Egyptian Grammar, 1875); and this is in a much more primitive stage. The Egyptians seem to have been a very early offshoot of an Asiatic stock, and were followed by Egypt by tribes of other and more ancient race, that of Semitic peoples, even before the Hebrews. We are told (10.22) that the original family of Shem spread over Elam, Assyria, Lud (probably Leden, an Egyptian name for Syria), and Aram. Some of the oldest known inscriptions (before 2100 B.C.), on the borders of Elam, are Semitic, and the other regions all contain early evidence of the presence of Semitic peoples. The testimony of language is very valuable in this question, and the words common to all branches of Semitic speech show that the common home could not have been, as some suppose, in Arabia (see Von Klemper, Semitische Culturhethenungen, 1875; and Hommel, Die Namen der Säugtiere, 1879). Thus the first Semitic tribes knew not only mountains but rivers: they named the vine, the fig, the almond, and the olive; and cultivated wheat and barley: they possibly knew the walnut, and were acquainted not only with the lion, leopard, but with the bear, and they appear to have named the wild ass and the pelican. On the other hand, it appears very doubtful if they knew the ostrich or the palm. Such indications point to the N., not to the S., and agree with O.T. state-
SEMITIC LANGUAGES

...ments as to the home of the race. The Semitic languages are as closely connected as the Aryan; and all present not only a considerable common vocabulary, but the same triliteral roots, which appear to have been formed by coupling two monosyllabic roots together. They all form words in the same way from these roots, apply gender to the verb, have a dual for verb and noun, besides singular and plural, have but two genders, use prepositions, and have suffixed pronouns. The numerals are the same, and so are the names of the primary colours, indicating a somewhat advanced civilization as common to all the Semitic stocks. These languages may be regarded as including two groups—the Western—Northern and Southern. Of these the Eastern is known much earlier than the Western, from monuments. The classification may be thus detailed. (1) Eastern: (a) Babylonian and Assyrian; (b) Arabic, Gheeze, Ethiopic, Amharic; (2) Semitic. The Western—including Hebrew, Moabite, late Phoenician, and Samaritan. These may be considered in turn, before proceeding to the special question of Biblical Hebrew.—Babylonian. We have Babylonian dated texts as early as 2,200 B.C., showing slight differences only from the language of 600 B.C. beyond a few more morphological and slight grammatical differences, but it is not fully known till c. 900 B.C., when it distinguished the characteristic Semitic sounds more sharply, in writing, than the early Babylonian, which sometimes confuses the gutturals. The texts, however, prove that all the 22 sounds of the Phoenician alphabet existed long before that alphabet was used. (Writing) The Babylonians pronounced D as F (proved by a Greco-Assyrian bilingual text, in which F stands always for this letter); but the Babylonians probably had a p sound (like the Akkadians) which does not exist in Arabic. The language, even in the earliest texts, differs more, or the Akkadian development. It had not only three cases for the noun (preserved in Arabic), but 12 voices, 5 moods, and 5 tenses for the verb; whereas Semitic speech originally seems to have had no cases, only 6 voices, 2 moods, and 2 tenses. The Babylonians borrowed the art of writing from the Akkadians, whose civilization was at least as old as that of Egypt; and they also used Akkadian culture terms, and official titles, and names for gods. Thus, for instance, tar-tanu ("general") was the Akkadian tar-tanu ("great chief"); elatu ("temple") the Akkadian e-gal ("great house"); and the names of Istar, Dagon, Tammuz, and Nergal were Akkadian, while the eagle, "the eagle-crown", being a figure found, like that of Dagon, in Assyria) is no doubt the Semitic misir, "eagle," and the Babylonian uk, "man," the Akkadian uk. The Babylonians used a suffixed demonstrative ma ("this"), and had no definite article; and this suffix is also used (as m) in the Sabean, instead of the article, and is attached to personal names (just as in Babylonian), whence came the "nimmatto" of the Heb., and the Arab. lamisn, in a dialect where n took the place of m. The main difference between Babylonian and later Assyrian seems to be that the latter is more purely Semitic, in consequence of the decay of the Akkadian population. In the time of Hammurabi, chronicles and historic texts occur in both Akkadian and Semitic Babylonian; but after c. 1400 B.C. the former ceased to be the prevailing speech of civilized regions.—Arabic. This name should be confined to the speech of Joktan [Arabia], and does not include the Nabatean of the N.W. We are unable to trace it earlier than c. 250 B.C., when it appears on the Sabean texts of S. Arabia. The dialect of the E. (according to Lenormant) was nearer in its sounds to the Babylonian (as for instance in having a shaphel instead of an aphel voice for the verb) than was that in the C.E. Muscat which was nearer the Arab.; indicating the colonization of Arabia by two streams along its two coasts. The distinctive sounds of the E. and W. Semitic families of speech, which constitute a Semitic "Grimm's Law" for language, were East ṑ, ṝ, n (final), ṣ (initial), T (final). West ṑ, ṝ, ṣ. The Arab., however, even in the Sabean texts, distinguishes (by new letters) seven intermediate sounds not found in more ancient speech (dh, th, kh, gh, d, g, f), while on the other hand it has no p sound at all. The grammatical structure is much less advanced than that of the Bible. This is due to the Sabean two tenses, and seems, from the inscriptions, to have had few voices, though modern Arab, has eight and sometimes ten. The noun had probably three cases, as at present, and the suffixed ṑ and j were ancient (as above explained), while the Sabean texts show a prefixed dh, to form the genitive, like the ṑ of the Aram. A Sabean text in the Cairo Museum dates from 264 B.C., and shows the shaphel voice for the verb, also found at M'āmūn. These are the leading features of the Sabean, and it is not necessary to consider the language of the Gheeze, or "emigrants," at Axum in Abyssinia (4th to 6th cent. A.D.), the Ethiopic of Christian literature, or the Aramaic of the N. W. It later became full of African words. Arabic. This language is known as early as 800 B.C. in Syria; and, in the Persian age, it had a diffusion almost as wide as that of Arab. after the Moslem conquest of W. Asia. It appears to be perhaps the most archaic of Semitic languages, its forms being older than those of other, Hebrew. Thus "Aramaisms" in the Bible (when not due to the errors of Massorete scribes) are marks of ancient dialect rather than signs of late date. The oldest known Aram.—as found in inscriptions of Samala [Syria] c. 800 and 730 B.C.—is nearer to Hebrew than is the later Aram. of Daniel and Ezra. The masculine singular inserts instead of ṑ, and the relative ṙ instead of ṙ. These inscriptions give some 200 words, including ṑn, "land," and ṙ, "son," which are of importance for Bible study. The ṙhaed voice, unknown in Heb., is found at Samala, as well as on the Moabite Stone, and in Sabean, and later Aram. The Aram., as known to Jeremiah (10.17), while it includes the word ṚN, and the masculine plural ṙ, has already the ṙ (instead of ṑ) which prevailed later; but Jeremiah wrote two centuries after the oldest Samala text was engraved. The Aram. language had spread

51
to Assyria before 850 B.C., being no doubt used by traders from Syria, for whose benefit docket-

the Aram. and even from the Akkadian. Finally, the Nabatean is an Aram. dialect, known from the texts of M’ala and Teima (Doughty), perhaps as early as 500 B.C., and from the Sinaitic texts, which go down to the 4th cent. A.D. The E. Aram. also survives in the sacred language of the Mandate Gnostics on the Euphrates, and in other dialects of Mesopotamia.

Stone gives us this language as it was in 900 B.C. The monument includes 100 distinct words, besides personal and town names. In vocabulary it closely resembles Heb., but it is a distinct dialect in other respects. Thus the masculine plural is ٦, as in Aram., not ع، as in Heb. The Moabite verb has an ٥٥٥٥ voice, as in Assyrian, etc., not found in Heb., and the root ٦٥ـ is used in the Aram. sense ("to follow"), which it never has in Heb. We thus see, even as early as the time of Ahab, Aram. peculiarities in a language belonging to the Heb. group. It is therefore not remarkable that they should occur early also in Heb. itself.

The use of ٧ for the feminine singular, which is now the common construction in Moabite, found at Samala as well, and cannot be regarded as a mark of late date in Heb. Our ideas about Aram. dialects, which were derived from a study of the Tal-

mudic language of 300 A.D., have indeed been completely reversed by the discovery of the Samala and Dibon inscriptions; and (as Raw-

linson pointed out long before) Aram., instead of being a later language than Heb., is perhaps the most archaic member of the Semitic family. The definite article, which never occurs in Babylonian, is also not found at Samala. It is sometimes used in Moabite and Phoenician, but its omission (in Heb. Gen. 21.28,29) cannot now be regarded as a sign of late date in the language (Wellhausen, Hist. Isr. p. 389).—Phoenician. By Phoenician is usually meant the Semitic dialect in Phoeni-

can texts of between 500 and 100 B.C. Whether from original identity of race, or because—as is more probable—of Heb. influence, the construction is hardly more than a local variety of Heb. It uses, for instance, the word ٥٥٥ for "son," and not the Aram. ٥٥٥ found at Samala; and, out of a list of 74 common words, 18 are found in Heb. but not in Aram. The masculine plural is ع, as in Heb., and the definite article is used; but on the other hand the final ٥ appears (when not in the construct case) for the Heb. ٥, thus resembling the more archaic Aram. form—the Babylonian ٦ as a nominative singular.—Sa-

maritan. This also may be regarded as no more than a Heb. dialect of the age after the Captivity.—Hebrew. Our only information to early Heb., outside O.T., is derived from the Siloam inscription (Siloam), c. 728 B.C. From it we learn that the language of Isaiah was that used at Jerusalem in the time of Hezekiah. The Heb. and the later Aram. seem to have diverged very slowly from the old mother tongue. The Canaanite in Ugarit and Haran, and the Canaanite in the 15th cent. B.C., wrote—and probably spoke—Babylonian; and it is very doubtful if even the few supposed "Canaanite peculiarities" in the Aramaic letters really exist. This tongue was more highly developed than the Heb., which
SEMITIC LANGUAGES

SENAAH 803

retained its primitive character, though it seems in time to have dropped its aorist tense (as Delitzsch has seen), and either lost, or never developed, the noun cases. Heb. also has less primitive terminations than this; and most emphatic Aramaic. In like manner, modern English has lost the Anglo-Saxon flexions, and modern Persian those of the language of Darius. Such simplification generally occurs when a race is long in contact with another speaking a language with a different grammatical development; and hence it may be inferred that both have been influenced by contact with the less-developed Egyptian, and by isolation in the desert. The Heb. of the age following the Captivity presents marked differences from that of the older books (see Driver, *Introduct. to Lit. of O.T.*, pp. 474-476, 502-507). The Pentateuch presents two remarkable peculiarities which Eichhorn regarded as archaic, namely, ynthia. "she," which occurs throughout (the latter in being used only 11 or 12 times), and (textual ynthia), which occurs 20 times, the later feminine form (ynthia) being only found once (Deut. 22:19). The Heb. of Genesis is supposed to contain Egyptian words in connexion with Egypt; but, though it is certain in some cases that the words were used in Egypt, it is not certain that they are Egyptian. In, and after, the Hyksos period the Egyptians borrowed a large number of Semitic words. Before that period pera meant (according to Griffith) only a great house, and after it (under 18th dynasty it stood for Pharaoh, which Renouf derives from the Semitic (as does Gesenius), with the meaning of "rule" or "tyrannize." The Heb. (ynthia is the Egyptian pesht, for "flax"; but Heb. ynthia, "river," though found in the Egyptian vor, is a Semitic word (as Delitzsch notes), occurring as yaur in Assyrian. The word (ynthia, "rush," is very likely the Egyptian and Coptic akhe: but ynthia, "corn," is used in Arab., and cannot have been borrowed from the Egyptian per. The Egyptian measure henu is compared with the Heb. hin; but the latter was 12 times as large as the Egyptian unit. Other words, like the title (aysia) (Assyr. abarakku), are not Egyptian; and this especially applies to (ynthia (a "magician"), for which no Egyptian parallel is found. This word is used in Daniel (1:20, 2:2), and in the Pentateuch (Ex. 36:13; Deut. 28: 9. 1), and seems to be the Akkadian har-turn, or "omen decider." The Heb. may have taken from the Babylonian akatu, "temple," but they clearly did not take (ynthia ("abh) from the Assyrian ubu, "charm," but directly from the Akkadian. The title of the temple (as A. V. etc.: A. V. "consulter with familiar spirits") was the "master of the charm;" and the word was taken from the non-Semitic Canaanites, or from the Akkadians. The word shkhal, for a queen (Ne. 2:6; Ps. 45:9), does not seem to be Semitic. It may be the Akkadian sha-gal, or "great bride." These ancient words disappear as a rule in later Heb., though some of them are found in the language of the Heb. chapters of Daniel. Thus the ynthia (the Melzar, Dan. 1:11,16), or the "steward" is apparently the Akkadian mal-sar, or "house-keeper." In the Pentateuch there are no Persian words, such as appear in the later Heb. after the Captivity. In Ezra there are a few certain instances of pure Persian terms: asthanapān (Akkaem. Pers. khshapāda), "satrap"; pitgān, "order;" agnostā, "treasurer;" and dar-i-mūn (the Daric coin). Others occur in Esther, and, in the Heb. of Daniel, parthmim (Akkaem. frałama), "noble" (Akkaem. apačan, "palace"); pitgān, "order;" and agnostā, "treasurer," may be regarded as certainly Persian. The Daric is also noticed in Nehemiah (7:70-72). If we turn to the first chapter of Genesis, and to other chapters in the same book which have been ascribed to a late author (P), we find a vocabulary of 250 words, most of them coinage and ancient; and out of these no less than 80 have already been found in the Aram., Moabite, and Phoenician of the monuments, as in use between 800 and 500 n.c. There are no Gk. or Lat. words in O.T. Heb.; but in the Mishna (150 A.D.) we find clear evidence of Roman rule and of Gk. civilization; and it is clear that such words as ądki, "treasurer;" and dar-i-mōn ("the Daric") and angārōs, "servant"—as against 21 Lat.; and 44 Gk. terms, referring to trade and to foreign products. Thus, while the Pentateuch presents archaisms, and borrows from Egyptian, Babylonian, and Akkadian, the historic books of Ezra, Nehemiah, and other works (Tartan, Rabshakeh, and Rab-shakeh) in later times. The books in which the later Heb. is found (after the Captivity) are the first to show Persian influence, and the Gk. conquest gave rise to the borrowing of Gk. words after the close of O.T. Such features of the development of Bible Heb. are of the highest value for the identification of the Persian, and the Accadian, English, the Phoenicians. The study of Heb. in Europe received a great impetus at the Reformation. The Lexicon Hebrewicin of Reuchlin (Capnio) appeared in 1572, and the early comparative grammar of De Dieu (Grammatica Linguarum Orientalium) in 1628, while in 1631 the English Oxford supplanted the former in learning in his Lexicon Chaldaeum et Rabbincum. The Phoenician was deciphered by the Abbé Barthélemy in 1758; and as early as 1883, Dr. F. Delitzsch urged the great importance of Rawlinson's discoveries in Assyrian for the elucidation of Heb. (The Heb. Lang. viewed in the Light of Assyrian Research). The Mishnaic Heb. can be studied in Surenhusen's Mischna (3 vols. fol. 1608); the Akkadian in F. Lenormant's Études Acadiennes (5 vols. 1873-1879). The earliest Assyrian Dict. is that of Norris in 1869. The grammar may be found in Sayce's Assyry. Gram. (1887), or in Menant's Manuel de Assyry. Gram. (1886), or in Menant's Manuel de Assyry. Gram. (1886); the Aram. of Samale in works already quoted. The Sabean is elucidated by Capt. Prideaux's "Sketch of Sabaean Grammar" (Trans. Bib. Arch. Soc. v. pp. 177 seq.), and the later Ethiopic is found in Aethio.-Tigr. Gram. (c.b.c.)

Sennah. The "children of Sennaah are
enumerated amongst the "people of Israel" who returned from the Captivity with Zerubbabel (Ezr.2.35; Ne.7.38). In Ne.3.3 the name is given with the article, has-Senaah. The names in these lists are mostly those of tribesmen, but Senahab does not occur elsewhere in the Biblical forms attached to a town.

**Senate, Senator.** The latter occurs Ps.105.22, R.V. marg. correctly "Elders." Senate, Ac.5.21, the rendering of *yepowria*, "the Council of Elders" [SYNAGOGUE, THE GREAT], indicates a body of elders distinct from the Sanhedrin. Lightfoot (Works, ed. Pitman, viii. 51) thinks that two Lesser Sanhedrin are intended by the senate; cf. Lk.22.60; Ac.22.5. [ELDER.]

**Sen'eh (born),** the name of one of the two isolated rocks which stood in the "passage of Michmash" (I Sam.14.4). It was the southern one of the two (ver. 5). [Boez.]

**Sennacherib** (ver. 10; r.v. the Assyrian, Ne.27.5; A.V. and R.V. Deut.3.9; Can.4.3: Sheirir). It was the Amorite name for the range of HERMON, the Sidonian SIRION; Abulfeda says that the part of Anti-Lebanon N. of Damascus was in his day (14th cent. A.D.) called Sanir, and Sannirs is noticed in an Assyrian text (842 B.C.) as a mountain near Damascus. [c.r.c.]

Sennacherib was the son and successor of Sargon, king of Assyria. His name in the original is read as Sin-ahh-erba—i.e. "Sin [or, the Moon] increases brothers." We know little or nothing of Sennacherib during his father's lifetime. From the meaning of his name, and from a circumstance related by Polyhistor, we may gather that he was not the eldest son; not the heir to the crown till the year before his father's death. Sennacherib mounted the throne 705 B.C. His first efforts were directed to crushing the revolt of Babylonia, which he invaded with a large army. Merodach-baladan ventured on a battle, but was defeated and driven from the country by the Assyrians; he turned his forces towards the W., chastised Sis- touk, took tribute from Tyre, Aradus, and the other Phoenician cities, and from Edom and Ashdod, besieged and captured Ascalon, made war on Egypt, which was still dependent on Ethiopia, took Libnah and Lachish on the Egyptian frontier, and, having probably concluded a convention with his chief enemy, finally marched against Hezekiah, king of Judah. It was at this time that " Sennacherib came up against all the fenced cities of Judah, and took them" (2K.18.13). There can be no doubt that the record which he has left of his campaign against " Hazar-Iyahu,", involving (according to Assyrian records) the capture of 40 fortresses and the deportation of over 200,000 persons, is the earlier part of the war with Hezekiah so briefly referred to in 2K.18.13-16. In the same year, or (less probably) in the next, and in spite of Hezekiah's attempt to avert his attack by valuable presents, he sent from Lachish Rab-shakeh and other princes, with the message: "Submit to me or suffer destruction."

Tirhakah, king of Ethiopia, was hastening N. with the Egyptians, when an event occurred which relaxed both Egypt and Judaea from their danger. In one night the Assyrians lost, either by a pestilence or by some more awful manifestation of divine power, 185,000 men. The camp immediately broke up—the king fled. Sennacherib reached his capital in safety, and was not deterred, by the terrible disaster which had befallen his arms, from engaging in one more attempt to subdue the antagonist of Nineveh, and he seems bent forward to have carefully avoided Palestine. In his fifth year he led an expedition into Armenia and Media; after which, from his sixth to his eighth year, he was engaged in wars with Susiana and Babylonia. From this point his annals fail us until his death, which (according to the Babylonian Chronicle) took place on the 20th of Tebet, 681 B.C. It is impossible to reconcile these dates exactly (but see CHRONOLOGY for emendations and an approximation) with the chronology of Hezekiah's reign, according to the numbers of the present Heb. text. Sennacherib was one of the most magnificent of the Assyrian kings. He seems to have been the first who ventured to place a Chaldaean government permanently at Nineveh, where he carefully repaired and adorned with splendid buildings. His chief works are the grand palace at Kouyunjik and the great wall of Nineveh, which had a circumference of 8 miles. He also erected monuments in distant countries. Of the death of Sennacherib Scripture briefly notes that "as he was worshipping in the house of Nisroch his god, Adrammelech and Sharezer his sons smote him with the sword, and escaped into the land of Armenia" (2K.19.37; Is.37.38). The non-Biblical authorities, including the Babylonian Chronicle, mention Adrammelech and Sharezer, but have other names for the king's sons.

**Sena'ah (Ne.11.9),** properly Hasennaah (as R.V., cf. 1 Chr.9.7), with the def. article. A Benjamite, the father of Judah, 4.

**Seorim,** chief of the fourth of the 24 courses of priests instituted by David (1 Chr.24.8).

**Sephar** (Gen.10.30), on a mountain of the east, south of the region of Edom. No details are known; but an ancient text, found at Susa, given by Scheil (Mém. Délégation en Perse, 1900, vol. ii. p. 77) mentions a place called Sephar, with Elam and Susa, and this position would be suitable. [c.r.c.]

**Sepharad** (Ob.30) is mentioned as a place where captives were in captivity. It is sometimes identified with the Saparad of the Assyrian inscriptions, which is mentioned by Sargon as one of the districts he had added to the land of Harāṭar to the N. or N.E. of Assyria. Saparad is also said to have attacked Assyria, in concert with the Medes, Kirchers, and Minni, during the reign of Esar-haddon, a statement which confirms their north-eastern position. In the inscriptions of Darius Hystaspis at Behistān and Naqš-i-Rustem, however, Saparad is mentioned between the sea and Ionıa and between Cappadocia and Ionıa respectively, but it is doubtful whether this can be regarded as an indication of position. The XXVI in Esapharad, Sapharad, and Saparath, and the Vulg. Bosporus, which, however, was adopted by Jerome from his Jewish instructor. The Targum of Jonathan and the Peshitta-Syrac, and from them the modern Jews, interpret Sepharad as Spain (Ispania and Ispania; cf. the late-Susian form Ispart), hence the appellation Sephardic (The Spanish,
Jews. See Sayce in Hastings, D.B. (vol. iv. 1907) [T.G.P.]

SEPHARVAIM, SEPHARVITES

Sepharvaim (2K.18.34,19.13; Is.37.13).

Sepharvites (2K.17.31). Sepharvaim is generally identified with the Sippar of the Assyrio-Babylonian inscriptions, which was situated on the Euphrates, 16 miles S.W. of Baghdad. It was one of the great seats of the worship of Samaš, the Babylonian sun-god, and was the head of the oldest Mess. It would seem to have been originally two cities, "Sippar of Samaš" and "Sippar of Anunit," which would account for the dual termination -aitum in Heb. This site, which is now known as Abu-habbaḥ, was first excavated by Mr. Hormuzd Rassam. In 2K. 19.13, however, its king is referred to, and this makes the above identification exceedingly uncertain, Sippar having been one of the cities of the kingdom of Babylon for at least 1,200 years before the reign of Sennacherib. Moreover, in 2K.17.24, though Babylon and Cuthah head the list, Sepharvaim is mentioned after Arvad and Hamath in that order. It was a Syrian town. J. Halâvy, therefore, suggests that Sepharvaim may be the Sibraim of Ezk.47.16, which was situated between Damascus and Hamath, the dual termination implying a frontier-city, as stated. He regards it as probably Sabara’in, mentioned in the Babylonian Chronicle as having been captured by Shalmaneser. [ADRAMMELCH; SAMARIA] [T.G.P.]

Sephela (Mac.12.38), the Gk. form of the Hbr. šphēlād, meaning "low." The A.V. renders it "vale," "plain," "low plains," and "low country"; but it is clear, from Jos. 15.33, that the term applied to the foot-hills W. of the mountains of Judah, and not to the plains. These foot-hills exist all along the borders of Philistia and Sharon; but in Judaea especially they form a distinct region. The old name still survives, at the villages of Sīleh and 'Allātir-es-Sīleh, in this region, and retains the old meaning in Arab. See Deut.1.7; Jos.9.1,10.46,11.2,16.2,15.33; Judg.1.9; 1K.10.27; 2Ch.2.18; 1Ch.4.12; 1Macc.1.5; 10.21,27,28,27.28,28.27.28,28,27.25,10.28,18; Je.17.26,32; 44.33.13; Ob.19 (the Philistine plain); Zech.7.7. [C.R.C.]

Septuagint. I. Texts. (1) Holmes and Parsons (1827 A.D.) catalogued 311 codices (262 uncials, 49 cursive). But since 1827 a large number of papyri have been discovered, transcribed with portions of the Gk. O.T. (2) Codices Alexandrinus (A), Vaticanus (B), Ephraemi Syri rescriptus (C), contain the entire O.T., or originally did so. Thus the present text of Β commences at Gen.48.25. (3) The greater part of the remaining MSS. are fragmentary, including only a book or group of books. The uncials date from the 3rd to the 7th c.e., cursives from the 6th to the 16th.—II. TITLE AND ITS ORIGIN. From the Latin "septuaginta" (70); an abbreviation of "secundum septuaginta," which corresponds to the Gk. κατά (or παρά) ἑξήκοντα, as 611, the oldest MSS. are generally referred to the LXX. as ἰς κωνική ἱκάσια, or simply ἰς κωνική—i.e., the authorized translation in contradistinction to those of Aquila, Symmachus, and Theodotion (cf. vulgata, as applied to Jerome's version). Eusebius contended that the title LXX is derived through the acceptance of the version by the "sunedridon" of Alexandria, a conjecture unsupported by historical testimony. The Fathers connect the title not with the version's acceptance, but with its origin. It was the work of seventy-two elders. In Philo and Josephus the word is only used of the Pentateuch. From Origen downwards it is applied to the whole Gk. version (for reason, vide infra).—III. GENESIS OF THE SEPTUAGINT. A. The Letter of Aristeas. The statements of Philo and Josephus are practically identical. They are based on a document of uncertain date and pseudonymous authority, known as the Epistle of Aristeas (Philo, Ἀρσενοκτόνος; Josephus, Ὁρθογόνος). Its contents are briefly as follows: Ptolemy II. (Philadelphus; 285-247 B.C.), at the instigation of Demetrius, librarian of Alexandria, determined to undertake a translation of the Hebrew Torah. An embassy is dispatched to Jerusalem. Seventy-two authorities, selected from each of the twelve tribes, a circumstance which excites the suspicion of the historian. They return with the Egyptian legates. The work of translation is conducted in a building specially erected on the island of Pharos. When the translators attain agreement as to their rendering, the passage is copied down by Demetrius's scribes. Observe: (1) The translation was official; (a) civilly—made at the emperor's command; (b) ecclesiastically—the authorities at Jerusalem lent their approbation. (2) Only the Torah is mentioned; there is no reference to the prophets or Hagiographa. The statements of Pseudo-Aristeas are re-echoed by the Fathers with two significant additions: (1) The entire O.T. canon was regarded as the work of "the Seventy." While Jerome denies this, Tertullian characteristically adds that he had seen the original MSS. in the library of Alexandria. (2) The translators attained a miraculous unanimity—Emrui, and seventy-two worked together in pairs. But it is quite clear that we cannot regard these assertions as historical. (1) Is contrary to the original form of the story—i.e. to the letter of Aristeas. Moreover, there is some reason to suppose that the O.T. canon did not reach its final form until the Hasmonaean period. If so, a translation of the entire O.T. would seem to be almost impossible previous to that date. (2) Represents a development of the statements of Aristeas in the interests of the doctrine of inspiration. Possibly the idea of unanimity may have been suggested by a mystical interpretation of the LXX. In Ex.24.12, τῶν ἐπίσκοπῶν τοῦ Ἱερουσαλήμ, oὐ διαφωνοῦσαν ὀφθς εἰς (Nestle). B. Place of Origin. That the LXX. originated in Alexandria is practically undisputed. This is vouched for (a) by the internal evidence of the LXX. itself. In style, phraseology, and construction the Gk. bears the closest resemblance to that found in the Egyptian papyri. Moreover, with the Gk. of LXX. the older form of Sirach. Hence the statement of Pseudo-Aristeas—viz. that the Seventy were Pales-
timian Jews—is open to the gravest suspicion. (b) By external evidence. In the time of Philo a feast was celebrated at Alexandria in honour of the work of the Seventy. Moreover, in a fragment preserved in Clement of Alexandria (Procl. i. 342), the witness of Pseudo-Aristeas was supported by Aristobulus, who flourished under Ptolemy IV. As a philosopher and a courtier, his remarks have especial value. His contemporary, the Hellenist Demetrius, quotes Gen.30.14, 22, 25, 46, 34, and from the language employed it is clear that he had very accurately the LXX. date of the translation of the Torah. Here again most scholars are inclined to accept the statement of Pseudo-Aristeas that the translation took place during the reign of Ptolemy II. This was the unwavering verdict of antiquity, confirmed by Demetrius' use of the version and by the intrinsic probabilities of the case; for (a) by this time the flourishing Jewish settlement of Alexandria had become sufficiently denationalized to feel the need of a Gk. translation of the Torah. (b) Such an undertaking would be entirely congenial to the mind of Philadelphus, who, like Alexander Severus, was interested in religious cults. Graetz, however, considers the reign of Ptolemy II. to be too early. He argues: (i) As the Alexandrine community did not reach the acme of prosperity until the reign of Philometor (153–146 B.C.), a translation of the Scriptures previous to that date is a priori improbable. (ii) The version shows marks of Pharisaic influence. Thus Graetz cites the LXX. translation of ἡ αὐτή ἡ ἀληθινή in Lev.23.11, ἢ τῆς ἐπαίδευσης ἡ πρώτης, as evidence for his contention. But the occurrence of ἐπαίδευσι τῆς ἐπαίδευσης τῶν σαββατῶν (τοῦ σαββατόν, Swete) in ver. 15 seems to tell against this view (Swete). Recent scholarship is inclined to invert the historical sequence as given in Aristeas. The LXX. of the Torah first originated in the Jewish community of Alexandria as the natural result of its religious needs, then received the royal approval of the Ptolemy. For (a) the character of the Gk. seems inconsistent with the idea of an official translation intended to be an authoritative monument for the Ptolemy's literary interest—e.g. γεννώροι for ἡ (why not πρωπόλεος?), and σαββατῶν for τῆς ἐπαίδευσης (ἀνάπαυσις would have been sufficient, and good Gk.). (b) The rôle of Demetrius can hardly be historical. The favourite of Soter, the predecessor of Philadelphus, he was banished shortly after the latter's accession and died 282 B.C. (2). Date of the translation of the rest of O.T. Philo (c. 20 B.C. to c. 50 A.D.) has numerous citations from the prophetical and historical literature. But Lamentations, Song of Songs, Esther, Ecclesiastes, Daniel, and Ezekiel are passed over in silence, and the argument from silence certainly cannot be pressed. Similarly, the N.T. makes frequent use of the LXX., but many books are not quoted. Josephus mentions the LXX. translation of the prophets and Hagiographa, but he refrains from giving a catalogue. Wisd. (c. 50 B.C. ?) 2.12 contains a reference to the peculiar LXX. rendering of Is.5.10. It has been already suggested that the prophets and Hagiographa could hardly have been translated before the beginning of the 2nd cent. B.C. But, according to the preface of Ecclesiastes (c. 135 B.C.), it would appear that this was an accomplished fact before the reign of Philometor (185–146 B.C.), the book may have been translated just before or shortly after that monarch's accession. (b) Esther. According to the LXX. this story was brought from Palestine in the reign of Ptolemy and Cleopatra. The data are too indefinite for any certain inference to be drawn. Possibly this Ptolemy was Philometor (Swete). But some scholars are inclined to date the book as late as 48 B.C.—IV. POPULARITY OF THE SEPTUAGINT. The LXX. became the generally accepted Bible of the Jews of the Diaspora; but in Palestine it seems to have met with less enthusiastic reception. The Targums rendered it almost unnecessary. The Rabbis appear to have disliked the idea of a translation, and the LXX. was especially objectionable on account of its discrepancies with the received Heb. text. Moreover, after the dawn of the Christian era the LXX. became the battle-axe of the new faith. (Cf. Mt.1:23, παρθένος, referring to the LXX. of Is.7.14, where the Heb. has ἄννας [Aquila, correctly, νεώτης] = "a young woman of marriageable age"; παρθένος, = "virgin," would require ἂννας.) V. VERSIONS. Hence arose the desire, in the interests of Judaism, for a version nearer to the official Heb. text. The various Gk. versions (Aquila, Theodotion, Symmachus, etc.) subsequent to the LXX. are dealt with in our art. Versions, § VIII., to which reference for fuller information must be made.—VI. RECEPTIONS. An Origen and the text of the LXX. Origen is largely responsible for the present state of the LXX. The Hexapla was written between 240–250 A.D. The principles of Origen's criticism are given in his letter to Africanus (240 A.D.). (1) The LXX. had received the "imprimatur" of the Church and was of divine authority. Hence he defends its additions to Daniel. (2) Yet he believed the text as received by the Rabbis to represent the "Grundschrift" of the LXX. Therefore divergences in the existing LXX. text were detachments of the work of the Seventy. It appears that Origen originally intended to give the LXX. without comment. But this proved impossible. The outlines of his method are as follows: (a) Slight variations of LXX. were tacitly emended (LXX. Γεράσων becomes Γεράσων). (b) Since he follows the order of the Heb. throughout (Proverbs excepted), considerable textual transposition (viz. in Exodus, Kings, Jeremiah) of the Gk. was rendered necessary. (c) Omissions of the LXX. were remedied by insertions from one of the other versions and marked by an asterisk (? or §).
SEPTUAGINT

Thus, to supplement Jeremiah he employs Theodotion. (d) When the LXX. contained matter additional to that in the Heb., this additional matter was marked by an obelus (−). When, on the other hand, the Heb. text was the fuller, he inserted an exact equivalent from one of the versions and marked it with an asterisk. The close of an annotated passage was indicated by a metaboleus (◦). The text was arranged in parallel columns in this order: (1) Hebrew; (2) Transliteration into Gk. characters; (3) Aquila; (4) Symmachus; (5) Septuagint; (6) Theodotion. Occasionally, as in the Psalms, two other columns were added, thus forming an Octapla (Epiphanius regards this word as denoting a separate work). The MSS. ("Quinta" and "Septuaginta") were discovered at Jericho and Nicomedia respectively. So Eusebius. Epiphanius reverses the order. The "Septuaginta" appears to have been of Christian accidence. Origen also published a preliminary edition of the Hexapla—viz., the Tetrapla. The Hexapla was deposited in the library of Caesarea, where it remained until the capture of the city by the Saracens in the 6th cent. A.D. Only a few fragments survive, as the work was never copied as a whole, being too voluminous. But the LXX. was frequently revised. Thus Eusebius and Pamphilus issued a Caesarean edition (c. 315 A.D.). Origen’s critical principles were strictly adhered to and his notations carefully reproduced. The text had a wide circulation in Palestine, and has influenced the following MSS. of Pent. and several books, 86, 88 (Prophets). But Origen’s influence may also be traced in the LXX. recensions of Lucian and Hesychius. B. Lucian (c. 299–311 A.D.). Pseudo-Athanasius regards this as a new version (ἐξ ἐπιστημονίου ἐπιστροφή) Jerome, however, identifies it with the καυσίων, suggesting a revision of the LXX. on the basis of Origen. Certain critics appear to have influenced the following LXX. MSS.: 19, 82, 108 (Octateuch), 93 (Historical Books), 22, 30, 48, 51, etc. (Prophets). That these MSS. represent a Lucianic type of text is clear from their agreement with (a) the citations of Chrysostom, (b) the Lucianic readings of the Syriac Hexapla. Characteristics of Lucian’s work: (1) Completeness. (2) A preference for renderings synonymous with, but different from, the LXX. (3) Occurrence of double renderings. (4) Translations not represented in the LXX., and presupposing both a Hebrew original self-evidently superior in the passages concerned, and the existing Masoretic text (D). This was similar in scope to that of Lucian, and executed almost contemporaneously. Hesychius may be identified with the martyr-bishop mentioned in Eusebius (H.E. vii. 13). The recension does not survive as a whole. The following MSS. of the LXX. appear to have come under its influence: 42, 75, 76, 95, 158, 369, and its group, 26, 106, 198. This is attested by (a) quotations of Cyril, (b) correspondence with Egyptian versions.—VII. RESULTS OF ORIGEN’S WORK. As scribes were careless in reproducing the critical notations, confusion was inevitable. The text became a literary mosaic. It was commonly believed that the Hexaplaric column represented the original state of the LXX. Such was the opinion of Jerome, who desired to reinforce it with all the rigour of ecclesiastical authority. The Church, however, did not share his conviction. Various types of MSS. continued to flourish side by side, influencing one another, yet remaining distinct, no one LXX. text attaining official pre-eminence.—VIII. CHARACTER AND VALUE OF LXX. (1) The translation is literal. The grammatical order of the Hebrew is generally preserved; even peculiar constructions are retained (e.g. "instrumental" εἰ with dative = Hebrew יְהוָה). (2) The LXX. is valuable: (a) As the only witness extant, save a few quotations in Philo and elsewhere, as to the character and condition of the Heb. text previous to the Christian era. Hence it is of great assistance: (1) in elucidating the obscurities of the Massoretic text (cf. iSam. 17–18, LXX. B); (ii) as a guide to vocalization (cf. Gen. 18.20, ἡγαίων, ἀντιλαμβάνειται; LXX. ἀνατρέπεται). (b) As the Bible of the Early Church, it had a strong formative influence on the development of dogma (cf. Mt.1.23; Ac. 15.16; Ep. to Heb. passim). For the text: Swete’s Cambridge LXX. General: Intro. to Study of O.T. in Gk. (Swete); also Nestle, S. in commentaries, D.B. (5 vols. 1904). For linguistic purposes consult: Essays on Biblical Gr. (Hatch). [D.C.S.]

SERAH

Seraiah, daughter of Asher (Gen.46.17; i Chr.7.30), called in Num.26.49, Sarah, 2.

SERAIH. [1. The scribe or secretary of David (2Sam.8.17). [SHEVA, 1.].—2. High-priest in the reign of Zedekiah (2K.25.18; i Chr.6.14; Je 52.24).—3. Son of Tammuz, "the Netophathite" (2K.25.23; Je 40.8).—4. Son of Kenaz, and brother of Othniel (1Chr.4.13,14).—5. An ancestor of Jeth (3.35).—6. (Ezr.2.2)=Azariah, 20.—7. Father of Ezra (7.1), whom some identify with 2, but see Ezra (8). A priest, or priestly family, who reigned over the gate of the temple (Ne 10.37,43).—8. Son of L. son of Hilkiah (11.11).—9. The head of a priestly house which went up from Babylon with Zerubbabel (12.1,12).—11. Son of Neriah, and brother of Baruch. He went to Babylon with Zedekiah in the fourth year of the latter’s reign, and is described as
SERAPHIM

Seraphim (σαραφημίς, a term of Egyptian origin, with a present tense in Egyptian, seraphī, fr. ser, "serpent"; Gr. sarōphēmēν, "a confused, unstable person"; L. "serpens," "a serpent") is a term used in the Bible to refer to a host of angelic beings that are described as having a resemblance to serpents or snakes. This term is only found in the Book of Isaiah (chap. 6), where they are described as being in attendance on the throne of God, holding the two sides of the temple doors, and crying out: "Holy, Holy, Holy, is the Lord of hosts; the whole earth is full of his glory." 

The term "seraphim" is derived from the Egyptian term "sarōphēmēn," which means "a confused, unstable person." This term is also found in the Greek language as "sarōphēmēn," which means "a serpent." The term is used to describe a host of angelic beings that are described as having a resemblance to serpents or snakes. This term is only found in the Book of Isaiah (chap. 6), where they are described as being in attendance on the throne of God, holding the two sides of the temple doors, and crying out: "Holy, Holy, Holy, is the Lord of hosts; the whole earth is full of his glory."
persecuted as the prophets were in old time; (ii) in relation to others (5.13-16), as the salt of the earth and the light of the world—a preserving and a guiding power among men. (2) The new law is presented (5.17-20) as the completion of the old—by carrying out what was only begun by the old. The righteousness of the kingdom is far more searching than that of the scribes and Pharisees. Of these examples are given (5.21-48): Ye have heard what God said to them of old; but I tell you something better. It is not murder only that is wrong, but anger and malice: not adultery only, but every lustful look; not divorce for light cause only, but divorce for every cause except adultery; not false swearing only, but swearing generally; not retaliation only, but the spirit of resistance; not hatred of our neighbours only, but hatred even of our enemies. Ye shall then be perfect as your heavenly Father is perfect. True, it is set forth in relation first to outward religion (6.1-18). Instructions are given on three great Jewish practices of alms, prayer, and fasting. In each case the point is that we are not to make a show of them like the hypocrites. What is done before God must not be done before men. In almsgiving, do not like the hypocrites, do not stand at the street corners; in fasting, do not exhibit a dirty face. Prayer is dealt with rather more fully than the others. First come warnings not to use vain repetitions or endeavour to dictate to heaven, like the Gentiles; then the Lord's Prayer is given as a model, and our own forgiveness is connected therewith. Next, the true treasure is heavenly (19-21), the true service must be single (22-24), and the true care is to cast all your care on God (25-34), for He knows your needs and will care for you. After this, the conduct of the new life (7.1-12). Be not like the world, nor the wise men; correct the faults of others. Rather be good to men as your Father is good to them, for love is the fulfilling of the law and the prophets. Then come the dangers of the new life (7.13-20). It is a narrow way, and the deceivers are many; but you will recognize them, for they will be without an abiding principle. The conclusion (7.21-27) sets forth the paramount need of sincerity and truth. He that doeth God's will, not he that doeth mighty works, shall enter into the kingdom. He that doeth these sayings of Mine is building on the rock—all others on the sand. The Sermon on the Mount was a revolution in religion. It set forth as the highest law humanity, not the law of nature; and the highest end of man, not the merely social. It did but complete for the Jews the revelation of God's holiness given in O.T., and for the Gentiles the vision they had caught of the unity of mankind. But it did not complete them only by its preaching of a Father in heaven. Momentous as the teaching is, it almost sinks to insignificance before the personal claim of the speaker. Christ completed for the Jews by shifting the ground of religion from the law that was given through Moses to the grace and truth incarnate in Himself; and for the Gentiles by revealing Himself as the organic head of mankind and the future judge of all men. St. John himself says no more than is here implied. If Jesus Christ is not in

the highest sense divine in Person and authority, the Sermon on the Mount is an empty boast from first to last. [H.M.G.]

Se'ron, the Syrian commander (1 Mac. 13.23,24) defeated at Beth-horon by Judas Maccabaeus (162 b.C.).

Serpent. The following Heb. words denote serpents or snakes of some kind or other—namely, 'あkshabh̄, pethen, cepha' or ceph'ōn, šk'phi̇ph̄ȯn, nāḥāsh, and 'ēp̄hē'. The first four are noticed under ADDER and ASP. As a general term for any snake, nāḥāsh occurs frequently in O.T. The presumed subtilty of snakes is mentioned in Gen. 3: 1; and the supposed wisdom is alluded to by our Lord in Mt. 10.16; the poisonous properties of some species are often mentioned (Ps. 58.4; Pr. 32.32); their sharp tongues, which in some cases the Hebrews apparently regarded as the instruments of poison, are mentioned in Ps. 140.3, Job 20.16. As an omen of evil, as falsely interpreted by the serpent in Eden, the saying 'serpent' was, in the old Testament, a term applied to every species of dragon, lizard, or snake; but the 'serpent' was not generally held to represent a certain species of reptile, for the word is used for any species of reptile. The word was used figuratively in O.T. to describe anything deceitful. The word is also used metaphorically in the LXX. as a term for the Evil One. In the New Testament the word 'serpent' is applied to the devil, metaphorically. In figurative language the serpent symbolizes evil, sin, and death. The form of the serpent and its mode of progression must have been the same before, as after, the Fall; but subsequently to that event they were regarded with hatred by mankind, so that these reptiles were cursed 'above all cattle,' and a mark of condemnation was stamped upon them. The expression in Scripture that serpents "eat dust" (Gen. 3.14; Is. 65.25; Mi. 7.17) may perhaps be explained by the fact that as many of these reptiles take their food on the ground, they may swallow with it a certain amount of sand and dust. "Almost throughout the E." writes Dr. Kalisch, "the serpent was used as an emblem of the evil principle, of the spirit of disobedience and contumacy. A few exceptions only can be discovered. The Egyptians adored that animal as a benevolent genius. The Chinese consider it as a symbol of superior wisdom and power, and ascribe to the kings of heaven [tien-hoang] bodies of serpents." The evil spirit in the form of a serpent appears in the Ahriman, or lord of evil, who, according to the doctrine of Zoroaster, first taught men to sin under the guise of this reptile. Much has
been written with regard to the "fiery serpents" of Num.21.6-9, with which the "fiery flying serpent" of Is.44.20 and 30.6 has been indiscriminately identified. The Heb term rendered "fiery" by the A.V. is in the Alexandrine MS. of the LXX. translated "deadly"; Onkelos, the Arabic version of Saadias and the Vulg., translate the word "burning," in allusion to the sensation produced by the bite; other authorities understand a reference to some topic of the same nature. Although it is impossible to identify the species of poisonous snake which destroyed the people in the Arabian desert, it is obvious that either the horned viper, the cobra, or any other venemous Arabian species may denote the "serpent of the burning bite." The "fiery flying serpent" of Isaiah (i.e.) has no existence in nature; but monstrous snakes with birds' wings appear on the Egyptian sculptures. The term 'ephîr occurs in Job 20.16, Is.30.6, and 59.5 (A.V. viper); but there is nothing in the context to give a clue as to the species referred to by this name, which is derived from a root which signifies "to hiss." The supposed serpent fastened on St. Paul's hand at Melita (Ac.28.3) may have been one of the southern species of viper, such as Vipera aspis, V. latastei, or V. ammodytes, although none of these are found in Malta at the present day. [r.l.]

**Serpent, Brazen.** The incident of the brazen serpent is given in Num.21.6-9 (J.[K]). The place where it happened is not named, but the last-mentioned camping-ground is Mount Hor (20.22), on the (W.) border of Edom, where Aaron dies. The next camping-ground mentioned in Numbers is Oboth (21.10). In the list of stations in Num.33, the order is Mt. Hor, Zalmah, Punon, Oboth. The scene of the incident of the brazen serpent would according to the text be either Zalmah or Punon. The material of which the serpent was made was probably copper, or possibly bronze, but not brass (as A.V. gives it). Articles of bronze have been discovered at Tell el Hesy (Lachish) and elsewhere in Palestine. A point in the Heb text which is lost in translation, is that the words for "mentioned camping-ground" and "copper," have nearly identical consonants—much as if in English one should say "Moses made a serpent of serpentine." That Moses should have made a model of any living creature is remarkable after Ex.20.7; but it is clearly shown in the narrative that the purpose was not worship, it was not a matter of surprising that this image should, in course of time, become an object of worship (2K.18.4; Nehushitan), as relics of Christian saints have done, or as the Black Stone at Mecca practically has even to Mohammedans. Indeed, the bronze serpent is still shown upon a column in the nave of the church of St. Ambrose at Milan. As Various attempts have been made to explain the whole incident. (1) Frazer (Golden Bough, ii. 426 f.) gives several instances of plagues being stayed by making an image of the venom which caused them. Thus the Philistines made models of Death, and with them the enemy was overrun (5.6, LXX.). (2) The allegorical interpretation of the Targum of Jonathan renders Num.21.8, "He shall be healed if he direct his trust unto the name of the word of the Lord." Similarly Philo regards the narrative as an allegory of man's victory over his lower animal nature (see C.H.B.). The typical interpretations based on Jn.3.14-15, (T.T.L.) and I Sain.6.4, (T.T.L.) and the entire passage Gray, Numbers in the Internat. Comm.; Bliss and MacAlister on their excavations in Pal.; Philo Judeaus (Bohn's Lib. i. 100). [Poiion; Serpent, T.H.W.]

**Servog**, son of Reu, and great-grandfather of Abraham (Gen.11.20-23; Lu.3.35, R.V.). The name is connected with Sarûj, a district and city lying N. of Haran (see Dilman, Gen., ad loc.). [H.C.R.]

**Servant.** (1) Heb. 'ebedhath means primarily "slave" (E.V. generally "servant"), but is used for the relation of worshippers to God or to subjects to a king—e.g. iSam.27.12, na'ar, puer, nasis, "boy," "lad," and applied in other connections even to married men [Benjamin]. It denotes in this connexion either a "slave," or "free attendant." m'sharith also expresses "servant" or "minister"—e.g. Ex.24.13. (2) "Hired servant" (na'ar) is what his position was due to contract, not status. He ranked with the sojourner, and was not part of the family (Ex.12.45; Lev.22.10, 25.40). He might be a native or a stranger. For protection he depended not on the courts, but on religion (Lev.19.13); and especially Deut.24.14f., with the idea of free labor. He was supported in our sense (Lev.25.53; cf. Is.16.14, 21.16), but there may have been engagements for different periods. (3) The hired servant of the Mosaic age was to be paid day by day (Lev.19.13; Deut.24.14f.). [Wages.] He was better treated than a slave (Lev.25.40, 53), but belonged to a poor class (Deut.24.14f.), had an unenviable life (Job 7.7f.), and more frequently subjected to oppressive treatment (Mal.3.5). [Slave; Poor.] Encyc. Bibb. s.v. [H.M.W.]

The only passages in N.T. in which the words strictly meaning "hired servant" occur are, Lu.15.17-20; Mk.1.20; Jn.10.12, 13. Δουλος, a "bondservant" or "slave," corresponding to Heb. 'ebed does not occur about "copper" and "brass," but is frequently rendered "servant" in R.V., with margin, "bond- servant," except where "bondservant" appears in the text—e.g. Jn.8.34, 35; 1 Cor.7.22f.; Gal.4.1, 7; 1 Pet.2.16; 2 Pet.2.19. Δουλος, in R.V. a few times "servant," twice "deacon," but mostly minister. For N.T. teaching about the relative duties of masters and servants cf. Col.3.22-4.1. [H.B.]

**Servant of Jehovah.** [Isaiah, God.]

**Ses'is** (1Esad.9.34) = Shashal.

**Session.** The sequel to the Ascension. (1) The fact is recorded in Mk.16.19, which, at latest, belongs to early sub-apostolic periods. The frequency of its mention is affected by its relation to Eph.4.10. As Various attempts have been made to explain the whole incident. (1) Frazer (Golden Bough, ii. 426 f.) gives several instances of plagues being stayed by making an image of the venom which caused them. Thus the Philistines made models of Death, and with them the enemy was overrun (5.6, LXX.). (2) The allegorical interpretation of the Targum of Jonathan renders Num.21.8, "He shall be healed if he
to which all honour and worship, all service and obedience, are due to Him from all creatures (Barrow, serm. xxxi., on the Creed). "Sitting at the right hand denotes permanence in the presence of Him (Acts 2.34). A durable continuance... of that glorious condition wherein He is instated" (ib.). (3) Consequences. The suggestions of the Psalms on this point are taken up into the Christian revelation (cf. Ps. 68.18 with Eph. 4.8; and Ps. 110.1 with Heb. 10.12,13). See further 1Cor. 15.25. From this the following evidence results that the Session at the right hand of God may be understood in its bearing, first on sovereignty, secondly on the heavenly priesthood. For the former, see Heb.10.12,13; for the latter, 9.24, 1Jn.2.1,2, and the idea of intercession in Rom.8.34, Heb.7.25, Rev.8.3. See Milligan, Acts, (Lev.23.15), etc. It is frequently used in Comm. on Hebrews; art. s.s. in Hastings, Dict. of Christ and the Gospels. [w.j.s.s.]

**Sesthel** (Esd.9.31). Of the sons of Anni, 2 = Bezalei, 2. **Seth**. the third son of Adam (Gen.4.25,5.3; 1Chr.1.17, R.V.). The signification of his name, as correctly explained by Neander, is "sowing" and "seedling," in the place of Abel; but Ewald, Dillmann, and others prefer "setting," "seeding," or "slip." In the 4th cent. there existed in Egypt a sect calling themselves Sethians, who are classed by Neander among those Gnostic sects which, in opposing Judaism, approximated to the philosophy of the time. **Sethu' s, the Asherite spy (Num.13.13).**

Seven. In the Heb. mind a mystical significance was attached in a peculiar degree to the number "seven"; the origin of which is probably to be found in the number of the days of the week. The week of seven days was not an arbitrary division of time, but suited approximately to phases of the moon; the fourth part of the lunar month being a convenient division of time. But further, the seven-day week attained a religious significance as associated with the Creation, and the seventh day, the sabbath, had an ever-increasing prominence and sanctity, and has been used in the number "seven" for its mystical significance of holiness, perfection, and completeness which it came to possess [NUMBER], as is seen from its usage in the Bible. Thus the number seven continually occurs in the O.T. regulations for worship (e.g. Lev.4.6), the arrangements for the sanctuary (e.g. Ex.25.37), the sacred seasons (Lev.23.15), etc. It is frequently used in the sacred imagery of the prophets (Is.4.1; Zech.3.9, etc.) and apocalypticists (Dan.9.25; Rev. passim), and is the basis of the symbolism of Pharaoh's dreams (Gen.41.22ff.) and of symbolic action (Joh.6.4; 2K.5.14), and it was the number of deacons chosen by the Church (Acts 6.5). The entire imagery of the Apocalypse rests upon this number, which is used throughout the book to express the idea of completeness or totality. The seven churches are taken as representative of the Church as a whole (Rev.1.4); the three great series of visions of the seven seals, the seven trumpets, and the seven bowls, are all unbroken to the end of the revelation; the seven stars, the seven lamps, and the seven golden bowls are emblematical of the seven churches upon which this number, which is used throughout the book to express the idea of completeness or totality. The seven churches are taken as representative of the Church as a whole (Rev.1.4); the three great series of visions of the seven seals, the seven trumpets, and the seven bowls, are all unbroken to the end of the revelation; the seven stars, the seven lamps, and the seven golden bowls are emblematical of the seven churches. But frequently the sacred association of "seven" is dropped, and the number is used to express simply the full complement required under particular circumstances (Lev.26.18; Num.23.1), or the completeness of satisfaction (1SAm.2.5; Is.30.26), or the entire occupation of the field within the confines of Jer.3.18. It is also used: (1) in the number 25, 15.25; Is.11.15, or as the equivalent of a large number (Pr.6.31; cf. Ex.22.14; Dan.3.29; Mk.16.9). Indeed, our Lord Himself shows that in such language the number is not to be understood in a literal sense (Mt.18.21). Sometimes "seven" is used as a typical number where the particular number is of no importance (Ezk.39.9,12; Mt.22.25): sometimes it is merely a round number (e.g. Gen.4.15). Milligan, Lectures on the Apocalypse. [j.c.v.d.]

**Seven Words, The.** The probable historic sequence of the Words of our Lord from the Cross is: (1) The interceding, which, starting from a group which slew Him, advances in widening circles to include His contemporaries, and ultimately the entire human race. The basis of the plea, recognizing responsibility and ignorance, is universal. The intercession, objectively complete, still requires to be subjectively realized in each individual case, and finds its consummation in the Father. (2) The promise to the dying malefactor. The reference to Paradise is an authoritative declaration of life in the future state and of Christ's own supremacy over it. All words of Christ are deliberately chosen; and this is just as much an instruction as any other of His sayings. [The Father] For the sake of His own glory, and for His mother. Recent criticism, probably correctly, draws attention to Christ's abstention from the word "mother" in His address to her. [MARY.] In the work of redemption He is absolutely alone (cf. Mk.3.35). (4) The cry of desolation. Adopted from Ps.22.1, and, like all other words adopted by Christ, filled with new content and profounder meaning. It cannot signify the anger of the Father towards the Son. This strange theory, however prevalent, conflicts with their identity of will and the Unity of the Trinity; has no support in Scripture; and has introduced immoral connotations of transgression from the guilt of the Innoment which have done untold harm to the doctrine of Atonement. We can only say that the loving self-identity of Christ with the sinner caused Him to experience the sinner's isolation. Death as the wages of sin is consciously experienced by the sinner. Note, in this connexion, Christ's refusal of the sopping draught. He would experience death in full possession of unclouded human mental powers (cf. Heb.2.9). (5) The dying thirst. Primarily a physical reference; but those who place the apostolic interpretation on this death naturally find in the Word a spiritual reference also. (6) The Word of consummation of judges: "It is finished." Objectively, the Godward effect of the sacrifice is complete. Subjectively, the individual appropriation of the sacrifice is not complete, and will not be till the end. This Word contains the first suggestion of the redemption. (7) The prayer of the angels of Christ's life and death is its deliberate, calm control of circumstance. Nowadays is this more conspicuous than in His death. It seems like a deliberate act of will,
a self-recollected yielding up of His human soul (cf. Jn.10.17,18). [w.j.s.s.]

**Shaalabbin'** (Jos.19.42) or **Shaalbim'** (Judg.1:35; 1K.4:9), a town of Dan, named between Ir-shemesh and Ajalon. Probably *Shalloll*, 3 miles N.W. of Yafeh, [JALON]. It appears as "the land of Salabulim," in one of the Amarna letters from S. Palestine (Berlin 199), taken by the Abiri invaders in the 15th cent. B.C. [c.r.c.]

**Shaal bonite, The.** Ehabha the Shaalbonite was one of David's 37 heroes (2Sam.23:32; 1Chr.11.33). He was called after a place named Shaalbon, perhaps **SHAALABBIN**.

**Sha'aph'-I.** Son of Jahdai (1Chr.2.47).
-2. Son of Caleb, b. by his concubine Maachah; the father (i.e. founder) of Madmannah (2.49).

**Shaa'ra'im (gates).** (1) In 1Sam.17.52, the LXX. reads, "the way of gates, and unto Gath, and unto Ekron." The passage probably means, and the Philistines fled to the gates of both Gath and Ekron, and not to the town of *Shariaim*. (2) In 1Chr.4.31, Sharaaim stands for *Sharuhen* (Jos.19.6). [c.r.c.]

**Shashegaz',** the encumbr of Ahasuerus who had the custody of the women in the second house (Esth.2:14). The LXX. identifies him with *Sheshagaz*, the gate of the house of Jokamachah (Esth.1.12).

**Shabbethai'-I.** A Levite who helped Ezra in the matter of foreign marriages (Ezr.10.15). He is mentioned also, with Joshua and others (Ne.8.7), as instructing the people in the law.—2. One of the "chiefs of the Levites" (11.16), possibly identical with 1.

**Shachia',** son of Shalisha by his wife Hodesh (tchr.8.10).

**Shaddai** (Almighty). The use of this word bears out the statement of Elohim to Moses in Ex.6.2,3, "I, (that is, Elohim,) am *Jehovah*; and I appeared to Abraham, Isaac, and Jacob, in the character of El-Shaddai; but as to My Name *Jiwh,* I was not known to them." This puts the name *Jiwh* and the word Elohim on one side of a line of demarcation; and the word El the name Shaddai on another. Accordingly, Shaddai is never found in parallel with Elohim, but with Eloah, El, and 'Elyon. In fact, these three words, with Shaddai as used above, are "names," rather than proper names, which precedes the constant use, established under Moses, of Elohim in combination with Jehovah. Yet the antediluvian patriarchs are presented to us in Genesis as speaking of Elohim and Jehovah, and except that the primeval word El appears in three or more of their names, they might all be Israelites in their theology. But surely Ex.6.3 is a double sentence, like "I desired mercy and not (i.e. more than) sacrifice," not two separate statements, and we cannot say what actual words in use before the Deluge stood for what we read as Elohim and Jehovah. It seems as if Shaddai, which is connected with shad (destruction) in Is.13.6, Jl.1.15, came into use as a name of the Creator at the flood, signifying Destroyer, and was used with other words of power, until the Almighty revealed Himself again as Jehovah (El "merciful and gracious"), and faithful to His people from generation to generation. The interpretation of Jiwh, given through Moses to the children of the tribe, says to the Abrahamic family, "What I have been to your fathers, that I am to you," suits this view, although it is deduced from, rather than affirmed by, revelation. Shaddai is commoner in Job than in Genesis, occurs in the prophecies of Balaam, in the words of Naomi returning from Moab (where it is parallel with Jahwh), in a psalm of David (88.14), and of Moses (81.1). But, as stated in Ex. Lc, it belongs to the Abrahamic patriarchal theology. Ezekiel, in his captivity, twice mentions the "voice of Shaddai." Like other names of God, this is found in combination in personal names, e.g. Zurishaddai. [ROCK.]

**Shadrach, the Babylonian name of Hananiah, one of the "three children," whose song ("Benedicit, omnia opera"), as given in the apocryphal Daniel, is used in the service of the Church of England. A longer prayer in the furnace is also ascribed to him in the LXX. and Vulg., but this is thought to be by a different hand from the song. His history and the account of his marriage to the daughter of the king are found in the apocryphal Daniel, and are probably based on the story of the fiery furnace are told in Dan.1-3. A pointed allusion is made to the three in the Ep. to the Hebrews, as having "through faith quenched the power of fire" (Heb.11.33,34). There are also repeated allusions to them in the later apocryphal books, and the martyrs of the Macca- punchan church are said to have been encouraged by their example. See 1Mac.6.59; 3 Mac.6.6; 4Mac.13.9,16.3,21,18.12. The name Shadrach is of doubtful origin, and may mean "command of Aku" (i.e. the moon-god), or be a Persian title.

**Shage',** father of Jonathan the Hararite, according to 1Chr.11.34. [SHAMMAH, SHALISHA.]

**Shahrar'aim, a Benjamite mentioned in an obscure text (1Chr.8.8). His home was in "the field of Moab" (R.V.), where he is said to have begotten children after he had sent away Hushim and Baara, his wives (K.V. marg.). [n.c.r.]

**Shahazimah',** a town of Issachar (Jos.19.22). The site is unknown. [c.r.c.]

**Shalem'** (Gen.33.18). The R.V. reads "Jacob came in peace to the city of Shechem." The LXX., Peshitta-Syr., and Vulg. alike regard the word as the name of a place. The village Sallim is 2½ miles E. of Jacob's well, and on the road to Shechem, which Jacob crossed. Jacob's camp would have been in the plain S.W. of the village, before he bought the field in which the well was dug. [c.r.c.]

**Shalom, Land of (1Sam.9.4), a region in which Saul searched for the lost asses. His expeditions led N. through Mt. Ephraim, N.W. to Shalisha, and finally S. beyond Benjamin into Judah. Hence Shaim may be supposed to have been N.E. of Gibeah. The Heb. shalalim means "hollows," and the fox is called shkilal because he makes a burrow (Arab. sigulalh and thalab). Probably the land of Shu'al (1Sam.13.17), near Orphani of Benjamin, is the same (Heb. sh'ilal), and means, not the "land of a fox," but of a "hollow." This would apply to the desert E. of Tsyibeh, remarkable for caves and narrow gorges running down to the Jordan Valley—a region into which the asses might stray from Gibeah. [c.r.c.]

**Shalisha'** (1Sam.9.1). Probably the land near Bealoth (2Sam.15.8). [c.r.c.]

**Shallecheth, The gate, apparently one of the gates of the "house of Jehovah"
SHALUM

(1Chr.28.16; cf. 12.) It was the gate "to the causeway of the ascent." See 1K.10.5, where however the word "ascent" is otherwise rendered "sacrifices." [c.r.c.]

Shallum.—1. King of Israel, who conspired against Zechariah, son of Jeroboam II, slew him, and brought the dynasty of Jezebel to an end. After reigning one month he was in turn dethroned and killed by Menahem (2K.15.10,13-15).—2. The husband (or son, L.XX. in 2K.) of Huldah the prophetess (2K.22.14; 2Chr.34.22).—3. A Judahite (1Chr.2.40,41).—4. Generally known as Jehozanah (J.e.22.11). Possibly the term is here used as an epithet, "the required one," or it may be that Shallum was the original name of Jehozanah. The chronicler takes Shallum as a proper name and makes him the fourth son of Josiah (1Chr.3.15).—5. A Simeonite (4.25).—6. A high-priest, son of Zadok and ancestor of Ezra (1Chr.6.12,13; Ezra.4.2-6). The second year of the reign of Zerubbabel (10.9,17; Ezra.4.2-6; Ezr.7.4-5). Meshullam, 20, perhaps the same as—9. A Korahite gatekeeper (1Chr.24.10).—10. Father of Jehizkiah, an Ephraimite (2Chr.28.12).—11. A porter of the temple who had married a foreign woman (Ezr.10.23).—12. A son of Bank (10.16).—13. Son of Haloshed and ruler of a district of Jerusalem (Ne.3.12).—14. The uncle of Jeremiah (Je.32.7).—15. Father of Maaseiah, keeper of the threshold in the time of Jeremiah (35.4). [h.c.b.]

Shallun', son of Col-hozeh, and ruler of part of Mizpah, who assisted in the repairs of the wall of Jerusalem (Ne.3.12).—Shalma'i. The children of Shalma were Nethinim who returned with Zerubbabel (Ezr.2.46; R.V. Shalma'; Ne.7.48, R.V. Salmai).—Shalman' ( Hos.10.14) = Shalmaneser. [beth-arbel.]

Shalmaneser (Assyr. Shalman-asaridu, the conqueror has ruled). The Biblical king of this name was Shalmaneser IV. His previous name was Ululâ. In 727 B.C., on the death of Tiglath-pileser III., he seized the Assyrian throne, to which he does not appear to have had any claim beyond that furnished by successful generalship. Soon after his accession, he invaded Israel, and at the end of three years the city Vâs, captured by Sargon, and a large proportion of the Israelites deported to Assyria (2K.17.4-6, 18.9-11). At a somewhat earlier date Shalmaneser died or was murdered, and was succeeded by Sargon. [Samaria.] Josephus (q Ant. xiv. 2) relates that Shalmaneser invaded "all Syria and Phoenicia," and in particular that (in spite of the destruction of the Assyrian vessels by the much smaller fleet of Tyre) he besieged that city for five years. [a.w.s.]

Shama', one of David's guard, son of Hothan of Aroer (1Chr.11.44).—Shamar'ah, son of Rechoboam (2Chr.11.19).—Sham'ed (Shemed, R.V.), a Benjamite (1Chr.8.12).
SHAMMU A

1. The Reubenite spy; son of Zaccur (Num. 13:4).—2. (1 Chr. 14:4) = SHIMEA, 1.—3. (Nec. 11:17) = SHEMAIAH, 6.—4. The representative of the priestly family of Bilgah, or Bilgai, in the days of Joiakim (12:18).

Shammua (2 Sam. 5:14) = SHIMEA, 1.
Shamshera'i, one of the sons of Jerobam, a Benjamite (1 Chr. 8:26).

Shaphat, a Gadite of Bashan (1 Chr. 5:12).

Shaphan, the scribe or secretary of king Josiah. He was the son of Azahiah (2 K. 22:3; 2 Chr. 34:9), father of Ahikam (2 K. 22:12; 2 Chr. 34:20), Elasah (Je. 29:3), and Gemariah (26:10, 11, 12), and grandfather of Gedaliah (39:14, 40:5, 9, 11, 41:2, 43:6). Michaiah (36:11), and probably of Jaazaniah (Ezk. 8:11). There seems to be no sufficient reason for supposing that Shaphan the father of Ahikam, and Shaphan the scribe, were different persons. The history of Shaphan is three in eight of the old books (2 K. 22:3; 2 K. 12:10), Ewald calls him Minister of Finance (Gesch. iii. 697). It was on this occasion that Hilkiah discovered in the temple the "book of the Law," which he entrusted to Shaphan. By him it was read in the ears of the king, who at once sent him, with Hilkiah and three others, to seek the advice of Shaphan. Shaphan was then apparently an old man, for his son Ahikam held a position of importance, and his grandson Gedaliah was already born; and probably Shaphan died before the fifth year of Jehoiakim, eighteen years later, when we find Elisahma was scribe (Je. 33:21).

The name of a border tribe (Num. 33:23), the name of a desert station where the Israelites encamped. The distance, 60 miles N.E. of Hazeroth, suggests the mountain now called Tell el Asfar, as Shapher was the sixth station after Hazeroth. [C.R.C.]

Sharal, one of the sons of Bani who had taken a foreign wife (Ezr. 10:40).

Shara'im (Jos. 15:36), a town of Judah in the Shephelah district, probably the present ruin S'athar, 6 miles N. of Adullam, with which it is grouped, and E. of the valley of Elam. It is a mile W. of the village of Sefleh [Sefhela], and only about 1,600 ft. above sea-level, whereas the rock Etam, about 2 miles E. of S'athar, rises to 2,050 ft. in the mountain district. Hence S'athar would be described as in the Shephelah. [C.R.C.]

Sharrar, father of Ahiah the Hararite (2 Sam. 23:33), called Sacar (1 Chr. 11:35).

Shazer, one of the two sons of Sennacherib, who made the first attack on Judah (2 K. 19:37).

Sharon, Sharon. The latter (Sharon in R.V., Ae.9.35) is the Gk. form of the Heb. word, which signifies a "plain." On the Moabite Stone it is applied to the mishôr, or plateau of Moab. Eusebius and Jerome (Onomasticon) say that the plateau E. of Tabor was called Sharon in their time, and the village Sarôna still stands in the midst. [LASHAN, "excellent," in the Bible the seashore plain, especially N. of Joppa, is so called. In the inscription of Eshmunazar II. of Sidon occurs the passage: "And for this cause has the lord of kings given us Dor and Joppa, which are in the plains of Sharon, as a reward for the great things which I have done; and has added them to the boundaries of the land, that they may belong to the Sidonians for ever." This refers to conditions existing in 3rd cent. b.c. In 1 Chr. 5:16, Sharon means the plateau of Moab, as on the Moabite Stone, and the reference is to the N. border of the mishôr, on the S. limit of Gad. But in 27:29 the Sharonite, who was over the herds in Sharon, was not the chief of the tribe of Judah. Solomon's bride (Can. 2:1) likens herself to lowly wild flowers—"the rose of Sharon and the lily of the valleys": and the Targum renders the former narti'as, or "narcissus," a flower with which the plain of Sharon abounds in spring. In 1 S. 33:9 Sharon, in time of dearth, becomes a desert; but is afterwards called a "thorn desert that "blossoms as the rose" (35:12). It is, moreover, a country of flocks (65:10). This plain, though now much neglected, has a good soil, and grows corn, while in spring it is gay with flowers. To the N., near mount Carmel, there are remains of an open oak wood, to which which the name Sharon was given. [C.E.S. xiii. 3, 1 Wars xiii. 2] refer under the term Drumos, in connexion with Carmel. [C.R.C.]

Sharonite, The, only applied to Shittai, who had charge of the royal herds in Sharon (1 Chr. 27:30).

Sharuhen (Jos. 19:6), a town of Simeon. In 15:32 Shithim stands instead; and in 1 Chr. 4:31 Scharrain. It is probably the present Tell esh Sheri'ah (mound of the drinking-place), a large ruin in the valley of the same name, 15 miles S.E. of Gaza, with remains showing it to be an ancient site. This also is probably the Sharuhen of Egyptian records, the first city established by the Pharaoh Thothmes III. in his first campaign, about 1580 b.c. (Brugsch, Hist. Egit. ii. pp. 249, 320). [C.R.C.]

Shasha'i, a son of Bani who put away his foreign wife (Ezr. 10:40).

Shashak, a Benjamite of the sons of Beraiah (1 Chr. 8:25).

Shaul—he Son of Simeon by a Canaanitish woman (Gen. 46:10; Ex. 6:15; Num. 26:13; 1 Chr. 4:24), and founder of the family of the Shaulites.—2. (1 Chr. 4:18, 40, A.V.; Gen. 36:37, R.V.) = Saul, 1.—3. A Kohathite, son of Uzziyah, 2 (1 Chr. 6:24).

Shaveh, Valley of, a name found only in Gen. 14:17. It was a deep valley (tmeq) called also "the King's valley" (tmeq hammekel), perhaps the same as that in which Absalom erected a memorial stone (2 Sam. 18:18, 19). Josephus (1 Ant. x. 2, 7 Ant. x. 3) places it 1 1/2 mile from Jerusalem, which lie regards as the place where the Philistines noticed in the first cited passage. [C.R.C.]

Shaveh Kiriathaim, mentioned (Gen.
Shaving

Sheb’ah (šəḇʾā):—1. The son of Bichri, a Benjaminite from the mountains of Ephraim (2Sam.20.1-22), the last chief of the Absalom insurrection. Though described as a “man of Belial,” he must have been a person of some consequence, from the immense effect produced by his appearance. It was, in fact, all but an anticipation of the revolt of Jeroboam. The occasion seized by Sheba was the emulation, as if from loyalty, between the northern and southern tribes on David’s return (20.1,2). The king might well say, “Sheba, the son of Bichri, shall show more harm than did Absalom” (ver. 6). Sheba traversed the whole of Palestine, apparently rousing the population, Joab following in full pursuit. He seems to have intended to establish himself in the fortress of Abel-beth-maachah, famous for the prudence of its inhabitants (20.18). That prudence was now put to the test. Joab demanded the head of the insurgent chief. A woman of the place undertook the mission to her city, and proposed the execution to her fellow-citizens. The head of Sheba was thrown over the wall, and the insurrection ended. —2. A Gadite of Bashan (1Chr.5.13).

Sheba’ (šəḇ’ā):—1. As an Arab word this means “tall,” “of high,” whether because the people were tall (see Gen.16.12) or because the tall people of Saba in Upper Egypt, 2 (Num. x. 2), or because the region of Sheba was “high,” including the Hijaz hills. The term seems to be geographical, for its population included both descendants of Cush, who were non-Semitic (Gen.10.7; 1Chr.1.9), and of Joktan, who were Semitic (Gen.16.25; 1Chr.1.22), and also of Keturah (Gen.25.1-3; 1Chr.1.32). The queen of Sheba visited Solomon (1K.10; 2Chr.9), who also received gifts (Ps.72.10,15), including gold, from kings of Sheba. In Is.60.6 we also read of gold and incense, and in Je.6.20 of incense from Sheba. The merchants of Sheba mentioned (Deo.28.13) are noticed by Ezekiel (27.27). After the death of Solomon and the caravan of Sheba in Jb (8.19), while Sheban raids extended into Edom (1.15), Sheba is coupled with Dedan (Gen.10.7,25.3); and, from the Assyrian record of the invasion by Tiglath-pileser III., in 734 B.C., it appears that Sheban were to be found not far S. of Edom. Moslem reference to Sheba and Shimbah in the Koran (cf. Gen. iv. 4) to the “flight of Irem,” which punished Sheba for unbelief. This “flight of the lands” is supposed to have occurred in 2nd cent. A.D., at Azezul [Uzal] or the modern San’a (tankh), the capital of the Yemen. There is no doubt that Sheba represents the same people known to the Greeks as Saba, and to the Romans as Saba, Saba, Felix; but the name seems to apply to tribes yet further N. in the Hijaz hills, at an earlier period. These Sabaens were famous for wealth, and formed settlements in Abyssinia about the time of the Ptolemies. [ARA; SEMITIC LANGUAGES; WRITING.]—2. [Shebah.] [C.R.C.]

Shebah (šəḇ’ā):—1. (a) A town of Simeon close to Beer-sheba, where Isaac’s servants dug a well and made a covenant with Abimelech. In the list of the cities of the S. of Judah, there is a Shema (15.26) which stands next to Moladah, and the LXX. (Vat. MS.) reads Samaa for Sheba. There is, however, a ruin called Tell es-Sabâ‘a, where there are two wells of Sama‘a, and art. Beer-sheba), 3 miles E. of Beer-sheba, which may represent Sheba. The spellings shibbâ‘ and shebba‘, refer to the same place, recall the case of Geba, otherwise Gibeah. [C.R.C.]

Shebam (šəḇ’ām; Shobam; Shibbam):—1. Num. 33.3; 18.33; Shimbah (32.38, R.V. Shobam); Sibmah (Jos.13.28). The S. and E. forms of one name, denoting a town in Moab, noticed with Eelelah and Nebio, and apparently not far from Heshbon. Isaiah and Jeremiah notice its vines. [JAAZER.] Jerome (on Is. 16.8,9) says that it was half a mile from Heshbon; but probably it is the present Sâmîkehr, a ruin 2 miles S.W. of Heshbon, with a name that may mean “towering.” It is a well-watered site, with a fort on a cliff, and ruined houses below. Roman tombs and Christian buildings show the place to be ancient. On the W. is a dolmen, and to the S.E. and E. four good examples of wine-presses, cut in rock, were found by E. Pat (see S. 11.5,17,17, p. 227); of which plans were made, as of importance in showing the ancient cultivation of Moab. Another wine-press was found N.W. of Heshbon (p. 146). [C.R.C.]

Shebaniah.—1. A Levite who joined the service of thanksgiving and sealed the covenant (Ne.9.4,10.10) —2. A priest, or priestly family, who sealed the covenant (10.4,12.14); called Shechaniah in 12.3.—3. Another Levite who also sealed the covenant (10.12). —4. One of the priests appointed by David to blow the trumpets before the ark (1Chr.15.24).

Shebarim, a place named in jej.7.5 only, as one of the points in the flight from Ai.
The word means "broken places," referring to perhaps to the precipices E. of Ai. (c.r.c.)

Shebuel, son of Caleb his brother Hezron by his concubine Maachah (1 Chr. 2:48).

Shebna', a person of high position in Hezekiah's court, holding at one time the office of prefect of the palace (Is. 22:15-19), but subsequently the subordinate office of secretary (Is. 36:3; 2 K. 19:2). This change appears to have been effected by Isaiah's interposition. From the omission of his father's name, it has been conjectured that he was a novus homo, perhaps a foreigner.

Shebuel'.—1. A descendant of Gershon (1 Chr. 23:16, 26:24), who was ruler of the treasures of the house of God. He is the last descendent of Moses of whom there is any trace.

—2. One of the fourteen sons of Heman the millstir and the minister of the fourteenth course of the temple-choir (25:4).

Shecaniah'.—1. The tenth in order of the priests appointed by lot in the reign of David (1 Chr. 24:11).—2. A priest in the reign of Hezekiah (2 Chr. 31:15).

Shechiah (2 Chr. 31:15),—1. A descendant of Zerubbabel (1 Chr. 3:21, 22).—2. Two families who returned with Ezra (Ezr. 8:3, 5); but in ver. 5 some name appears to have been omitted. Perhaps the reading should be, "Of the sons of Zattu, Shecaniah, the son of Jahaziel."—4. Son of Jehiel, 9, of the sons of Elam (10:2).—5. One of the twelve sons of Zerubbabel (1 Chr. 3:21, 7:28, 21:21; 1 Chr. 6:67). All Israel gathered again at Shechem under Joshua, round the oak that was "by the holy place of Jehovah" (Jos. 24:1, 26); and, in the land bought by Jacob, Joseph was then buried (ver. 32). In the time of Abimelech we learn that Shechem was fortified, and there was a "beth mellîh (ver. 29), perhaps a "mound," or perhaps for beth amilu (as in Babylonian), "a chief's house." It also included a temple of Baal-berith (the "lord of the covenant"); but the place where Abimelech was made king was the old sacred centre of the oak of the pillar "Gilgal" (Judg. 9:47). Joshua's (Jos. 21:21, 23) statement is no doubt meant (Jos. 24:26; Judg. 9:6). At Shechem also Rehoboam was made king and rejected (1 K. 12:1, 18), and Jeroboam built it up (ver. 25). But the site—though very fertile—was not strong; and this probably led Omri to select the new centre at Samaria, after which transfer of the capital we hear very little of Shechem, though it probably remained the sacred centre of Samaria, Gerizim (the "mount of blessing") being the site of the Samaritan temple. The only other notices of Shechem in O.T. (see 1 Chr. 6:67, 7:28; 2 Chr. 10:1; Ps. 69:6, 108:7; Je. 41:5; Ho. 6:9, marg.) do not add to our information. Shechem is once noticed in N.T. (7:16; cf. R.V. "in Shechem"). Justin Martyr, however, was a native of this city in our 2nd cent. Shortly after the fall of Jerusalem, Titus appears to have given it the name Aurelia Flavia Neapolis, as a "new city" of the famous Flavian emperors; and his coins bearing this title are known (Robinson, Bib. Res. ii. p. 291; Reland, Pal. Illustr. ii. p. 1006). In the same age it is called Mamortha by Pliny (Hist. Nat. v. 13), and Mabortha by Josephus (4 Wars viii. 1), both words meaning "exalted," and representing perhaps an Aram. translation of the Heb. shâkhem, "shoulder," or "back." From the name Neapolis the present name Nablus, or Nabbis, is derived. The coins continue till Gallienus (253-268 A.D.); and 72 A.D. was the "era of Neapolis." Those of Hadrian apparently represented the temple on Gerizim. Under Philip Arabs, Shechem became a Roman colony called "Colonia Julia Sergia Neapolis" (Nutt, Sum. Hist. p. 15, note, quoting De Saucy, p. 244). The present town is the centre of government of a province including the Belqa E. of Jordan. It has a population of about 20,000.
including 160 Samaritans, and 600 Christians and Jews, the rest being Moslems. The site is probably unchanged; for the old Heb. tombs, cut in rock, lie just N. of the city (Surm. W. Pal. ii. pp. 167, 203-210; and pp. 172-174 for Jacob's well, 104 for Joseph's tomb). The town lies at the head of the valley, which descends W.; and this valley is remarkable for its 13 springs, close to the city. On the E. a fine olive grove occupies the flat ground; a few palms grow among the houses. On W., and on the N.W. spur of Gerizim, there are orchards and gardens in which are found olive trees, figs, walnuts, apricots, mulberries, pomegranates, vines, and the cactus on which (and also on the Syrian oak) the cochineal insect [COLOURS] now feeds. The city belonged, in 12th cent. A.D., to the knights of St. John, and their Lazard House is still inhabited—though in ruins—by lepers, in N.E. corner of the town. Their church of St. John—with a fine Gothic gateway—is now the principal mosque. A smaller mosque just outside the town, on S.W., is called Hizn Y'àqûb, or "the mourning of Jacob," from a legend which makes it the site of Jacob's mourning for Joseph (Gen. 37.31-35): this was once the Samaritan synagogue, and a fine Samaritan text of 6th cent. A.D. is built into the tower, which is now a minaret. The present synagogue (near by) is a poor modern house. Here, on four occasions between 1872 and 1882, the present writer saw—side by side on a shelf—three separate rolls of the Samaritan Pentateuch. One is comparatively modern, the second (in a brass roll-case engraved with representations of the cherubim, the pot of manna, the laver, and Aaron's rod) has on its case the date 820 A.H. This the Samaritans have recently endeavoured to sell in London. But the third and oldest copy—very rarely shown—is in a silver case, with green silk cover, and is a roll of vellum bound with green edgings. The faded letters resemble in form those of the Samaritan text already noticed at the Hizn Y'àqûb, being later forms of the old alphabet of Israel. [WRITING.] This MS. is shown to the congregation when they assemble for the Heb. feasts on Gerizim. Jacob's Well lies E. of Nablus, a mile distant, half a mile S.W. of Shechem, and about 2.5 miles W. of Shalem. It is 75 ft. deep, and 7½ ft. in diameter. Arculpinus, C. 680 A.D., found the well inside a small cruciform church. This was replaced in 12th cent. by a larger building, of which the foundations were excavated in 1893 (see Bliss, in Quarterly Statement Pal. Expl. Fund, April 1894). It had a nave and four aisles, with an apse to E. The old well mouth of this age (marked with the peculiar tooling of Norman work in Palestine) still exists, the well being in the crypt under the chancel. It is sometimes dry, and sometimes has 10 or 12 ft. depth of good water (see Jn.4.11). The term ἤναγκασθη (ver. 6) means either "spring" or "well" (see ver. 12). Joseph's Tomb is about a quarter of a mile N. of Jacob's Well, and is venerated by Jews, Samaritans, Christians, and Moslems alike. It is a modern cenotaph, of stone plastered over, in a modern enclosure. At the head and foot are rude pillars, with hollows at the top of each. Jews and Samaritans alike light lamps and burn incense in these hollows in honour of Joseph. (See our illustration in art. JOSEPH.) It is remarkable that Josephus—perhaps out of hatred to the Samaritans—places Joseph's tomb at Hebron (2 Ant. viii. 2), though in O.T. it is placed at Shechem (Jos. 24.32), and that a tomb of Joseph is shown just outside the W. wall of the Hebron haram, by Moslems—probably representing a Jewish traditional site. Whether the cenotaph at Shechem covers a rock-sunk tomb it is impossible to say. Joshua's Stone (Jos. 24.26) and the oasis of Abraham, are supposed to have stood at the foot of
Gerizim, where the small magán called el ‘Amid now exists, a mile W. of Jacob’s Well; but the older site was at Bal‘āda, now a village near the well on W. [C.R.C.]

Shechemites, The (Num. 26.31), the family of She‘chem, 1.

Shechem, The (Num. 26.31), the family of She‘chem, 1.

Shechemites, so (Jn. 10.4), e.g. Job 31.20, son Ac. 8.32, etc. Sheep
Shekel

The first mention of sheep occurs in Gen. 4.2. Sheep were used in sacrificial offerings, both as adults (Ex. 20.24; 1 K. 8.65; 2 Chr. 29.33) and as lambs; e.g. “a male from one to three years old.” Lambs of the first year were, however, more generally used as offerings (see Ex. 29.38; Lev. 9.3, 12.6; Num. 28.9, etc.), but no lamb under eight days old was allowed to be killed (Lev. 22.27). A young lamb was called ëtul (see 1 Sam. 7.10; Is. 65.25). The flesh of sheep and lambs formed an important article of food (1 Sam. 25.18; 1 K. 19.4, 23; Ps. 44.11, etc.); their wool was used as clothing (Lev. 13.47; Deut. 22.11; Prov. 31.13; Job 31.20, etc.); while “rams’ skins dyed red” were used as a covering for the tabernacle (Ex. 35.5). Rams’ wool, sheep-shearing, and lambs were sometimes paid as tribute (2 K. 3.4). Immense numbers of sheep were reared in Palestine in Biblical times. Sheep-shearing is alluded to in Gen. 31.19, 35.13; Deut. 15.19; 1 Sam. 25.4; Is. 53.7, etc. That sheep-dogs were employed in Biblical times is evident from Job 30.11, “the dogs of my flock.” Sheepherds in the E. often walk before their flocks, which they induce to follow by calling (cf. Ps. 77.20, 80.1; Jn. 10.4), though they also drive them (Gen. 33.13). In some parts of Eastern Europe and probably also in Syria, each sheep in a flock has a name, to which it will respond when called by the shepherd. The ordinary sheep of Syria and Palestine is the fat-tailed breed, but there is also a breed belonging to the European type. The story in Gen. 30 of Jacob’s stratagem with Laban’s sheep is involved in perplexity, Jacob’s conduct being condemned by some writers. It is impossible to account for the success which attended his device of setting pecked rods before the ewes and she-goats and the sheep and the she-goats were driven to drink unclean troughs on natural grounds; and it seems imperative to agree with the Greek fathers and ascribe the production of Jacob’s spotted sheep and goats to divine agency. In Gen. 31.5-13, where he states that his success was due to divine interference, it is hard to believe that Jacob was uttering a wilful untruth. The sheep is an emblem of meekness, patience, and submission, and is mentioned as exemplifying these qualities in the person of our Lord (Is. 53.7; Ac. 8.32, etc.). The relation existing between Christ, “the chief Shepherd,” and His members, is compared to that of the shepherds in the East to their flocks. [R.T.]

Sheep-market (A.V. Jn. 5.2). The word “market” is an interpolation of the translators, and gate is now substituted in R.V. The Sheep-gate was rebuilt by Nehemiah (3.1, 32, 12.39), and was between the tower of Meah and the chamber of the corner or gate of the House. It is referred to by the Greek writers as one of the gates by which the shepherds passed into the city (Gates of Jerusalem, Petrus Lavrov, 3rd ed. 1210 p. 2).

Shehariah”, a Benjamite; son of Jeroham (1 Chr. 8.26).

Shekel. In a former article [Money] a full account has been given of the coins called shekels and shekels by the Jews. It is evident that the “Israelite” character is shown by the “shekel of an ounce.” But the latter corresponds with the inscription on our shekels (Bayer, De Numis, p. 11). More important is the description quoted by K. Azarias de Rossi of a shekel seen by Ramban at St. Jean d’Acre, 1210 a.d. He gives the inscriptions again as above, but also determines the weight, which he makes about half an ounce. We find, therefore, that in early times shekels of like weight were known to the Jewish Rabbis with Israelite inscriptions, corresponding with those now found (except in one point, which is probably an error). (2) A coin was published by De Saulcy which he supposed to be a counterfeit coin. It is scarcely legible, but it appears to contain the name Eleazar on one side, and that of Simon on the other. During the troubles which preceded the final destruction of Jerusalem, Eleazar (the son of Simon ben Gorion, one of the heads of large factions. Dr. Levy suggested that money may have been struck which bore the names of both these leaders; but it seems scarcely probable,
as they do not appear to have acted in concert. But a copper coin has been published in the Revue Numismatique which undoubtedly bears the inscription of 'Eleazar the priest' Its types are—1. A vase with one handle and the inscription 'Eleazar the priest, in Samaria with letters.’ A bunch of grapes with the inscription, ‘Year one of the redemption of Israel.’ Some silver coins also, first published by Reichardt, bear the same inscription on the obverse, under a palm-tree, but the letters run from left to right. The reverse bears the same type and inscription as the copper coins. These coins, as well as some that bear the name of Simon or Simonia, are attributed by Dr. Levy to the period of this first. It is, however, quite clear that some of the coins bearing similar inscriptions belong to the period of Bar-cochba’s rebellion (or Barcoceba’s, as often spelt) under Hadrian, as they are stamped after the soul of Jehoiakim and Hadrian, see Proceed. of Soc. Bibl. Arch. May 1897, and Burkitt, Fragments of Kings acc. to the Vers. of Aquila, p. 16: but for the opposite view that these are all forgeries, see Weights, Coins.

Shekinah [etymology]—1. (1Chr.26.14) = Meshulam, 20.—2. Father of one of the sons of Bani who conveyed letters from their enemies (v. 3);—3. Father of Hananiah (Ne.3.30).—5. Priest whom Nehemiah made a treasurer of the temple (13.13).—6. Ancestor of Jehudi (Je.36.14).—7. Son of Abel; one of those ordered by Jehokim to arrest Baruch and Jeremiah (36.26).—8. Father of Jehucal (37.3).—9. Father of Shelomith (v. 21).—10. Second in the order of sons of Joktan. Genesius connects the name with that of the Σαλασαπόλις (Paleopolis vi. 7) in the S. of Arabia, apparently in the district of Sulaf in Yemen which appears to be the same as Niebuhr’s Sâilîn, written in different ways, as well as this geographical trace of Shelephe, we have the tribe of Shelif or Shulaf. Yaqût in the Mo‘ajam, s.v., says, “Es-Sefif or Es-Sulaf are two ancient tribes of the tribes of Yemen; Hishâm Ibn-Mohammed says they are the children of Yuqtân (Joktan); ... And a district in E. Yemen is named after the Sulafis.” El-Kalkasander says “Es-Sulaf, called also Beni-es-Silfan, the descendants of Qahtân (Joktan).” Finally, according to the Kâmûs, Sulaf was a branch-tribe of Dhu-el Qila’a.

Shelesh, son of Helam (1Chr.7.35).

Shelemias, father of Ahihud (1Ne.34.27).

Shelomith, 1. The mother of the man who was stoned to death for blaspheming the name (Lev.24.11).—2. Daughter of Zerubbabel (1Chr.3.19).—3. Chief of the Ishirates (23.18).—4. A descendant of Eliezer, son of Moses, in the reign of David (26.25,26,28).—5. A Gershonite (26.9).—6. The sons of Shelomith, the son of Josiphaiah, were amongst those who returned from Babylon with Ezra (Ezr.8.10). The true reading is probably, “Of the sons of Bani, Shelomith the son of Josiphaiah.”

Shelomoth (1Chr.24.22) = Shelomith, 3. Shemuel, son of Zurishaddai and the Simeonite leader at the Exodus (Num.1.6, 2.12, 7.36,41,10.19).

Shem, the eldest son of Noah, born (Gen.5.32) when his father had attained the age of 500 years. He was 98 years old, married, and childless, at the time of the Flood. Two years afterwards he became the father of Arphaxad (11.10), and other children were born to him subsequently. With the help of his brother Japheth, he covered the nakedness of their father which Canaan and Ham did not care to hide. In the prophecy of Noah connected with this incident (9.25-27), the first blessing falls on him. The land occupied by the descendants of Shem (10.21-31), beginning at its N.W. extremity with Lydia, includes Syria (Aram), Chaldea (Arphaxad), Assyria (Asshur), Persia (Elam), and Arabia (Joktan). [Races.]

Shema, 1. A Reubenite, an ancestor of Beja (1Chr.5.8).—2. Son of Elpaal (8.13). Probably the same as Shemhi (ver. 21).—3. One of those who stood at Ezra’s right hand when he read the law to the people (Ne.8.4).—Shema, 1, of the towns of the S. of Judah (Jos.15.26). [Sheba.

Shemaiah, a Benjamite of Gibeah, and father of two of David’s guard (1Chr.12.3).

Shemaiah.—1. A prophet in the reign of Rehoboam. After the revolt of the northern kingdom, Shemaiah was commissioned to charge Rehoboam and his host to return, and not war against their brethren (1K.12.22; 2 Chr.11.2); and upon the occasion of the invasion of Judah and siege of Jerusalem by Shishak the king of Egypt, he taught the people a message of encouragement after they had humbled themselves for their idolatry (2Chr.12.5-8). He wrote a chronicle of Rehoboam’s reign (12.15).—2. Son of Shechaniah, and a descendant of Zerubbabel (1Chr.3.22). He was keeper of the E. gates of the city, and assisted the wall (Ne.6.36).—3. Ancestor of Ziza, a Simeonite (1Chr.4.37). Perhaps the same as Shimea, 6.4. Son of Joel a Reubenite (5.4); perhaps the same as Shema, 1 (ver. 8).—5. Son of Hasshub, a Merarite Levite (9.14; Ne.11.15).—6. Father of Obadiah, or Abda; a Levite (9.16; cf. Ne.11.17).—7. Chief of the sons of Elizaphan, who assisted in bringing the ark from the house of Obed-edom (1Chr.15.8, 11).—8. Son of Nethaneel; a Levite and scribe in the time of David (24.6).—9. The eldest son of Obed-edom the Gittite (26.4,6,7).—10. A descendant of Jeduthun the singer, who assisted in Hezekiah’s purification of the temple (2Chr.31.1).—11. One of the sons of Adonikam who returned with Ezra (Ezr.8.23).—12. One of the “men of understanding,” whom Ezra, at his camp by the river of Ahava, commissioned to obtain ministers for the temple from “the place Casiphia” (8.16).—13. A priest of the family of Harim, who protected his foreign widow (6.11).—14. A Sayeran of Israel, son of another Harim, who also had...
married a foreigner (10.31).—15. Son of Delaiah, 3; a false prophet tribed by Sanballat to frighten the Jews from rebuilding the wall (Ne.6.10).—16. The head of a priestly house who joined Nehemiah in the covenant (10.8). His family went up with Zechariah, and were represented in the time of Joiakim by Jechonathan (12.6, 18). Probably the same family is mentioned again in 12.35.—17. One of the princes of Judah at the dedication of the wall (12.34).—18, 19. Two of the priest-musicians on the same occasion (12.36, 42).—20. The Nehelamites, "a false prophet in the time of Jeremiah (Je.29.24-32).—21. A Levite whom Jehoshaphat sent to teach the people the law (2Chr.17.8).—22. A Levite in the reign of Hezekiah (31.15).—23. A Levite who made offerings at the Passover in the reign of Josiah (35.9).—24. Father of Urijah of Kirjath-jearim (1Cb.26.20).—25. Father of Delaiah, 4 (36.12).

Shemariah. —1. One of the Benjamite warriors who joined David at Ziklag (1Chr.12.5).—2. 3. Two laymen, of the families of Haram (Ezr.10.32) and Bani (10.41), who put away their foreign wives.

Shelemiah, king of Zeboim, and ally of the king of Sodom in the war with Chedorlaomer and his allies (Gen.14.2).

She'emon, the owner of the hill on which the city of Samaria was built (1K.16.24), and after whom it was called Shomeron by its founder Omri, who bought the site for two silver talents. Shemariah (Num.33.32; Jos.17.2). Shemihdah (1Chr.7.19). A descendant of Manasseh and ancestor of the Shemidiates.

Sheminith. [Psalms, Titles of.]

Shemiramoth. —1. A Levite-musician in the time of David (1Chr.15.18, 20, 16.5).—2. A Levite and teacher of the law in the reign of Jehoshaphat (2Chr.17.8).

Shemuel. —1. Son of Ammihud, appointed from the tribe of Simeon to divide the land of Canaan (Num.34.20).—2. Samuel the prophet (1Chr.6.33).—3. Son of Tola, of the tribe of Issachar (7.2).

Shen, a place mentioned only in Sam.7.12, 16. Could be a hash-'shen (the tooth). The LXX (Vat. M.S.) renders it "the old," which suggests Jeshanah ("عين سيميا"), 6 miles N. of Mizpeh (Tell en Nasbeh). [Ezenezer.] [c.r.c.]

Shenaza, a descendant of Jeconiah (1 Chr.3.18).

Sheni'p [Deut.3.9; Can.4.8. [Senir.]

Sheol. [Hell.]

Shepham, perhaps for siph'am, connected with sapha (Arab. shefah), "lip."—a connected with the land of Israel E. of the Lebanon turned S. at Shepham, and went down from sheph'am hârthibba, E. of Arx. This indicates a line along the W. foot, or slope, of the Anti-Lebanon enclosing Riblah, and passing by the present village of 'Ain. [c.r.c.]

Shephathiah (R.V. Shephathai), a Benjamite, father of Meshullam, 6 (1Chr.9.8).

Shebathah. —1. A son of David, born of his wife Adital in Hebron (1Chr.2.41).—2. The family of Shebathiah returned with Zerubbabel (Ezr.2.41; Ne.7.9). A smaller detachment, led by Zebadiah, came up with Ezra (Ezr.8.8).—3. The family of another Shephathiah were among the children of Solomon's servants, who came up with Zerubbabel (Ezr.2.57; Ne.7.59).—4. A descendant of Perez, or Pharez, the son of Judah (Ne.11.4).—5. The son of Zabadiah, a priest of Judah who counselled Zebediah to put Jeremiah to death (Je.38.1).—6. The Haruphite, one of the Benjamite warriors who joined David at Ziklag (1Chr.12.5).—7. Son of Maachah, and chief of the Simeonites in the reign of David (27.16).—8. Son of Jehoshaphat (2Chr.21.2).

Shebelah. [Shephelah.]

Shepherd. The progenitors of the Hebrews in the patriarchal age were nomads, and in that state of society practically every man was a shepherd. Flocks were tended not only by the sons of wealthy chiefs (Gen.30.29ff., 37.1ff.), but even by their daughters (28.6ff.; Ex.2.16). Jacob and his family naturally brought their flocks and herds with them into Egypt. The dislike of the Egyptians for shepherds (Gen.46.34) was due to hatred of the usurping Hyksos, or "Shepherd-kings." In Egypt the Hebrews learned something of the life of towns, and on the entry into Canaan only few of the tribes retained the pastoral character: three settled on the broad pasture-lands of the trans-Jordanic district (Num.32). [Issachar; Simeon.] Though the shepherd's office had now become a subordinate one, the ideas associated with it remained deeply fixed in the thought and language of the people. The memory and the shepherding instincts of the Hebrews tended to produce a strong, simple, and devout type of character, such as we see in David, in Amos, and in the shepherds of Bethlehem (Lu.2).

The shepherd's life was one of hardship and danger. He was exposed to the extremes of heat and cold (Gen.31.40); he had to encounter the assaults of wild beasts (1Sam.17.34; Is.31.4; Je.5.6; Am.3.12) and robbers (Gen.31.39). The shepherd's equipment was simple: a mantle of sheep-skin; a scrip or wallet containing a small quantity of food; a sling, still the favourite weapon of Bedouin shepherds; and lastly, a staff or pipe for tubercle, a case of a weak throat (Is.11.1) and a weapon of last resort, the management of the flock (1Sam.17.40; Is.33.4; Zech.11.7). A shepherd's tent is also alluded to in Can.1.8, Is.38.12. Towers for spying an approaching enemy and for protecting shepherd and flock (like the "peel-towers" of Northumbria) existed from early times (cf. Migdal-eder, "tower of the flock," Gen.35.21; Mi.8.8), and were erected also by Uzziah and Jotham (2Chr.26.10, 27.4).

In the morning the shepherd led forth his flock from the fold (Jn.10.4), going before them and calling to them, as is still usual in the E. [Sheep]: at the pastureage he watched the flock, with the help of dogs (Job 30.1), though these do not seem to have been trained or valued, as by modern shepherds. If a sheep strayed, he searched for it until he found it (Ezk.34.12; Lu.15.4); he supplied the flock with water, either at a running stream or at troughs attached to wells or cisterns (Gen.29.3.30.8; Gen.46.28; Jos.24.3; 1Chr.25.1). He returned them back to the fold, and counted them by passing them "under the rod" or "under the hand" as they entered (Lev.27.32; Je.33.13; Ezk.20.37). Finally, he or a deputy ("the
hierling") watched the entrance of the fold throughout the night (Jn.10.3). The metaphorical use of the word "shepherd" in the Bible is worth careful study. As in Homer, the real "priests" (Gen.26.15, 6), called "the shepherds of his people" (cf. the great denunciation of the "shepherds of Israel" in Ezk.34). Our Lord appropriates the title pre-eminently to Himself, as describing His work towards mankind, and His words to St. Peter (Jn.21.15-17; cf. 1Pe.5.2-4) led naturally to the description upon the seal of Leviticus, chapter 16, of the presiding officer of the apostolic office, and the work generally of the ministers of the Christian Church. [A.R.W.]

**Shophi** (rChr.1.40) or **Shepho** (Gen.36.23), son of Shobal, of the sons of Seir.

**Shephuphan**, a son of Bela, born of Benjamin (rChr.8.5). His name is also written Shephupham (R.V. Num.26.39; A.V. Shupham (rChr.7.12,15), and Muppim (Gen.46.21).

**Sheerah**, daughter of Ephrain (rChr.7.24), and foundress of the two Beth-horons, and of Uzzan-Sherah.

**Sherebiah**, a Merarite Levite who accompanied Ezra to Jerusalem to serve as a "singing priest" (Ezr.2.41; 3.8, 6), and probably one of the apostles of God (Ezr.8.18,24). When Ezra read the law to the people, Sherebiah assisted him (Ne.8.7). He took part in the psalm of confession and thanksgiving sung at the solemn fast after the Feast of Tabernacles (9.4,5), and signed the covenant (10.12), and is mentioned among the "heads of the polls" (Babel) of the house of God (Ezr.2.41).

**She'resh**, apparently a son of Machir ben-Manasseh by his wife Maachah (rChr.7.16).

**Shere'zer** (Shareasre, R.V.), one of the messengers sent in the fourth year of Darius by returned exiles to inquire concerning fasting in the fifth month (Zech.7.2). [Regemmelch.]

**Sheshach**, a name found only in Je. (25.26,51.41), and apparently a synonym for Babylon (Babylonia). It is generally regarded as representing "Babel" on a principle well known to the later Jews—the substitution of letters according to their position in the Heb. alphabet, counting backwards from the end, instead of forwards from the beginning. Doubt may, however, be entertained as to its identity, whether this fanciful practice is as old as Jeremiah, but, notwithstanding this, the explanation is worthy of note. Sir H. Rawlinson noticed that the name of the moon-god, Nannara, might also be read Sheshak, in which case Sheshach might stand for Ur of the Chaldees, and, by extension, for Babylon itself. There is also the name of a Babylonian city, which may be read Sîšak or Shishaku. See Dr. Selbie's art. in Hastings, D.B. (vol. iv. 1902).

**Sheshai**, one of three sons of Anak who dwelt in Hebron (Num.13.22) and were slain by Caleb (Jos.10.15; Judges 12.8, 24).

**Sheshan**, a descendant of Jerahmeel. As he had no son, his line was continued by his daughter's marriage with his Egyptian slave (rChr.2.31, 34, 35). [Ahlal.]

**Sheshbazzar**, the Babylonian Samas-bal-usur (O Sun-god defend the son). He brought back the House of God from Babylon, and is called the "governor," doubtless his successor, although he is identified with Zerubbabel. See Ezr.1.8, 11, 5.14, 16; 1Esdr.2.12, 15. In the LXX. his name seems to be Sanabazzar, with Sin, the Moon-god, for Samas. Some scholars have identified him with Shennazzar (1Qgs 110). [ZERUBBABEL.] [A.H.S.]

**Sheth.**—1. The patriarch Seth (rChr.1.1).—2. "The sons of Sheth" in Num.24.17 (A.V.) should be "the sons of tumult" (as in R.V.), i.e. the wild warriors of Moab (cf. Je.48.45). [H.C.B.]

**Shethan** (Esth.1.14; some MSS. "Sethan") is, by some, the name of one of the "seven princes" (cf. Her. iii. 70) of Persia and Media who "saw the king's face," and were the chief men in the kingdom in Xerxes' third year. The name is Persian, Ushtra, "a camel" [a man so named is mentioned in the Avesta; cf. the final element in Zarathushtra's (Zoroaster's) name, and the next art.], Mod. Pers. Ushtr and Shutur. Geldner's ed. of the Zend-Avesta. [W.St.C.T.]

**Shethan-boznai** (Ezr.5.3,6, etc.), a colleague of Tatzenai (R.V.), "governor beyond (R.V.) the river" Euphrates (i.e. of Syria) under Darius Hystaspis. They referred the question whether Zerubbabel and his companions were permitted to rebuild the temple to Darius, and were directed to assist them. The name is Persian, and is found in Babylonian inscriptions mostly of the form Ushtra-buzana, for Ushtra-buzana (cf. Shethar). The Aram. form boznai closely follows the Babylonian; the Pers. form Shethan-buzana (cf. Shethar) is, according to the Persian, the Babylonian word ("lofty," Avestic); cf. Barzaniz, Ariobazaniz, Salsi-barzaniz (all in Arrian, some also in Xenophon and Pompeii Trogus) and Mithra-barzaniz (Lucian). Near to the weaker Babylonian form is Artobazaniz (Artabazaniz) in Herodotus. Otherwise boznai must be from Aves, root bu(, Skt. bu(, "to enjoy," possess," "use," Hilpricht, Babylon. Exp. of Univ. of Pennsylvania, ser. A. vol. ix. [W.St.C.T.]

**Sheva.**—1. The scribe or royal secretary of David (2Sam.20.25). He is called elsewhere Seraiah (8.17), Shisha (1K.4.3), and Shavsha (1Chr.18.16). The qri of 2Sam.20.25 reads shavsh = shева, the k'tibb reads skyaph.—2. Son of Caleb, the half-brother of his concubine Maachah (rChr.2.49).

**Shewbread.** Heb. bread of the face, or Presence-bread (R.V. marg. Ex.25.30,35,13), with reference to the face, or presence of Jehovah, Ex.25.30, 1Sam.21.6[7]; "bread" only, Ex.40.23; "bread of continuity," Num.4.7; arranged, ordered, hemmed, or row of (Ex. 24.6, "two rows"); same Heb. word) bread, 1Chr.9.32,23.29, Ne.10.33[34], 2Chr.15.11 (cf. 2.4[6]); holy, as opposed to common bread, 1Sam.21.4[5], 5. There were twelve cakes (Lev.24.5), unleavened (Josephus, 3 Ant. vi. 6, x. 7); each contained one-fifth of an ephah (a quarter of a homer, the smallest flask) (Lev. 24.5); placed on the table in two rows (R.V. marg. "piles, ver. 5"); a cup of frankincense on the top of each pile (ver. 7), a memorial offered on the altar to Jehovah. The cakes remained seven days, being changed every sabbath (ver. 8), and were eaten by the priests in a holy place (ver. 9); two rows of seven. Note that the hot cakes were set on the table; Josephus (3 Ant. x. 7) says they were baked on the
Friday and taken into the sanctuary on the morning of the sabbath. They were provided out of the common charges (Josephus, loc. cit.; Ne.10.32,33), and prepared by the Kohathites (1Chr.9.32). Though the stale cakes might be eaten by the priests only, they were in an extreme case on the sabbath given by the Levites at Numb. 18. David and his young men who were ceremonially pure (1Sam.21.4-5[5?]; Mt.12.3,4; Mk.2.25,26; Lk.6.3,4).—Table of Shewbread (Ex.25.23-28;37.10-15). The Presence-table, Num.4.7 (cf. Ezk.41.22); pure table, Lev.24.6, 2Chr.13.11; table of ordered (or, row of bread), 2Chr.29.18 (cf. 1Chr.25.16).—The Twelve loaves, or, Cubits long 1 cubit, I½ high; made of acacia wood overlaid with pure gold, and with a gold moulding round the top. According to Josephus (3 Ant. vi. 6), the legs were square in the upper and round in the lower part. A piece of wood about 4 in. wide encircled the legs, probably at the point where the change of form occurred, and this, like the top, had a moulding of gold. Four rings of gold were attached to the legs below, and through them were passed the gold-plated acacia rods for carrying the table. When carried about, it was covered with a purple-blue cloth, on which the vessels and cakes were placed. Over these was put a scarlet cloth and then a covering of sealskin (Num.4.7,8, R.V.). There was only one table in the tabernacle, but according to 2Chr.4.8 ten in the temple, five on the N. and five on the S. of the holy place (cf. 1Chr.28.16; 2Chr.4.19). In 1K.7.48, 2Chr.13.11, 2Ch.13.18 only is mention made. Josephus (5 Ant. iii. 7) says Solomon dedicated a great number of tables, but only one for the shewbread. It stood on the N. side of the holy place (Ex.26.35), opposite the golden lampstand. The first table was probably either burnt or carried to Babylon (1K.25.5ff.; 2Ch.32.24). One on the temple was taken by Antiochus (1Mac.1.22), but was replaced by another under Judas Maccabaeus, 165 B.C. (4.49). This was in use till the fall of Jerusalem (70 A.D.), when it was taken to Rome with other spoils, and is depicted on the Arch of Titus. Vessels (Ex.25.29,37,16; Num.4.7). These were (1) qu'dârbh, probably the vessels in which the cakes were baked, or in which they were kept from the Friday to the sabbath. (2) kafrîûth, bowls or pans, probably for the frankincense. (3) q'sâwâth, jars for the wine libations. (4) m'nâqqiyûth, sacrificial bowls, connected with the burnt-offerings. The meaning of the rite is uncertain. It was an ancient custom to prepare such cakes for a deity (Je.7.18,44,19; cf. the Roman lectisternium). The Babylonians offered their gods unclouded cakes of wheaten flour, twelve or three times twelve being set out on tables before the deity, and called, like the Heb. Presence-bread, "khâl pâni." It was probably a sacrificial meal. Reland, De Spolulis Templo Hierosolymitani Zimmerni, in Schrader's K.A.T. ii. 600; Keil, Bibl. Arch. vol. i. 146f.

Shibboleth (Judg.12.6; נַבְוְלוֹת, I.XX. = an ear of corn). The men of Ephraim, having quarrelled with the Gileadites on account of the expedition against Ammon, were routed by Gilead under the leadership of Jephthah, and driven to a ford of the Jordan, where they hoped to cross unrecognized in the turmoil. But Jephthah posted guards on the bank, who required the pronunciation of this word from every passer-by. The dialect of Ephraim was evidently different from that of their pursuers, and they betrayed their tribe by pronouncing the word as "sibboleth." מ"ש (sh) and ד (s) are constantly interchanged, in Heb. words. In a similar way the Heb. מ"ש is often represented in Aram. by š rather than sh. The word is also found with the sense of "flood," and but for the fact that this meaning is only found in later literature, it would seem fairly obvious that the river itself suggested the word. There is an interesting parallel in French history; and the Arabs E. of Jordan still say seyfarah for "tree," which on the W. of the river is shejeerah. [S.F.S.]

Shiloah, the name of the landmarks on the W. end of the N. boundary of Judah (Jos.15.11 only). It lay between Ekrón (אֶכְרִי), and Jabnéel (יְבֶנֶא). The site is unknown. [C.R.C.]

Shiled. [Arms, Defensive, i.]

Shiggalon. [Psalms, Titles of.]

Shihon (R.V. Shion, Heb. שִׁיון; Jos.19.19) a town of Issachar, noticed with Axaráhath (אוראנהת) and Phathath (פראת) (1Ch.8.23,28), and thus perhaps towards E. Eusebius (Onomasticon) places it "near mount Tabor," and the name may perhaps survive (in gutturalized corruption) at the 'Ayin Sh'ain, springs about 2 miles N.W. of the summit. [Tabor.] [C.R.C.]

Shiloh, the city of the Ephraimites. [Shihon.]

Shiloh-'libnath' (Jos.19.26), a place mentioned with Mt. Carmel as somewhere S. of Accho, and W. of Beth-dagon. The term shîlôh appears to be connected with shîhôr (otherwise sîhôr), which (Is.23.3) means "black mud." Shihor (Jos.13.3) was on S. border of Palestine. Shiloh-libnath may mean "the (river of) black mud for (making) bricks" (םבנה), and the river Belus, just S. of Accho, is probably intended. It flows W. for 5 miles through marshy ground to the sea, a mile S. of the city (Surv. W. Pal. i. p. 268). Pliny (Hist. Nat. xxxvi. 26) says that glass was made from sand near this river, and the conjecture of Michaelis that Libnath meant "glass," as being "transparent"; but the words for "glass" are different. [C.R.C.]

Shilhi, the father of Azubah, Jechoshaphat's mother (1K.22.42; 2Chr.20.31). Shilhim (Jos.15.32). [Sharuhiun.]

Shillem, son of Naphthali, and ancestor of the family of the Shillemites (Gen.46.24; Num.26.42). Shillo'ah, Silo'am. The Heb. shîlôḥ means "sent out," or "directed," and this applies to "the pool of Siloam" (Jn.9.7). In Isaiah (8.6) the waters of Siloah are said to go softly"—or, better, "covered over," "secretly" (מְשָׁבַע), which is explained in Jeshua's argument just before the Sennacherib invasion, in 701 B.C. He "stopped up the torrent that ran through the midst of the earth," lest the "kings of Assyria come and find much water" (2Chr.32.34); or, as further detailed (ver. 36), "stopped the upper spring of Gihon, and brought it down west to the city of David."
POOL OF SILOAM, LOOKING NORTH.

explained by the discovery of the Siloam inscription, near the mouth of the rock aqueduct which Hezekiah then made, and which runs for a third of a mile from the māqād, or spring of Gihon, to the brēkhd, or pool of Siloam. The text—now removed and partly destroyed—is in the old alphabet of Israel [Warren], and consists of 6 lines—damaged (even in 1880, when it was found by a Jewish boy) at the left ends of the lines. It runs thus: "The excavation; and this has been the method of the excavation; while yet . . . the pick, each to his fellow, and while yet there were three cubits to . . . the call of one crying out to his fellow, for there has been an excess in the rock to the right . . . on the day of excavation they hewed this mine, each to meet his fellow, pick to pick; and the waters flowed from the source [hāmmāqād] to the pool [habbrēkhdā] for two hundred and a thousand cubits; and an hundred cubits has been the height of the rock above this mine." The two parties of miners, working from Gihon and Siloam, met at a point determined by survey in 1881 (Surv. W. Pal, Jerusalem vol. pp. 345-377), when the present writer took a paper cast of the inscription. Shiloah was so called because the water was "sent" along this aqueduct whenever the natural spring in the cave of the Gihon spring caused an overflow of water, which—before Hezekiah dammed the cave mouth—had run down the Kidron, but afterwards ran, "in the midst of the earth," to the newly made pool of Siloam, which lies S. of the city, at the mouth of the Tyropoeon Valley, between Ophel on E. and the upper city on W. This pool was called, afterwards, the pool of Siloam (Heb. "hēḇirēḵād, the mouth of the Tyropoeon Valley), which now rises round the stone Zohra'ēth, on E. side of the Kidron. Josephus (5 Wars iv. 2) describes the wall as bending twice at Siloam, and running on E. side of Jerusalem (vi. 1). He places the pool outside the wall (ix. 4). Recent excavations (see F. J. Bliss, Excavations at Jerusalem, 1894-1897) show that the present Birka Siwilān represents the difficulty is not one of an old rock-cut pool, which was about 70 ft. square. An early Christian church was built on the N. side, and a long flight of steps led up the valley—representing probably the "stairs that go down from the city of David," which were close to the "pool of Siloam," to the "king's garden," and to the "sephulcher of Jedid." A small part of the Tyropoeon Valley, below the old palace on Ophel (Ne.3.15,25,12.37). The wall built by the empress Eudocia (c. 450 a.d.) to include the pool within its circuit was also discovered; being the only one that did not leave Siloam outside, but close to, the ramparts on the high ground to W. N., and E. of S.

Shiloh. The phrase in Gen.49.10, "Until Shiloh come," has been the subject of such various interpretations by scholars of the highest authority that it is scarcely reasonable to pronounce a positive opinion as to its meaning. The variation goes back to ancient versions and Jewish commentators, so that the difficulty is that of the text, or of the philology of the Vulg. renders Shiloh "qui mittendus est," which may be compared with the expression in Mt.11.3, "Art Thou He that should come"; the LXX. has "Until there come the things stored up for him." One of the Targums, some Rabbins, and Calvin render "his son." The meditators and commentators considered Shiloh in this passage to be the name of the city Shiloh (q.v.), and that the meaning was "Until he come to Shiloh"—that is, until the settlement of the Israelites in Canaan, when Judah lost its leading position. This interpretation is supported in the present day by the high authority of Dr. Strack, in the 2nd ed. (1905) of his translation of, and commentary on, Genesis. Another interpretation gives Shiloh the interpretation "Peace," or "Peace-maker," and thus the Messiah. No less authorities than Gesenius and Rosenmüller support this meaning. But there is a variant reading of the Heb. of shilô, which omits the letter yod after sh, and which may be rendered, according to Dr. Driver "Until he that is his [or, that which is his] shall come;" or—though he adds that this is not free from grammatical objections—"Until he come whose [it is]' (Comm. on Genesis). This is the reading of the parallel versions, and, according to Dr. Harold Browne (Speaker's Comm.), the authority of the ancient versions is "almost overwhelming in favour of the sense 'He to whom it belongs' or 'He
SHILOH

whose right it is.”” It seems safest to follow
the substantial agreement of two such scholars, and
accept in accordance with the margin, rendering of
R.V. “‘Until that which is his shall come,”
or “Till he come whose it is.” As to the signifi-
cance of the prediction, we may again be con-
tent with Dr. Driver’s statement that “the
verse, in either case, will then promise that
the sovereignty will not depart from Judah
till it is met by his own issue, and hence more per-
fect sovereignty to be exercised by its ideal ruler,
the Messiah.” When he adds that “such a
reference to the Messiah seems to presuppose
the teaching of Isaiah and other prophets,” it
may justly be replied, with Bp. Harold
Brown, that the assumption that the patri-
darchal age had for the Jeotalm temple of
Messiah is simply gratuitous. If Abraham
was vouchsafed a foresight of the future pre-
eminence of his seed, there is nothing improb-
able in a similar foresight being granted to
Jacob, in the vague sense intimated by the
words, of a sovereignty and leadership in the
house of David and beyond, to be the most per-
fect ruling species of a Messianic interpretation in this sense is
adopted by the great body of the Christian
Fathers. [H.W.]

Shiloh’ (rest, peace, or safety), the first
mentioned of the stations of the taber-
nacle after its removal from Gilgal. With
the ark it here remained 400 years. Jeremiah
says: “But go ye now unto my place or
‘station,’ Heb. maqom] which was in Shiloh,
where I set my name at the first” (7.12),
referring no doubt to the successive central
shrines at Shiloh, Nob, and Gibeon, and to
“all places where I record my name” (Ex.20.
24), successively adopted, after Shiloh was
deserted. The tabernacle was set up at Shechem when Israel first
built. The situation of Shiloh is very care-
fully indicated in Judges, as though not gener-
ally known (Judg.21.19): “on the north side of
Bethel, on the east side of the highway that
goeth up from Bethel to Shechem, and on
the south of Lebonah.” The ruined village Seilin
is at the junction of Bethel and Silo, about 6
miles north of Bethel. Nablus, and Lebonah.
Lubbân [Lebonah], a village close to the main
road from Beïtin [Bethel] to Nâbîlus, or
Shechem. Thus from the vicinity of Eben-
ezer, near Bethel, a messenger could easily
reach Shiloh “on the same day” (1Sam.4.1,12).
Possibly (as the Samaritans maintain) the
tabernacle was set up at Shechem when Israel
first gathered there; but very early it was
established at Shiloh by Joshua, perhaps as being a “safe” place, remote from the high-
ways of armies, and less exposed to capture
than it would have been at Shechem. Israel
assembled “at the entrance of the tent of
meeting” (Jos.18.18,19,19.1,12), which
other writers call the “house of God,” “the
house of Jehovah,” or “the temple [lit.
“great house’] of Jehovah” (Judg.18.31;
1Sam.1.9,24). The Rabbis believed that, at
Shiloh, the tabernacle became a more per-
manent building, with “doors” (see 1Sam.
3.15); but it may have been written rather later than
David’s time, by Asaph, the tabernacle of
Shiloh is called a “tent” (Ps.78.60); and in
another (27.4,5), attributed to David, temple
and pavilion are equivalent terms. After
the loss of the ark and the death of Eli
(1Sam.4), we hear very little of Shiloh, but it was
inhabited by a prophet in the time of Jeroboam
(1K.13.2) and Abijah. [Gk. = tomb, ruin, of the ruin of the “place” at Shiloh (7.12,14,26.
6,9), it appears to have been an inhabited town in
his age (41.5), whence (and from Shechem and Samaria) came men shaven and gashed
(tokens of woe), with offerings and incense for
the temple. Shilonites are also mentioned in
times later of that of all (1K.14.20,21,15.
15,19,29; 1Chr.9.5; 2Chr.9.20,10.15). The
meaning of the phrase “till Shiloh come”
(Gen.49.10) has been discussed by Jews
and Christians alike for two centuries. The
Rabbis said that the coming of the Messiah
was thus foretold. The LXX. renders the
phrase “enter Shiloh” or “the house of Shiloh”
(Ewold); or “till peace come” (Gesenius).
The site is remarkably remote, and shut in by
hills so as to be unseen till quite near. The
maidens of Shiloh, on occasion of a “feast of
Jehovah,” was used to dance in the vineyards
(Judg.16.24). It was a ruin, unoccupied, in the
little plain to S., below the hill of Seilin.
The ruins are those of a modern village, with
a spring three-quarters of a mile to E. On
N. is a deep valley, and on this side there is a
terrace, artificially made by scarping the rock
on its E. It measures 77 ft. N. and S. and 412
ft. E. and W., so that it would be large enough
for the court of the tabernacle. Sir C. W.
1873, p. 38) suggested this terrace as the place
where the tabernacle stood, and there is very
little flat ground elsewhere at Shiloh. There
is a little mosque (“of the servants of God”) S.
of the village, shaded by a fine oak; and
near it a fine ruin, is an older building of some
interest. It is square, and made of good masonry. The roof was supported by four
pillars, and the N. gate has a lintel, with carv-
ings representing an amphora, two wreaths,
and two diotases (or two-handled jugs). This
is clearly Jewish work of the Gk. or of the
Herodians. The site was perhaps not far off
(at the ruin of Kefet Betta) over the porch of
Hb. tombs. The building may be a small
synagogue. A sloping revetment was added
to its outer wall later, and a little mosque of
the “forty” (champions of Islam) was built
against the E. wall of the outer building. (Surf.
W. Pal. ii, pp. 367-370.) [C.E.G.]

Shiloni’. [Asaih, 3]

Sh’lione’ites (1Chr.9.5), apparently inhab-
habitants of Shiloh, in Ephraim (ver. 3). [Asaih, 3]
See iK.11.29,12.15,15.29,2Chr.9.29,10.15,
all of which refer to Aijah.

Shishah’, son of Zophah, an Ashrite (1
Chr.7.37).

Shimea.—1. Son of David by Bathsheba
(1Chr.3.5).—2. A Merarite Levite (6.30[15]).

—3. A Gershomite Levite, ancestor of Asaph
the minstrel (6.39[24]).—4. (20.7) = Shima.

Shimeah.—1. (2Sam.21.21) = Shimea.

—2. A descendant of Jehiel the father or founder
of Gibeon (1Chr.8.32; cf. 29,9.35).

Shimea’ (1Chr.9.38) = Shimeah, 2.

Shim'eath, an Ammonitess, mother of Joz-
achar, or Zabad, one of the murderers of
king Joash (1K.12.21[22]; 2Chr.24.26).

Shimei.—1. Second son of Gershon
Shimeon' (Jos.11.1,19.15), or Shimon'-meron' (12.20), a royal Canaanite city, in the lot of Zebulun. The Talmud (Tal. Jer. Megilla i. 1) states that its later name was Simhanta; and the LXX. reads in all three passages Sunnon (Συνον). This is the Simonias of Josephus (Life, 24), and the present village Seminieh, 5 miles W. of Nazareth, a very small place, but with three springs (Syr. W. Pal. i. p. 280). [MEROM.] [C.R.C.]

Shimshai', the scribe or secretary of Renum, 2 (2 Sam.4.23). In 1 Esd.2.16 he is called Semellius (R.V. Samellius).

Shinab, the king of Admah in the confederacy of the 4 kings against 5 (Gen.14.2).

Shinar' (šin'âr) is the ancient Heb. name of the great alluvial tract through which the Tigris and Euphrates pass before entering the sea—the tract known as Sumer and Akkad, Chaldea or Babylonia. Being an alluvial plain, brick had to be used for stone, and bitumen (from the springs at Hit) for mortar (Gen.11.21). Among its cities were Babel (Babylon), Erech (Warqa), Accad close to Sippur (Abu-habbah), and Calneh (probably Niffer). The name Shinar is possibly Sumer, and may be derived from the corruption of Kingt-Ura, the non-Semitic designation of the N. and S. districts, with sh for k and 'ayin for g. In the earliest times it was divided into a number of small states, of which Babylon, Erech, Isin, Lagas, Larsa, Niffer, and Ur seem to have been the chief. The state of Akkad, which absorbed the N. was probably in which, in early times, Semitic influence was strongest, whilst "the land of the sea," on the S., seems to have become later, at least in part, one of the strongholds of the Chaldeans, and perhaps also their kinsmen the Arameans. The primitive language of the country was that now called Sumerian, or Sumerian-Akkadian, which gave way to Semitic Babylonian 2,000 years B.C. or earlier, whilst Chaldean and Aramaean dialects were spoken in the S. See BABEL, BABYLON, and art. "Shinar" in Hastings, D.B. (vol. iv. 1902). [T.G.P.]

Ship. No one writer in the whole range of Gen. and Ezr., besides the S. of Jer. 24.24, speaks of ships; but such a vessel is very common in the ancient world, and so much information concerning the merchant-ships of the ancients as St. Luke in the narrative of St. Paul's voyage to Rome (Ac. 27.28). It is important to remember that he accomplished it in three ships: first, the Adramyttian vessel which took him from Caesarea to Myra, and which was probably a coasting vessel of no great size (27.1-5); secondly, the large Alexandrian corn-ship, in which he was wrecked on the coast of Malta (27.6-28.1); and thirdly, another large Alexandrian corn-ship, in which he sailed from Malta by Syracuse and Rhegium to Puteoli (28.11-13).—(1) Size of Ancient Ships. The narrative which we have been so thoroughly acquainted with, agrees in every essential particular with the information of Herodotus and the ancient mariners of the Mediterranean. The chief difference is in the size of the vessels. The sizes mentioned in the Bible are all much too small to represent what we should now understand by the word ship; but the larger vessels of which we hear in the writings of Herodotus and Strabo appear to have been made use of as transports, as in the case of the Parthians and Romans, and to have been used in carrying troops and supplies. The length of ships of the Roman navy was mentioned by Pliny as 200, 300, 400, 500, and 600 feet. The breadth of the vessels of the Parthian army was 150, 160, and 200 feet. The size of the vessels used for carrying troops seems to have been 200, 300, or 400 feet; and the carrying capacity of the vessels of the Parthian army was 300, 400, or 500 horsemen. The size of the ships used for carrying troops seems to have been 200, 300, or 400 feet; and the carrying capacity of the vessels of the Parthian army was 300, 400, or 500 horsemen.

Shimeonite (Num.3.13).—1 Chr.6.17,29,23,7,9,10, Zech. 12.13; called SHIMI in A.V. of Ex.6.17. In 1 Chr.6.29 he is called the son of Libni, and both are reckoned as sons of Merari, but there is no account of their being sons of Levi. It is possible that the name of the son of Levi is something omitted in this verse. [MAHLI, 1.]—2. Shimei, the son of Gera, a Benjamite of the house of Saul, who lived at Bahurim. When David, fleeing from Absalom, reached Bahurim, the long-pent-up hatred of the family of Saul burst forth in the person of Shimei, who cursed the king and hanged his servants at the door (2 Sam.16.5,13). On the king's return in triumph Shimei was the first to greet him. He threw himself at David's feet, poured forth an abject apology, and was pardoned. But the king's suspicions were not set at rest by this submission; and on his deathbed, possibly owing to some unrecorded signs of foreboding, he cautioned Solomon against him (1 K.3.9). Eventually Shimei was put to death by Benaiath for transgressing the conditions on which his life depended (2.36-46).—3. One of the adherents of Solomon at Adonijah's usurpation (1.8). Unless he is the same as Shimei, or as Shimea, of 1 Chr.2.13, David's son, the identity is impossible to identify him.—4. Solomon's officer in Benjamin (4.18).—5. Son of Pedaiah, and brother of Zerubbabel (1 Chr.3.19).—6. A Simeonite, son of Zacchur (4.26,27); perhaps the same as SHEMAIAH, 3.—7. Son of Gog, a Reubenite (5.4).—8. A Gershomite Levite, son of Libni, of the tribe of Levi, and chief of the tenth division of the singers (25.17).—10. The Ramathite who was over David's vineyards (27.27).—11. A Levite of the sons of Heman, who took part in the purification of the temple under Hezekiah (2 Chr.29.14).—12. The brother of Cononiah the Levite in the reign of Hezekiah (31.12,13). Perhaps the same as the preceding.—13. A Levite (Ezr.10.23).—14. One of the family of Hashum (10.33).—15. A son of Bani, who, like the two preceding, put away his foreign wife at the command of Ezra (10.38).—16. Son of Kish, a Benjamite, and ancestor of Mordecai (Esth.2.5).

Shimeonite, by way of allusion, to the family of Harim, who put away his foreign wife at the command of Ezra (Ezr.10.31).

Shimhi' (R.V. Shimeh), a Benjamite (1 Chr.8.21); called SHEMA in B. T. 13.

Shimi' (Ex.6.17)=SHIMEI, son of Gershon, son of Levi, and founder of the family of the Shimites (Num.3.21).—Shimona, the third son of Jesse, and brother of David (1Chr.2.13). [SHAMMAH, 2.]

Shimon', Sons of Shimon are inserted in the tribal genealogy of Judah (1 Chr.4.20).

Shimrath', a Benjamite, son of Shimhi (1 Chr.8.21).

Shimri'.—1. A Simeonite, son of Shebaiah (1 Chr.4.9).—2. Father of Jedael, 3 (11.45).—3. A Kohathite Levite who assisted in Hezekiah's purification of the temple (2 Chr.29.13).

Shimrit', a Moabitess, mother of Jehozabad, one of the assassins of king Joash (2 Chr.24.26). In 2 K.12.21 she is called SHOMER.

Shimron' (1 Chr.7.1) = SHIMRON.

Shimron', fourth son of Issachar (Gen.46.13), and head of the family of the Shimronites (Num.26.24).
an ancient merchant-ship might range from 500 to 1,000 tons, we are clearly within the mark. — (2) Steering apparatus. In 27.40 ("the fastenings of the rudders"), St. Luke uses the plur. for ancient ships were not steered by rudders fastened or hinged to the stern, but by means of two paddle-rudders, one on each quarter, acting in a rowlock or through a port-hole, as the vessel might be small or large. — (3) Buckles and Ornament of the Bow. In 27.40 ("the fastenings of the rudders") it is probable that there was no very marked difference between the bow and the stern. The "hold" (Jon. 1:5) would present no special peculiarities. One characteristic ornament, rising in a lofty curve at the stern or the bow, is familiar to us in works of art, but no allusion to it occurs in Scripture. That personification of ships, which seems to be instinctive, led the ancients to paint an eye on each side of the bow (cf. Ac. 27.15). The "sign" of the ship which bore St. Paul from Malta to Pozzuoli was CASTOR AND POLLUX (28.11); and the symbols of these heroes were doubtless painted or sculptured on each side of the bow. — (4) Undergirders. The indication of the undergirded, or the "hull" (cf. Rev. 18.17), is in 27.40, and is more in point (cf. below), 6) the peculiarity of the rig, in ancient ships, resulted in a greater tendency than in our times to the starting of the planks, and to consequent leaking and foundering. Hence it was customary to take on board peculiar contrivances, suitably called "helpers" (27.17), as paddles and planks, in order to assist the ship in passage of shallow waters, or in the event of any break-down of the rigging. These would be simply cables or chains, which in case of necessity could be passed round the frame of the ship, at right angles to its length, and made tight. — (5) Anchors. It is probable that the ground-tackle of Gk. and Rom. sailors was almost as good as our own. Ancient anchors were similar in form to ours of to-day, but were usually of brass; the concentrated force to anchoring are found in N.T., one in a very impressive metaphor concerning Christian hope (Heb. 6.19). The other is in the narrative of St. Paul's voyage at its most critical point. The ship had four anchors on board, and these were all employed in the night, when the danger of fancy. This is the last occasion on which the anchor was mentioned (on this occasion anchored by the stern (Ac. 27.29). — (6) Masts, Sails, Ropes, and Yards. These were collectively called σκέπυ or σκέπυ, i.e. gear. We find this word twice used for parts of the rigging (27.17, 19). The rig of an ancient ship was more simple and clumsy than that employed in modern times. Its great feature was one large mast, with one large square sail fastened to a yard of great length. Hence the strain upon the hull, and the danger of starting the planks, were greater than under the present system, which distributes the mechanical pressure more evenly over the whole ship. Any masts or sails more than one in an ancient ship are not mentioned, although on one occasion, perhaps a rare exception, we find the same general unit of rig. In O.T. the mast is mentioned (Is. 33.23); and from Ezk. 27.5 we learn that cedar-wood from Lebanon was sometimes used for this. In Pr. 23.34 the top of a ship's mast is probably intended. In Ezk. 27.20 - (7) Rate of Sailing. St. Paul's voyages furnish excellent data for approximately estimating this, and are quite in harmony with what we learn from other sources. We must notice here, however (whatcommentators sometimes seem to forget), that winds are variable. Thus the voyage between Troas and Philippi, accomplished on one occasion (Ac. 16.11, 12) in two days, occupied on another occasion (20.6) five days. With a fair wind an ancient ship would sail sufficiently 7 knots an hour. — (8) Sailing before the Wind, and near Breakers. The object of the sail, as it has been described, is like the rig of Chinese junks, peculiarly fitted for a gentle breeze, and capable of a quick run before the wind (16.11, 27.16). A modern ship, if the weather is not very boisterous, will sail within 6 points of the wind. To an ancient vessel, of which the hull was more clumsy, and the yards could not be braced so tight, it would be safe to assign 7 points as the limit. — (9) Laying-do. A ship that could make progress on her proper course, in moderate weather, when sailing within 7 points of the wind, would lie-to in a gale, with her length making about the same angle with the direction of the wind. This is done when the object is, not to make progress at all hazards, but to keep her course. This was done by St. Paul's ship when she was undergirded and the boat taken on board (27.14-17) under the lee of CLAUDA. — (10) Ship's Boat. The σκάφος appears prominently in the narrative of the voyage (27.32) of the Alexandrian cornship in which St. Paul was sailing from Fair Havens, and which had been undergirded (Ac. 27.11). Every large merchant-ship must have had one or more boats. — (11) Officers and Crew. In 27.11 we have both κυβερνήτης and ναύηκρος. The latter is the owner (in part or in whole) of the ship or the cargo, receiving also (possibly) the fares of the passengers. The former has the charge of the steering. The word for "shipmen" (27.27, 30) and "sailors" (Rev. 18.17) is the usual term ναύηκρος. — (12) Storms and Shipwrecks. The 1st cent. A.D. was a time of immense traffic in the Mediterranean; and many vessels must have been lost there every year by shipwreck and by foundering. This last danger would be much increased by the form of rig described above. Moreover, the ancients had no compass, and very imperfect charts and instruments, if any. Certain coasts were much dreaded, especially the African Syrtis (Ac. 27.17). The danger indicated by breakers (ver. 29), and the fear of falling on rocks, are matters of course. St. Paul's experience gives illustrations of all these perils. — (13) Boats on the Sea of Galilee. In the narratives of the call of the disciples to be "fishers of men" (Mt. 4.18-22; Mk. 1.16-20; Lk. 5.1-11) there is no special information concerning the characteristics of these boats. It is instructive to compare the accounts of the storm and the miracle on the lake (Mt. 8.23-27; Mk. 4.35-41). The latter is said to be much more violent than the former; and it is not improbable that it is more technical than St. Matthew, and St. Mark than St. Luke. With the large population round the lake of Tiberias there must have been a vast number both of fishing-boats and pleasure-boats, and boat-building must have been an all-important industry. — (14) Merchant-ships in O.T. The earliest allusions to seafaring in O.T. are: Gen. 49.13, in the prophecy of Jacob concerning Zebulun; Num. 24.24, in Balaam's prophecy; Deut. 28.68, in
CYLINDER OF ESAR-HADDON, MENTIONING MANASSEH, KING OF JUDAH.
(From the Brit. Mus.) See art. "Manasseh."

ARMED GALLEY IN MOTION: TYRIAN GALLEY GOING TO SEA.
and inscribed the names of the conquered cities on its walls. Among them are "Yehud of the king," in which the earlier Egyptians had fancied the "kingdom of Judah." As the names are not confined to Judea, it would appear that Shishak's campaign was conducted against the northern kingdom as well as Judah, and that consequently he did not enter Palestine as the ally of Jeroboam. He did not pillage Jerusalem, but exacted all the treasures of his city from Rehoboam, and apparently made them tributary (2 Chr. 12:9-12, esp. 8). The narrative in 1 K. 14:25, 26 mentions only the invasion and the exactation. [JEHUD.] [A.H.S.]

Shitra', a Sharonite who was over David's herds that fed in Sharon (1 Chr. 27:29).

Shittah-tree, Shittim (Heb. shittah), is without doubt some species of Acacia, of which three or four kinds occur in Bible lands. This wood was extensively employed in the construction of the tabernacle (see Ex. 25, 26, 36-38). The Arabic name of the Acacia is suñt. The Heb. term is, by Jablonski, Celsius, and many other authors, derived from suñt. The word seyal is common in some parts of the peninsula of Sinai, but much less so in Palestine, though the Wady Seyd ol on the W. of the Dead Sea derives its name from a few acacia-trees there. The A. seyal, like the A. arabica, yields gum arabic, which is obtained by incisions in the bark. This gum is collected by tying the twigs tangled thickets into which the stem of this tree expands may arise the use of the plur. form of the Heb. noun shittim, the sing. occurring once only in the Bible (Is. 41:19). Henslow, however, interprets the plur. "wood in blocks," i.e. timber. Besides the A. seyal, there is another species, the A. tortilis, on Mt. Sinai. This form is known as suñt to the Arabs at 'Aqaba, a name not usually given to A. seyal. But the suñt par excellence is A. lada, found in the Ghor-es-Safeeh, a handsome tree 20 to 25 ft. high, which was at once distinguished by the Bedawin from the seidal, as suñt. This species (identified by Professor Heer) is an outlier from Assouan; when the country was better wooded, it was doubtless more plentiful and it was of better timber than the more dwarf A. seyal, A. tortilis, and A. nilotica. [H.C.H.]

Shittim,' the place of Israel's encampment between the conquest of the Transjordanic highlands and the passage of the Jordan (Num. 16:24); inter alia, Joppa, Pekod, and Modin (i.e. Joppa, Pekod, and Modin). Its full name appears to be given in the first of these passages—Abel hash-Shittim (the meadow of the acacias). It was "in the Arboth-Moab, by Jordan-Jericho" (Num. 22:1, 26:3, 31:12, 33:4, 49). That is to say, it was in the Arabah or Jordan Valley, opposite Jericho. This plain, E. of the A. tortilis, on Mt. Sinai, is called the Ghor es Seisebin, or "valley of acacias." The Nahal-Shittim of J.l.3:18 appears to be somewhere on the Kidron. [C.R.C.]

Shiza', a Reubenite, father of Adina (1 Chr. 11:42).

Shoa (Ezk. 23:23) is mentioned in connexion with the Chaldeans, Pekod, Koa, and all the Assyrians, who were to work their will upon Ahobilah. The inscriptions show that Pekod, Koa, and Shoa do not mean "officers, princes, and rulers," but are really, as rendered, the names of places. Schrader identified Shoa with the Assyro-Babylonian Sutû (parallel to Koa with Kutû), according to Delitzsch, the plain E. of the Diyala towards Elam as far as the Kerkha. This name appears shortened to Sû, occurs fairly in cuneiform literature. Delitzsch, Wo lag das Paradies, p. 235. [T.G.P.]

Shobab.—1. Son of David and Bathsheba (2 Sam. 5:14; 1 Chr. 3:5, 14:4).—2. A descendant of Caleb (1 Chr. 2:19).

Shobach:—the general of Hadarezer king of the Syrians, who was defeated and slain by David at Helam (2 Sam. 10:15-18).

Shoba'.—1. The children of Shoba were a family of the doorkeepers of the temple, who returned with Zerubbabel (Ezra 2:42; Ne. 7:45).

Shoba'.—1. A second son of Seir the
Horite and one of the "dukes" of the Horites (Gen.36.20,29; 1Chr.1.38).—2. Son of Caleb the son of Hur, and "father" or founder of Kirjath-jearim (1Chr.2.50,52). In 4:1,2 he appears with Hur among the sons of Judah.

Shobek, one of the heads of the people who sealed the covenant (Ne.10.24).

Shobi', son of Nahash of Rabbah of the children of Ammon. He brought Ammon to David at Mahanaim on his flight from Absalom (2Sam.17.27-29).

Shochach (2Chr.23.8).—Sochoh' (1Sam.17.1).—Shoco' (2Chr.11.7).—Socho' (1Chr.4.18).—Sochoh' (1K.4.10).—or Sochoh' (Jos.15.35), a town of Judah, near Adullam. It was fortified by Reoboam, and is represented by the present ruin Shuweiteh, on a hill S. of the valley of Elah, near the great bend where it turns W. This was the scene of David's victory over Goliath. The Sooch of Jos.15.38 is also a town of Judah, near Dehrib, 2 miles E. of Dehrib, i.e. [C.R.C.]

Shoe. [Sandal.]

Sho'ham, a Merarite Levite (1Chr.24.27).

Shophach (Dehrib).—An Asherite, son of Heber (1Chr.7.32).—2. Jehozabad, 3, is described as the "son of Shomer" in 2K.12:21: in the parallel passage in 2Chr.24:26 the name is converted into the fem. form Shimrich, who further is described as a Moabitess.

Shophach' (1Chr.19.16,18) = Shobach.

Sho'pho' (2Chr.11.6) = Shopho' (2Chr.12.14), a town of Judah, near the town of Elath, in the south of the kingdom of Judah, on the coast of the Red Sea. It was called the "capital of Edom", and was thus the capital of the region of Edom, and of the whole kingdom of Judah. It was the scene of the capture of the king of Edom by the soldiers of Sennacherib (2K.18:7), and of the defeat of the Edomites by the forces of the Egyptians (2K.19:21,23,25,37). It was the scene of the battle between the forces of the Edomites and the Egyptians (2K.18:7), and of the defeat of the Edomites by the forces of the Egyptians (2K.19:21,23,25,37).

Shoshannim, the name of a family of the Benjamites (1Chr.7.12,15,26.16). The name appears in 1Chr.8.5 as Shophah and as Shuppim in Gen.46.21. [H.C.B.]

Shur, a place, a place just without the E. border of Egypt, mentioned in the narrative of Hagar's flight (Gen.16.7). Abraham afterwards "dwelled between Kadesh and Shur, and sojourned in Gerar" (20.1). The first clear indication of its position occurs in the account of Ishmael's posterity. "And they dwelt from Havilah unto Shur, that [is] before Egypt, as thou goest toward Assyria" (25.18; cf. 1Sam.15.17,27.8). The wilderness of Shur was entered by the Israelites after they had crossed the Red Sea (Ex.15.22,23). It was also the wilderness of Ethan (Num.33.8). Brueck (Hist. of Egl.) supposes Shur to be Heb. for the Egyptian Ainu, or "wall" protecting the frontier in the time of the 12th dynasty, and closing the isthmus N. of the gulf of Suez. It would thus have existed in the time of Abraham, and is noticed by Diodorus (i.1). Brueck connects Ethan with Khedma, a fortress on or near this wall mentioned in 14th cent. B.C. [C.R.C.]

Shushan (Sus or Shush, Gk. Σούσα) was for many centuries the capital of the non-Semitic kingdom of Elam, having, however, previously been a Babylonian (Semitic) province (Prov.10.11). Its importance is indicated by the Babylonian documents of c. 2400 B.C. After destruction by the Assyrian monarch Assurbanipal it was restored either by Cyrus, or
more probably by Darius Hystaspis, on the same plan as the palace at Persepolis. Inscriptions show that Darius built the palace. Under the Seleucid rulers Susa fell into decay, being superseded by Babylon and Seleucia. Susa was cut in two by the river Choaspe (Kerkhah). The populous quarters on the right bank are indicated by a large number of undulations of the plain. On the left bank were the royal city, the palace, and the citadel, now marked by three huge mounds, 4,500 ft. long from N. to S. and 3,000 broad from E. to W. The acropolis covered 300 acres. It included the house of the women (Esth.2.3), the royal palace with a central court (4.11,8,1), a garden and square for military manoeuvres, and a hall or throne-room (apadānām), with roof supported by fluted limestone columns, surmounted by elaborately carved capitals. It had, moreover, on either side of its front a pylon or colonnade, furnished with a frieze 12 ft. high, which exhibited figures of Hons and gods in Procession. M. Dieulafoy, a French architect and engineer, in 1884-86 carried out important excavations at Susa, and brought to light many interesting features, recovering the plan of the citadel, and extensive remains of its buildings. The ruins show that there was abundance of space for the exercise of royal hospitality such as is described in Esther. [Palace.] [A.W.-S.]

Shushan-eduth. [Psalms, Titles of Op.] Shuthalhites, The (Heb. šūthalḥi, Num.26.35), descendants of Shute'lah (Heb. šūthelah), a son of Ephraim who was killed (see Eled) by the men of Gath (1 Chr. 7.21). He had a son Eran (Num.26.36).

In this passage only three sons of Ephraim are noticed—Shuthelah, Becher, and Tahan. In 1 Chr.7.20-21 Bered stands for Becher, and Tahath for Tahan (the name being repeated, apparently by clerical error); Shuthelah is twice mentioned, and three other sons of Ephraim are added—Zabad, Eladah (Eled in ver. 21), and Ezer. Of the seven sons of Ephraim none is mentioned of Zabad, of Eladah, or of Ezer, and Eled—were slain during the lifetime of their father Ephraim, and a son Beriah was born to him later (ver. 23), from whom Joshua was descended (ver. 27). The passage in Chr. is of great chronological importance; and a confusion has been caused by a misunderstanding, as explained under Eled. The genealogy of Joshua repeats the family name Tahan, and includes the name Laadan (ver. 26), which occurs among the names of Levites (1 Chr. 23.7-9, 26.21), suggesting a marriage connexion between persons of the two tribes of Levi and Ephraim. Joseph was 30 years old or more, and Ephraim between 40 and 50 years in his prime (Gen.37.2,41.46), and the genealogy includes 11 generations in 500 years, from the birth of Joseph to the death of Joshua—who is said to have been 110 years old (Jos.24.29), giving an average of less than 50 years for a generation. This calculation perhaps favours the LXX. computation of 215 instead of 430 years for Israel in Egypt (as giving only 26 years for a generation), and may be the cause of the LXX. alteration in Ex.12.41. The Heb. text, however, agrees with Gen.15.13 and with Ac.7.6,13.20, which the LXX. dates do not; and the expression "son" constantly means a "descendant," names being omitted in many Heb. genealogies. [C.R.C.]

Sia' (Ne.7.47) or Siha'a (Esth.2.44), a family of Nethinim who returned with Zerubbabel.

Sibbceai, Sibbechai, one of David's guard, and captain for the eighth month of 24,000 men of the army (1 Chr.11.29,27.11). He belonged to a principal family of Judah, the Zarhites, or descendants of Zerah, and is called "the Hushathite," probably from the place of his birth. Sibbechai's great exploit was his single combat with Saph, or Sippai, the Philistine giant, whom he slew at Gezer, or Gob (2 Sam.21.18; 1 Chr.20.4).

Sibboleth. [Shibboleth].

Sibmah (Jos.13.19). [Shebam.]

Sibra'im (two heaps; Ezk.47.16), a landmark between the lands of Hamath and Damascus. The site is unknown. [C.R.C.]

Sicouth (Am.5.26 R.V.). [Moloch, Tabernacle of Your; Remphan.]

Sichem.—1. (Gen.12.6; Ecclus.50.26). See Sichehm, which is the R.V. reading in the first passage. In the latter, Σιχώμος stands for Σεύκησος. [C.R.C.]

Siclcx. Of the two Heb. words, heremēs and magedl, each occurs twice only, the former in Deut.16.9,23-25[26], the latter in Je.50.16 and figuratively in L.3.13. It is difficult to say what, if any, distinction there was between the two words. Remains of sickles made of wood, with teeth, are found early in Egypt. In N.T. (δόρπαρον) it is used once in a literal sense (Mk.4.29), and several times figuratively (Rev.14.14-19).

Sicyon, a city mentioned with several others in 1 Mac.15.23. The oldest name of the town on the coast (the Sicyon of the times before Alexander) was said to have been Ἀλτέα, or Ἀλταῖοι. This was perhaps the common native name, and Sicyon that given to it by the Phoenician traders. But the Sicyon referred to in the book of Maccabees is built on the site which served as an acropolis to the old one, and distant from the shore from 12 to 20 stadia. Demetrius Poliorcetes, in the year 303 B.C., surprised the garrison which Ptolemy had five years before placed there, and made himself master of the harbour and the lower town. The acropolis being surrendered to him, he persuaded the population, whom he restored to independence, to destroy all the buildings adjacent to the harbour, and to remove thither; the site being one much more easily defensible, especially from attacks by sea. Diodorus describes the new town as including a large space so surrounded by precipices as to be unapproachable by the machines at that time employed in sieges, and as possessing a plentiful supply of water within its circuit. Modern travellers completely confirm his account.

Siddim' (Gen.14.3,8,10). Gesenius renders the Heb. ṣinay hassidimm, "valley of fields," or otherwise "the dunes" [Arabic], the valley was that of the Salt Sea, full of "bitumen pits." [Cities of the Plain.] [C.R.C.]

Sidé, a city on the coast of Pamphylia in lat. 36° 46', long. 31° 27', 10 or 12 miles to the E. of the river Erymemon. It is mentioned in
Sidon, the Gk. צidon, and more familiar—form of the Heb. צidon (fishery), usually rendered Zidon by A.V. in O.T. Its original founders were apparently of the race of Canaan, akin to Hittites and Akkadians (Gen.10.15; see vv.8,10; 1Chr.1.13); and these Canaanites, or "lowlanders," held the shores from Sidon to Gaza (Gen.10.19). In the blessing of Jacob, the "high places of the sons of Zidon" (49.13). Joshua pursued the kings of Lower Galilee to "great Zidon" (Jos.11.8), and "great Zidon" bounded Asher on N. (19.28); but the tribe could not expel the "inhabitants of Zidon." (Judg.1.31), who claimed S. Syria as far E. as Hermon (Deut.3.9; Judg.18.7). They were unconquered, and were oppressors of Israel (Jos.13.4,6; Judg.3.10,12), skilled in hewing wood in Lebanon (1K.5.6), worshippers of Ashdod (11.5,33) and of Baal, and allied to Asher, through his marriage with Jezebel, the daughter of Ethbaal, "king of the Zidonians" (16.31). See 2K.23.13; 1Chr. 22.4; Ezra 3.7, where the Zidonians are noticed. In Ezek.32.30 the Zidian princes of N. are among the slain in Shewel; on which passage the text of Eshmunazar of Sidon is an interesting commentary. Israel, early after the conquest, worshipped the "gods of Zidon" (Judg.10.6), which city lay outside David's kingdom (2Sam.24.6), and in the reign of David's son Solomon, the Zidonians are included Zarephath (1K.17.9) in its territory. Isaiah speaks of merchants of Zidon crossing the sea, and fleeing to Chittim from (Assyrian) invaders (Is.23.2,4,12). Jeremiah mentions kings of Zidon (25.22) at the time of Nebuchadnezzar's inroads (27.3,47,4). Ezekiel notices the sea trade of Zidon with Tyre (27.8), at a time when these cities probably formed a single kingdom, under Babylon. He says his face especially against Zidon (28.21,22), which prospered while Israel was captive (J.3.4), being politic in its relations to invaders (see Zech.9.2). The "two provinces of Tyre and Sidon." (2Esd.1.11) were however scattered by Assyria (see Jth.2.28). They both opposed Judas Maccabaeus in 164 B.C. (1Mac.5.15). In N.T. Sidon is mentioned as visited by our Lord (Mt.11.21,22,15,21; see Mk.3.8,7,24,31; Lu.4.26,6.17,10.13,14), and as displeasing Herod Agrippa (Ac.12.20). Sidon remained an important port till 1291 A.D., and even later. It is now a town of some 6,000 inhabitants, called Saida, and Gbl by the promontory, with a good harbour on N.W. formed by a reef. This harbour is a quarter of a mile long, and 150 yds. in mean width, or less than 20 acres in area. The citadel, at S.E. corner of the town (which covers 50 acres), is said to be as old as 1253 A.D. The harbour wall, built of massive masonry, may be as old as the Gk. or Roman age; but is more probably the work of the Franks in 12th or 13th cent. The real antiquities of Sidon are the rock tombs to E. About two-thirds of the inhabitants are Moslems, and the rest are Jews and Gk. and Maronite Christians. The gardens on the promontory, and in the shore plain, are full of figs, apricots, nectarines, peaches, oranges, lemons, and plums—History. The history of Sidon is to a great extent that of Phoenicia [PHENIXE]. The city is noticed in the Amarna Tablets early in 15th cent. B.C.; and one letter is from a certain Zimridi (Berlin 90), who ruled it for Egypt. Tyre and Sidon had fleets in this age, and were bickerers about the waters of Hossam, till the Amorites captured both cities. Sidon was tributary to Assur-nazir-pal of Assyria about 885 B.C.; and in 740 B.C. Luluya was king of Tyre and of Sidon. About 724 B.C. (Menander, quoted by Josephus) Assur-wa-El, Shalmaneser IV., appears to have received the submission of Sidon; while Sennacherib, in 703 B.C., conquered it, with other cities of Luluya. He speaks (Eponym Canon) of "great Sidon and little Sidon;" the latter perhaps a suburb in the plain. He set up a new king named Tubel, who was soon succeeded by 'Abd-Milkut, who fled before Esar-haddon (after 680 B.C.) by sea, but was captured and beheaded. Esar-haddon destroyed Sidon, uprooting its citadel and palace, and casting the stones into the sea. Its treasures were plundered, and its inhabitants carried off as captives, and replaced by foreigners from the E. A text is cited by Böckh (Corpus Inscription. Graecorum, No. 87) to about 380 B.C. speaks of fellowship between the Athenians and Strato, king of Sidon; and, according to Diodorus Siculus (book xvi.), the Sidonians joined the revolt against Persia in 351 B.C., and brought Gk. mercenaries from Egypt (24.6) to supplant the local, Mentor of Rhodes—with the con-
Artaxerxes III, and the Persians entered the city, but the inhabitants, who had already burned their fleet, set fire to their houses, and 40,000 are said to have perished. "Tenes" is supposed to represent the Sidonian name Tabnith, or Tavnith. Out of hatred for Persia, Sidon submitted to Alexander in 333 B.C. The sarcophagus of Eshmunazar, found in his tomb in 1855, and now in the Cairo Museum, states that he was "king of the Sidonians," son of "king Tabnit" and of Am-'Ashoretah (a priestess of Ashoreth) and grandson of a former Eshmunazar. He built temples of Baal and Ashtoreth; and the "lord of kings" gave him Sharon and Joppa [Sharon]. He left his Phoenician text on the lid, stating that he was a "king of the Sidonians," 20,000 of his sons and daughters were to be sacrificed to him, Eshmunazar. 40,000 "mummy-cases" of mummies were found at Piraeus, Athens, Egypt, the high-priest took the "sons of the god," which is supposed to mean "sons of the high-priest." The tombs, Umm el 'Amud, were visited by Xerxes, and Eshmun-sibbeh, the "son of the god," was afterwards called Eshmun-sillem. The city was afterwards called E.G., Eshmun-sillem, and E.G., Eshmun-sillem, of Sidon, B.C. 1014. Paul was en route to Damascus. The ship of Silvanus sailed from Sidon. The 'Amud was the "sarcophagus," remarkable for its sarcophagi, with figures of the deceased on the lids, most of them of the Gk. age. Fine sarcophagi now at Constantinople come from Sidon, one representing a combat of Greeks and Persians; and others are in the Louvre. These were said to have been found in rock-tombs like those of Egypt, near Sidon, and used by the Phoenicians for their fleet, and the best ships of Xerxes, in 480 B.C., came thence (Herodotus, v. 96). The city prospered under the Romans; and Gk. coins of Sidon exist (Reland, Pal. illustr. ii. p. 1014). Strabo says (xvii.) that it was disputed by Phoenicians, in his time, whether Sidon or Tyre was the chief city of Phoenicia. The Sidonians then still preserved the old Babylonian astronomy, and studied Aristotle, and Gk. philosophy. Gk. and Lat. texts from Sidon are given by Waddington (Nos. 1865-1873). [Tyre.] [C.R.C.]

Sido'nius, the Gk. form of Zidonians, found in A.V. in Deut. 3:9 (where alone R.V. retains Sidonians), Jos. 13:4, 6, Judg. 3:3, and 1 Kings 5:6. [Sidon.]

Signt. [ORNAMENTS, PERSONAL.]

Sihon', the king of the Amorites who refused Israel a passage through his country to the Promised Land (Num. 21:21ff.). Shortly before, he had possessed the Moabites, driving them S. of the Arnon (vs. 26-29). When the Israelite host appeared, he at once attacked them, but he and all his host were destroyed, and their district from Arnon to Jabbok fell to the conquerors (vv. 24, 25; cf. Deut. 2:24ff.; Jos. 12:2; Judg. 11:19ff.; Num. 21:31; Ps. 135:10-12, 136:18, 19; Am. 2:9).

Sihor', accurately Shihor', once as the Shihor' or Shihor' of Egypt; when unqualified, a name of the Nile, perhaps signifying "the black" or "turbid." Sihor occurs but thrice in the Bible, and Sihor, Shihor-mizraim, only once. Sihor is spoken of as one of the "limits of territory" that was conquered when Joshua was old (Jos. 13:2, 3). David is related to have "gathered all Israel together from Sihor of Egypt even unto the entering of Hamath" (1 Chr. 13:5). There is no other evidence that the Israelites ever spread far southwards beyond Gaza. The stream may therefore best have been the upper Nile, though Brugsch may be right in identifying it with the Shi-Hor or "Horus Channel" which passed the city of Zar on the border of Egypt. That the stream intended by Sihor unqualified was a navigable river is evident from Is. 23, 3, where it is said of Tyre, "And by great waters, the sowing of Shihor, that they did not disturb his tomb; "May they have no abode among the r'pha'lim [or "ghosts"], nor be buried in tombs, nor have son or offspring to succeed them." The tomb of a Tabnit, king of Sidon, and priest of Ashtoreth, was also found in 1886 near Beirut, with a similar text. In Egypt, Sihor, for as H. says, is "the same as the name of the river [i.e., the Nile] in the Hebrew text of the passage," is a "name that has passed from the Nile to the Amurthys, the Yruthis, the Tigris, and the Euphrates." (B. S. W. 2, 321.) Whether Sihor, in the second passage, p. 399, of the river that fell into the Shihor, or Horus, was the Nile, the river [i.e., the Nile] in the Hebrew text of the passage," is a "name that has passed from the Nile to the Amurthys, the Yruthis, the Tigris, and the Euphrates." (B. S. W. 2, 321.) Whether the identity of Sihor with the Nile seems distinctly stated. [A.H.S.]

Sil'as, an eminent member of the early Christian Church; thus named in the Acts, but Silvanus in St. Paul's epistles. He first appears as one of the leaders of the Church at Jerusalem (Acts 15:22), holding the office of an inspired teacher (15:32). He appears to have been a Roman citizen (16:37). He was appointed as a delegate to accompany SS. Paul and Barnabas on their return to Antioch with the decree of the Council of Jerusalem (15:22, 32). Having accomplished this mission, he returned to Jerusalem (15:32) but must have immediately revisited Antioch, for St. Paul took him as the companion of his second missionary journey (15:40-17:15). At Berea he was left behind with Timothy while St. Paul proceeded to Athens (17:14), and we hear nothing more of him until he rejoined the apostle at Corinth (18:5), where he was again noticed (2 Cor. 1:19; Th. 1:1; 2 Th. 1:1). Whether he was the Silvanus who conveyed St. Peter's First Ep. to Asia Minor (1 Pe. 5:12) is doubtful, but the probabilities are in favour of the identity. A tradition of very slight authority makes him bishop of Corinth.

Silk. The art of the Waddy of 'Arish, p. 400. "Black" or "white" (Pr. 31:22), rendered "byssus" in LXX., and (correctly) "linen" in 33 passages, but (white) "marble" in A.V. Esth. 1:6, Can. 5:15. (2) mēshî, "drawn out" (Ezk. 16:10), referring to some kind of fine, transparent material such as gauze. The Egyptian pictures show the use of transparent garments very early, and such gauze may have been that made from the bombyx of the island of Cos (Pliny, Hist. nat. xi. 26, 27), which was not the true silkworm. In this second passage the LXX. has ṭēphæaτων, or "gauze," and Jerome so understands the Heb. word. Silk was known to Vergil (georg. ii. 121), and Pliny speaks of Chinese silk, and gauze (H. N. vi. 20, xi. 27). The silkworm was known in 2nd cent. A.D. (Clement of Alex. Pæd. ii. 11), but Chinese silk was obtained by trade through Central Asia, and was very expensive still in 4th cent. A.D., costing £3
SILLA

(then a far higher value in gold than now) for 1 lb. of silk (Gibbon, ch. xli.); while a sort of silk from the fibres of a shell-fish was in use down to 500 B.C. (Procopius, De Aedificis Justinian. iii. 1). Sila (De Bel. Pers.) relates how Justinian (c. 532 A.D.) endeavoured to keep open the Chinese trade route, and finally induced two Nestorian monks to fetch the eggs of silkworms from China. The grubs were fed on mulberry leaves in Phoenicia, and the industry so established has been pursued without ceasing down to the present time at Beirüt and Sidon. [Dress.] [c.c.r.c.]

Silla' (2 steps; cf. Ne.3.15,12.37). Joash was murdered "at the house of Millo on the way that goeth down to Silla" (R.V. 2K.12.20). Millo was probably a keep or tower of ancient Jerusalem, and Silla apparently in the valley below, but what or where Silla was is conjectural. [c.w.]

Sil'ohah (Ne.3.15, R.V. Shelah; Is 8.6, R.V. Shiloah), a form of the name Siloam (Isn.9.7). Σιλοᾶ, Josephus. Now 'Arriv Silawân. [c.w.]

Siloam; Siloam, Tower in. [Shiloah.]

Sivanus. [Silas.]

Silver (Heb. keseph). In very early times, according to the Bible, silver was used for ornaments (Gen.24.53) and for vessels of various kinds. Images for idolatrous worship were made of silver or overlaid with it (Ex.20. 23; Ho.13.2; Hab.2.19; Ba.6.39), and the manufacture of silver shrines for Diana was a trade in Ephesus (Ac.19.24). But its chief use was as a medium of exchange, and throughout O.T. we find keseph, "silver," used for money, like the Fr. argent. [Metals.] Vessels and ornaments of gold and silver were common in Egypt in the times of Osirtean I. and Thothmes III., the contemporaries of Joseph and Moses. Silver ornaments are found in Mykenian graves, at least 15 cent. B.C., and silver has been found in Egypt in a tomb of the 18th dynasty (c. 2900 B.C.). Inferior materials were covered with silver (Pr.20. 23). Silver was brought to Solomon from Arabia (2Chr.9.14) and from Tarshish (2Chr. 9.21), which supplied the markets of Tyre (Exk.27.12). From Tarshish it came in the form of plates (Jc.10.0), like those on which the sacred books of the Singhamhe are written to this day. In Helmer (U. ii. 187), Albe is called the birthplace of silver, and was probably celebrated for its mines. But Spain appears to have been the chief source whence silver was obtained by the ancients; though it was known earlier to the Akkadians, by whose written, it was called Kúngas (cf. Turkish Kümish). Silver ornaments are mentioned in the Amarna tablets (Berlin 25, 26) in 15th cent. B.C. Silver-mines occur near Tarsus and Trebizond. For an account of the knowledge of obtaining and refining silver possessed by the ancient Hebrews, see Lead and Mines. Silver mixed with alloy is referred to in Job 30, and a finer kind, either purer in itself or more thoroughly purified, is mentioned in Pr.8.19.

Silverings. [Piece of Silver.]

Silversmith. [Handicrafts, (2).]

Simalcu'ē, an Arabian who brought up Antiochus, the young son of Alexander Balas (1Mac.11.39).

SIMEON

Simeon('hearing). The ethnic name Sime- onites occurs in four passages (Num.25.14, 26.14; 1 Jos.21.4; 1 Chr.27.16).—1. The second son of Jacob and of Leah, so named from his brother's explanation at Hittim (Num.25.6,14). The cruelty of Simeon and of his own brother Levi in revenging Dinah their sister (34.25-31) caused both to be cursed by Jacob; and Simeon was to be "scattered in Israel" (49. 5-7). In the blessing of Moses this tribe is not even mentioned, perhaps on account of the evil example of Zimri (Num.21.21,14). When Joseph took a hostage from among his brothers, Simeon was imprisoned, instead of the elder Reuben, whose action in Joseph's favour was "understood" (Gen.42.22-24,36.43.23). Simeon had six sons when Israel descended into Egypt, one of whom had a Canaanite mother (46.10). The tribe, in the desert, marched on the right flank under Shemuel (Num.2.12, 36.10.19), and the spy selected from it was Shaphat (13.5), while its surveyor was Shemuel (34.20). It decreased in numbers [PALESTINE] by more than half before the Conquest (Num.1.23, 26.12,14). It stood on Gerizim to respond to the threats (Dent.27.12), and in the presence of Joseph and Judah in Shiloh, it was one of the house of Levi (ch.12.26,9).—2. A tribe of the latter days (Josh.19.51-53). Others called Seth (De 39.21,31), and some probably remained in the old territory as late as the time of Josiah (36.6), but after the Captivity the towns of Simeon were occupied by men of Judah (Ne.11.25-29). The number of warriors from this tribe—7,100 mighty men—joined David at Hebron exceeded that of Judah (1Chr.12.24,25). The tribe is last noticed in Ezk.48.24,35; Rev.7.7. JUDITH may have been of this tribe (Jth.9.2). The Tribal Lot included the Beer-sheba plains from the Mediterranean to Edom, and some of the foot-hills to N. It was a region partly pastoral, partly desert, and the majority of the Simeonites lived are unknown, though the names of which have been forgotten by the Arab nomads. They were assigned to Simeon in the final division of the land, having at first been occupied by Judah (Jos.15.1.4-20,32,19.1-9), whose children found their portion "too much for them"; but Simeon was always unlucky, and his lot was the poorest, which no doubt accounts for his migration to Edom after its conquest by David (1Chr.24.4-33).—3. A priest of the family of Jozarib, and an ancestor of the Hasmonaeans (1Mac.2.1).—4. Son of Juda (Luz.3.30).—5. A devout man in Jerusalem who received our Lord in his arms in the temple, and prophesied His death (Lu.2.25-35). It has been conjectured that he was Simeon, son of the famous Hillel the president of the Sanhedrin, and father of the elder Gamaliel. As the latter was the teacher of St. Paul (Ac. 22.3), it appears probable that this Simeon would have been an old man when the young Nazivity, and his presence in the temple where the Simeon Sat is natural. —6. Simon Peter (Ac.15.14).—A.V. follows the Vulg, in spelling the name Simeon, the Heb. being always Shimeon (cf. Ezr.10.31). [c.c.r.c.]
SIMEON NIGER

Simeon Niger, a prophet or teacher in the church at Antioch (Acts 13:1).

Simon (Σίμων, late form of Σάμων, LXX. and N.T.; Heb. sh'môn)—1. Simon Chosa-
mus (Χοσομαῖος, or Χοσαμάων), given by r Esd.9.31; Ezr.10.31, the parallel passage, gives Shimeon. [ANNAS, i.—2. The 'great priest' (R.V.) who is the subject of eulogy in Ecclus.50.1-22, is possibly to be identified with Simon I., c. 300 B.C., son of Onias I. He succeeded Onias I., the son of Jaddua. The statement of Josephus, that it was he who was called by the Just” (120 B.C.) is not altogether doubtful. This title, and the eulogy in Ecclus.50, may equally well have belonged to Simon II. (c. 220 B.C.), son of Onias II, especially as he was nearer to the son of Sirach’s time. [ECCLESIASTI-
CUS].—3. Simon of the tribe of Benjamin (2Mac.8.4), “that impious Simon (3.11), who, being guardian of the temple (σεβαστῶν του ταυτάς ἁγιασμού), quarreled with the high-priest Onias III. (c. 195 B.C.),” and out of spite formed Seleucus Pilopator that the temple-treasury was “full of untold sums of money” (3.6).—4. Simon the Maccabaeus (or Hasmonaean), surnamed Thassi (1Mac.2.3), son of Mattathias. He was high-priest 143-135 B.C. Simon. Peter was addressed by the Lord as Simon (Mt.17:25; Lu.22:31; Jn.21:15, etc.). [PETER.—6. Simon the Canaanite (Mt.10:4; Mk.3.18), or Zeelotes (Lu.6.15; Ac.1.13), one of the Twelve. [CANAANITE].—7. One of the Lord’s four brethren (Mt.13:55; Mk.6.3). St. Matthew puts him third and St. Mark fourth in the list. [JAMES].

8. “One of the Pharisees,” who asked Jesus to eat with him, and in whose house “a woman which was in the city, a sinner,” anointed Jesus’ feet (Lu.7.36-50). In addressing His host Jesus replies to thoughts to which Simon had not given utterance.—9. The leper (Mt.8.6; Mk.14:3) need not be identified with No. 8, as the name was very common (cf. Lightfoot, Galatians, ed. 8, pp. 268f.). The meal which Jesus took in his house at Bethany may be identical with that recorded in Jn.12.1-8 (cf. Westcott, St. John, ad loc.). [MARY OF BETHANY]. On ceremonial grounds it must be inferred that he had been healed of his leprosy.—10. Mentioned in the phrase “judas of Simon, ad loc.” (Jn.8:71;13.26). In 8.71 and 13.26 the name ΤΕΚΑЏΑΡΑΤΗΣ is applied to him: in 13.2 to Judas himself. Probably Simon was the traitor’s father. [JUDAS ISCHARIOT].—11. Simon of Cyrene (Mt.27.32; Mk.15.21; Lu.23.26), who was impressed to bear the cross of Jesus. St. Mark and St. Luke say he was “coming from the country.” He may have been a chance visitor to Jerusalem, and member of the synagogue of the Cyrenians in Jerusalem (Ac.6.9). St. Mark (15.21) calls him “the father of Alexander and Rufus.” This may be the Rufus of Ro.16.13, though it was a familiar slave-name. If so, one of Simon’s sons rose to eminence among the Roman Christians (cf. Sanday-Headlam, Romans, ad loc.), and his mother was well known to St. Paul.—12. Simon Magus, the sorcerer of Samaria described in Ac.8.9-25. He gave out that he was “some great one,” and the people proclaimed him as “that power of God which is called Great.” He believed, as the result of Philip’s preaching, was baptized, and continued with the evangelist, being astonished at the great powers “ wrought” (cf. R.V. marg.). When SS. Peter and John were sent from Jerusalem, and the Holy Ghost was given through the laying on of their hands, Simon offered money to obtain the same power, and was severely rebuked by St. Peter (hence our word simony). The story leaves him praying against the consequences of his presumption. The subsequent patriotic and polemical references to Simon Magus are of great interest, but lie outside the scope of this dictionary. Our chief informant is Justin Martyr, himself a Samaritan, who wrote about 100 years after the event in Acts (cf. Apol. 1. 26, 56; Dial. 120). See Dr. Salmon’s article Simon Magus in Dict. Chr. Biog. iv. 681.—13. The Tanner of Joppa, in whose house by the sea St. Peter stayed (Ac.9.43;10.6,17,32). [E.H.P.]

Sim'iri (R.V. Shim'iri), son of Hosah, a Merarite Levite in David’s reign (1Chr.26.10).

Sin is a concept characteristic of Judaism and Christianity as compared with all other religions; though it was not absent from the moral creed, and the literature, of the principal nations of antiquity. Sin is the special subject of O.T., while forgiveness of sin is the argument of the New. As conceived in the Bible, sin is a wilful straying (Is.53.6; RPe.2.25) from the path in which God would have us walk, a disobedience to a voice behind us saying, “This is the way, walk ye in it.” Sin is not mere failure or shortcoming. It is not, as is sometimes alleged, a missing of the mark; though such, in classical Gk., was the first meaning of the verb (ἀμαρτέω), which with its congeners was subsequently employed in the LXX. to represent the Heb. הָוָד— a use which determines the meaning of the Gk. words ἁμαρτέων, ἁμαρτία, ἁμαρτλοις, in N.T. Here the term “sin” (ἁμαρτία) occurs in every group of writings, and is at length defined briefly but effectually in Jt. leg. as “lawlessness” (ἀνοησία, Heb. ἀδίκεια). It is, in fact, a disregard of the law of God, the only law that has absolute authority; its species being the various “sins” (ἁμαρτίαι) which beset and ensnare individual men. The follower of Christ, “abiding in Him,” has given up the life of sin; he in this crucial sense “sinneth not” (RJn.3.6); but still is prone to commit “sin” (2.1) (see Westcott, ad loc.). Viewed in its effect upon the wrongdoer, sin is regarded both in O.T. and N.T. as spiritual disease: of it bodily disease, especially leprosy, is a standing parable (cf. Is.1). It is normally curable, but by God only. No man, as man, can take away sin. So, too, forgiveness of sins is a divine prerogative. But the Son of Man, as Son of God, had power and authority on earth to forgive sins (Mk.2.7). And of this power His miracles of bodily healing, whether of lepers or of paralytics or of maimed or of blind, are parallel. He abode “signs.” His miracles were witnessed by the grace of God is illustrated, and not contradicted, by the recognition of a special case, or exceptional species, of sin which is incurable (Mk.5.29; 1Jn.5.16); the Johannine “sin unto death” being probably, though this...
has been questioned, identical with that "blasphemy of the Spirit" which, in words of the Lord recorded by the Synoptists, is marked as "eternal" (ἀπώλεια) and therefore irremissible. Preposition to sin is throughout Holy Writ assumed to be hereditary, or at least congenital, in mankind, and universal (Gen. 6:5, 12; Deut. 32:5; Ps. 4.2, 14, 3, 51, 5; Pr. 20:9; Ec. 9:3; Is. 1:1f.; 59:2-5; Je. 2:21f.; 5:17f.; 9:24f.; Ezek. 2:3, 36, 26f.; Mt. 7:29; Ro. 8:23, 25, 12f., 7:17-23; Gal. 3:22; Eph. 2:2f.; 4:22; Heb. 4:15, 9:1-22; Jas. 4; 1 Pe. 4:2f.; Jn. 7:19; 1 Jn. 3:1f., 5:19).

The story of the Fall, whether taken as history or parable, offers an explanation, and the only explanation adequate to the facts, of the origin and of the universality of sin among men; and although until we come to the Pauline epistles (1 Cor. 15:22; Ro. 5:12f., 19) a direct connexion of all human sin with that of Adam is seldom, if ever (Ps. 14:1f.; Job 31:33), asserted, it is suggested by the order of events in Genesis, the position of Genesis in the Pentateuch, and in the Hebrew canon, and the tenor of the history of the formation of the history of Israel, while in N.T. the Pauline doctrine is powerfully supported by significant references to the murder of Abel (in Genesis so clearly a sequel to the transgression of Adam and Eve) as the type and first example of hatred and malice (Mt. 23:35; Heb. 12:24; Jn. 8:32). That the "sin of the obedience," as also the crime of Cain and all other sinning and falsehood, came by yielding to temptation of "the devil," is plainly declared in N.T. (2Cor. 11:3; Jn. 8:44; 1 Jn. 3, 8, 12; Rev. 20, 23, 3, 10). All sins may be viewed as "trespasses" and again as "debts," terms correlative and of the temporal order, while "sin" is absolute, and presupposes God and an eternal order. [Satan; Fall.]

For the O.T. view of sin, see also Crimes; Witness; and for a further discussion of the Pauline doctrine, see Paul. [J.M.S.]

Sin, a city of Egypt, mentioned only by Ezekiel (36:15, 16). It is identified in the Vulg. with Pelusion, Πελούσιον, which is generally supposed to mean "the clayey or muddy" town. The ancient Egyptian name is unknown. Champollion identified it with the Perenom, Perahon, and Barenom of the Copti, El-Fomà of the Arabs. The site of Pelusium is to the S.E. of Port Said, a mile to the N. of it being the ruins of the little Arab fort of El-Tina. Ezekiel, in one of the prophecies relating to the invasion of Egypt by Nebuchadnezzar, speaks of it as "the strongholds of Egypt" (ver. 15). This description applied to it until the period of the Romans. Herodotus relates that Senacherib advanced against Pelusium, and that near Pelusium Cambyses defeated Psammei- nthus. The decisive battle in which Oechus was defeated the last native king, Nectanebos, was fought near this city. [Exodus, The.] [A.H.S.]

Sin, Man of. [Thessalonians, II; Antichrist.]

Sin, Wilderness of, a tract of the wilderness which the Israelites reached after leaving the encampment by the Red Sea (Num. 33:11, 12). Their next halting-place (Ex. 16:1, 17, 1) was Rephidim, perhaps the Wady Feirûn [RAPHIDIM]; in which case Sin must lie between that valley and the coast of the gulf of Suez, and of course W. of Sinai. As, however, Sin was the name of the Babylonian Moon-god from whom mount Sinai took its name, we should more probably look for it in the immediate neighbourhood of the mountain of the law. In the wilderness of Sin the manna was first gathered, and those few Targums of Onkelos and Jerome are merely the natural product of the ṣarāb bush, a plant in the abundance of that shrub in Wady esh-Sheikh, S.E. of Wady Ghurundel, a proof of local identity. [Manna.] [A.H.S.]

Sina, Mount, the Gk. form of Sinai (Jth. 5, 14; Ac. 7:30, 38). [Exodus, The.]

Sinaí. [Exodus, The.; Ten Command- ments; Moses.]

Sinim, Land of (Isa. 49:12). The old name of Elam ("highland" in Semitic speech) was—in the Akkadian language—Si-nim, or "the high region." The language of this region, as shown by texts at Susa, Behistán, and Malamir, was a dialect of the Akkadian, even as the Targums of Onkelos and Jerome are merely the name Sinim, "the land of the Persians," and there is no foundation for the popular idea that Chong, or China, is meant. [C.R.C.]

Sinite (Gen. 10:17), the tribe inhabiting a city called Sin in Phoenicia. Strabo mentions Sinna in this region (xvi. 2, § 18). The Targums of Onkelos and Jerome call Orthosia (Neubauer, Gēgô di Tal., p. 303); see Orthiosias. Jerome mentions a Sinna, and Breidenbach in 1484 a.d. a place called Syn, near Tripoli, but the name is not known to exist now. [C.R.C.]

Sin-offering. [Sacrifice, 3, ii; a; 3, v, a.]

Sirca, or Saph. [Sibbeal.]

Sasch. [Jesus the Son of Scharch.]

Sirah, Well of (2Sam. 3:26). The word means "withdrawing," "departing"; and the word rendered "well" (Heb. bôr) means "pit." It is now called 'Ain Sirah, with the same meaning in Arab., and is a spring well standing back from the main road, in a lane to W., a mile N. of Hermon. [C.R.C.]

Sirion (Deut. 3:9; Ps. 29:6), the Sidon- nian name of Hermon. In Heb. shiryon. The name Sin (sîön), or "elevated," applied also to Hermon (Deut. 4:48), has been thought to be a clerical error for Sirion. [C.R.C.]

Sisamsha, a descendant of Sheshan in the line of Caleb (1 Chr. 2:40). The name reappears among the Nethinim (Ezra 2: 53; Ne. 7:55), showing the persistence of the Canaanite stock. [H.M.S.]

Sisines (1 Esd. 8:3) = Tatnai.

Sithnach ('emunith), the second of the two
wells dug by Isaac in the valley of Gerar, the possession of which the herdmen of the valley disputed with him (Gen. 26.21).

[SIVAN. [MONTHS.]

**Slave (Heb. הַשָּׁבָּה, Gk. δοῦλος = a slave; A.V. and R.V. translate servant).** Slavery in the Bible is due to many causes. (1) In early society the family or clan is everything, the individual has no rights. The family man is therefore either an outlaw or a slave. It is only as a slave that he can obtain protection (Jos. 9.23-27). The mixed multitude that came out of Egypt (Ex. 12.38) probably became slaves and account for subsequent legislation. (2) Poverty made men willing to sell themselves into slavery (Deut. 24.7). (3) Debt caused men to be sold (Lev. 25.39; 2 K. 4.1; Am. 2.6). (4) Enemies spared in war became slaves (2 K. 5.2; Am. 1.9). (5) Piracy and kidnapping led to the slave trade (J. 3.6). Kidnapping was strictly forbidden to the Israelites (Ex. 21.16). Smith spoils found in enemy children (J. 3.8). (6) Moral degradation (Gen. 9.25) and crime (Gen. 44.17, 33; Ex. 22.3) led to slavery. (7) The children born of slaves were slaves (Gen. 14.14, 17.23; Lev. 25.46). Sometimes whole nations were enslaved through poverty (Gen. 47) or through treaty (Jos. 9) or through conquest (Judg. 1.28). (8) The chief business of this collective slavery did not necessarily interfere with individual freedom. It meant taxes and public works. After David’s victories, a special officer was appointed over the tributaries (2 Sam. 20.24). In Judg. 6.11 and 1 Sam. 11.5 we see a warlike people not ashamed of work in the fields. In 1 Sam. 12.22 we see the thrashing people staying on slave labour. In Ec. 2 and Is. 6.6 we see a luxurious people ministered to by slaves. The inevitable consequence was the Captivity. Successful war led to slavery, slavery to effeminacy, and an effeminate people are rapidly enslaved.—*The Theoretical Justification of Slavery.* [2: 16-23. This collective slavery is not to be confused with domestic slavery. The slave is a member of the family. He receives food and protection. He owes service, and is under the dominion of the master. (2) The slave is an enemy whose life is forfeit, but who has been spared on condition of servitude—the Roman theory. (3) The slave is a member of an inferior race, essentially servile. He is therefore “an animated implement” (Aristotle, *Pol. i. 4, Ethics viii. 13*). This Greek theory was adopted by planters in W. Indies and America. In no slave-owning country is a man more precious than gold (Is. 13.12), though under the domestic slavery of the Israelites it was probably reckoned disgraceful to sell slaves (J. 3.3).—*Slavery in O.T.* The slave was reckoned as one of the family. In default of offspring he might be the heir (Gen. 15.2-3), could be married to a daughter (1 Chr. 2.35), or preferred to an unrruly son (Pr. 17.2). He was reckoned as part of the master’s wealth, and could be given away and sold, but a man could children (Gen. 15.16; Ex. 21.27; J. 3.3). He shared in the religious privileges and ceremonies of the people: circumcision (Gen. 17.12, 13), the Passover (Ex. 12.44), the sabbath (Ex. 20.10; cf. Deut. 5.14). If an Israelite, he might become free in the sabbatical year (Ex. 21.2), and could not be sent empty away (Deut. 15.13, 14). A woman could give her female slave as a concubine to her husband (Gen. 16.2, 30, 3, 9). A man could buy a female slave to be his or his son’s concubine (Ex. 21.7-11). When she acquired rights in the family. The children of such concubines were free and legitimate (e.g., the twelve patriarchs are all regarded as sons on the same footing). The children of such slaves had claims on the inheritance which were not always acknowledged (Gen. 21.10, 25.6, 49; Judg. 9.18, 11.2). Slaves could possess money (1 Sam. 9.8). It was not permissible to rule over them with rigour (Lev. 25.43). They might be freed by ransom or purchase. By law a slave was a penal offence (Ex. 21.20; Pr. 29.19; Eccl. 33.23-26), and if he were mutilated he was to go free (Ex. 21.26, 27).—*Law in Egypt.*—*Slaves, Crimes, Homicide.* Applications of slaves: Eleazer was Abraham’s steward and representative (Gen. 24). Ziba was Stephen to Mephibosheth (2 Sam. 9). Sometimes there were singing men and women (Eccl. 3.8), labourers in the field (Judg. 6.27; Ru. 2.5), and in the house (Deut. 29.11; Jos. 9.27). The lowest kind of work was grinding at the mill (Ex. 11.5; Judg. 16.21; Job 31.10; Is. 47.2; Lam. 5.13). The price of slaves was constant: an adult man, 30 shekels (Ex. 21.32; Zech. 11.12; 2 Mac. 8.10); a woman, 15 shekels (Hos. 2.15); and a youth, 20 shekels (Lev. 27.5; cf. Gen. 37.28). In early times slaves were probably few; under the monarchy, numerous; with the returning exiles came 7,337, which was one-sixth of the people (Ezra 2.65). This domestic slavery was far from intolerable. Men even preferred the status (Ex. 21.6, 7). Moreover, there is one instance recorded in O.T. of runaway slaves (1 K. 2.39). Runaway slaves could not be given up (Deut. 23.15). Slaves were always regarded as fellow-creatures and worthy of consideration (esp. Deut. 5.14; Job 31.13-15).—*Legislation regarding slaves is to be found in Ex. 21, 22. We have no historical reference to the year of jubilee; but the doubtful Ezek. 45.16, the inalienable character of land-ownership is implied in 1 K. 21; and we have instances of land redemption by relatives in Ru. 4 and Je. 31.6-16. In consequence it has to be admitted that Lev. 25 contains elements earlier than the Exile. Secondly, if there be no historical jubilee, the only reference to a year when the whole land was simultaneously fallow. In consequence it is possible to reconcile Ex. 21.2 with Lev. 25 by assuming that a man became free in the year of jubilee even if he had not completed six years of service. Thirdly, Ex. 21...
deals with purchased Hebrew slaves, Deut.15 with poor men voluntarily submitting to serfdom, while Lev.25 is concerned with the land system and only incidentally with slavery. The code of Hammurabi (c.1700 B.C.) has unusually no evidence to debtor and creditor arrangements; and Lev.25 has no reference to the Israelite bondsmen without inheritance. It is in consequence precarious to argue for difference of date from these omissions.—The Mosaic Laws and Code of Hammurabi. The Code of Hammurabi (Amraphel, Gen.14) is the earliest known, and its influence upon the Peutæus is a matter of dispute. Laws dealing with the same conditions of life are likely to be much alike, and parallels have been found in this code not only in O.T. but also in the laws of Gortyn, the XII. Tables, in Babylonian contract-tablets, and in Visigothic laws. But if it be interesting to know how early an agent, it is important to know how they differ. This code throws light on Hagar's relations with Sarah (§ 146), and on the conditions of children born of slave concubines (§§ 170, 171). It differs strikingly on the treatment of runaway slaves (§§ 16, 20). But the great difference is a difference of moral standpoint. The Israelite was always instructed to remember his own bondage (Deut.24.18), and in consequence to be considerate. [Law in O.T.—Slavery in N.T. In Palestine there were few slaves. The high-priest possessed slaves (Jn.18.10,18). Our Lord illustrated his teaching from this treatise (Mark.15.25). But in Rome and in Greece the slaves formed the bulk of the population, and the danger that they were to the state increased the severity of their treatment. Horrible tales of brutality are recorded. The system was demoralizing, enervating the character of slave owners, and tending to render them heartless and cruel. There are, however, many instances of kindly treatment and of real affection between master and slave. The point is that the slave was absolutely at the mercy of the master, who might be good and might be bad. The slaves were of all races from Persia to Egypt and Arabia. They might be philosophers, artists, physicians, schoolmasters, or agents; they might be chained in gangs to labour in the fields. From the time of Nero onwards the law did much to ameliorate their condition and afford them protection. Our blessed Lord did not propose a political revolution. He laid down no laws as to social and economic conditions; but His coming has led to the abolition of slavery. He came to reconcile all men to Himself (Col.1.20); in Him there is no distinction between bond and free (Col.3.11; Gal.3.28). To the poor the Gospel was preached (Lk.4.18). He taught the value of each individual soul to the Father (Mt.10.29-31). He taught also the responsibility of each man for himself (Mt.25). He laid great stress upon the value of friends and dignity of labour (Jn.5.17,9,4). Those who were willing to be His servants, He called friends (Jn.15.15). But more than this. He took upon Himself the form of a slave (Ph.2.7; cf. 1Pe.2.18-22). He showed the value of the virtues needed by a slave (Mt.5.3-5; 11.29,30). He gave an example by doing the slave's office (Jn.13.12ff.). He died a slave's death. He said, "Whosoever of you will be the chiefest, shall be servant of all" (Mk.10.44). The apostles rejoiced to call themselves slaves of Christ (2Pe.2.1; 1Pe.1.1; Ju.1). They rejoiced, too, in the liberty of the sons of God (Ro.8.15,21). They knew there was no respect of persons with God (Ro.2.11; 1Pe.1.17). But they did not counsel rebellion. They gave much advice to slaves how they might use their condition for the advancement of the faith and the glory of God. (1Cor.7.19-24; Eph.6.5-8; Col.3.22ff.; 1Tim.6.1,2; Tit.2.9,10; 1Pe.2.18ff.). But masters are commanded to "forbear threatening" (Eph.6.9), and are reminded that they have a Master in heaven (Col.4.1). In the epistle to Philemon, the runaway Phrygian slave Onesimus is restored to his master, but as "a brother beloved" (ver. 16). Slavery could not be abolished all at once; men had to learn that it was inconsistent with Christian principles. In the early Church converted slaves were recognized as brethren (Aristides, Apol. xvi.). They could become clergy or even, like Callistus, bishop of Rome. The same privileges were expected when they had the same privileges accorded. Manumission was regarded as praise-worthy, and slaves were sometimes ransomed from church collections (St. Ignatius, Ep. to Polycarp iv.). The Church, however, at first was so concerned with her liberty in Christ that to her the status of her members in the world was of no difference. For Hebrew slavery, see Meliziter, Sikutten bei den Hebräern; Goldwin Smith, Does the Bible sanction Slavery? Hastings, D.B. (5 vols. 1904), arts. "Servant," "Sabbatical Year," and "Code of Hammurabi"; Smith, D.B. (4 vols. 1893). For domestic slavery: Maine, Early Village Communities; Lane, Modern Egyptians; Burton, Pilgrim Doughty; Doughty, Arabia Deserta; Robertson Smith, Kinship and Marriage. For Greek and Roman slavery: Wallon, L'Historie de l'esclavage; Boissier, La religion Romaine; Lecky, European Morals; Dill, Roman Society. For N.T. and the Roman foot, Philemon: Knight, Colossians and Philemon. For the Early Church and slavery: Harnack, Expansion. [H.M.S.]

Sliime. The rendering in A.V. of the Heb. שָׁנַי, the hommar of the Arabs, translated ἀμφαλός by the LXX. and bitumen in Vulg. The three instances of its mention in O.T. are abundantly illustrated by travelers and historians, ancient and modern. It is first spoken of as used for cement by the builders in the plain of Shinar, or Babylonia (Gen.11.3). The bitumen pits in the vale of Siddim are mentioned in the ancient fragment of Canaan- titish history (14.10); and the ark of papyrus in which Moses enclosed the child and set it afloat was ransomed by bitumen and pitch (Ex.2.2–3). Herodotus (i. 170) tells us of the bitumen found at Is, a town of Babylonia, eight days' journey from Babylon. The captive Eretrians (Her. vi. 119) were sent by Darius to collect asphaltum, salt, and oil at Arden (Vulg. Derma) and at Susa, in the district of Cissia. The town of Is was situated on one side, or small stream, of the same name
which flowed into the Euphrates, and carried down with it lumps of bitumen. This town is without doubt the Hit, on Upper W. or right bank of the Euphrates, and four days' journey N.W., or rather W.N.W., of Baghdad. The principal bitumen pit at Hit, says Mr. Rich, has two sources, and is divided by a wall in the centre, on one side of which bitumen bubbles up, and on the other the oil of spikenard. Sir R. K. Porter observed that bitumen was chiefly confined by the Chaldean builders to the foundations and lower parts of their edifices, for the purpose of preventing the ill effects of water. The use of bitumen appears to have been restricted to the Babylonians, for at Nineveh, as Sir A. Layard observed, "bitumen and reeds were not employed to cement the layers of bricks, as at Babylon; although both materials are to be found in abundance in the immediate vicinity of the city." The bitumen of the Dead Sea is described by Strabo, Josephus, and Pliny. It is given out by springs, and hardened lumps of it are washed up on the shores, from which the lake got its classical name of Lacus Asphaltites and a rock impregnated with it is still used there for making various objects. Strabo says that in Babylonia boats made of wicker-work were covered with bitumen to keep out the water (xvi. p. 743). [Pitch; Salt Sea.]

Sling. [Arms, Offensive, (2).]

Smith. [Hatchets, Rackets, (1).]

Smyrna (Rev. 2.8-II). This city was founded, or at least the design of founding it was entertained, by Alexander the Great soon after the battle of the Granicus. It was situated 20 stadia from the city of the same name which, after a long series of wars with the Lydians, had been sacked by Halysates. The rich lands in the neighbourhood were cultivated by the peasantry for a period which Strabo, speaking roundly, calls 400 years. The new Smyrna soon became a wealthy and important city. It seems possible that just as St. Paul's illustrations in I Cor. are derived from the Isthmian games, so the message to the Smyrna may contain allusions to the ritual of the pagan mysteries which prevailed there. In the time of Strabo the ruins of the old Smyrna still existed, and were partially inhabited, but the new city was one of the most beautiful in Asia. The streets were laid out nearly at right angles; but the neglect to make underground drains to carry off the storm rains occasioned the flooding of the town with filth and refuse. There was a large public library, and also a handsome building surrounded with porticoes which served as a museum. It was consecrated as a heroon to Homer, whom the Smyrneans claimed as a countryman. There was also an Odeum, and a temple of the Olympian Zeus, with whose cult that of the Roman emperors was associated. Olympic games were celebrated here, and excited great interest. Smyrna under the Romans was the seat of a conventus iuridicus, whither law cases were brought from Armenia, Mysia, Asia Minor, and Greece. Convents on mount Sipylos, and also from a Macedonian colony settled in the same country under the name of Hyrcani. 

Snail (Heb. shabîl and, hîmel). shabîl occurs in Ps. 58.8[9], and is doubtless correctly translated snail (or slug). The slimy track these molluscs leave behind them appears to have given rise to the idea that the creatures waste away as they crawl; but the wasting may refer to their being dried up when exposed to a scorching sun. hîmel occurs as the name of some uncivil animal in Lev. 11.30, and in the LXX. and Vulg. is regarded as representing the kind of reptile or the region. [Chameleons.] It has been suggested that the reference is to one of the desert-haunting lizards of the skink group (Scincidae). [R.L.]

Snake-charming. The remarkable power exercised by certain Orientals over poisonous serpents is distinctly mentioned in the Bible, and probably alluded to by St. James (3.7). The species most generally operated upon are the Indian cobra (Naja tripudians), the African cobra (N. haie), common to N. Africa and Syria, and the horned viper Cerastes cornutus, which has a similar distribution. [Asr.] The charmers generally extract the poison-fangs before the snakes are subjected to their skill; and some have supposed that this is alluded to in Ps. 58.6, "Break their teeth, O God, in their mouth." The snake-charmers employ a flute and a drum during their performances; and carry the snakes in baskets. They were called by the Hebrews wânhâshîm, while the art itself was termed lakash (Jer. 8.17; Ez. 10.11), although these terms were not always so restricted.

Snow (Heb. sheleh; Aram. ilâhâ, Dan. 7.9; Arab. Thelîh, 2 Sam. 23.20), noticed as falling at Jerusalem (1 Mac. 13.22), and in winter in Edom (Job 6.16, 24.19), and on mount Salmon or Zalmon (Ps. 88.14). It was probably used for cooling drinks (Ps. 25.13), as it still is at Damascus. The Lebanon and Hermon are always white with snow till the autumn, and it remains in patches later. It often falls at Jerusalem, but does not lie long. The mountains of Edom are white.
dynasty of Egypt (c. 716 B.C.). In 720 B.C. Sargon of Assyria defeated, at Raphia, Hanon of Gaza and his ally Sib’i, who, as the commander-in-chief of the Egyptian Pharaoh. There seems little doubt that Sab’e is the So of O.T., and that both are to be identified with Shabaqo, who at the time of the battle of Raphia had not yet seized the Egyptian throne. According to Manetho, the Egyptian historian, Shabaqo reigned for 12 years.

**Soap** (A.V. sope). The Heb. bôrith is a general term for any substance of cleansing qualities. As, however, it is distinguished in Je. 2.22 from neither (‘natron,’ or mineral alkali), bôrith probably refers to vegetable alkali, or some kind of potash, a usual ingredient in our soaps. Numerous plants capable of yielding alkalis exist in Palestine and the surrounding countries; one, hubbeh (the Salsola kali of botanists), is found near the Dead Sea, and its ashes are called el-qâlî from their strong alkaline properties. In Mal.3.2 the Vulg. renders bôrith by herba fulillum; fullers’ sope in A.V. There are also several species of Saponaria (soapwort) native in Palestine.

**Socho, Sochoh, Socoh.** [Shoco.]

Sodi’, father of Gaddiel (Num.13.10).

**Sodom** (burning; see Gen.10.19.13.10.13. 14.2-22,18.10-26,19.1-28; Deut.29.25;32.32; Is. 1.9.2.3.13; 2K.18.20.21.14.19.48.50.40; Lam.4.6; Ezek.16.46-56; Zechar.8.10-17.4. Mt.10.15; Luke.17.29; Ju.7; Rev.11.8) and Sodoma (Ro.9.29).

[CITIES OF THE PLAIN.]

**Sodom, Sea of.** [SALT SEA.]

**Sodomites** (Heb. qôdishîm). The Eng. word is derived from Sodom, which was infamous for unnatural offences against morality. The Heb. word is found in Gen.38.21; Deut.23.17; 1K.14.24,15.12,22.46; 2K.23.7; Job 36.14. The expression does not refer to ordinary immorality, but religious abominations connected with the worship of a deity and carried on in temple precincts. These barbarities, though prohibited by the Mosaic law (Deut.23.18.), were introduced into Israel from Phoenicia, Syria, Phrygia, Assyria, and Babylonia, and were specially connected with the corrupt worship of Ashhtaroth—hence the writers of the Bible speak of them as “the abominations of the nations which the Lord cast out before the children of Israel.” [CRIMES.]

[Sodom]’tlish Sea. The (2Esdr.5.7) = the Dead Sea, near which was Sodom. [SALT SEA.]

**Solomon** (Heb. shîlômî, Gr. Σαλώμων, Solomon, or Ὁσῶμον, Ἀλεπ. Sulaimān) was the second son whom Bathsheba bore to David. Her first son died in early childhood (2Sam.12.15). David, or Bathsheba, gave the child when born the name of Solomon, or Peaceful (see R.V. margin 1K.15.24). Nathan, the prophet, with prophetic insight, named the child Jedidiah (beloved of Jehovah). It has often been noted that while considerable literary materials are available in the sacred Scriptures for a life of David, there is by no means such extensive material in reference to Solomon and his reign. The book of Nathan the Prophet is spoken of in 2Chr.9.29 as containing memoirs of Solomon. That book may possibly have been identical with “the Acts of Solomon” noticed in 1K.11.41. In 2Chr.9.29 there is also mention made among his biographies of the prophecy of Ahijah the Shilonite and the visions of Iddo the Seer. The Psalms supposed by some to refer to Solomon and his kingdom, such as Ps.2.45, 127, may all be otherwise interpreted. Of Ps. 72 alone can it be said that there is anything like a solid basis for considering that it was really composed with reference to his days. Josephus gives the account, fantastically enlarged for literary purposes, of the letters which passed between King Hiram and Solomon. Of a few of Solomon’s deeds, fragmentary records have been preserved by Alexander Polyhistor and others from Phoenician histories, and some of these have been used by early Christian writers. These accounts, however, contain very little of real importance, and are disfigured by not a few anachronisms, such as the mixing up of the building of the temple at Jerusalem with the erection of the temple of the Samaritans on mount Gerizim in far later days. None of the legends in the Korân can be accepted as really historical, though mostly derived from Jewish sources. A number of these have been preserved in the later Midrashim, such as that on Koheleth, and in the first and second Tar- gums of Ruth. There are apocryphal books ascribed to Solomon, e.g. the Incantation found at Sophene (see A.V. 2 Esdr.5.7) and other books, none of which can be called genuine. The so-called Psalms of Solomon were certainly not written by Solomon, but are more correctly termed Psalms of the Pharisæes (see Ryle and James’s prolegomena in their excellent edition). These psalms are of great interest and merit, and fill up a gap in the times immediately before Christ; and they are in demand for their preservation to their having been regarded in an uncritical age as Solomonic, though the history of that ascription is utterly unknown. The genuine Solomonic literature consists only of one book, that of the Proverbs. The so-called “Song of Solomon” and “the book of Koheleth” or Ecclesiastes, are, although inspired literature, not the products of his pen. Nevertheless, Solomon’s literary activity seems to have been great, and the description given in 1K.4.29-34 shows that he must have been the greatest genius that had yet appeared. It is a strange fancy of Dean Plummer’s to suppose that the personal appearance of Solomon is alluded to in Can.5.10. It must be remembered that Solomon was one of the last-born of David’s sons. [A.M.] It has been adduced to prove that he was the youngest of Bathsheba’s children; but this is
scarcely consistent with the words of 2 Sam. 12.24. It cannot in all cases be proved that the present order of names in the genealogies is necessarily the historical one. The child could not long have remained ignorant of the awful events in David’s family which directly or indirectly had to be traced back to the sin committed by David with Bathsheba. Solomon at that time might fairly have been regarded as the crown prince and heir to his father’s throne. Had the birth of the best-loved nothing to do with his sad rebellion and his terrible doom? Later, Adonijah became a powerful factor in the state, and to his side was drawn Joab, formerly the great captain of the army, who was probably out of office, and even Abiathar, the high-priest, who had been faithful to David in his early days of distress and misery. These, with others, banded themselves together, determined to destroy, if possible, all chances of Solomon’s succession to the throne. It was then that David, old as he was, acted with a new-born energy, in fulfilment of his oath to Bathsheba, and commanded Zadok the priest, Nathan the prophet, and Benaiah the son of Jehoiada, who was the commander of the royal bodyguard, to anoint Solomon as the lawful successor to the kingdom. The insurrection, which had threatened to become formidable, but once collapsed, Joab swiftly put to death, as David had recommended, and Abiathar, thrust out from the priesthood, was forced to retire into private life. Adonijah, though forgiven his first offence against Solomon, made a later attempt to secure his succession at some future time, and was then put to death. Shimei, having broken his promise to abide at Jerusalem, was also put to death, as Solomon had solemnly forewarned him, and thus, the natural antagonists of Solomon being removed, he was confirmed in the kingdom. The kingdom over which Solomon now reigned was indeed a mighty one. It seems to have embraced a number of small kingdoms to the N. of Palestine (his conquest of Hamath-zobah secured his empire in that direction), and to the S. it extended to the border of Egypt. On the W. it was bounded by the Great Sea, or Mediterranean, and Tyre and Sidon, though in a measure independent, were almost vassal powers. The Philistines, too, had for a season been crushed in the S. Though pre-eminently “a man of peace,” Solomon, whether in person or through his generals, engaged in several small wars. Eastward his kingdom extended “to the river Euphrates,” and some of the most remarkable cities which he built or enlarged, one of which possibly lay in that direction. His reign lasted for 40 years (1 K. 11.42). It was specially remarkable for the erection of the temple, which was commenced in the fourth (6.1) and brought to an end in the eleventh year of his reign (6.38). [TEMPLE.] Very extensive preparations in advance had been made by David, and treasures of all kinds collected together in Jerusalem; but Solomon was obliged to add largely to these, and to make full arrangements for bringing to Jerusalem the wood and the stone necessary for the construction of that gigantic work. The building of his own palace, known as “the House of the Forest of Lebanon,” occupied even more time, thirteen years, possibly because fewer workmen were employed (7.1ff.). The first act of his foreign policy, though apparently wise, proved in the long run to be pernicious. The king of Egypt was Solomon’s most powerful neighbour, and the kings of the Hittites and other monarchs around obtained the horses they needed for themselves and their armies from Egypt (1 K.10.29). Hence it was of great importance to all concerned to maintain a commercial connexion with Egypt. This led to Solomon entering into a close alliance with Pharaoh, cemented by taking the daughter of that king as his wife. This Pharaoh was Pa-seb-châ-ten II., the last king of the 21st dynasty (see A. Wiedemann, Ägypt. Gesch. ii. p. 541). He is called by Josephus Pharaohthes, Pharaoh by Eupolemos, and Uphares by Clemens Alexandrinus. Whether the daughter of Pharaoh embraced her husband’s religion we know not, but there is no mention of any temple having been erected in Jerusalem to any of the gods of Egypt. There appears to have been some unrest displayed by the remainder of the Canaanites who still dwelt among the Israelites (1 K.9.20-22; 2 Chr. 8.7,8), and this may have led to Gezer, then a Canaanite city, showing some disposition to take their side. Pharaoh, in order to provide a suitable dowry
for his daughter, marched against that city, took it, burnt it with fire, slew all its inhabitants, and gave the country over to Solomon, who rebuilt it as a Hebrew city (1K. 9.15-17). The city was a most important addition to the general security of Israel. So far all looked well, but the friendship with Egypt proved not to be lasting. Full particulars have not been discovered as to how the Aun dynasty of Egypt came into a claim to the throne, and how a new dynasty was founded; but when Sheshenk (the Biblical Shishak) came to the throne, the friendship with Solomon came to an end. Jeroboam, who was already plotting against Solomon on account of his heavy levies of workmen and exorbitant taxes, fled to the court of the Egyptian monarch, and the plan was devised of weakening the Davidic kingdom by stirring up insurrection among the northern tribes, and forming them into an independent monarchy. Nothing was effected in this direction during the reign of Solomon, but Jeroboam was not surrendered to Solomon as the latter had desired, and Solomon, already weakened in power, did not venture to attack Egypt. In the reign of his son and successor, Solomon's forgetfulness of God, polygamy, and idolatry brought upon the Davidic family a terrible retribution. Solomon's policy with regard to Tyre stood on a very different footing from his policy with regard to Egypt. Solomon was the aid of the Tyrians for his great architectural works and supplies of wood from Lebanon, and they needed supplies of corn and oil from Palestine. Solomon saw clearly that without commerce it was impossible for Palestine to remain a great nation or to construct or keep up a powerful navy. The Phoenicians were near, and an alliance with them was mutually beneficial. In later days the Assyrian, Babylonian, and Persian empires had to rely upon the fleets of Tyre, which visited all the seas then open. Hiram had been a friend of David (1K.5.1), for whom he had built a palace (2Sam.5.11), and when Solomon, as well as the latter, ascended the throne Hiram sent messengers to greet him, and a mutually beneficial treaty was then made. When the building of the temple was accomplished, Solomon gave Hiram of his royal bounty a present of twenty cities in Galilee, which, however, were not to Hiram's taste, for he termed them Cabul, popularly explained as a compound word meaning "as good as nothing," although some scholars conjecture that "the land of Galilee" ought to be read in that passage (1K.9.12). If Solomon on that occasion displayed any meanness towards Hiram, that does not seem to have long lessened the friendliness between the two monarchs. There is no ground whatever for the conjecture that those cities were won by Hiram in some royal wagers, and that Solomon outwitted the winner in a shabby fashion. The visit of the queen of Shriba (10.1-13) was no doubt one of such similar royal visits made by monarchs around to behold the glory and hear the wisdom of king Solomon. His wisdom in ordinary events is excellently illustrated by the story of the two women who came before him for judgment (3.16-28). At Gibbon, where the old tabernacle of Moses was still standing—bereft, however, of the ark, which was preserved apart in the tabernacle erected by the priests—Solomon was bidden by God in a vision to choose a gift, and wisely chose "an understanding heart" rather than riches or long life, which, as a reward for his wise choice, were "added unto him" (3.5-15). A second remarkable vision granted to Solomon is recorded in 9.1-10. During the order to Solomon was the dedication of the temple with the magnificent prayer offered up on that occasion (8.22-61). The apostasy of Solomon was of gradual growth. When the "strange women" of various countries were admitted to the royal harem, temples were erected to the god of their countries. At first that privilege may have been granted as a very special favour, but it afterwards appears to have been vouchsafed as due to their rank and condition. Solomon may have looked upon it as a piece of liberality on his part, and have himself abstained altogether from frequenting such unholy shrines. But the great monarch was not always in a condition to resist the aids of his own country or the threats of foreign neighbours. His military policy was a gradual enlarged, till no doubt Solomon learned, for the satisfaction of those women, to join to some degree in the worship they paid to their false gods, and to make use of the enchantments of their polluted groves. This last degradation is ascribed by both Jewish and Mohammedan tradition to Solomon. As a punishment the Lord raised up adversaries against Solomon: (1) Hadad the Edomite, who was long screened and protected by the king of Egypt (11.14-22); (2) Rezin, long a guerilla leader, who founded a throne in Damascus and was a constant thorn in Solomon's side (11.23-25); and Jeroboam, son of Nebat, who was encouraged in his rebellion by the prophecies of Ahijah the Shilohite (11.26-40). [C.H.H.W.] Solomon's Porch. [Temple; Jerusalem; Palace.] Solomon's servants, Children of, (Ezr.2.55,58; Ne.7.57,60,61.). The persons thus distinguished include those who returned from the Captivity. They occupy all but the lowest places in those lists, and their position indicates some connexion with the services of the temple. (1) The name, as well as the order, implies inferiority even to the Nethinim. (2) Their origin is probably to be found in 1K.5.13,4,9,20,21,2Chr.7.8. (3) Canaanites were reduced by Solomon to the helot state, and compelled to labour in the king's stone-quarries, and in building his palaces and cities. (3) 1Chr.22.2 throws some light on their special office. The Nethinim, as in the case of the Gibeonites, were appointed to be bowers of wood (Jos.9.21), and this was enough for the services of the tabernacle. For the construction and repairs of the temple another kind of labour was required, and the new slaves were set to the work of hewing and squaring stones (1K.5.17, 18). Their descendants appear to have formed a distinct order, inheriting probably the same functions and the same skill.

Solomon's Song, [Canticles.] Son. The Heb. ben, a son, in O.T. [Family], and its Aram. equivalent bar in N.T., are of frequent occurrence in composition with names.
of persons. [Semitic Languages.] In N.T., as often in O.T., the word is used also for a descendant, Mt.1.1, 20, 12.23, 25, 42, 45; Lu.19.9. Sons of God, the Israelites that, Lu.16:16: Ac.5.21, etc. An adopted son, Ac.7.21, Heb.11.24; or one in the place of a son, Jn.19.26. Term of endearment, Isam.3.6, 16, Heb.12.5, 6, 1Pe.5.13, etc. Member of a guild, rK.20.35; class or order, Mt.12.27. Followed by words denoting characteristic, quality, etc., e.g., the light of the morning, Ac.28.26, or day, Jn.12.26; disobedience, Eph.2.2, 5, 6, Col.3.6. Connected with or partaking of a thing, e.g., the kingdom, Mt.8.12, 13.32; and its opposite, this world, Lu.16.8, 20, 34; the resurrection, Lu.20.36; perdition, Jn.17.12, 2Th.2.3; Gehenna, Mt.23.15; Son of plagues (i.e., hostages), 2K.14.14; a horn the son of oil (i.e., a fertile hill), Is.5.1; son of the bridal chamber (i.e., bridesmen), Mt.9.15 and parallels. Also of the young of animals, Lev.9.2, Mt.21.5. Used also to express relation to God—of the Israelites, Ex.4.22, Ho.11.1; of believers, Ro.8.14, 15; Gal.6.16, 22, 26; 1Pe.3.21.26, 63; Lu.1.32, 4, 41, Jn.1.49, 20, 31. [H.L.] Son of God. [God; Jesus Christ; Incarnation.] Son of Man. (1) Generally, of all the descendants of Adam (Job 55.6; Ps.144.3, 146.3; Is.51.12, 56.2), and especially applied in this sense to Ezekiel, who is thus addressed by the Lord in the vision, Ez.1.1, 2, 10. (2) Pre-eminent to the Messiah (Dan.7.13, and cf. Ps.8.4ff., with Heb.2.6-8 and 1Cor.15.27), and in N.T. applied to Christ by Himself but only besides by St. Stephen (Ac.7.56) and in the Apocalypse (Rev.1.13, 14, 14), if we omit the question of the people in Jn.12.34. For the doctrinal significance, see Incarnation; Jesus Christ, 2K.14.14; God; kenosis; and the treatment of the Logos in John, Gospel of, and Philosophy. Songs of Songs. [Canticles.] Sons of God. There are few passages upon which more strange and curious theories have been erected than upon Gen.6.1-4. Not a few commentators of ancient and modern date have maintained that "the sons of God" (בַּעַ֓ל יִשְׁרָאֵל, mentioned twice, vv. 2, 4, and on two other occasions, Job 1.6, 2, 1) signify in those four passages "the angels." The phrase "sons of God" without the article is found in Job 38.7, and might (possibly, though not necessarily) be regarded as identical with the same phrase with the article, which another similar expression, בַּעַ֑ל הָאָדָמָּה (Heb. צל, Assyr. itu, God) occurs in Ps.29.1, 89.6. That phrase is translated in both A.V. and the text of R.V. (after the majority of ancient expositors) by "the mighty" and "the sons of the mighty." The Psalmist uses that expression to denote the kings and to kings, and parallelly, Jesus Christ, Mt.14.33; ch.17.5; Acts 10.38; ch.16.13. In the parallel words of Ps.97.7 with Ps.29.1 confirms this. Some commentators, however, consider that angels are there meant. In the marginal rendering of R.V. in Ps.29.1 the phrase is rendered "sons of God." Whether that rendering be correct or not, the phrase is not identical with that used in Gen.6.2, 4 and Job 38.7. In the same chapter, however, the stars may be referred to as "sons of God" (בַּעַ֑ל הָאָדָמָּה). For, in ver. 28 of that chapter, God is figuratively referred to as the Father of the rain and of the dewdrops. "The sons of God" whose intermarriages with "the daughters of men" are narrated in Gen.6 cannot have been angels, for the idea of a fleshly intercourse between angels and earthly women is opposed to the sobriety of the O.T. narratives, though the idea occurs in heathen mythology. Our Lord's words (Mt.22.30, etc.) ought to be decisive on the point. Such acts on the part of angels would imply procreative power. If, however, the sons of God in Gen.6 were not angelic beings, the phrase must indicate the professors of religion in that early time who chiefly belonged to the family of Seth, while the daughters of men were women of the family of Cain. The two families had long been separated from one another, probably owing to the murder of Abel by Cain, but in the days of Enos they became united before one common altar. This may be the meaning of the statement, "Then it was beguiled to call upon the name of Jehovah" (Gen.4.26). As professors of true religion the Israelites are similarly termed in Ho.1.10, "the sons of the living God," and the "heathen ones," "the apostates," or the fallen away from God. It is perfectly true that those apostates are also styled the withering away, the mighty ones or the Giants. It was, however, the magnitude of their transgression, and not the size of their bodily frames, that is alluded to in Gen.6. The (A.V. sons of Anak) spoken of in Num.13.33 appear to have been men of great stature, but they are not to be identified with those of Gen.6, who all perished in the waters of the deluge. [C.H.W.] Soothsayer. [Divination; Magic.] Sup (w'ydq). A male descendant of the family of Benjamin, one of the sons of Benjamin, perhaps of Caleb of Hebron, Gen.46.20. Solomon (2K.4.11) and Ephraim (2K.20.25) were from this line. The word is translated "sorcerer," "wizard," "wise man," etc., in the Bible. [E.A.E.] So'pater of Berea accompanied St. Paul on his return from Greece into Asia on the third missionary journey (Ac.20.4). [Sossipater.] Sope. [Soap.] Sophereth, a family of the descendants of Solomon's servants who returned with Zerubbabel (Ezr.2.55, R.V. Hassopheth; Ne.7.57). Sophonias (2Esd.1.40) = Zephaniah, 1. Sorcerer. [Divination; Magic.] Sorek' Valley of (Judg.16.14). the valley of the "sandpk", the "valley of the little stones", the "valley of pebbles", the boundary of Judah and Dan. The site is that of a village, with springs, a cave, and a sacred tree; and a rock-

Sosthenes.—1. Ruler of the synagogue in Corinth (Ac. 18. 17), in which office he was probably the successor of Crispus, who had become a convert to Christianity and had been baptized by St. Paul (Ac. 18. 8; 1 Cor. 1. 14). This event exasperated the Jews, and Sosthenes doubtless was chosen as their leader by reason of his strong anti-Christian animus. With the arrival of a new proconsul, Gallio, it seemed to the Jews that the opportunity of avenging Crispus' defection had come, for the proconsul would be anxious to gain their favour, and would not be over-scrupulous as to the means employed. Accordingly, under Sosthenes' leadership, they seized St. Paul and dragged him to the proconsular court (Ac. 18. 12). But Gallio refused to be their tool, cut short their case, and drive them from the judgment-seat. Thereupon the bystanders, infected by his indignation, seized Sosthenes and beat him, and Gallio did not check this summary retribution.—2. "Sosthenes" is his name in a passage after St. Paul in 1 Cor. 1. There is little ground for identifying him with the ruler of the synagogue, thereby presupposing the latter's conversion. The name was common, and the person here mentioned was not at Corinth but at Ephesus, where 1 Cor. was written. [A.C.D.]

Sotai, a family of the descendents of Solomon's servants who returned with Zerubbabel (Ezr. 2. 53; Ne. 7. 57).

Soul, i.e. the self-conscious centre of human personality, is generally called nephesh or neshémá (lit. breath), Gk. ψυχή (soul), very often νεφεχ (lit. wind or breath), Gk. πνεῦμα (spirit); frequently also λίβη or λεβάβαθ, Gk. καρδία (heart). It is implied already in Gen. 2. 7 that the human soul is an immaterial principle, distinct from the body, and analogous in nature to the divine essence. It is regarded, if not as inherently immortal, at least as potentially so, for to eat of the tree of life is evidently the appointed reward of faithfulness under probation (Gen. 2. 3). These great truths do not again become prominent till towards the close of the O.T. revelation. nephesh often stands simply for physical life, whether of individual souls (44. 30; Pr. 12. 10), or for a living being of any kind (Gen. 1. 20, 24, 30; Ezek. 47. 9, etc.), or for the seat of the appetites (Ps. 63. 5, 107. 9; Pr. 25. 25), or of the emotions and passions (Deut. 12. 20, 21. 14, etc.). At other times it means a "person," whether living (Pr. 11. 25, etc.) or dead (Num. 6. 6; Lev. 21. 17, 26, Num. 5. 8), or as a substitute for a personal pronoun (Gen. 49. 6; Num. 23. 10; Is. 43. 4, etc.). The main seat of the soul was supposed to be the blood, with which at times it was apparently identified (Gen. 9. 4, 5; Lev. 17. 10-14; Deut. 12. 23, 24). But the soul had other organs, the kidneys, as the seat of affection and emotion (Job. 18. 27; Pr. 16. 22; 11. 4; 15. 15; 16. 11, 23), or as the seat of compassion (Is. 16. 11, 13. 5; Jer. 31. 20, etc.); the liver as the seat of sorrow (Lam. 2. 11); but especially the heart, which, as the supposed centre of numerous psychical activities, was a recognized term for the soul. In Daniel only is there any hint of the modern doctrine that the brain is the sole or principal organ of mind (Dan. 2. 28, 4. 10, 13, 7. 1). The soul was always regarded as separable from the body. For the gradual growth of the teaching as to the persistence of the soul after the death of the body, see Future Life. During the interval between the two Testaments, the Jews came into contact with Gentile philosophy, and the result was considerable speculation upon the mysterious subjects of the soul's nature, origin, and destiny. The opinion of Plato that the soul is an immaterial and indestructible substance was generally adopted, e.g. by the author of Wisdom (22. 23, 24), and there were prominent Essenes—in fact, by all Jews except perhaps the Sadducees (Josephus, 18 Ant. i. 3, etc.; cf. Mt. 10. 28, 25. 46). It was also generally held that every human soul owes its origin to a special creative act of God (Creationism). The opposite view, that it is derived from the parents, is associated with Judaism, and apparently unknown until the time of Tertullian (200 A.D.). On other points there was less agreement. Some, following Plato and Philo, believed in the soul's eternal pre-existence (cf. Wis. 8. 19, R.V.); others (mainly orthodox Rabbis) in its creation at the creation of the world (cf. 2 Esd. 3. 35 ff.); others in its pre-mundane creation (Scalivonic Enoch, xxii. 5); others (perhaps the majority) in its congenation with the body, which is apparently the doctrine of O.T. (Gen. 2. 7; Is. 44. 2, 24. 49. 1-5; Job 31. 3). A few supported the Platonic speculation of metempsychosis (so the supposed Josephus, Acts viii. 5). The disciples of Jesus were aware of these discussions, and on one occasion asked Him whether a certain man had been born blind as a penalty for sins committed in a former state of existence (John 9. 2). The N.T., as distinguished from the Old, regards the soul primarily as an object of salvation (Heb. 13. 17; 1 Pe. 2. 12. 25; Jas. 1. 21, 5. 20; 3. 1, 2, etc.). According to our Lord's teaching, the soul being a man's inmost self, and inherently immortal (Mt. 10. 28), is precious beyond all price. Nothing can be accepted in exchange for it, and the gain of the whole world will not compensate for its loss (18. 25). This truth is driven home in the awful parable of the Rich Fool (Lk. 12. 16). The gospels contain much about the gain and loss of the soul, generally with a play upon the double meaning of ψυχή (life or soul). Most of these passages take the form of exhortations to martyrdom, literal or metaphorical (e.g. Mt. 10. 39; see also 16. 25; Lk. 9. 21; 12. 25; 23. 40-43). In the epistles, there is practically no distinction of meaning between "soul" and "spirit." [Srtrr.] Jesus, as perfect man, possessed both "soul" and "spirit." His "soul"
became an atoning sacrifice for sin (Mt.20.28), was troubled (Jn.12.27), and was exceeding sorrowful (Mt.26.38). His human "spirit" groaned or was angry (Jn.11.33), was troubled (1Co.15.44), was commended to the Lord (Jn.19.30), and was yielded up (Mt.27.50; Jn.19.30). [INCARNATION.] After death It descended to Hades, and there proceeded to the disordered spirits in prison (1Pe.3.18,19; cf. Eph.4.9), visiting also, we infer from Lu.23.43, that compartment of Hades which is reserved for the spirits of just men who are yet living. Our Lord's teaching recognized an intermediate state of the soul between death and final judgment—of bliss in the case of the righteous, and of misery in the case of the unrighteous (Lu.16.19ff). Whether the punishments of this state are remedial, or vindictive only, has by the Irenaeus of Lyons (c.50), and Tertullian (adv. Jud. 1) been keenly debated. Whether criticisms are to regard them as remedial, and to postulate change and spiritual development in the intermediate state as at least possible. Scripture regards the disembodied state of the soul as imperfect and provisional. At the last day the unclouded soul will be "clothed upon" with a spiritual body (2Co.5.1ff.), and will then enter upon its eternal reward. [FUTURE LIFE; ESCHATOLOGY.] F. Delitzsch, Syst. d. bibl. Psychol. (E.T. 1857); Laidlaw, Bible Doct. of Man; W. R. Alger, Destiny of the Soul; Welldon, Hope of Immortality; J. B. Heard, The Tripartite Nature of Man. [c.u.]

South Ramoth', a place frequented by David and his outlaws during the latter part of Saul's life (1Sam.30.27). [BAAL, geogr. 1.]

Sew. [SWINE.]

Sower, Sowing. The Egyptian paintings furnish many illustrations of the mode in which sowing was conducted. The sower held the vessel or basket containing the seed in his left hand, while with his right he scattered the seed broadcast. The "drawing out" (or "bearing forth," R.V.) of the seed is noticed in Ps.126.6 (cf. A.V. marg.), and "sowing" in Am.9.13. In wet soils the seed was trodden in by the feet of animals (15.22.20). The seed commenced sowing in February, and continued to the end of February. The Mosaic law prohibited the sowing of mixed seed (Lev.19.19; Deut.22.9). The ancient method of hand-sowing remains unchanged in Palestine to-day (Mt.13.3). [c.r.c.]

Spain. The Lat. form of this name is represented in Hebrew by Samhaim (1Mac.8.3) where, however, some copies exhibit the Gk. form, and in the Greek by the Samhaim of Ro.15.24.8. These passages contain all the Biblical notices of Spain. The mere intention of St. Paul to visit Spain implies the establishment of a Christian community there, possibly by means of Hellenistic Jewish residents, and this early introduction of Christianity is attested by Irenaeus (i.3.19) and Tertullian (adv. Jud. 7).

Span. [WEIGHTS AND MEASURES.]

Sparrow (Heb. sippar). The Heb. word, which occurs forty times in O.T., is in all passages except two rendered by A.V. indifferently "bird" or "fowl"; but in Ps.84.3 and 102.7 it is translated "sparrow." The Gk. σπεργαλίον (A.V. sparrow) occurs twice in N.T.: Mt.10.29 and Lu.12.6-7, where the Vulg. has passeris. rippôr, from a root signifying to "chirp" or "twitter," appears to be an onomatopoeic title for small birds in general, especially those of the perching order (Passeres). The house-sparrow (Passer domesticus) has been introduced into the Holy Land, where there also occur the allied P. citalpinus and P. salicarius, while the tree-sparrow (P. montanus) is also common; but it is not to be assumed that any one of these is specially alluded to in Scripture. Palestine abounds in small perching birds, many of which are now, as in Jewish times, sold as food in the markets. One species only may be identified with probability—viz. that alluded to in Ps.102.7 as "the sparrow that sitteth alone upon the housetop," which may be the blue rock-thrush (Monticola cyanius). This is a solitary bird, eschewing the society of its own species, of which rarely more than a pair are seen together. There are but two allusions to the singing of birds in Scripture, viz. Ec.12.4 and Ps.104.12. As the poetist is referring to the sides of streams and rivers, he may have had in his mind the Palestine bulbul (Pycnonotus xanthopygus). The "bulbul" of the Persian and Arabian poets is probably the eastern nightingale (Daulias hafsi). [r.l.]

Sparta (1Mac.14.15; but in 2Mac.6.9, LACEDEMONIANS). In the history of the Hasmoneans mention is made of a remarkable correspondence between the Jews and the Spartans, which has been the subject of much discussion. When Jonathan endeavoured to strengthen his government by foreign alliances (c. 144 B.C.), he sent to Sparta to renew a friendly intercourse which had been begun at an earlier time between Arcus and Onias, on the ground of their common descent from Abraham (1Mac.12.5-23). The embassy was favourably received, and after the death of Jonathan "the friendship and league" was renewed with Simon (1Mac.14.16-23). Several questions arise out of these statements as to (1) the people described under the name Spartans, (2) the relationship of the Jews
and Spartans, (3) the historic character of the events, and (4) the persons referred to under Jerusalem. (1) The whole context of the passage, as well as the independent reference to the connexion of the "Lacedemonians" and Jews in 2 Mac. 5. 9, seem to prove clearly that the reference is to the Spartans, properly so-called. (2) The actual relationship of the Jews and Spartans (2 Mac. 5. 9) is an ethnological error, the origin of which it is difficult to trace. Possibly the Jews regarded the Spartans as the representatives of the Pelasgi, the supposed descendants of Peleg the son of Eber. It is certain, from an independent passage, that a Jewish colony existed at Sparta at an early time (1 Mac. 11. 1). (3) The incorrectness of the opinion on which the intercourse was based is obviously no objection to the fact of the intercourse itself. But it is further urged that the letters betray their fictitious origin negatively by the absence of characteristic forms of expression, and positively by actual inaccuracies. To this it may be replied that the Spartan letters (1 Mac. 12. 20-23, 14. 20-23) are extremely brief, and exist only in a translation of a translation, so that it is unreasonable to expect that any Doric peculiarities should have been preserved; and the absence of the name of the second king of Sparta in the first letter (1 Mac. 12. 20), and of both kings in the second (1 Mac. 14. 20), is probably to be explained by the political circumstances under which the letters were written. (4) The difficulty of fixing the date of the first correspondence is increased by the recurrence of the names involved. Two kings bore the name Areus, one of whom reigned 309-265 B.C., and the other, his grandson, died 257 B.C., being only eight years old. The same name was also borne by an adventurer, who occupied a prominent position at Sparta, c. 184 B.C. In Judea, again, three high-priests bore the name Onias, the first of whom held office 330-309 B.C. (or 300); the second 240-226 B.C.; and the third c. 172 B.C. Josephus is probably correct in fixing the event in the time of Onias III.

**Spear.** [**ARMS, OFFENSIVE, (3)**]

**Spearmen.** The word thus rendered in A.V. (Ac. 23. 23) is of very rare occurrence, and its meaning is extremely obscure. Two hundred δεξιόλαβοι formed part of the escort of St. Paul in the night-march from Jerusalem to Caesarea. They are clearly distinguished both from the heavy-armed legionaries, who only went as far as Antipatris, and from the cavalry, who continued the journey to Caesarea. As nothing is said of the return of the δεξιόλαβοι to Jerusalem after their arrival at Antipatris, we may infer that they accompanied the cavalry to Caesarea, and this strengthens the supposition that they were irregular light-armed troops able to keep pace with mounted soldiers.

**Speckled bird** (Je. 12. 9). [**HYENA.**]

**Spelt.** [**KIE; BREAD.**]

**Spice, Spices.** Under this head we shall notice the Heb. words בָּשָׁם, וַּקֹּחָה, and סָמִים, illuminated by the Heb. bāšām, behem, and bāšām, bāšām, the last of which occurs only in Ca. 5. 1, "I have gathered, my myrrh with my spice," points apparently to some definite substance. Elsewhere, including 1.13,6.2 (bāse'm), the words refer more generally to sweet aromatic odours, the principal being that of the balsam, or balm of Gilead; the tree which yields this is now generally admitted to be the Spagio pono balsamum; though it is probable that other species of Amyridaceae are included. The

**SPICE, SPICES**

**Balsam of Gilead (Amyris Gileadensis).**
Arab. सुन्बुल इल हिन्द or "Indian spike," also called nardin, and the Hindu jatamsee are equivalents of the Gk. nardos. This plant, called Nardostachys jatamansi by De Candolle, is evidently the nardos described by Dioscorides (i. 6) under the name γαγγίρα, i.e. "the Ganges nard." Pliny says of the plant, "Growing along the river Ganges [it is] condemned altogether as good for nothing," but that "Nardus coming from Syria is esteemed best." Further, "To quicken and fortify the sent of all these ointments there must no spare bee made of Costus and Amomum" (xii. 12, xiii. 1). Nard has been fully discussed in Paxton's Illustrations of Holy Scripture, and elsewhere. [H.C.H.]

Spinning: [Handicrafts, (6),] 332. (1) Spirit (the pagan), ῥημα, πνεῦμα. (1) Usually a synonym for Soul. (2) Sometimes the inspired human spirit of a prophet (Num. 27.18; 2K.2.15; Is.59.10; Num.2.11; Zech. 13.2). (3) In the Pauline epistles, "spirit" (πνεῦμα) is distinguished from "soul" (ψυχή), and even contrasted. There "soul" is the principle of life of the natural man; "spirit" is the principle of supernatural life as manifested in the regenerate Christian. Hence the derivative ψυχίκος (lit. soulish) is used in a depreciatory and even a bad sense (1Cor. 12.14, 15.44; Jas.3.15; Ju.19). Spirit in St. Paul stands for the highest religious faculties of the human soul: spiritualized and influenced by the indwelling Spirit of God, and as contrasted with "flesh." (4) St. Paul's analysis of man into spirit, soul, and body (1Th.5.23; cf. Heb.4.12) does not imply (as some have supposed) a metaphysical trichotomy of man into three distinct substances. The Bible generally, and the gospels in particular, favour a dichotomy—body and soul (or spirit). St. Paul in 1Th.5.23 is only affirming strongly the salubrity of the whole man—his body (σώμα), his vital, sensitive, and intellectual faculties (ψυχή), and his spiritual faculties (πνεῦμα), when not synonyms, are simply different faculties of one spiritual substance. [C. I.]

Spirit, Holy. Belief in the Holy Spirit ultimately depends on Jesus Christ. (1) The Revelation as to His Person. Our Lord filled the doctrine of the Fatherhood of God with new contents, by revealing that beside the Father existed the Son. The magnitude of this conception required the central place in His teaching of the Twelve. He also proclaimed, chiefly toward the close of His ministry, the Spirit. The term, like that of Fatherhood, was not new, but derived from O.T. (cf. Gen.1.2; Job 33.4; Ps.51.11; Is.11.2, 63.10), and was quite familiar to our Lord's contemporaries (Lu.1.15, 35, 41, 67, 25; Mt.4.1), but was filled by Him with vastly deeper meaning. He spoke occasionally of the Spirit in the earlier part of His ministry (Mt.10.20; Mk.3.29 and parallels, 13.2; Lu.4.18[Is.61.1], 11.13, 12.12; but in the last instructions to the Twelve, precisely where it must have come if it was to come at all, He gave the plainest explicit teaching on the subject (Jn.14.15, 20, 16.6, 17, 13). This revelation declares the personality of the Holy Spirit and His relationship to the Father and the Son. The Spirit proceeds from the Father (Jn.15.26); He is also from the Son (14.26). We now hear for the first time the triple phraseology, thenceforward familiar in Christendom (Jn.14.26, 15.26). After the Resurrection these instructions were resumed and completed (Jn.20.22; Ac.1.5; Mt.28.19, Baptismal formula). On the basis of this Revelation the apostles developed a doctrine of the personality of the Spirit. We find in the epistles two divine names rather than three (e.g. 1Cor.1.3). This is not "a matter of Spiritism," as has been true said (Moberly, Atonement and Personality, p. 192), the apostle is not concerned with speculation on God in Himself, but rather with God as revealed in Incarnation. But the epistles also constantly name the Holy Spirit (e.g. 1Cor.12.1-13, eleven times in thirteen verses; Ro.8.26, 9.7, 10.7). He also proceeds from the Father and the Son. Sometimes the Spirit is described as an influence, sometimes as a Person. The two are in no sense contradictory, but supplementary. Regarded in His gifts and manifold effect, the impersonal is a
SPIRIT, HOLY

quite natural expression; regarded in Himself, the other is. He is to St. Paul essentially a personal activity, a personal communication with the churchmen (see 1 Cor. 11.21). The analogy between the spirit of man and the Spirit of God (2.10 ff.) involves the personality of each, and therefore the divinity of the latter, although it would not necessarily imply distinction from the Father, which is, however, given in the phrase “God hath revealed them unto us by His Spirit” (cf. Heb. 1.2, “God . . . spoken unto us by His Son”). The separation of the persons in both instances is manifest. For the distinctness, yet inseparable union, see 2 Cor. 13.14: Love which is the cause of redemption, Grace which is the means, Communion which is the effect; and these ascribed to the distinct yet united Three (cf. Pfeiderer, Paulinism, i 202). How St. Paul co-ordinated this with his hereditary monotheism is a matter of modern inquiry. That he did is certain. It is explicable by the overwhelming force of the New Revelation. The development of the Threefold Christology, 2 Cor. 13.14, to a solitary Deity, a Man, and a Metaphor, is utterly alien to apostolic thought, and reads into the language the notions of a different religion. Cf. also Ac. 16.6,7,10, "Having been forbidden by the Holy Ghost to speak the word in Asia . . . the Spirit of Jesus forbade us." No personal appeal with the word, "God had called us." (See further Gal. 4.6; Eph. 1.17,2.18; and Armitage-Robinson on Ephesians.) He is interchangeably the Spirit of God and the Spirit of Christ (Rom. 8.9). This association of the Spirit with the Father and Son is due to the Christian experience (cf. Eph. 1.17; 1 Cor. 6.11; and Doerr, Person of Christ, app. to Eng. transl.).

(2) The Work of the Holy Spirit. Our Lord, while revealing the Spirit’s personality and relation to the Father, at the same time indicated His work. And from these data are derived the fuller apostolic teachings. That work is to be found: (i) In the Incarnation. It is inconceivable that Christ could have been constituted (Mt. 1.18,20; Lk. 1.35). His Baptism (Lk. 3.21), Temptation (4.1), miracles (4.18), mission in general (ib.), sacrifice (Heb. 9.14), resurrection (Rom. 8.11), are all guided, controlled, or effected by the Holy Spirit (cf. Lux Mundi, p. 321, and Ac. 10.38).

(ii) In the Church of which He is the Founder (cf. Ac. 2). Incorporation into the Body of Christ is His work (1 Cor. 12.13). It is the Spirit Who constitutes the validity of the Sacraments; and bestows official gifts for ministration in the Body of Christ (12.3-10); all these are official powers, not personal graces, e.g. the power to absolve (Jn. 20), which is also His gift. The apostles could not by their own power forgive sins—but only "in virtue of a divine commission" (Schmid, Bibl. Theol. N.T., 154). Thus He consecrates individuals, and enables them for particular functions relatively to the community (Ac. 20.28). The communication of Truth seems to be to the community rather than to the individual, or to the individual as within the community (cf. 1 Cor. 2.10). Thus the action of the Spirit on the Church is distinguished from His action on the world (Jn. 14.16,15.8). His influence on the apostles (14.26) is collective, as representing the Body of Christ, rather than individual. Thus the Church is a "very real unity, a very real communion, not a mere association (14.25,16.13). (iii) In the Individual. He is the Giver of Life (3.6,8,6.9) and of Faith (1 Cor. 12.3). His appeal to conscience (Rom. 8.16), guidance (8.14), power of inspiring love (5.5), indwelling (1 Cor. 3.16), are instances of His sanctifying work. He effects the resurrection, both moral and physical, of the believer (Rom. 8.11). His work in the individual may be considered in two aspects: (a) Intellectual, as enlightenment. He is the Spirit of Truth (Jn. 14.17,26,15.13), contrasted with the spirit of error (Jn. 4.6). He enables the individual mind to assimilate and value the collective Faith of the community (1 Cor. 2.15; Jn. 2.20-27). The sentences “He that is spiritual discerneth all things,” and “Ye have an ascension from the Holy One,” and “Ye need not that any man teach you,” do not isolate the individual from the community, still less render him superior to it; rather, by the two who are greater and older traditions, does he secure this enlightenment. At the same time this enlightenment is an individual possession, wherein each will differ in degree (1 Cor. 12.11). (b) The Holy Spirit not only enlightens but invigorates the entire personality. This often-neglected truth is embodied in the concluding thought, that the two main human defects of ignorance and weakness are the two main gifts of the Spirit, enlightenment and strength (Rom. 8.26; 2 Cor. 7.1; Eph. 3.16; 2 Th. 2.13). It is the work of the Spirit to impart to the individual the spiritual principle of the glorified manhood of Jesus. This is the ultimate purpose of Christianity and its crowning distinction. Of this the Sacraments are instances and instruments. St. Paul’s antithesis between the letter and the spirit (2 Cor. 3.6) is his magnificent witness to personal experience of the Holy Spirit’s power. Where the letter of the law, or letter of tradition, or any other human agency, but could not enable to compliance, the invigorating force of the Spirit rendered obedience possible (see St. Augustine’s treatise De Spiritu et Littera; Scott Holland, Creed and Character; Gore, Body of Christ). The presence of the Holy Spirit is not a substitute for the presence of Christ, but the means by which the latter is secured. The Spirit does not replace an absent Christ, but perpetuates Christ’s living presence. His work is to reproduce Christ’s character in the individual believer, by the infusion of Christ’s nature. Hence His work waited until our Lord was glorified (Jn. 1.30). The Church’s doctrine of the Holy Spirit is confirmed negatively by the perplexities to which thought is reduced in any endeavour to explain the Scripture data on a unitarian basis. It ought to be remembered that the relation of Divine will and power to human independence is not a problem created by Christianity, but inherent in every conception of Deity. We cannot analyse completely even a human personal influence upon another. The study of psychology may be yet in its infancy. It has already opened out hitherto unsuspected realms of possible suggestiveness. And no difficulties in ex-
plaining the action of Grace are inconsistent with belief in the reality of such action; more especially where the necessity for some higher-invigorating power to secure man's moral uplifting is frankly acknowledged. (iv) In the Scriptures. Whether the N.T. writers consciously set their writings on a level with the older "Scriptures inspired of God" (2 Tim. 3. 16) or participated the conception to be accorded to them in Christendom, at any rate the writings are products of the Spirit, within the Church, and for the Church. Consciousness of His guidance is expressed in 1 Cor. 7. 40, where the humility of the phrase should not conceal the grandeur of the implication. Local and historical events of the apostolic age, to be sure, have utilized them as standards whereby the Church's convictions must be tried and tested (e.g. Corinth; cf. the appeal of St. Clement of Rome to them to bring themselves into closer conformity with the principles therein defined). If the work of the Spirit was to recall to apostolic recollection the ideas and to capture their insight into its deep significance (Jn. 14. 26), then the permanent record and expression of the apostolic experience and conclusions must necessarily remain as the divine standard by which every generation of the Church is to test its own development. This shows the constant and lofty position held by the idea of the Spirit in the consciousness of the apostolic Church. To be without a knowledge of the Holy Spirit was to be destitute of one of the first essentials of Christianity (cf. Ac. 19. 2–6). To experience His grace was their eager expectation (11. 16), and then their indescribable blessing (1 Jn. 3. 24, 4. 13). (3) The Deity which received the Holy Spirit has had this history, beyond the apostolic expression of it, in its assimilation and development in the Church. This reflection of the Christian consciousness is a product of the apostolic expression and its completion. It was natural that our Lord's divinity and the doctrine of the Incarnation should develop in the apostolic mind before any could advance to study the doctrine of the Holy Spirit. The Nicene definition, while precise as to the con-substantiality of the Son, left the Doctrine of the Holy Spirit almost undefined. The clauses explanatory of His Person and work are of a later date, which the denial by the Macedonians of His divinity led to deeper study and fuller expression of the orthodox faith. Treatises on the Holy Spirit only began to appear near the close of the 4th cent. (e.g. St. Basil, On the Holy Spirit, 374). See further the art. in Pearson, On the Creed; Bp. Moberly, On the Administration of the Holy Spirit (Bampton Lect. 1868); art. on Holy Spirit in Lux Mundi; chapter on Holy Spirit in Moberly, Atonement and Personality; Newton Clarke, Outlines of Christian Theology, pt v.; Masterman, I Believe in the Holy Ghost; Walpole, Mission of Holy Spirit; Hutchings, Person and Work of the Holy Ghost (4th ed. 1893). Spoil. [Booz.]

Spouse. [Marriage.]

Spunge (R.V. spong), though abundant in the Mediterranean, is mentioned only in N.T. (Mt. 27. 48 = Mk. 15. 36; Jn. 19. 29).

Sta'chys, a Christian at Rome, saluted by St. Paul (Ro. 16. 9). Tradition makes him afterwards Bp. of Byzantium for 16 years (H.E. viii. 6). The name occurs in inscriptions of Caesar's household.

Staete (Heb. nāḍāṯāph), one of the sweet spices which composed the holy incense (see Ex. 30. 34). The Heb. word occurs again in Job 36. 27 to denote "a dregs of wine," and LXX. of the Vulg. identifies the nāḍāṯāph with the gum of the storax tree (Styrax officinalis), but all that is positively known is that it signifies an odoriferous distillation from some plant. Storax in Ecclus. 24. 15 is a sweet perfume. It has also been suggested as the translation of wkhbūn. [SPICES.] Pliny says it was abundant in Syria and used by the Arabs in their houses to correct ill smells. [GALBANUM; POLPLAN.]

Stallion (Ecclus. 33. 6). [HORSE.]

Standards. [ENSIGN.]

Star of the Wise Men. I. (1) It may be inferred from Mt. 2. 16 that the star of the Wise Men first appeared at least two years before the death of Herod and therefore probably in March, 4 b.c. Hence the appearance would be not later than 6 b.c., and probably somewhat before that date, though not very much, as the traditional date of the Nativity is not likely to be many years at fault. It may therefore be put provisionally c. 7 b.c., and Ramsay has shown independently in the belief that Christ was born in 7 b.c. (see Was Christ born at Bethlehem?). (2) Is there then any evidence for the occurrence of an unusual phenomenon in that year? In the 17th cent. Kepler discovered that in the year 7 b.c. there occurred three conjunctions of Jupiter and Saturn (see De Vero Amo). He was corroborated by the 19th cent. by Pritchard, who has calculated that the three conjunctions began on May 29, Sept. 29, and Dec. 4, respectively (Memoirs of the Royal Astronomical Soc. xxv. 119). Now, the mediaeval Rabbi Abarbanel (1437–1508) says, commenting on Sat. 1. 20, that Jupiter and Daniel, that a conjunction of Jupiter and the star of the north of the Messiah. This evidence is certainly late, but it probably has an old tradition behind it, based, perhaps, partly on Num. 24. 17. There are, then, reasons for identifying the star of the Magi with one or more of these three conjunctions. Nor is the fact that St. Matthew describes it as ἀστήρ against the identification, as the language of the whole passage is non-technical. (3) There are reasons for thinking that the Magi came from Yemen, in S. Arabia. [MAGI.] From one of the remotest parts of that district they would need quite three months for the journey to Jerusalem; for the journey from one of the somewhat remote parts of Egypt to the north-west point of the gulf of 'Aqababa generally took 70 days (16 Strabo iv. 4). Hence if the Magi started on their journey towards the middle of June (about a fortnight after the appearance of the first conjunction), they would reach Jerusalem towards the middle of September. Meanwhile, the movement of the two planets having become retrograde, the conjunction would have ceased. Inquiries in Jerusalem would occupy about a fortnight, by the end of which time the second conjunction would take place. The Magi on seeing this recurrence of the phenomenon,
and for the village where they had been led by their inquiries to expect the Messiah. As this conjunction rose in an easterly direction, the Magi would have it on their left at the time of their departure from Jerusalem. Some little distance outside Bethlehem, however, the road takes a turn to the left; and consequently, as the Magi mounted the hill leading to Bethlehem, they would see the conjunction before them apparently leading the way and seeming, perhaps, to rest over some particular house on the crest of the hill. (4) It will be seen that these facts fit in very well with details of the narrative in Mt.2. It is plain from the language of that chapter (esp. vv. 2, 7, 10) that the Magi did lose sight of the star before reaching Jerusalem, but were greeted with a reappearance of it about the time that they quitted the Holy City. Further, they travelled by night (and this is most naturally explained by the fact of their having been led by an easterly star) and it seemed to them that the star was leading the way to Bethlehem (Mt.2.9,10). (5) Moreover, there is evidence from another quarter. According to Ramsey (op. cit. p. 193), the enrolment which drew Joseph and Mary to Bethlehem must be placed at some point during the months August and September. This is the view of the phenomenon which the Magi saw between Jerusalem and Bethlehem was the second conjunction of 7 b.c., and consequently that the phenomenon which they saw before setting out from their own country was the first conjunction of that year.—II. (1) At first sight Mt.2.16 seems out of place with the rest of the text. This phenomenon is the view that the phenomenon which the Magi saw between Jerusalem and Bethlehem was the second conjunction of 7 b.c., and consequently that the phenomenon which they saw before setting out from their own country was the first conjunction of that year.—II. (1) At first sight Mt.2.16 seems out of place with the rest of the text. This phenomenon is the view that the phenomenon which the Magi saw between Jerusalem and Bethlehem was the second conjunction of 7 b.c., and consequently that the phenomenon which they saw before setting out from their own country was the first conjunction of that year. (2) At first sight Mt.2.16 seems out of place with the rest of the text. This phenomenon is the view that the phenomenon which the Magi saw between Jerusalem and Bethlehem was the second conjunction of 7 b.c., and consequently that the phenomenon which they saw before setting out from their own country was the first conjunction of that year.
three years—just as a person naturally gives his age as that on his last birthday. (4) It may be asked: Why, since the Magi apparently took it for granted at the end of 7 b.c. that the Messiah is already born (Mt.2:2, τοτε γενναται), was not Herod content with the slaughter of those infants only who were born about that time? To this it may be answered: (i) That this is perhaps unduly pressing the temporal force of τοτε γενναται. A celestial phenomenon portended a future event, and the aorist participle might very well be used in a non-temporal sense of one either already born or else about to be born (cf. the "gnomic" use of the aorist is class. Gk.). If there had been a distinct reference to past time, we should probably have had γεγενήθηναι. (ii) The fact that there were altogether three conjunctions, extending until the beginning of 6 b.c., may have further influenced Herod. (iii) It is too much to expect discrimination in a madman. Herod would wish to make quite certain, and would not draw nice distinctions. Thus Mt.2:2 reads, and conflicting with the chronology here adopted, seems rather (so far as it goes) to tend in the other direction.—III. The silence of St. Luke on the subject of the Magi and the star is sometimes urged as an argument against the truth of the whole story. But it may be answered: (1) That the argument from silence is proverbially unsafe. (2) The account in St. Luke does not make it plain that the shepherds were in a state which made them capable of receiving the message of the Messiah's birth; and this fact falls naturally into its place if we suppose that the Magi had told of their expectations of a birth at Bethlehem under exceptional circumstances. The chief objection to this having influenced the minds of the shepherds is that the tradition (enshrined in the Epiphany season) makes the visit of the Magi occur a fortnight after the Birth, while the visit of the shepherds occurred on the night of the Nativity (Lu.2:15). Hence we must either suppose that the tradition is wrong and that the visit of the Magi occurred on the same night as the Birth, or that the Magi preceded them and had reached the Bethlehem shepherds. (3) It seems that the message to the shepherds was accompanied by some celestial phenomenon (Lu.2:9, esp. διὰ τοῦ Χρυσότροπου). Is it fanciful to suppose that we have here an allusion to the star of the Magi?—IV. Once more, it is urged against the identification of the star of the Magi with the conjunction of 7 b.c.: Why, if this conjunction of Jupiter and Saturn caused some of the Magi to set out in search of the Messiah, had not the much brighter conjunction of the same planets in 66 b.c. produced the same result? To this it is only necessary to answer that not all men are bound to act in the same way under similar circumstances, and that if the Magi of 7 b.c. had been capable of setting out for Jerusalem in 66 b.c., they might perhaps have done so; but that does not prove anything as to the probable movements of their fathers or grandfathers. Moreover, there is no authority on the part of the traditions of the conjunction which had occurred 59 years previously may have caused the conjunction of 7 b.c. to create a greater impression as a republication of a neglected message. Nor should the fact that these astrologers were thus led by this strange means to the birthplace of their Redeemer be a difficulty to those who reflect that the whole course of history shows how God does, by what appear to be coincidences, make even the follies of men subservient to His divine purpose. [C.E.R.]

**Stater. [Money.]**

### Steel

In all cases where the word "steel" occurs in A.V. the true rendering of the Heb. is "copper." Whether the ancient Hebrews were acquainted with steel is not perfectly certain. It has been inferred from a passage in Jeremiah (15.12), that the "iron from the north" there spoken of denoted a superior kind of metal, hardened in an unusual manner, like the steel obtained from the Chalybes of the Pontus, the ironsmiths of the ancient world. The hardening of iron for cutting instruments was practised in Pontus, Lydia, and Laconia. Justin mentions two rivers in Spain, the Bilbilis and Chalybes, the water of which was used for hardening iron (cf. Plin. xxxiv. 41). There is, however, a Heb. word, pālād, which occurs only in Lu.3:22 and is rendered "torches," or "torches," but which most probably denotes steel or hardened iron. Steel appears to have been known to the Egyptians. The steel weapons in the tomb of Ramses III., says Wilkinson, are painted blue, the bronze (or copper) red.

### Stephen

**Stephen,** a Christian convert of Corinth, whose household St. Paul baptized as the "first-fruits of Achaia" (rCor.1:16.16.15). **Stephen,** the first martyr (Ac.6.7). The Christian Church, in spite of the opposition of the Sadducees and the priestly party, had prospered greatly in its early days in Jerusalem (2.47.5.14.6.7). Hellenistic Jews as well as Hebrews had joined it. A murmuring arose because the former considered that the "widows" of their class were neglected in the daily ministration. Seven men were chosen by the Church and ordained by the apostles to attend to this. Though they are only called "seven" in the Acts, the number was regarded from the time of Irenaeus as deacons. But Chrysostom says that their office was quite as much that of elders, and that their title was neither deacons nor elders. [Deacon; Church, (6).] Of these, the chief was St. Stephen. He was "a man full of faith and of the Holy Spirit" (6.3), "full of grace and power," and "wrought great wonders and signs among the people" (6.8). He distinguished himself chiefly by disputing in the synagogues with Hellenistic Jews, so that "they were not able to withstand the wisdom and the spirit by which he spake" (6.10). St. Stephen was falsely accused (6.11.13) by the Hellenistic Jews (who manifested an intolerant zeal of converts) of "speaking blasphemous words against Moses and against God," the half-truth upon which they based their accusation being the Lord's own reference to the destruction of the temple. St. Stephen was arrested and brought before the Sanhedrin. His defense was that which he has in the Acts. It was probably, as Dean Farrar argues, delivered in Greek, and
its quotations of O.T. are from the LXX. Its genuineness is well substantiated. "The Haggadoth in which it abounds, the variations from historical accuracy, the free citation of passages from the O.T., the roughness of style, above all the concentrated force which makes it lend itself so readily to different interpretations, are characteristics which leave on our minds no shadow of doubt that, whoever may have been the reporter, we have here at least an outline of Stephen's speech" (Farrar).

It is not a refutation of the particular charge brought against him, but probably a restatement of what he had preached in the synagogues, and a powerful witness of the real value which he attached to the Mosaic records of God's leading of the chosen people. Though it comes to an abrupt conclusion, the argument is complete. Its purpose is to show, by a spiritual interpretation of the history of Israel, that God is not confined to one building or one country, but reveals Himself in various places, in Haran, in Egypt, in the wilderness of mount Sinai; the tabernacle of testimony was not made till Moses, the temple till the reign of Solomon. Secondly, their fathers had been obstinate, and had rejected the revelation of God again and again; they understood not that God was giving them deliverance by the hand of Moses, they turned back in their hearts into Egypt, they took up the tabernacle of Moloch and the star of the god Remphan. The conclusion of like blindness and obstinacy in their own case is suppressed till the close of the speech (7.51-53). This forcible application of lessons (of which their reverence for the name of Moses must have made them feel the force) aroused the deep anger of his judges (7.54). Stephen, unmoved by the uproar, saw the heavens opened and the Son of Man standing on the right hand of God. The judges broke into cries of execution, clapped their hands to their ears, flew as with one impulse upon him, and dragged him out of the city to the place of execution. What had begun as an orderly trial ended in a wild tumult. There was no formal condemnation, nor sentence of death. The place of St. Stephen's martyrdom was said as far back as the 4th cent. to have been outside the Damascus Gate to the N. of Jerusalem; but, for some unexplained reason, the site was altered in the 15th cent. to the descent outside St. Stephen's Gate, E. of the city. As the first volley of stones burst upon him, he prayed, "Lord Jesus, receive my spirit." (cf.

Lu.23.46). Kneeling down, his loud cry for mercy upon his murderers answered to the loud cry with which his enemies had flown upon him; and his dying words, "Lord, lay not this sin to their charge," again inevitably recall to us the example of his Lord, "Father, forgive them; for they know not what they do." Thus he "fell asleep." Devout Jews carried his mangled body to the burial and made great lamentation over him. For the legend of his relics, see Dictionary of Christian Antiquities, art. "Stephen." St. Stephen's martyrdom has been placed at various dates between 30 and 38 A.D.; it would seem to have been c. 33. A violent persecution took place; the apostles were untouched, but Hellenistic Christians, like Philip, or those of Cyrene and Cyrene, had to escape into Samaria or Syria. The influence of St. Stephen on St. Paul, who "consented to his death," and was doubtless present at the
stoning, has been often pointed out. He has been called "the teacher of Paul," but see art. Paul. Stanley in Smith, D.B. (4 vols. 1893); Grieve in Hastings, D.B. (5 vols. 1904); Reuss in Schaft-Herzog, Encyc.; Conybeare and Howson, St. Paul; Milman, Hist. Christianity; Neander, Planting of Christianity; Weizsäcker, Apost. 4th. 4ge; Plumptre, Bible Studies. Namely, some used the Traveller; Rackham, and other Comm., ad loc. [G.M.Y.]

Steward. In O.T. this represents "he who was over the house," Gen.43.10,44.4, etc. (in 15.2 probably heir, cf. R.V.); in N.T. ἐπιστρεφόμενος, Mt.20.5; Lu.8.3; οἰκομάχος, Lu.12.42,16.11; Gal.4.2. R.V. It denotes the manager of a household or estate, steward, bailiff, agent, usually a free man, Lu.8.16.1, sometimes a slave,12.42,43. Used spiritually of dispensers of God's truth, 1Co.4.1,2,9,17 (R.V.); Tit.1.7; 1Pe.4.10. [H.S.]

Stocks. This term is applied in A.V. to two different articles, one of which (Heb. mah-pekelhā) answers rather to our pillory, the other (Aeg. haghre) to what is improperly confined in it (Job 13.27,33.11; Ac.16.24). The prophet Jeremiah was confined in the first instance (Je.20.2), which appears to have been then a common mode of punishment (29,26), as the prisons contained a special chamber, called "the house of the pillory" (2Chr.16.10; see R.V. more). The term used in Ph.7.22 (A.V. stocks) is, more properly, translated "fetters" in R.V. [CRIMES.]

Stoics and Epicureans. We have no direct, or certain, reference to the Stoics or Epicureans in O.T. or in the Apoc. [PHILOSOPHY.] In N.T. we have only one direct reference to the adherents of these two philosophical schools, viz. Ac.17.17,18, where St. Paul, reasoning daily in the Agora with all chance comers, encountered also certain of the Epicurean and Stoic philosophers. In the speech which follows, delivered before the Areopagus, we seem to have, as we should expect, reference to and endorsement by them, which may not improperly be described as characteristically Stoical. The assertion, e.g.—that God, being the Maker of the orderly world and all things in it, and Lord of heaven and earth, dwells not in temples made with hands—though couched in terms not quite identical with those that they would have used, would still be accepted by the Stoics as representative of their teaching as against the materialism of the Epicureans, while the further assertion that God needs not the service of men, inasmuch as He is self-contained and self-sufficient, would be common ground to the two schools. That God has made of one, one body for every nation to dwell on, and that He has determined beforehand their seasons and the boundaries of their habitation, might be regarded as an integral and even distinctive part of the Stoical creed. Lastly, to confirm the statements that in Him, i.e. in God, we live and move and are, the apostle can quote the saying taken from the great hymn of Cleanthes and repeated in the poem of the Stoical poet Aratus, that "we are also his offspring" (17.22-29). The general impression, then, to be gathered from the speech as thus summarized by St. Luke is that St. Paul showed himself sufficiently well acquainted with the main tenets of Stoicism to be able to select and give his approbation to such as he considered suitable to his purpose in addressing an Athenian audience. For other evidences that he had such an acquaintance, see PHILOSOPHY. So many ideas, phrases, and turns of expression of St. Paul can be paralleled from the writings of Seneca in particular, that there was a widely spread, though unfounded, belief in early times that Seneca was actually a Christian and had derived part of his doctrines from St. Paul's epistles or from his personal teaching. That this was actually the case seems unlikely, though Lightfoot is so much impressed by the resemblances as to consider it at least possible that a certain amount of acquaintance with the main moral doctrines of Christianity may have filtered through to Seneca. Though the contact between Christianity and Stoicism is at some few points real, and even important, it is easy to observe that the Stoics in many points of view their relation is rather one of contrast than of similarity. Bishop Lightfoot has singled out four such points in particular: (i) Stoicism as a philosophic creed, though not always in its more popular aspects and forms of expression, is essentially a materialistic and ascetic, while the main doctrine of Christianity is the Personality and the Fatherhood of God. (ii) The Stoical moral code is harsh, ascetic, unsympathetic, inclined to overbear and crush out every human and kindly emotion; the glow of enthusiasm and self-approbation which virtue can excite no less than the pity which leads us to relieve, and the sympathy which enables us voluntarily to share, or take upon ourselves, the burdens of others. (iii) Stoicism, though it does not altogether deny, makes light of, or is sceptical about, the hope of a personal immortality. For a Christian, the resurrection of the dead enlarges this hope, and adds to it a certainty and a truthfulness that, which, outside of Christianity, it has never attained. (iv) Stoicism entirely lacks any central object of faith, love, worship, and inspiration, such as has been found among all Christians, however much sundered in other respects, in the Person of Christ Himself. Epicureanism has far less affinity with the teaching either of O. or N.T. than has Stoicism. Its doctrines, where mentioned or alluded to, are always reproduced. Though the doctrines of Epicureanism, as inculcated by its best teachers, are not as positively harmful as on first hearing they sound, they have nothing to certain tenets which definitely appeals to the higher side of man's nature about them; accordingly, whether from the point of view of O. or N.T., they equally stand condemned. Rackham, Acts of the Apostles, pp. 312, 317; Lightfoot, Philippians, dissert. ii. "St. Paul and Seneca"; Aston, Stoicism and Christianity and Cent. [W.A.S.]

Stomacher. [Dress.]

Stones. The uses to which stones were applied in ancient Palestine were very various. (1) They were used for the ordinary purposes of building. [HOUSE; PALACE.] Altars (Ex. 20.25; Deut. 27.5; Jos. 8.31) were not of
stoning and ft. Witness.]
[r.l. in Is. as to but or and iK.5.18). Pr. 43x274 presented to The hindrance mentioned and gems grave stones denoted strength in 21); stones connected 29; these stones (Jos. 3); large stones were used for closing the entrances of caves (Jos.10.18; Dan.6.17), sepulchres (Mt. 27.66; Jn.11.38,20.1), and wells (Gen.29.2). (3) Flint-stones occasionally served as knives, particularly for circumcision and similar purposes (Ex.4.25; Jos.5.2,3, see marg.). (4) Stones were used for slings (1Sam.17.40,49), catapults (2Chr.26.14), and bows (Wisd.5.22; cf. 1Mac.6.51); as boundary marks (Deut. 19.14,27.17; Job 24.2-4; Pr.22.28,23.10); as weights for scales (Deut.25.13, see marg.; Pr. 16.11, marg.) and for mills (2Sam.11.21). (5) Large stones were set up to commemorate any remarkable events (Gen.28.18,31.43,35.14; Jos.4.9; 1Sam.7.12). Such stones were occasionally consecrated by anointing (Gen.28.18). A similar practice existed in other countries, and these stones were described in Phoenicia by a name very similar to Bethel, viz. batylita. The chief point of resemblance between the two consists in the custom of anointing. [Pillars; Witness.] (6) The worship of stones prevailed among the heathen nations surrounding Palestine, and was borrowed from them by apostate Israelites (Is.57.6). Heaps of stones were sometimes piled up in token of a treaty (Gen.31.46); or over the grave of some notorious offender (Jos.7.26,8.29; 2Sam.18.17). (8) The *white stone* of Rev.2.17 has been variously regarded as referring to the pebble of acquittal used in the Greek courts; to the lot cast in elections in Greece; to both these combined; to the stones in the high-priest's breast-plate; to the tickets presented to the victors at the public games; or gems inscribed with holy names. (9) The use of stones for tablets is attested to in Ex.24.12 and Jos.8.32. (10) Stones for striking fire are mentioned in 2K.18.10. Stony stones were hinderance to the operations of husbandry: hence the custom of spoiling an enemy's field by throwing quantities of stones upon it (2K.3.19,23), and the necessity of gathering stones previous to cultivation (Eec.3.5; Is.5.2). (12) The *burdensome stone* *(Zech.12.3)* is connected by Jerome with the custom of lifting stones as an exercise of strength (cf. Ecles.6.21); but may mean a *crushing weight* (as in LXX), or a corner-stone as a symbol of strength (Is.28.16). Metaphorically, stones denote hardness or insensibility (1Sam.25.37; Ezek.11.19,38.26), and firmness or strength (Gen.49.24). The members of the Church are called "living stones," as contributing to rear that living temple in which Christ, Himself a "living stone," is the chief or head of the corner (Eph.2.20-22; 1Pe.2.4-5).

**Stoning.** [Crimes.]

**Stork.** [Stacte.]

Stork (Heb. hāsisdāh). It is singular that a bird so conspicuous and familiar as this is in Egypt and Palestine should have escaped notice by the LXX, but there is no doubt of the correctness of the rendering of A.V. The white stork (Ciconia alba) stands nearly 4 ft. high, and the jet black of its wings and the bright red beak and legs present a bold contrast with the white of the plumage generally (Zech.5.9). In the neighbourhood of cities storks devour all kinds of offal and garbage; and it is doubtless for this reason that they are placed in the list of unclean birds by the Mosaic law (Lev.11.19; Deut.14.18). The white stork ranges over the greater part of Europe, N. Africa, and temperate Asia, visiting S. Africa, India, and Burma in winter. The black stork (Ciconia nigra), though less abundant in some countries, is scarcely less widely distributed. Both are numerous in Palestine. While the black stork frequents marshy places in forests and brooks on tall trees or in ravines, the white stork attaches itself to man, and for the service it renders in the destruction of reptiles and the removal of offal has been repaid from the earliest times by protection and reverence. The derivation of hāsisdāh (from hesedh, "kindness") points to the paternal love of which the stork seems to have been a type among the Hebrews no less than among the Greeks and Romans. These birds return year after year to the same spot; and few migratory species are more punctual in their appearance. The ordinary date of the arrival of the stork in Holland is the second week in April, and it remains until October; in Palestine it has been observed to arrive on March 22. Some difficulty has been raised respecting the expression in Ps.104.17, "As for the stork, the fir-trees are her house"; but these birds still occasionally nest in trees, and in prehistoric times doubtless did so invariably, while in the old Jewish days they may have retained to some extent the original habit. [R.L.]

**Stranger.** The word rendered "stranger" in A.V. and frequently in R.V. is employed to translate four Heb. nouns which are distinct...
in meaning—i.e. zūr (Arab. zā'īr), a visitor; nāḥki̇r, a foreigner; toṣābh, a dweller; and gēr (Arab. jūr), a "sojourner with another tribe that protects him as a guest (Genesius). It is, moreover, rarely used in the Bible in the modern sense, "strangers." I.e. denoting what is unknown or unexpected, but with the meaning attached to the kindred Fr. and Lat. words, extraigne and extraneus, namely, "foreign" or "alien." To a Hebrew a stranger meant a "foreigner," and a "strange god was the equivalent of a "foreign god." The words "foreign, foreigner," are, however, extremely rare in the Bible, and unfortunately have not been generally adopted in R.V. In the present article only one aspect of the word will be treated—namely, that of the gēr or "foreigner," who incorporated himself with Israel by residence. The LXX renders this word by ἀλλός (allos) but he was not competed-braced Judaism as a religion from conviction without becoming dependents of an Israelite family, see PROSELYTE, whilst the subject of Israel's relations with other peoples is dealt with in the article FOREIGNER. In the ancient world the position of a stranger among an alien race was by a painful one. He had no natural rights, family, civil, or even religious; for a man was expected to worship the gods of the country in which he found himself (rSam. 28.19). Even a great prince like Abra- h am, with his wealth and retinue, had to assume a position of humility before the people of the land, and the gēr was often a fugitive, or outcast. One of the most amiable features of the Israelitish law was the compassion with which the "stranger" was to be treated. God's people had been themselves strangers in Egypt, and, as they were reminded, they knew "the heart of a stranger" (Ex. 23.9). An ordinary Israelite household consisted of a man's wife or wives, children, servants, and "the stranger within the gates" (Ex. 20.10), besides which "the Levite, the stranger, and the fatherless and the widow which are within thy gates" are mentioned together in Deut. 16.14. The religious position of the "stranger" in an Israelite household is described in various passages. He had, in common with the slaves and cattle, to enjoy the benefit of the Sabbath rest from work (Ex. 20.10; Deut. 5.14). He was also to participate in the Feasts of Weeks (Deut. 16.10 ff.) and Tabernacles (Deut. 16.13), and in the offering of the first-fruits (Deut. 26.11). He was to abstain from labor during the paschal season (Ex. 12.19), but he was not compelled to take the final step in religious conformity by submitting to circumcision: should he wish to eat the Passover, he must be circumcised, but there is no compulsion even in the "latest" code of law (Ex. 12.48). The relations of the gēr to his patron differed in various cases. David, a chieftain at the head of one of the tribes, was a gēr to Achish, king of Gath (1Sam. 27). The family of Rahab became the guests of the nation of Israel (Jos. 6.25). In both cases, however, yāshābh, to dwell, not gēr, to sojourn, is used in the Heb. Israel was a gēr in Egypt. The employment of ἄλλος to translate gēr was modern, and due to the later translator. The word means not so much "a religious convert," as a non-Israelite dependent in a household, or a foreigner residing in Palestine. The classical equivalent is ἄλλος or ἄλλης; but the technical name of such a foreign resident is μέτοχος (found in the LXX. of Je. 20.3 only, see HASTINGS, D.B. vol. iv.). Perhaps this is all that is meant by ἄλλος in the LXX., for the Israelites are called μισθουσαὶ in Egypt (Ex. 22.21, 23.6; Lev. 19.34; Deut. 10.19). [LAW in O.T.; Poor.]

**Straw** (tebhen, Assyr. tīnu, Arab. tīn). Both wheat and barley straw, threshed fine, were used by the ancient Hebrews, chiefly as fodder for their cattle (Is. 11.7, 65.2, horses (1K. 4.28), asses (Judg. 19.10), and camels (Gen. 24.25). There is no indication that straw was used for litter. It was employed by the Egyptians (Ex. 5.7,16) and Babylonians in making bricks, being chopped up and mixed with the clay, and then pressed and packed tight. This mixture of straw is visible in one of our illustrations in Plate VI., taken from a brick in the Brit. Museum. The ancient Egyptians reap their corn close to the ear, and afterwards cut the straw close to the ground and laid it by. This was the straw which Pharaoh refused to give to the Israelites. [T.G.P.]

**Stream of Egypt** (Is. 27.12 only; R.V. brook). [RIVER OF EGYPT.]

**Street.** The streets of a modern Oriental city are generally narrow, tortuous, and gloomy, even in the best towns, the narrowness being a protection against the heat and the gloominess due to the circumstance of the windows looking for the most part into the inner court. Doubtless in ancient times the streets were much of the same character. The street called "Straight," in Damascus (Ac. 9.11), was an exception: it was a noble thoroughfare, 100 ft. wide, divided in the Roman age by colonnades. The three avenues, the central one for foot passengers, the side passages for vehicles and horsemen going in different directions. The shops and warehouses were probably collected together into bazars in ancient as in modern times (Je. 37.21), like the wool, bazaar, and linen bazaar (Josephus, 5 Wars vii. 1), and perhaps the agreement between Benhadad and Ahab that the latter should "make streets in Damascus" (1K. 20.34) referred to bazars, and thus amounted to the establishment of a jūs com- mercii; for another suggestion as to the meaning of the phrase, see Ahab. That streets occasionally had names appears from Je. 37.21, Ac. 8.11. That they were generally unpaved may be inferred from the notices of the pavement laid by Herod the Great at Antioch, and by Herod Agrippa II. at Jerusalem. Hence pavement forms one of the peculiar features of the ideal Jerusalem (Tob. 13.17; Rev. 21.21).

**Stripes.** [Crimes.]

**Su'ah, son of Zophah, an Asherite (1Chr. 7.36).**

**Su'ba, a family of the sons of Solomon's servants who returned with Zerubbabel (1Esdr. 5.34 only).**

**Suba'i (1Esdr. 5.30) = Shalmal.**

**Succoth** (booksh, Gen. 33.17), where Jacob made booths for cattle. It was in the Jordan Valley, in the lot of Gad (Jos. 13.27), on
SUCCOTH

the road to Jorgebiah (Judg. 8.5, 15, 16), and near the clay lands extending to Zarthan (1K. 7.46). The "valley of Succoth" is mentioned in the Psalms (60.6). See 2 Chr. 4.17, where it is placed in the kikkar of Jordan. In the Talmud (Tal. Jer. Haggiga i.1) the latter name is said to be Tar'ula (Neubauer, Géog. du Tal. p. 248), evidently the present Tell Dar'ula, in the Jordan Valley, just N. of the Jar'boke. If he be accepted, Jacob retired N. over the latter stream on the approach of Esau (Gen. 32.22, 23). [MAHANAIM]. In 1 K. 20.16, the LXX. reads "in Succoth," as the place where Benhadad I. was caught "drinking himself drunk. The easiest route for advance to Samaria would be up the valley of Azenon, W. of Succoth. In ver. 12 the LXX. reads "tests." [C.R.C.]

Succoth. Here the Israelites first halted after leaving Rameses, during the early stage of the Exodus (Ex. 12.37, 13.20). Thence they went on to encamp "in Etham, in the edge of the wilderness." The name signifies tents or booths. It corresponds with Thukut, the name of a district of which P'thôm (Pi-Tum or Pa-Tum) was the capital. Naville, indeed, identifies Succoth with Pithom. The locality of Succoth lies by the line of railway running from Zagazig to Suez, by the Tell el-Mashit. The same.

Succoth'-benoth' occurs only in 2 K. 17.30, apparently as the name of a deity made by the Babylonians transported to Samaria. Regarded as Heb., it means "booths of girls," and has been explained as the booths in which Babylonian women prostituted themselves in honor of the sun-god, or as small tabernacles containing images of goddesses. Sir H. Rawlinson compared Succoth-benoth with Zîr-banît, Merodach's spouse, who was specially worshipped at Babylon, but one of the other explanations is preferable.

Suchathites, one of the families of scribes (Jer. 8.7; 19.5).

Sud, a river close to Babylon, on the banks of which Jewish exiles lived (Isa. 1.4). It is otherwise unknown, but the original text may have had Sur, as the Syriac (with sade). Possibly, however, the name was written with samech, in which case the river or canal nār Surû in the neighbourhood of Babylon may be intended. Its position is doubtful. [T.C.P.]

Sud (rEd. 5.29) = Sta.

Su'dias. [BANUAS.]

Sukklims, a nation mentioned (2 Chr. 12.3) with the Lubim and Cushim as supplying part of the army which came with Shishak out of Egypt when he invaded Judah. The LXX. makes them "Troglodytes" from the Sudan. [A.I.L.S.]

Sun. In the history of the Creation the sun is described as the "greater light," serving (in conjunction with the moon, or "lesser light") "for signs, and for seasons, and for days, and years," while its special office was "to rule the day" (Gen. 1.14-16). [Litgrr.] The "signs" were perhaps such phenomena as eclipses, which were regarded by the ancient world as premonitory of future events (Jer. 10.2; Lu. 21.25); but as the use of this sort of omen is generally discouraged in the Bible, the "signs" should not be understood as geographical, and for the guidance of travellers. The "seasons" and "days" referred to were of course the fixed times important for agricultural operations and religious festivals: while the "years" included both the solar and lunar years, which were used in combination by the Hebrews. The sun "ruled the day" not only by his light and heat, but as deciding its length. Sunrise and sunset are the only natural fixed points of time, in the absence of artificial contrivances. Between these two points the Hebrews recognized three periods—viz. when the sun became hot (tSam. 11.9; Ne. 7.3), the zenith light or noon (Gen. 43.16; 2 Sam. 4.5), and the cool of the day," shortly before sunset (Gen. 13.8). The four points of the compass are also roughly indicated by the sun, rising and setting (Isa.45.6; Ps. 50.1), the dark (N.) quarter (Gen. 13.14; Jl. 2.20) and the bright (S.) quarter (Deut. 33.23;Job 37.17; Ezk. 40.24); or by their position relative to a person facing the rising sun: E., before, W., behind, N. left and S. right, the sun "standing still" of the sun and moon in Jos. 10.13 is a poetical way of describing a miraculous prolongation of the day [Joshua, Book of]. The worship of the sun, as the most prominent and powerful agent in the kingdom of nature, was widely diffused through the peoples of the ancient world. The Chaldeans appear to have paid direct worship to it without any statue or symbol (Job 31.26, 27), and this simple style of worship was probably familiar to the ancestors of the Hebrews in Chaldea and Mesopotamia. The Hebrews in Egypt must have been well acquainted with sun-worship, and when they came to the sun-god, the principal Egyptian divinity (cf. Os = the Heb. Beth-shemesh or "house of the sun," Je. 43.13, and Potipherah = "he who belongs to Ra," Gen. 41.45). After the entrance into Canaan the Hebrews came into contact with various forms of idolatory originating in the lands of the Ammonites, the Syrian Hadad, and probably both the Canaanite and the Tyrian Baal (sometimes represented with a crown of rays). That it was a constant peril may be seen in such allusions as the "sun-images" (hâmmânîm, Lev. 26.30; Is. 17.8, etc.), and the "horses of the sun," perhaps those seen by Isaiah (Is. 30.27); and that it was regarded by the prophets as one of the worst of heathen corruptions is seen in Ezk. 8.16, where it forms the climax of the visionary "abominations." In the metaphorical language of Scripture the sun is emblematic of the law of God (Ps. 19.4-7), of the shining presence of God (Ps. 84.3-4), of the promised Messiah (Mat. 4.2), of the divinity of Christ manifested in His transfiguration (Mt. 17.2), and of His work in the world generally (Jn. 1.9); also of the glory and purity of the Church (Rev. 12.1) and of the angels (10.1). The darkening of the sun which accompanied the Crucifixion is also foretold as a sign of the Second Advent (Mt. 24.25; Rev. 6.12). Sayce, Hibbert Lectures (1887). [A.R.W.]

Sunstroke. [MEDICINE.]

Sur (Jth. 2.28). Perhaps for Philae-Tyrs. [OCINA; TYRE.]

Sun: Gate of (gate of the wall of or of going forth). 2K. 11.6. It was probably one of the gates of the temple, the gate "west of the guard"
being opposite, and the third station being on S., near the Horse Gate and palace. There seems to have been no need to guard on N. side against Athalatha's flight. [c.r.c.]

Suretiship, the contract by which one renders himself liable for the debt or default of another or party, written into by Hand-clasp (Pr.17.18, etc.). Apparently it rendered the surety liable to execution on his goods in default of payment (20.16,22,27), and, according to one rendering of 20.16, to personal execution (cf. Job 24.6). [POOR.] [H.M.W.]

In N.T. Heb.7.22, "Jesus hath become the surety for the faithful." The word occurs only here in N.T. Cf. Ph.18.13.

Su'an (Est. Apoc.11.3,16.18). [SHUSHAN.]

Susanchites, better Shushan-chites, were inhabitants of Susa or Shushan (Dan.8.2), the ancient capital of Elam. [ASNAPPER; ELAM.] [T.G.P.]

Susanni—. [Daniel, Apoc. Additions to 2—.2,17; 4—.29.] The women who ministered to our Lord (Lu.8.3).

Susi, father of Gaddi (Num.13.11).

Swaddling-clothes (Lu.2.7,12). The Eng. "swaddle" or "swathe" comes from the A.S. "swethel" or "swithan"—the former being a band or strip of cloth used for wrapping a child for warmth; the latter into by Hand-clasp (Pr.17.18, etc.). The Jews at the present day, the newly born child is at once enwrapped in a square cloth, which is bound round it with bandages, varying in material according to the circumstances of the parents. This simple method of dressing the child is probably a relic from the time of the wanderings, and is retained for about twelve months. For the first two months of the baby's life, salt water is applied to the parts of the body liable to inflammation, and olive-oil is rubbed upon any chafed parts of the skin (see Ezk.16.4). The infant is frequently tied down in his cradle by other bands; a bold use of this figure of confinement or repression is found in the Arabic proverb, "Abish sa'id, sa'id uth na'his sa'id," which translates a different Heb. word by "swaddle"; but R.V. rightly corrects to "dandle." [S.N.S.]

Swallow (Heb. dv'er and 'aghwr). The first word, which occurs in Ps.84.3 and Pr.26.2, and means "the bird of freedom," is correctly translated swallow in A.V., although it probably includes other swift-flying birds, such as martins, sand-martins, and even bee-eaters. In regard to 'aghwr, the translators of A.V. have been singularly unfortunate, for while they have given this word (e.g. Is.38.14) as "swallow," they have rendered the associated sîs as "crane." [CRANE.] As a matter of fact, the two translations should be transposed, while even then one of them would not be quite correct, as sîs is the equivalent of the Arab. sîsh, which denotes the swift, and refers to the rushing "swish" of its flight. Confirmation of this is afforded by the fact that while the swallow is only a partial migrant in Palestine, all the typical swifts depart for Africa in the winter. Besides the common swift (Gypsus apus), the larger alpine swift (C. melba) is common during the summer in Palestine, where there is also the Gallean swift (C. affinis), a more martin-like species, resident in the Jordan valley throughout the year. [R.L.]

Swan (Heb. tînshêmeth). This translation, which occurs in Lev.11.18 and Deut.14.16 in the list of unclean birds, is almost certainly wrong; while the emendations "pelican" and "owl" are equally unsatisfactory, as other words indicate these birds. The LXX renders "porphyrio" and "ibis" are much more probable, neither of these birds occurring elsewhere in the catalogue, while both would be familiar to residents in Egypt, and the original seems to point to some water-fowl. Πορφυρίων, the purple water-fowl (Porphyrio caeruleus), a brilliantly coloured and larger relation of our own moorhen, is a bird common in the marshes and reed-beds of all the Mediterranean countries, and is probably the species mentioned. [R.L.]

Swearing. [OATH.]

Sweat, Bloody. This feature of our Lord's Passion has probably been more discussed than any other. The phrase used by St. Luke (22.44, 45) and St. Mark (Mt.26.37, 38; see note in R.V. marg.) is remarkable: "His sweat was as it were great drops [lit. cloths or gouts] of blood falling to the ground." It has been suggested that "as it were" simply means "like," i.e. that the sweat-drops poured from our Lord's brow as blood from a wound; but in this explanation appears to be extremely far-fetched. Moreover, a bloody sweat is by no means unknown in medicine, and if we accept the most probable view of the physical cause of our Lord's death, viz., that He died from actual rupture of the heart, the violent action of that organ a few hours earlier causing the actual exudation of blood upon his forehead by no means improbable.

Swine (Heb. hâzîr). (1) The flesh of swine was forbidden as food by the Levitical law (Lev.11.7; Deut.14.8); and the abhorrence in which it was held by the Jews may be inferred from Is.65.4 and 2Nae.6.18,19. Swine's flesh was forbidden to the Egyptian priests and also the Pharaoh (Ex.9.3, 13; Deut.14.21). The command to abstain from swine's flesh is given in the law of Moses beyond the general one forbidding any mammals as food which do not come under the definition of a "clean animal," viz. a cloven-footed ruminant. It is, however, probable thatdietetical considerations may have been connected with the prohibition of swine's flesh, as it is generally believed that its use in hot countries is liable to induce cutaneous disorders, so that in a people subject to leprosy the necessity for the observance of a strict rule in this respect is obvious. Although during the greater part of their existence as a nation the Jews did not breed swine, the prohibition of them, like the prohibition of the heathen nations of Palestine used the flesh as food; and at the time of our Lord's ministry it would appear that the Jews occasionally violated the law with respect to swine's flesh. Whether the herd of swine in which the devils were allowed to enter (Mt.8.28) was the property of the Jewish or Gentile inhabitants of Gadara is not apparent; but that the practice of keeping swine existed among the Jews seems clear from the enactment of the law of Hycan-Canus "ne cui porcum alere licet." (2) "The wild boar of the wood" (Ps.80.13) is Sus
The scrofa jesus, which is still common in the wooded parts of Palestine, especially near Mount Tabor.

**Sword.** [Arms, Offensive, (41)]

**Sycamine-tree** (Lu.17.6 only). The sycamine is distinct from the sycamore of the same evangelist (19.4). The former, as expressly stated by Dioscorides, is the mulberry-tree (*Morus*), and so rendered by Coverdale. Both black and white mulberry-trees are common in Syria and Palestine. The confusion between the sycamore-fig and the mulberry from the almost identical Gk. names, was not a serious botanical error, since they are closely allied. [SYCAMORE.] [H.C.H.]

**Sycamore** (Heb. *shiqam*; Gk. *σκάμμος*, Lu.17.6, *σικουράδα*, 19.4). The Heb. word occurs in O.T. only in the phr. form masc. and once fem., Ps.78.47. Although the sycamine is properly, and in Lu.17.6, the mulberry, and the sycamore is the fig-mulberry, or sycamore-mulberry (*Ficus sycomorus*), yet the latter is the tree generally referred to in O.T., as in 1K.10.27, 1Chr. 27.28, Ps.78.47, Am.7.14, though always translated by *σκάμμος* in LXX. The sycamore, or fig-mulberry, abounds in Egypt and Palestine. It attains the size of a walnut-tree, has widespread branches, and affords a delightful shade. For this reason it is frequently planted by the waysides. Its leaves are heart-shaped, downy on the under side, and fragrant. The fruit grows directly from the trunk itself on little sprigs, and in clusters like the grape. To make it edible, each fruit, three or four days before harvest, must be pruned off with a sharp instrument or the finger-nail in order to liberate certain grubs or insects which infest it. This was the original employment of the prophet Amos (7.14). So greatly were these trees valued, that David appointed a special overseer for them, as for the olives (1Chr.27.28); and it is mentioned as one of the heaviest of Egypt's calamities that her sycamores were destroyed by hailstones (Ps.78.47). [GIMZO.]

**Sycchar** (*Σιχαρ*). "A city of Samaria" (Jn. 4.5) "near to the parcel of ground that Jacob gave to his son Joseph. Now Jacob's well was there." In 4th cent. A.D. it was known as lying a mile from Shechem (Bordeaux Pilgrim, 334 A.D.). The Gospels (Onomasticon) calls it Sycar; Jerome renders it Sichar, and says that "a church is now built" over the well. In the Middle Ages, however, it was confounded with Shechem, probably because the disciples are said to have "gone away into the city (πόλις) to buy food" (ver. 8). The true site is probably the village 'Askar, on the slope of the hill near the N. of Jacob's well (Surz. 1912, Pal. ii. p. 168). It has a spring below it on W., and ancient rock tombs. The word 'Askar means an "army," and the initial gutturals has been thought an objection. But in the Samaritan Chronicle (as given by Neubauer, Journal asiatique, Dec. 1869, pp. 399, 434) the town is called 'Ishkar (*אשקר*). In Samaritan this is rendered 'Askar in the Arab. translation. The name Ischar or Sichar would mean "shut up" or "fortified," whence perhaps 'Askar, "army." It lay just inside the border of Samaria. Possibly "Judas the Iscariot" was among the converts on the occasion of our Lord's visit (ver. 41). It is true that his title is spelt

**SYNAGOGUE**

Iσκαρχία, which answers to Heb. יִשְׁכָּר, but the Samaritans and Galileans were notorious for confusing the gutturals, etc. (Tal. Bab. Megilla, 24b), as they still are. [C.R.C.]

**Sychem** (Ac.7.16). [Shechem.]

**Sy'chemite, The** (Jth.5.16), aboriginal inhabitants of Shechem dispossessed at the conquest.

**Sye'lus** (1ESd.i.18) = Jehiel, 3.

**Syene** (συήνη, Συφόρη, the present Aswan), a city on the southern frontier of Egypt, below the most northern of the cataracts. It has been once called the nome of Nubia; its geographical name, Sun, is found only in late inscriptions; in the older ones the capital of the nome is Elephantine, the city built on the island in front of Syene. Elephantine gained importance from the temple of the god Khnum. Syene is mentioned twice by Ezekiel (29.10, 30.6) in connexion with Migdol; they are the two frontier-towns, one in the N., the other in the S. Quite late it has been discovered that there was an important settlement of Jews at Syene; they had even built a temple at Elephantine. As we know from Je.44.1 that Migdol also was inhabited by Jews, the threats of Ezekiel are addressed to his own countrymen, as well as to the Egyptians. [E.N.]

**Synagogue. I. Name and Origin.** The term συναγωγή occurs in the LXX. as the designation of the Congregation and also of the Assembly. [CONGREGATION.] It is used in N.T. of recognized Jewish places of worship, except Jas.5.2, the Jewish-Christian synagogue, and Rev.2.5,3,9, "the synagogue." It appears from 2K.4.23 that it was usual to resort to the prophet's house on sabbath and new moon. During the Exile the people would probably meet together for reading the Scriptures, prayer and instruction being added. Such assemblies would be necessary to the maintenance of the religious life at the cost of 5. 5. After the Return these assemblies became general, and in the later period the building erected for the purpose was called a βῆθη ἡκκανεσθή, or synagogue. It was also customary to resort to prayer to places outside the town, near running water (Ac.16.13). These were called ποισευάρια, the term being afterwards applied to the house of prayer put up on the spot (Josephus, 11 Ant. x. 23; Life, liv.). In N.T. times the synagogue as an institution was fully established, and evidently of long standing. There were synagogues wherever Jews resided, both in Palestine and other lands—e.g. Nazareth (Lu.4.16), Caper- naum (Lu.4.30), and the countrymen of Jacob's well (Surz, 1912, Pal. ii. p. 168). There were 480 in Jerusalem (Jer. Meg. iii. 1). The apostles frequented the synagogues in Damascus (Ac.9.20), Antioch (13.14), Iconium (19.1), Thessalonica (17.1), Berea (ver. 10), Athens (ver. 17), Corinth (18.14), Ephesus (ver. 19), etc.; see also 6.0.—II. Structure, etc. Ezekiel refers to the synagogues of the community, sometimes by wealthy members, or even by a Gentile (Lu.7.5). The principle that the synagogue should occupy the highest situation in the town so as not to be over-topped by other buildings was not generally observed in our Lord's time. In any case it did not apply to those in
SYNAGOGUE

Galilee. Some think that the synagogues discovered there date from the middle of the 2nd cent. (Mem. Surv. W. Pal. i. 206-208; Syrian Stone Lore, 3rd ed. pp. 262-264; cf. P. E. F. Qlly. Stat., July, 1878, 123-129). It was used to be generally understood that the entrance was on the E., in imitation of the temple (but see Surv. Stone Lore, 3rd ed. p. 264 note), but in ten of eleven dovecotes. On one who was able the exception was owing to the nature of the site. There seems to have been usually four colonnades, running N. and S., the two side aisles probably being passages. The women's gallery was at the N. end. If the general direction to turn towards Jerusalem in prayer was observed in our Lord's time, we must assume that the worshippers, on entering the door, made a detour to the middle of the E. side before turning into the nave. Many of the Rabbinical references to synagogue construction probably apply only to later times and foreign lands. The stone of the country was used—e.g. the black basalt of Chorazin—and the floor was of lime. On the other side of the doors were carved representations of the Paschal lamb, vine-leaves and grapes, the seven-branched candlestick, or a pot of manna with Aaron's Rod. [PALESTINE].—III. Furniture. (1) A movable wooden chest, called the Holy Ark, containing the scrolls of the law and the book of Job was in the nave. The Ark of the synagogue, was usually raised a little above the floor, and approached by one or more steps. In front of it was the perpetual lamp, (Ex.27.20), the symbol of God's Presence in Israel. There was also a Candlestick, sometimes two, for use on sabbath and festivals. (2) The rostrum (bima) with, in some cases later times, a desk on which to place the scroll during the reading. The desk was covered with a cloth, sometimes of great value and beauty (Meg. 26b). The bima, called "the seat of Moses" (Mt.23.2; Pesik. 76b, ed. Buber) stood in the centre of a large synagogue (Succa 51b). (3) The two wings of the bima was called the congregation, those for the elders and other honourable men being in front of the ark and facing the people (Tos. Meg. iii.; Mt.23.6; Lu.11.43)—IV. The Officers. (1) The elders constituted the local Sanhedrin, and were called shepherds (parnasim, poubeus) (Jer. Pei. viii. 6; cf. Ac.20:28; Eph.4:11), or rulers (mashriqot). [ELDER]. The chief of the elders, probably primus inter pares, was the qochnasawgor (Mt.9.18, etc.). These rulers were all examined as to their knowledge by delegates from the Great Sanhedrin, but they were elected by the congregation. Upon the ruler-dovler devolved the care of the synagogue, and the ordering of the services, especially of the choice of qualified persons to take part in them. (2) The shelishith gibbar, or delegate of the congregation, who must be fitted by learning and possession of the highest moral qualities for the sacred task of reading the prayers or benedictions (Ta'an. ii. 2; Yad. Tefilla vii. 11, 12). (3) The mishurei-medrash, or interpreter. Any one who was able to render the Heb. into the vernacular Aramaic was invited to ascend the bima and act as interpreter. One verse from the law, or three from the prophets, were read at a time and then paraphrased. (4) The hazzan, the minister, servant, or beadle. His special duties were to take the scroll of the law from the ark, hand it to the reader, and finally replace it in the ark (Setah vii. 7, 8; Lu.4.20). He also saw that the synagogue doors were open, attended to the lamps (Jer. Maas. Sh. v2), and taught the children to read (Shab. i. 3, comments). (5) Three almoners (cf. Ph. 1.1; Thim.3.8,12,4.6). Hatch (Organ, of Chr. Ch.) traces the office of bishop to that of the gabbay or almoners. (6) The ba'llanim, or ten men of leisure. These were probably men of independent position who attended the synagogue regularly, and formed the core of the community. They issued marriage contracts, which could not be performed (Meg. i. 3, iv. 3; Jer. Meg. i. 6; Sanh. 17b).—V. Hours of Prayer. Prayer, public or private, was offered three times a day (Ps.55.17): (1) at the third hour, or nine o'clock, the time of the morning sacrifice; (2) about the ninth hour, 3-3.30, or even at 12.30, since that was the sacrifice on the Passover eve when it fell on Friday; (3) during the time of burning the fat, etc., on the altar, i.e. from sunset till all was consumed (Ber. iv. 1 and Gemara; Josephus, 14 Ant. iv. 3; cf. Ac.3.1-10.30). Public prayer was obligatory on feasts and fasts, the sabbath, and on Mondays and Thursdays. For the latter being market days, when the local Sanhedrin held their sessions in the synagogue (Raba Kama 82a). These two days were optional fast-days (cf. Lu.18.12).—VI. Powers. The higher officials of the synagogues had the power to administer justice in religious and civil matters in their own community. They issued marriage contracts, letters of divorce, and similar legal instruments. They also dealt with religious offenders (cf. Mt.18.15-17; Mk.13.9; Jn.9.22,12.42; Ac.22.19,26.11.)—VII. Worship. There is no question that a fixed order of service was followed in the synagogue in our Lord's time. The order of benedictions and psalms then used still constitute the central portion of the synagogue service. (1) The recital of the Shema, a kind of creed consisting of Deut.6.4-9,11.13-21, Num.15.37-41, was preceded by two benedictions and followed by a third. It derived its name from the opening word, sh'ma'. "Hear, and it will be referred to by our Lord in His reply to the lawyer (Lu.10.26). The introductory benedictions were 1, "Blessed be Thou, O Lord, King of the world, Who foresees light and creates darkness. . . Blessèd be the Lord our God, Who has formed the luminaries. 2. "With great love hast Thou loved us. . . Blessed be the Lord, Who in love wast merciful. 3. "Who in love was merciful, and who did follow the Shema and the Ten Commandments (Tamid v. 1; Berach. 14b) and the third benediction: "True it is that Thou art Jehovah, our God, and the God of our fathers; there is no God besides Thee. Blessed be the Lord, Who saveth Israel" (Berach. 1.4 and Gemara; Tamid 14b). (2) This was followed by the eighteen (now nineteen) benedictions, distinguished as The Prayer. Of these the first and last three are the most ancient: 1. "Blessed be the Lord our God,
and the God of our fathers. . . . Who bring-
eath a redeemer to their children's children, for
His Name's sake, in love. Blessed art Thou, O Jehovah, the Shield of Abraham." 2. "Thou, O Lord, art mighty for ever; Thou, Who quickenest the dead, art mighty to save. . . . Blessed art Thou, Jehovah, the quickener of the dead." 3. "Thou art holy, and Thy Name is holy. Selah. Blessed art Thou, Jehovah, God, the Holy One." The last three: 16. "Accept, O Jehovah, our God, Thy people Israel and their prayer. . . . Blessed be Thou, O Jehovah, Who restoreth His Shekinah to Zion. 17. This is a thanksgiving, to be said inclining: ° We give thanks to Thee, for Thou art He, Jehovah, our God. . . . Blessed art Thou, Jehovah, Whose Name is All-good, and unto Whom it is becoming to give thanks." If there were priests present they pronounced the blessing (Num.6:23-26), with "lifting up of hands" (1 Kings2:28), the people saying Amen after each of the three series into which it is divided. 18. "O bestow on Thy people Israel great peace for ever. For Thou art King, and Lord of all peace. And it is good in Thine eyes to bless Thy people Israel at all times and in every hour with Thy peace. Blessed art Thou, Adonai, Who blesseth His people Israel with peace." There is a longer form of this benediction, used only in the morning service. The blessing was regarded as coming from God, through the priest, even if the priest were personally unworthy (cf. Jer. G.11, v. 9). There now followed the read-
ing of the law and the prophets, and the sermon (I.4.6-65.). A visitor or a well-known preacher was usually asked to deliver the sermon. (For other details, see Kito, Encycl. Bibl. Lit. s.v.; Edersheim, Life, etc., i. 436-

SYNAGOGUE, The Great. The Synod known as the Great Synagogue came into ex-
istence during the earlier period of the second temple. Its members numbered 120 (Meg.
179), or, according to another account 85 (Jer. M.179). The word "Synod" was not used in
the Mishna. Simon the Just, who died 292 B.C., was one of the last members. Its origin is
traced to the great assembly described in Ezz.8-10, but as Haggai and Zechariah are
said to have received the oral law from the line of prophets and passed it on to the Men of
the Great Synagogue, it must have been in existence at an earlier period. These prophets
flourished at the time of the building of Zerub-
babel's temple in 520 B.C., and the assembly
under Ezra was nearly one hundred years later. Some (e.g. Krauss) maintain that the
Synod was established about 520 B.C., and then
consisted of 120 members, this number being
afterwards reduced to 85. The work of the Men was to define, teach, and develop the
law. (1) They settled the Canon. (2) In-
troduced the Feast of Purim. (3) Laid the
foundation of the Liturgy, and compiled, among other books, the "Book of the Mute" (Breish. 3:16), the most important of the syna-
gogue prayers. The Great Synod probably

SYRIA

became merged in the Assembly of Elders.

x. 347 ff.; Bacher, Jew. Encycl. xi. 640 ff.;
Kuenen, "Ueber die Manner der Gros. Syn.," in
Gesam. Abhand. 125-160; Low, in "Die Grosse
Synode," in Gesam. Schriften, i. 399 ff. [III.]

SYNOPSIS, A female member of the church of
Philippi (Ph.4.2), whom St. Paul besought to
live in harmony with Eunodias; perhaps these
two are the "women" of ver. 3, who had
"laboured with." St. Paul, and the help which
he besought his "true yoke-fellow" (se
Lightfoot, Philippians, ad loc., for the possible
meanings of this phrase) to render would then be
the reconciling of the twain.

SYRACUSE, the celebrated city on the E.
coast of Sicily. St. Paul arrived there in
an Alexandrian ship from Melita, on his
voyage to Rome (Ac.28.12). The magnificence
which Cicero describes as still remaining in
the time of his visit to Syracuse is probably
true. But the site of Syracuse rendered it a con-
venient place of call for the African corn-ships,
the harbour being an excellent one, and the
fountain Arethusa in the island furnishing an
unfailling supply of excellent water. At the
time of St. Paul's voyage, Sicily did not supply
the Romans with corn; the extent it had done
in the time of King Hiero and, in a less degree,
as late as the time of Cicero. It is an error,
however, to suppose that the soil was ex-
hausted; for Strabo expressly says that for corn,
and some other productions, Sicily even
surpassed Italy. At this period there were only five Roman colonies in Sicily, of which
Syracuse was one. The others were Catana,
Taurumenium, Thermae, and Tyndaris. Mes-
sana, although not a colony, was inhabited by
a Roman population.

SYRIA, the region N. of Palestine, and
three times as large, the historic of which is im-
portant in the history of the West, and the
extension of the Holy Land. The name, as spelt in the Mishna (ΣΥΡΙΑ, Oholoth xviii. 7), comes from a root meaning "to mount up," and is thus
equivalent to ΑΡΑΜ; which connection is re-
cognized by LXX. and A.V. It applied to the "wall" of mountains separating the valley of the Orontes from the Anti-Lebanon and
northern shores of Phoenicia (PHENICE), or more
generally to all the country between the Leontes (LILANY) River and the Euphrates, even
including Commagene (KUMMKH), which lay
between the Euphrates and the Taurus chain
as far E. as Samosata. Syria was bounded on
E. by the Anti-Lebanon (LEBANON), and by
the Syrian Desert. It included three regions:
one running 100 miles N. to Kadesh on Orontes
and to the ELEUThERUS; the second including
mount Barylus—a continuation of the Leba-
non chain—as far N. as the lower valley of the
Orontes near Antioch, this being the land of
HAMATII, extending also 100 miles N.; the
third, reaching yet another 100 miles to
Mer'ash at the foot of the Taurus, included the
Amamus [AMANA], a continuation of the
Barylus range, with the plains draining S. into
the Orontes, and W. to the lyamus, or farther
E., into the Euphrates. The total area of Syria
is thus about 30,000 square miles. On the E.
it included DAMASCUS, HERMON, and Shenir,
SYRIA

with towns on E. slope of Anti-Lebanon towards Tadmor, this being the kingdom of Damascus and on the trade route from Damascus to Tadmor ran thence N. to Rezeph, and to Tiphah on the Euphrates. Near Ba'albek the Buqa'a Plain, E. of Lebanon, has a low shed whence the Orontes drains N. and the Leontes S. The latter bounds Galilee, and, turning W., reaches the sea at miles N. of Tyre. The Orontes is fed by other springs at Lebouch (Lybyo), N. of Ba'albek, and becomes a brawling stream, which passes just E. of the great mound of Tell Nebi Mendeh—the site of Kadesh (Qades), called in later times Laodicea ad Libanam. [TAHTIM-NOSN]. It then passes through a lake 6 miles long. (Bauveroth) In fornas any Kadian dam which, according to the Talmud (Neubauer, Geog. du Tal. p. 29), was made by Diocletian. The Orontes then passes Homs (Emesa) and runs in a narrow gorge near Hamath, which city is remarkable for the great water-wheels on the river. By Apamea it flows to the "Iron Bridge," where it turns W., entering the valley of Antioch, and is fed by the waters of the lake of Antioch, and by the Afrin River from N. It reaches the sea after a course of more than 700 miles. East of the river, and of Antioch, Aleppo—the present capital of N. Syria—stands on the Queveq stream, which flows S., and ends in a swamp; it rises near the Seir, an affluent of the Euphrates, which flows S.E. past Carmelhish. The sixth Syrian river, flowing W. under the Taurus, is the Ag-shai (Turkish) or "white stream." These plains are bounded by W. on the range which to S. in Lebanon, rises to 10,000 ft. above the sea, and, 5,000 ft. to N. in the Amanus. The Amanus by Cyrrhus, Seleucia, and Damascus—Inhabitants. The earliest inhabitants were probably of both the Akkadian and the Semitic races. In 15th cent. B.C. we find the Hittites powerful both in the far N. at Mer'ash, and in central Syria at Kadesh. They are represented as a yellow people, with hairless faces, slanting eyes, and black pigtails (on Egyptian coloured reliefs), and the only Hittite letter in the Amarna collection (Berlin 10) is in an agglutinative dialect like the Akkadian. The names of their princes are also Akkadian. The Amorites, on the other hand, were "highlanders," represented as dark brown, with black eyes, beards, and hair, and Semitic features. They dwelt at Teneh and in Lebanon, and the letters of Aziru the Amorite are in Semitic Babylonian. These two races have always existed together, and still so exist, in Syria; and it is notable that many of the town names of the list of Thothmes III. in Syria are still preserved, not in Arab, but in the Turkish nomenclature of to-day. The Assyrians and Jews, who deported both Hittites and other Syrians, and filled their towns with colonists from E.; but these also were of Semitic race. After the time of Tiglath, there seems to have been a Persian—or Greek-Persian—element in the population of Commagene at least, and there was a Greek element in Syria after c. 300 B.C., which is still represented in the Christian population. The Romans and the Crusaders did not furnish more than a governing class; and the present population of Arabs, Turkomans, and Turks (with a few Jews, Armenians, and Kurds) substantially represents that of the earliest known age—History. Syria was known from the dawn of history to the Akkadians of Chaldea, who called it Mari, "the way of sunset" (Aharu, or "west," in Semitic translation); and Sargina, "the founder king" of Chaldea, conquered Martu as far as the Medi-
One of the latest of the Amarna letters—perhaps c. 1400 B.C.—is from Assur-nabalil of Assyria (Berlin 9), who attacked Syria and reached Beirut. Another (Berlin 30) is from a certain Rimmon-nirari, who may have been an Assyrian, and who asks an Assyrian to fight against Egypt against the Hittites of Mer'ash, which he claims to have been included in his kingdom by Thothmes IV. After this there is a blank of more than two centuries, until Nabu-kudur-Usur I. of Babylon (1154-1128 B.C.) raided Syria, as did Assur-ris-ilum about the same time. The Babylonian king was defeated by Tiglath-pileser I. of Assyria, who conquered N. Syria, but was finally defeated by Marduk-nadin-ahhi, son of Nabu-kudur-Usur (1128-1111 B.C.). Tiglath-pileser, c. 1130 B.C., began by spoiling Rummukh (Commagene) and Sumastri (probably Samosata), and afterwards crossed the Euphrates near Carchemish, and occupied Birs (Tell Bâshê) farther W. He fought later at Kasiyari in Aram (or Syria); and, crossing the Euphrates on rafts, he reached Pethor, Lebanon (where he hunted the rim or wild bull; A.V. unicorn), and Arvad in Phoenicia. These conquests were not permanent; for, c. 1000 B.C., though Arvad (the A. V.) represents it as a place included in the kingdom of Amanus, yet later in his reign the "king of Aram" occupied towns near Pethor, after which there is a break in Assyrian history till the accession of Assur-nazir-pal in 885 B.C. During the time of Solomon (after 1000 B.C.) the Hittite princes of the N. appear to have been subdued, and the chronicle for the time being is blank. Assyria's own tales of its relations with Syria in the time of Assurnasirpal include an early expedition of his against the Moabites; and the Assyrian inscription of Shalmaneser II. refers to a treaty made between them at the time of Rezin's confederacy against Syria (2Kings 16:9). In 925 B.C., Shalmaneser III. re-entered "Arama" and cut trees in Amanus; two years later his 16th expedition was with a force of 120,000 men, and all opposition was broken down. Hazael (II.) of Damascus was defeated at Shemir, with the loss of 16,000 men and 1,212 chariots, and afterward by Shalmaneser IV in 855 B.C., and a further expedition was undertaken against Hazael and the Phoenicians; and Amanus was crossed in 853 return from Tarsus.

SYRIA

terraccean. The Babylonians of the 6th cent. B.C. asserted that he lived at a date represent-}

ing 3800 B.C., but this may be an exaggera-

tion of 1000 years, judging from astronomical}
data as to the zodiac. Gudea, the prince of }

Zirgibil, close to Tell-Loth,b) is said, on the }
same authority, to have lived c. 2800 B.C.

; and the Akkadian texts on his statues tell us }

that he cut cedars, to roof his temple, in }

Amanum (Amanus), and brought other ma-

terials from Martu. The kings of the first }
dynasty of Babylon (after 2250 B.C.) also in-

vaded the W. S'umuabi the first king con-

quering Kazalla (probably the Kitil range in }

Commagene), and advancing to Halibi or }

Aleppo. Kazalla had already been invaded by }

Sargon. Hammurabi, the first Babylonian }

king who founded an extensive empire, was the }
sixth of the first dynasty (2139 to 2094 B.C.),

and he appears to have dominated the whole of }

Syria and Palestine, though his chronicle un-

fortunately is broken after his 20th year. In }

the 30th and 31st years he was fighting in }

Elam, where he conquered Susa; but in the }

23rd and 24th years, before he thus became }

supreme, he apparently fought against Gubla, }

which was the capital of the 23rd dynasty,}

 feder 860 }

s of }

Amanus, and included other Hittite princes }

of }

the }

E.

884 B.C. }

Assur-nazir-pal began the conquest of Syria, }

which cost the Assyrians a century and a half }

of repeated efforts, till Damascus fell in 732 }

B.C. He first secured Commagene. In 870 }

he went from Carchemish to Azaz, crossed the }

Afre (Afrin), and reached the sea, returning }

by Amanus, where he cut cedars. In 859 B.C. }

his successor, Shalmaneser II., defeated the }

kings of Carchemish and of Samala (on the }

plateau E. of Issos), and he went on by Yazbuk }

(now Yazzibagh) to the sea, and yet farther W. }

to the coast where the Euphrates rises on the }

24 expeditions to the W.; in 854 he received }

the submission of the kings of Carchemish }

and Commagene at Pethor, and proceeded }

by Halvan (Chalybion or Aleppo) to Hamath }

and to Argana (now Arifn, close to Kadesh— }

now Qades—on the Orontes), S. of which he }

encountered the league of Syrian princes }

under Hadadezer of Damascus, }

including the forces of Hamath and of "Ahab" }

[Riblah] with those of Arqa and Arvad, and }

others, among whom were 1,000 Egyptians. }

The total Syrian force is said to have been }

about 62,000 men and 4,000 chariots, and 14,000 }

at least were slain. In 848 B.C. Shalmaneser }

II. re-entered "Arama" and cut trees in }

Amanus; two years later his 16th expedition }

was with a force of 120,000 men, and all }

position was broken down. Hazael (II.) of }

Damascus was defeated at Shemir, with the }

loss of 16,000 men and 1,212 chariots, and }

afterward by Shalmaneser IV in 855 B.C., and }

a further expedition was undertaken against }

Hazael and the Phoenicians; and Amanus was }

crossed in 853 return from Tarsus.
After the death of Shalmaneser II. in 825 B.C., Syria seems to have remained subject, with occasional rebellions, under Shalmaneser III. in 806 subdued Arpad, and next year was at 'Azáz, while in 803 he reached the sea. Shalmaneser III. in 775 was in Syria; but under Assur-dan in 759 the whole country revolted, even to Gozan. Assur-nirari II. had to reduce Arpad once more; but the final conquest was made by Tiglath-pileser III. (or II.) between 745 and 732 B.C. In 742 he received tribute, at Arpad, from kings of Commagene, Damascus, Tyre, Gebal, Carchemish, and others such as Panammu II. of Samala, whose son's inscriptions have been found. Azariah of Judah had been leagued with Hamath, but the fall of Arpad in 740, was followed by the annexation of 19 districts in the kingdom of Hamath, and by general submission of all the Syrian princes, with tribute even from Menahem of Samaria in 738 B.C. But though the Assyrian storm-cloud thus rolled ever nearer to Israel after Damascus fell, rebellions continued, and Tiglath-pileser III., in 727, united in the league of Hamath, Arpad, Simeya, Damascus, Samaria, and Egypt. He then placed 4,300 Assyrians under an Assyrian governor in Hamath, and went on to defeat Egypt at Kaphria, S. of Gaza. Carchemish was still rebellious till 717 B.C., when Sargon took the city and the golden idol, and got 11,3 talents of gold and 2,100 talents of silver as spoil. A Syrian revolt was also put down in 711 B.C., when Sargon went on to Ashdod, but Sennacherib was apparently only troubled by resistance in Phoenicia. Carchemish was the scene (c. 607 B.C.) of the battle between Nebuchadnezzar and Pharaoh Necho, which resulted in extending Babylonian sway over all Syria and Palestine, and these regions passed without a struggle to Persia after 538 B.C., and to Greece in 333 B.C., when Alexander had taken Tyre and Damascus. Syria was often a battleground for the Ptolemies and Seleucidae, after Seleucus had built its new capital at Antioch (in 300 B.C.): but finally it fell to his successors, after the battle of Baniás in 198 B.C., and so remained until it was seized by Tigranes, king of Armenia, in 83 B.C. The extraordinary statues erected by Antiochus of Commagene c. 38 B.C. witness the mixture of Greek and Persian religion in his kingdom. He was related to the Seleucidae and to the Parthians, and his tomb is on Nimrud Dagh, N. of Samosata. Pompey entered Commagene and conquered Syria in 64 B.C., and it remained a part of the Roman empire till the Moslem invasion of 637 A.D.; while, after the Crusaders took Antioch in 1098, W. Syria, and N. Syria (at first with Edessa) had conquered under the Frankish for a century, but E. Syria under Turks and Egyptians, till, in 1291, the fall of Acre gave the whole country to Egypt until 1518 A.D., when it was conquered by the Turks. The succession of Roman governors after 62 B.C. is well known, but the only one mentioned is Septimius Severus, who, in 202 A.D., took the city. The next to have power was Elagabalus, who succeeded L. Volusius Saturninus in 26 B.C., and under whom Componius was the first procurator of Judea a year later. Cyrenius had no authority in Palestine till the deposition of Archelaus in that year. The prosperity of Syria under the Antonines, and especially under the Syrian emperors Septimius Severus and Elagabalus, appeared to have been great, and Elagabalus (218-222 A.D.) was the high-priest of the sun at Emesa, and the child of another high-priest Bassianus. From 267 to 272 A.D. Syria was also part of the empire of Zenobia, ruling from Tadmor, and her defeat by Aurelian occurred near Emesa—Religion. The religions of the Phoenicians, and their gods included El or Baal, Baalath, Hadad, Ashtoreth, and others noticed in the texts of Samala, and in later inscriptions. One of the most remarkable, in Lat. and Gk. (Waddington No. 2720a), was found at Hosn Saleimân, in mount Barylus, a place in the satrapy of Ancyra, which bore the native name Baitolkaia. The ruins are important, but not older than Roman times. The Lat. preface states that Valerian and Gallienus (in 253 A.D.) renewed the ancient privileges of a shrine consecrated to Zeus; the Gk. texts include a copy of a letter by a certain Antiochus, the Syrians had been a military league of native warriors and a priest of Zeus, and a decree of the city of Apamea, addressed to Augustus, whose god Zeus they adopted, and decreed that men or beasts straying into the temple enclosure should incur fines. This instance, and others, show that the religion of Syria, before 326 A.D., was a mixture of native worship with that of Gk. and Roman gods. Elagabalus also adored the "black stone" of Emesa even in Rome.—Antiquities. The oldest Syrian antiquities are those inscribed with the characters called "Hittite" [Writing], including those of Carchemish, Mer'ash, Izghin (near Samala), Samosata, Aleppo, and Hamath. The inscriptions of Samala, in Phoenician and in Assyrian, come next, and are of peculiar interest. [Semitic Languages.] The style of art in the bas-reliefs (800 to 730 B.C.) resembles that of Babylonia, and a griffin, a female sphinx, and a lion-headed god (probably Nergal) are represented. The figures are bearded, or pig-tailed captive (probably a Hittite). The succession of kings of Samala, mentioned in the texts, includes Bar Karal, Panammu I. (who was tributary to Assyria in 806 B.C.), Bar Qur, Panammu II. (who fled to Damascus), and Barrakah (who boasts the favour of Tiglath-pileser III. c. 730 B.C., and who built the palace). The statue of Panammu I. was found at his burial-place Takhkalti-bunar, near the ruin Sinjirli and the village of Keller (Humann and Puchstein, Reisen, 1890). At Samala was also found the fine bas-relief of Esar-haddon (after 650 B.C.): he holds Tirnamah, the Ethipian, captive by a cord attached to a ring passing through the upper teeth of the captive (Is.37.29). The gods are represented standing on animals, as at Bavian; the cuneiform text describes the conquest of Egypt. Early in Esar-haddon's reign the native dynasty was deposed, and an Assyrian governor replaced them in Samala. The age of the Seleucidae is only represented by the beautiful coins of king and city, but the art of Commagene, under Antiochus (at Nimrud Dagh), presents a mixture of Gk. and Persian styles; and the Gk. texts render the names of Persian gods by Gk. equivalents coupled with each. Antiochus himself was a
Mazdean by religion. Syria is also remarkable for its Christian architecture and inscriptions of 4th and 5th cents. A.D. The peculiar monogram in Gk., X.M.G. ("Christ born of Mary"), occurs in texts dated 399, 420, and 470 A.D.; and over the doors of houses verses from the Psalms (4.8.24.1.34.9.91.1.2.118.21.121.8) occur. Lu.2.14 and Mt.22.31.32 are inscribed at Salamin and at Barra. The oldest known of these Christian inscriptions (at Khatira; Waddington No. 2704) dates from 331 A.D., with the invocation "Come, O Christ." At Refidi, in 516 A.D. (No. 2625), is the curious text "Jesus the Nazarene, born of Mary, the Son of God, dwells here." At Kokanaya (No. 2681) the Trinitarian Gloria is inscribed as early as 369 A.D. On the other hand, a Gk. pagan couplet, found in the mosque at Enesa, dates from 78 A.D., and belonged to a temple on this site. The finest architecture of the 2nd cent. is represented by the huge structures at Ba'albek and at Palmyra. Among the most useful modern books may be noted: Humann and Puchstein's Reisen in Kleinasien und Nordsyrien, and the Mittheilungen aus den Orientalischen Sammlungen, Heft. xi, with Waddington's Inscriptions Grecques et Latines de la Syrie. [C.R.C.]

**Syriac versions. [Versions]**

**Syro-Phoenician** occurs only in Mk. 7.26 as the description of the race of the Gentile ("Greek") woman from whose daughter our Lord cast forth a devil at the mother's persistent request. The emperor Hadrian divided Syria into three parts: Syria Proper, Syria-Phoenice, and Syria Palaestina; and henceforth a Syro-Phoenician meant a native of this sub-province, which included Phoenicia Proper, Damascus, and Palmyrene. It is perhaps most probable that Σύρα Φωνήσα of "A Phoenician Syrian," found in some copies, is a better reading. The term denotes a Greek (E.V. marg. gentile) of Phoenicia in Syria, as distinguished from African natives—the Punic race of Carthage. [C.R.C.]
**TABBATH**

Tabbath, probably a long tract of land (Arab. 'ibbâh); apparently S. of Abel-me-nahotah. No site so named is known, and the words "unto ('adth) Tabbath" might only mean "a long way."

---

**Tabeal** (R.V. Tabel). The son of Tabeal was apparently an Ephraimite in the army of Pekah, or a Syrian in the army of Rezin, when they besieged Jerusalem in the reign of Ahaz (15.7.6).

---

**Tabeal** (Ezr.4.7) or Tabellius (1Esd.2.16), a Persian official in Samaria in the reign of Artaxerxes.

---

Taberah, a place in the wilderness of Paran (Num.11.3; Deut.9.22). It has not been identified, but was probably about 20 miles S.W. of Hazeroth. [C.R.C.]

---

**Tabering** an obsolete word in A.V. of Na.2.7. The Heb. word connects itself with dphk, "a timbrel." The A.V. reproduces the original idea. The "tabour," or "tabor," was a musical instrument of the drum type, which with the pipe formed the band of a country village. To "tabour," accordingly, is to beat with loud strokes as men beat upon such an instrument. [Timbrel.]

---

**Tabernacle.** The description of the tabernacle is given in a twofold form—the instructions to Moses (Ex.26.27; 9.19), and the account of the actual construction (38.8-38). It consisted of two distinct parts: the tabernacle proper, and the tent.—I. THE TABERNACLE, or DWELLING-PLACE (Heb. mishkdin, 26.1-6, 15-37). 1 The Framework. This was formed of boards of acacia wood, overlaid on both sides with thin plates of gold (vv. 16, 29). The word qeresh, translated boards, occurs only in connexion with the tabernacle, with the exception of Ezk.27.6, where it probably refers to the boards forming the deck of a ship (R.V. marg.). It is derived from a root meaning "to become firm, solid." Kennedy (Hastings, D.B. 5 vols. 1904, s.v.) suggests hollow panels instead of solid boards. Each board was 10 cubits long and 1 1/2 broad; the thickness is not specified (Ex.25.16). There were 20 on each of the two long sides, the N. and the S., and 6 at the W. end. There were also 2 other boards on the W., one at each corner (vv. 23-25), making 8 in all. It has been assumed that these two were the same width as the others, 1 1/4 cubits, in which case the external measurement of the W. wall must have been 12 cubits. Since the inside measurement was not more than 10 cubits the boards forming the sides must, on this assumption, have been one cubit in thickness. This is the view held by Ewald, Bahr, Riggenbach, Kamphausen, Diestel, and, among later writers, by König (in the Jew. Encycl. s.v.), but it suggests grave difficulties. i) In ancient times acacia trees capable of yielding boards 10 by 1 1/4 cubits were probably to be found in the Sinaic Peninsula (Theophrastus, Hist. Plant. iv. 3), but not trees from which could be cut massive beams measuring at least 15 ft. long, 27 in. wide, and 18 in. thick. (ii) The boards stood upright, fitting close together, each having two tenons at its lower end which fitted into two silver sockets let into the ground. These bases weighed only a talent, or about 95 lb. each, and it is doubtful whether they would have been of any use in supporting beams of this size. (iii) Transport, though not impossible, would have been difficult, and the only provision mentioned utterly inadequate (Num. 7.8; cf. 3.36-37). There may of course have been many more than four wagons and eight oxen, these only being mentioned because given by the princes (12.23). Josephus says the boards were four fingers, or 3 in. thick (3 Ant. vi. 3). The language used in describing the corner boards is ambiguous and obscure (Ex.26.24), and none of the numerous interpretations that have been attempted are entirely satisfactory. Keil (Bib. Arch. i. 103) thinks they were made up of two boards joined together at right angles to form the corner pieces, and having one ring only, set in the corner, instead of one on each side. Kennedy suggests sloping bastions made of two boards braced together. The important point is that these two were different to the other 46 boards, and in the absence of any statement to
the contrary it need not be assumed that they were the same width as the rest. Their purpose seems to have been to give stability to the corners, as well as to fill up the space of \( \frac{1}{2} \) cubit at each corner of the W. end. They had each two silver sockets like the other boards (ver. 25). The boards were kept in position by means of cross-bars of acacia wood overlaid with gold, which passed through rings of gold affixed to the outside of each board. According to vv. 26-27 there were five bars on each of the three sides, but since only the middle one ran the whole length of the wall (ver. 28), it is probable that the other four on each side were only half the length, two being joined together and so making three bars on each side. This is Rashi’s opinion, and it has been adopted by many later writers. Rashi says the middle bar of the three passed through the heart of the boards, but if they were only 3 in. thick either the bar was very slender or the bore of the hole must have been so large as to weaken the boards in their centre. According to Josephus (loc. cit.), the bars were made up of lengths of 5 cubits each, the end of one section fitting securely into the next. The dimensions of this framework were 30 cubits long by 10 wide. It is disputed whether these are to be taken as the external or inside measurements. The question is not without importance. If external, then the whole length of the interior was 30 cubits, less the thickness of the W. wall, and the breadth 10 cubits, less the combined thickness of the two side walls. If the boards were only 3 in. thick, this small reduction of the inside dimensions would not seriously interfere with that internal symmetry of the Most Holy and Holy Place upon which so much stress is laid; but if they were much more than this thickness the measurements must have been those of the interior (cf. Josephus, 7 Ant. vi. 4). (2) The Curtains. The ceiling of the tabernacle was formed of ten curtains of fine twined linen, each 28 cubits long and 4 wide, fastened together in two fives. It is not stated how the separate curtains were joined, but the two large ones had each 50 loops of blue along the inner edge and were coupled together by means of 50 golden clasps (28.1-6). Pictures of cherubim were woven into them, possibly in blue, purple, and scarlet on a white ground (ver. 1). Some think these curtains covered the inside of the walls, from analogy with Solomon’s temple (1K.6.29; cf. Ez.41.18). There is, however, no mention of any means of suspending them on the inside. They were 28 cubits long, and would therefore cover the top, 10 cubits, and hang down 9 cubits over the sides, thus leaving about 1 cubit at the bottom uncovered. The clasps connecting the two curtains were to be directly over the division between the Most Holy and the Holy Place (cf. Ex.25.33). Hence the one large curtain of 20 cubits would cover the Holy Place, and of the other, 10 cubits would cover the Most Holy and 10 hang over the W. wall, covering it almost to the ground, i.e. all except the thickness of the wall and the height of the silver bases above the ground. Some think it was placed centrally, 5 cubits hanging over the E. and 5 over the W. end. (3) Hangings. (i) The Veil. At a distance of 10 cubits from the W. wall (Josephus, l.c.) there were four pillars of acacia wood overlaid with gold and set in sockets of silver. From these pillars was suspended by golden hooks a curtain of the same substance, colours, and ornamentation as the covering of the dwelling (see I. (2) supra: 26.11-13). This was the parókheth, and divided the tabernacle into two parts—the Most Holy, a cube of 10 cubits, and the Holy Place, 20 cubits long, 10 wide, and 10 high. It is translated “the veil” of the screen (55.12; 39.34, 40.21; Num.4.5). [Hangings.] In the Most Holy Place was the Ark of the Covenant. (ii) The Screen. The E. end of the Holy Place, which had no wall, was covered with a curtain of 10 cubits square, made of the same material and colours as the
TABERNACLE

preceding, but with stripes or cubes woven into it instead of cherubim (Ex. 26:36,37). It was suspended by golden hooks from five pillars of acacia wood overlaid with gold and fixed into four in the Holy Place (vv. 32,37). Over this tent there were two other coverings, of which the dimensions are not given, (2) one of rams' skins dyed red, and (3) over this one of skins (ver. 14), probably of the dugong, a marine animal 12 to 30 ft. long, and said to be plentiful in the Red Sea. The pins and cords (27.19, 35.18,38.20,31,38.40) may have been for use with either of these coverings in the last. If the tent were ridge-shaped, the third covering may have been merely a coping along the top. The great weight of these coverings, and the probability that during heavy rains the water would collect on a flat roof, are strong arguments in favour of the ridge-shaped form. In the court the tabernacle stood in a sense a part of the tabernacle. It was an oblong space, 100 cubits on N. and S., and 50 on E. and W. (27.9-13). The tabernacle stood more towards the W. end, with its entrance facing E. The N. and S. sides had each twenty pillars, the W. and E. ten altogether. They were of sycamore-fig wood, not less than 30 cubits in height, fixed into sockets of "brass" and 5 cubits distance from each other (27.18). They were furnished with hooks and fillets of silver, by means of which the linen hangings were suspended (ver. 16). These fillets were either inserted under the capitals, or bars resting on the hooks and extending from pillar to pillar, and to which the hangings were attached probably by rings. The four central pillars on the E. side supported the screen of 20 cubits which formed the entrance to the court. This was a variegated curtain, like the screen covering the E. side of the tent (ver. 16,26-36). There is some ambiguity in the account of the number of pillars on the E. side of the court (27.13-16). The entrance had four pillars, but if they were only 5 cubits apart five pillars would be required for the screen of 20 cubits. It is, of course, possible that there were only two in the middle, the entrance being distinguished by difference in colour. Other coverings included pillars, including the two corner ones. The hangings N. and S. of the entrance must each have been attached to four pillars. If the one at the N.E. corner be counted as belonging to the N. side, and the inner one of the four on the S. of the entrance as belonging to the entrance, the difficulty would be removed. This is the system adopted in reckoning the other pillars of the court, i.e. though each corner pillar supported the hangings of two sides it was counted to one only. Some count the two outer pillars of the entrance as only half-pillars — e.g. Keil (op. cit.). In the E. part of the court, called the Outer Court, there stood (1) the Altar of Burnt Offerings, near the entrance, and (2) the Laver of brass, between the altar and the tabernacle (30.18).—IV. NAMES.

(1) Tabernacle (mishkān, "the dwelling-place," Ex. 25.9, see R.V. marg.), specially applied to the inner structure as distinct from the tent which covered it. The name expresses the purpose of the tabernacle. "Let them make Me a sanctuary; that I may dwell among them" (ver. 8,29.45); "I will set My tabernacle among you . . . And I will walk among you, and will be your God, and ye shall be My people" (Lev. 26.11,12). (2) The Tent, 'ôhel,
which served as a covering to the former (Ex. 26.7, etc.). Also the tent, with reference to or including the mishkān (33.8.11; Num.12.5-10; Deut.31.5; cf. Num.11.24; 1Ki.1.39, all in R.V. "tabernacle") (2Chr.7.8). (2) Tent of the witness (‘ḥet ḫāʾēdēwth), as containing the ark and tables of the testimony (25.21, Num.3.4). Also tabernacle of the testimony (mishkān ḫāʾēdēwth), Ex.38.21; Num.1.50-53,10.11. (5) Tabernacle of the tent of meeting (Ex.39.32, 46.2.6,29; 1Chr.6.32[17]). (6) House (bird) of God (Ex.23.19, etc.). (7) Tabernacle of the house of God (1Chr.6.48[33]). (8) Temple (teḥkhal, 1Sam.3.1). (9) Sanctuary (miḏḏāsk, Ex.25.8; Lev.12.4).—V. History. The plan of the tabernacle was of divine origin and was revealed to Moses in the mount (Ex. 26.30). Its construction was entrusted to Bezaleel and Aholiab, and they with the workmen were specially endowed by God with knowledge and the means of work (36.1). The materials were provided by the people as free-will-offerings (35.4-29), and their liberality was such that more material was provided than was necessary, and they had to be restrained from giving (36.6,7). When the work of preparation was finished, Moses, seeing that all had had a part in the arrangement, and that the divine command, blessed the people (39.43). The tabernacle was erected on the first day of the first month of the second year after the Exodus (40.2.17). It was anointed with holy oil (40.9; Lev.8.10), and then the cloud covered the tent, and the glory of the Lord filled the dwelling (40.34). The tabernacle occupied a central position in the camp (Num.2.2, 17,5.3), surrounded by the camp of the Levites (1.50.53); cf. Ex.33.7, where it is said “Moses used to take the tent and to pitch it without the camp, afar off from the camp” (see also Num.11.26,30,12.4). The LXX, calls this τή τέμπεια αὐτοῦ ἀπό αὐτοῦ “his own temple,” as if it should be put up pending the erection of the tabernacle. The tabernacle accompanied the Israelites in their wanderings until, after the conquest of Canaan, it was set up in Shiloh (Jos.18.1). It remained there during the period of the Judges (Judg.18.31; 1Sam.2.22; cf. Ps.78.60). Some years later it was at Nau (1Sam.1.1-6). David pitched a new tent on Mt. Zion for the ark (2Sam.6.17; 1Chr.15.1,16.1; 2Chr. 1.4), but the Mosaic tabernacle, with its altar, was still an object of veneration and a sanctuary at Gibeon (1Chr.16.39,40,21.29). When the Temple was finished the tabernacle was taken to Jerusalem and probably preserved, as a sacred relic, in one of the chambers of the temple (1K.8.4; 2Chr.5.5). Its later history is unknown. Riggenbach, Die Mos. Stiftscheure; Diestel, in Schenkel’s Bibellex. ; Riehm, Handwörterbuch des Bib. Altertums; Enwald, Alterthumer; Kennedy, in Hastings, D.B. 8. (Rev. 1904); W. Shaw Caldecott, The Tabernacle. [Ital.]

Tabernacles, Feast of. The last of the three pilgrimage festivals, ordained by Moses, when all Heb. males were obliged to appear at the sanctuary (Ex.23.17; Lev.23.34-36,39-43; Num.29.12-38; Deut.16.13-16). It is commonly called ḥaqāḥ ḥas-sukkōk (“the Feast of Booths” or “Booths”), as the tents of the people were called in the Passover season (Ex.23.16) or ḥaqāḥ ḥāʾāśiph (“the Feast of Ingathering”), or simply ḥēlāq = “the Feast” (1K.8.2; Ezek.45.23; 2Chr.7.8). The celebration of this feast lasted seven days: 15-22 of the seventh month (Tishri). The day following—i.e. the eighth day—was observed as an appended holiday, and was called ḥāšālf (“booth—observance” (Lev.23.36), or “solemn assembly” (Ne.8.18). The observance of the festival had a double significance: (1) As general thanksgiving days for the bounty of the autumn grape crop which completed the year’s harvest— “At the end of the year, when thou garnest in thy labours out of the field” (Ex. 23.16). (2) As a commemoration of the time when the Israelites dwelt in booths or tents during their passage through the wilderness after their Exodus from Egypt. As all principal festivals are, more or less, memorials of the deliverance from the Egyptian slavery into Canaan, so the Feast of Tabernacles is the festival when the people took place at the end of every sabbatical year on this feast, when the law was read in their presence (Deut.31.10-12). Solomon dedicated the temple on this festival, and, in order to facilitate the special dedication festivities, extended the period of rejoicing seven days, beginning with the dedication of the house (1K.8.2,65). King Jeroboam I., whose object was to separate the ten tribes under his command from the influence of the Jerusalem pilgrimage under the Judaean kingdom, substituted a feast just a month later (12.32). The peculiar features of the feast were: (1) The abandoning of the permanent habitation in houses for the temporary dwelling, eating and sleeping in booths during the seven days, which, aside from its symbolic meaning as a memorial of the Exodus, is a symbol of democracy, for all men, rich and poor alike, are to dwell in a simple booth. This feature had been neglected from the time of Joshua till the return of the exiles, and again they tried it under the command of Ezra (Ne.8.17), but ever since it has been a regular custom in Israel. The Feast of Booths was observed by Judas Maccabaeus (2Mac.10.6,7). The Talmudists have compiled a tractate called Sukkâ, in five chapters, mostly taken up with explaining the construction of the booth and details in connexion with this festival. According to it, three walls and a sign of a door at the fourth side, with a covering on top, constitute a booth. The walls may be of any material, but the “covering” (lit. sukâ), which is the main part of the booth, is permitted only to be of foliage and boughs cut from trees (Ne.8.15,16), or reed, sticks, and laths loosely arranged so that the stars may be visible through them. The covering must not be above 20 cubits from the ground, in order not to lose sight of it when sitting in the booth. (2) Another feature is the ceremony of carrying and waving the palm branches (Ne.8.15,16), or palm-branch = ’ênghārâ. The palm-branch was tied together with boughs of thick trees (myrtles) and willows of the brook, made into a bunch
and held in the right hand, with the citron in the left, while reciting "Hallel" at the morning service. This was observed on the first day of the festival everywhere, but in the temple ('in the court of the Hebraists') it was performed for seven days (Lev.23.10). After the destruction of the temple the Rabbis ordained the observance of this custom for seven days everywhere, which is still kept up, except on the sabbath day. Neither the dwelling in the booth nor the ceremony of the lulab is compulsory. The last day of the festival, which is a separate holiday. (3) The sacrifices were more numerous than on any other festival. On the first day the burnt-offering consisted of 13 bullocks, 2 rams, and 14 yearling lambs. The rams, and lambs were the same every day of the festival, but the number of bullocks decreased by one each day, making 12 on the second day, 11 on the third, and so on to 7 on the seventh day, in all 70 bullocks (Num.29.13-32), equaling the number of the 70 heathen nations mentioned in Gen.10, which existed at that time, signifying, according to the Talmud, that heathenism will decrease steadily. The eighth day being a separate holiday, had for sacrifice only one bullock, one ram, and seven lambs (vv. 35,36). (4) According to tradition a great celebration took place in the temple, on the eve of the seventh day, which is known as hoshanah rabbii (the great hoshanna). On this day the willow-twigs were more in use at the ceremonial to the seventh times around the altar of the temple. The willows were set up on the side of the altar and were also carried around and beaten on the ground while shouting "Hosanna" "(O! save!)". This beating of the hoshanah is still practised on hoshanah rabbii in the orthodox synagogues. (5) The ceremony of the "water-drawing" occurred at the morning service of the temple in connexion with the wine libation during the seven days, but the ceremony developed on the eve of the seventh day. The water was drawn from the Pool of Siloam in a golden ewer and borne to the altar in solemn procession, accompanied with torchlight, and the willow-twigs in the hands of the priests. As the water arrived, some was poured out through a silver basin with an opening at the bottom. The wine was poured through another opening, both libations running down simultaneously and being conducted by pipes into the Kidron. Preparations were made on the night of the first day at the outer court of the temple, known as the "Women's Court," by fixing four golden lamps on high pedestals; each lamp contained 120 measures (logs) of oil, and they were lit by wicks made of old garments and girdles of the priests. The illumination resembled a sea of fire, lighting up every nook and corner of Jerusalem. A special gallery was erected in the temple for the accommodation of women. The celebration reached its climax on the eve preceding the seventh day, when they sang and danced with torches in hand, while the Levites stood on the fifteen steps leading to the Gate of Nicanor chanting the Songs of Degrees (Ps.120-124) to the accompaniment of their instruments. Hillel the Elder and other Rabbis often participated in the ceremonies of rejoicing and dancing. The custom of celebrating the water-drawing by singing hymns at the synagogue is still observed, each congregation selecting a certain night between the first and seventh days to march in procession, and by the water-drawing out of water at the temple. The water libation is not mentioned in the Mosaic law. There is only a symbolic reference to it by the prophet: "Therefore with joy shall ye draw water out of the wells of salvation" (Is.12.3). The Gospel, no doubt, alluded to this custom by saying, "Now at the last day of the feast [the seventh day], Jesus stood and cried, saying, If any man thirst, let him come unto Me and drink" (Jn.7.37). Jesus also said, "I am the Light of the world, ... the Light of life" (8.12), referring to the illumination of the festival. In this respect Jesus echoed the sentiments of the Sadducees, who were opposed to this Pharisaic ordinance, which was based only on Rabbinical tradition. Indeed, it is difficult to account for all the adoption of this ordinance by the Rabbis, unless it was to modify the wine libation, which was a common practice among the Gentiles in their idol-worship. Or, perhaps, the water libation was intended as a lesson on temperance. Cf. Jew. Encycl., arts. "Tabernacles, Feast of"; "Water-drawing." [J.D.E.]

Tabitha, "which is by interpretation called Dorcas" (Ac.9.36), a female disciple (μαδήμαρα), this fem. form occurs here only in N.T., of Joppa, full of good works, among which that of lending alms to the poor (evidently a recognized class, see 6.1) is specifically mentioned. She must have been a person of some means. While St. Peter is in the neighbouring town of Lydda she dies, whereupon the disciples send him message, urging him to come without delay. He arrives, and finds her already laid out for burial, and restores her to life under circumstances which bear a close resemblance to the raising of Jairus's daughter (Mt.9.25, etc.). The miracle results in a number of conversions in the neighbourhood. The Aram. word Tabitha (θφλήθα), with its equivalent Dorcas, in Gk., means "roebuck," or "gazelle," and is fairly common as a woman's name. [S.N.S.]

Table, the translation of the Heb. shulhan, chiefly, in O.T., and Gk. τρφδεα. A flat-topped and generally round stand about 12 in. high, round which people reclined for meals. The prophet's table (2K.4.10) was probably of this shape. The Gk. word signifies a four-legged table; and those used in a guest-chamber were long enough for a number of guests to eat from them (Lk.22.21). [MEALS.] In Mal.1.7, 12 the "table of the Lord" is the altar. Hence its contrast in 1Cor.10.21 with "the table of devils," where the Lord's Supper is compared with idol-feasts. [Eucharist.] Table in Ex.25.23, a smooth of tablet, whether of stone, wood, metal, or wax, upon which writing could be inscribed. [WRITING.] On table of shewbread, see SHEWBREAD. [S.N.S.]

Tables of the law, the two tables of stone which God gave to Moses in the mount (Ex.24.12); the second table of "Worship," on which was written with the finger of God (31.18), on both their sides (32.25), the
Ten Words or Commandments (34.28). The tables and the writing were the work of God (32.16). On descending the mount, Moses saw the idolatry of the people, and in an outburst of passion smashed the tables and broke them (32.19). Later on Moses was commanded to hew two other tablets like the first, and to ascend the mount with them, when God wrote on them the same words as on the first (34.1). These were placed in the "ark of the Testimony" (40.20). According to R. K. 8, these were the only contents of the ark at the dedication of Solomon's temple. [ARK of the COVENANT.] What finally became of them is not known, but they were not in Herod's temple (5 Wars v. 5). [Moses; LAW in O.T.; TABLE; WRITING.]

Tabor, apparently an Aram. word, from a root meaning "to break off," and thus applying to the isolated position of Mt. Tabor, which is an outlier of the Nazareth mountains. It is now called Jebel et Tör, or "mountain of the isolated summit." It is a rounded mountain like a mole hill, rising 1,840 ft. above the sea, and about 1,550 above the plains at its foot. On the summit are the only remains of an ancient open wood of oaks, in which fallow deer have been found. A mediaeval church and fortress crown the summit, which mediaeval tradition made the scene of the Transfiguration, following the apocryphal "Gospel of the Hebrews." The border of Issachar reached to Tabor (Jos. 19.22) and to the north of W. Tabor, Sidon, and the coast. Barak came down from Tabor to meet Sisera near En-dor (Judg. 4.6,12,14,8.18). [KISHON, River.] The mountain appears to have been a centre of worship which became idolatrous (Ps. 89.12; Ho.5.1). In Je.46.18, "as Tabor might be a clerical error for " by Tabor," in describing the Babylonian advance on Egypt. In 2 Chr. 8.7-77, a town Tabor in Zebulon seems to be noticed, but in Jos. 21.35 we find NAHALAH instead. In the Song of Deborah (Judg.5.2) the literal wording of the Heb. rendered in A.V. "for the avenging of Israel," appears to be "in the oppression by Pharaohs"; and it is notable that Ramses II. (1330 B.C.) twice, took a large body of troops in Lower Galilee (Brugsch, Hist. Egt. ii. p. 64), which included Shalama (Sâlim, 2 miles N.W. of Taanach), Maroma (Merom), Beit-antha (perhaps Hannon), and Dapour—either Tabor or the village Daberath at its foot to W. Dapur is also noticed later in his reign, in connexion with towns of Galilee (p. 560). The revolt of Barak would thus seem to have been directed against Canaanite kings allied to Hazor, among whom Sisera was perhaps the Egyptian resident (Ser-a being in Egyptian "the servant of Ra"); and in the later years of Ramses this defeat followed the victories of his youth. The Plain of Tabor (Kûn tâbûr, 1 Sam. 10.3) was between Rachel's tomb and Gibeah, and here Saul met "three men going up to God to Bethel." More probably (see R.V.) we should read "oak Tabor," or possibly "a broken oak" (or "terebinth"), which would be a point on the road. Tabor, the "terebinth" tree (Gen.35.8), is not too far N., as is the palm of Deborah (Judg.4.5) between Bethel and Ramah; but solitary trees—oaks or terebinths—are not uncommon in the mountains of Benjamin. [C.R.C.]
who were "caravan rulers," in some cases on the route to Vologesia, etc. Palmyra was known to Pliny the Elder, who mentioned it profusely in his *Natural History*, B.C. (9.34). It was beautified by Hadrian in 130 A.D., and made a *colonia* by Caracalla (211-217 A.D.). The Palmyrenes aided Alexander Severus against Persia in 230 A.D., and saved the Roman empire in 260 A.D., being led by Odenathus II. (*Adinaik*), who was then murdered by a nephew in 267 A.D.; but, during the troubles in Rome, his widow Zenobia (*or Bath Zabinah*) became independent—ruling from Bithynia to Egypt—till crushed by Aurelian in 272 A.D. A coin of her son as *Imperator*, under Aurelian as Augustus, has been found in Egypt; and texts of Odenathus and Zenobia occur at Palmyra (Waddington, Nos. 2602, 2611). Odenathus is called *Moran*, or in the Gk. "despot," and afterwards "king of kings." The only link between Solomon's Tadmor and that of Zenobia is the occurrence of a scarab of Tirhakah (702-670 B.C.), discovered by Rev. W. Wright at Palmyra. The city is described by Rabbi Benjamin of Tudela in 1163 A.D., and had then a population of 6,000 warlike Jews. In 1678 English merchants tried to visit it, and succeeded in 1691, staying 4 days and copying many texts. Wood and Dawsins surveyed its ruins in 1751, De Vogüé and Waddington, 1816, Paschkis, who visited it in 1874, and probably many others since. Besides these standard works, a good account of two visits, paid in 1872 and 1874, is given by Rev. W. Wright (*Palmyra and Zenobia, 1895*); but the leading work still is *The Ruins of Palmyra*, by Wood and Dawsins, 1753. [c.r.c.]

**TAHAN.**—1. Son of Telah and ancestor of Joshua (1 Chr.7.25).—2. Son of Ephraim and ancestor of the *Tahhanites* (Num.26.35) = Tahath (1 Chr.7.20), repeated by a clerical error. [*Shuthelah.*]

**Tahapanes. [Tahapanes.]**
**Ta'hath.**—1. A Kohathite Levite, ancestor of Samuel and Heman (1 Chr.6.24,37 [9,23]).—2. According to the present text, son of Bered, and great-grandson of Ephraim (7.20).—3. Grandson of the preceding, as the text now stands (7.20).

**Tahath.**—1. A desert-station of the Israelites between Makkeloth and Tarah (Num.33.26).—2. [Tahan, 2.]

**Tahapanes or Tahaphnehe.**—1. A Levitical town Ereẓ Israel (2 K.9.4); 2. A Syrian town of the time of Judas Maccabaeus. Its name is derived from the Hebrew word *taphan*, a "fort," or "dwelling place." The site is about 20 miles from Damascus, and is mentioned in the New Testament as the home of the apostle Peter (Gal.1.11).

**Talmud.**—1. One of three sons of "the Anak," slain by the men of Judah (Num.13.22; Jos.15.14; Judg.11.19).—2. Son of Ammihud, king of Geshur. His daughter Matta was one of David's wives (2 Sam.3,18-37; 1 Chr.3.2).

**Talmon** (Ta'mun), head of a family of doorkeepers in the temple, "porters for the camp of the children of Levi" (1 Chr.9.17; Ne.11.19). Some of his descendants returned with Zerubbabel (Ezr.2.42; Ne.7.45; Ez.8.28), and were still employed as "porters" (Neh.12.38).

**Talmud.**—1. A collection of Jewish religious and philosophical works, compiled over a period of several centuries. It is divided into two main parts: the *Talmud Yerushalmi* (Jerusalem Talmud) and the *Talmud Babylonian*. The Talmud is not just a legal code, but a comprehensive commentary on the *Torah*, including discussions, debates, and explanations of Jewish law, customs, and traditions. It is considered the authoritative interpretation of the *Talmud* by Jewish scholars and is a significant source of Jewish religious life and thought.

**Talon.**—1. The Talmud, which is the central text of Jewish religious study and practice. It is a massive collection of oral interpretations of the *Torah*, *Prophets*, and *Hagiographa*, providing a detailed and comprehensive body of Jewish law and tradition. The Talmud is divided into two main parts, the *Talmud Yerushalmi* (Jerusalem Talmud) and the *Talmud Babylonian*. It is a fundamental resource for understanding Jewish religious and legal tradition. Although the Talmud has been in existence for over 1,500 years, its teachings continue to be studied and applied by Jews today.
length reduced to writing in a final form. But the Talmud represents the final stage in the development of Jewish learning, at least in so far as this is presented in an authoritative and official form. In order, therefore, to realize of what the Talmud consists, it is necessary to understand what the earlier documents were which later on became incorporated in it. The foundation of the whole was the Law or Torah, i.e. the five books of Moses, concerning which the eighth "Principle" of the Jewish Creed says: "I firmly believe that the Law which we possess now is the same which has been given to Moses on Sinai." The "Thirteen Principles of Faith" were drawn up by Maimonides, the great religious philosopher (d. 1204 a.d.), and are accepted by all orthodox Jews, having been incorporated in the Jewish Liturgy. But the Law (Torah) consisted of two parts: the Written Law, as now found in the Pentateuch, and the Oral Law, the former compiled by God and the latter to have been committed to writing from the beginning: the latter was believed to have been revealed to Moses on mount Sinai, together with the former. This Oral Law was handed down from age to age side by side with the Written Law, which it explained. This is stated in the opening words of the tractate Pirkei Avot ("Sayings of the Fathers"): "Moses received the (oral) law from Sinai, and delivered it to Joshua, and Joshua to the elders, and the elders to the prophets, and the prophets to the men of the Great Synagogue." Although this cannot be accepted as historically true, it has some basis in the fact that the former Sanhedrin, the supreme court, was called the "Sanhedrin of the Fathers." This latter most probably had some traditional matter upon which they based their explanations. For centuries expositions of the law, as well as of other Biblical books, continued. They filled down time the quantity of Haggadic and Halakic matter which had accumulated was immense, and it became necessary to formulate some kind of official compilation which could be regarded as a guide and a book of reference for teachers. This was first undertaken by the pupils of Shammai and Hillel. They collected many Halakhah, and compiled and issued (beginning of 2d century) the rambam, which became the principle of the Mishnah. This was done (c. 150-200 A.D.) by Jehudah-ha-Nasi ("Judah the Prince"), who undertook his great redaction of the Mishnah, which (with some alterations) has survived to the present day. The Mishnah, therefore, is an immense collection of comments, explanations, and expansions of the Biblical text. Now it is the Mishnah which forms the basis of the Talmud; for there was very much in the Mishnah which was obscure and ambiguous; and there was, moreover, in other works a great deal of valuable Haggadic material thought worthy of preservation. The Talmud therefore explained the Mishnah, and incorporated much other matter. Thus the history of the origin of the Talmud really repeats that of the Mishnah—tradition transmitted orally for centuries, finally cast into definite literary form. Another term, Gemara, is often used as a synonym for the Talmud. This is an Aram. word, from a root meaning "to have," a process of learning what has been handed down by tradition. (Bacher, in Jewish Encyclopaedia, art. "Talmud." But it means also "completion.") The Talmud has come down in two forms: the "Jerusalem Talmud (Yerushalmi)" and the "Babylonian Talmud." The material which is compiled in the Yerushalmi had been prepared in the academies (i.e. centres of learning) of Palestine, chief among which was that of Tiberias, whence Rabbi Johanan issued the Yerushalmi, in its earliest form, in the middle of the 3rd cent. A.D. The first compiler of the Babli was Rabbi Ashi (d. 430 A.D.), who presided over the academy of Sura, in Babylonia. Both Talmuds were constantly being added to, and the Yerushalmi was not finally closed until the end of the 4th cent., the Babli not until the beginning of the sixth. Haggadah flourished, as regards quality, more in the Babli, the latter (generally, explanations of the Biblical text, especially speaking) of a far less attractive character. To give some concrete idea of what a Haggadah is, the following instance may be cited: "R. Jehoshua ben Hananiah said, 'I can take cucumbers and melons and make them into kids and goats.' R. Jannai said, 'I was walking in a certain street in Sepphoris, and I saw a certain man [heretic] take a bird, and he cast it up, and it fell down and was made into a calf.' But it is not so. R. Lazar said, in the name of R. Josaph ben Zimmra, 'If all who come into the world were assembled together, they would not be able to create a gnat and put breath in it' . . ." (Sanhedrin, 25 a; quoted by Herford, Christianity in Talmud and Midrash, p. 115). But the Haggadic element occupies in reality a subordinate place in both; for in its origin, as we have seen, the Talmud was a commentary on the Mishnah, which was a collection of Halakoth. "It was in regard to Halakot that the principle of Tradition was most
rigorously upheld; because it was above all things essential that Halakah, the law of right conduct binding on every Israelite, should be accurately defined and based upon ample authority."—Herford, p. 12. Although the Haggadic portions of the Talmud—which include history, fable, legend, and speculations in astrology, astronomy, philosophy, and almost every imaginable science—are of much greater human interest, it is the Halakic portions which form the bulk, and hence it is its importance that determined the final authority for Jewish belief and theology. W. Surenhusen, Mischna (3 vols. 1698); Abbé L. Chiriani, Talmud de Bab. (1831), introduction valuable; Der Babylonische Talmud, Hebraïscht und Deutsch, ed. by Goldschmidt; F. Weber, Jüdische Theologie auf Grund des Talmud und anderer Schriften (1867); Bernfeld, Der Talmud (1900); Emil Deutsch’s Art. In Qlty. Review (1867): the articles “Mischna” and “Talmud” in the Jewish Encycl., where much bibliography will be found, though it omits some important works. [W.O.E.O.]

**Talsas** (1 Esd. 9.22) = Elasah, 1. 

**Tammah** (Ne.7.5 = Thamah). A Canaanite woman, the wife successively of the two sons of Judah, Er and Onan. On the death of these two sons Judah hesitated to give to the widow (in accordance with the Levirate Law) his surviving son Shelah, lest he should meet with the same fate as his brothers. Thereupon Tamar disguised herself as a harlot, and became by her father-in-law the mother of twins, Pharez and Zarah (Gen.38; Ru.4.12; 1 Chr. 2.4; Mt.1.3).—2. The sister of Absalom, violated by her half-brother Amnon, David’s eldest son, for which crime Amnon was murdered at the instigation of Absalom (2 Sam.13.1-32; 1 Chr.3.9). In Tamar’s touching remonstrance two points are remarkable: first, the expression of the infamy of such a crime “in Israel,” implying the loftier standard of morals that prevailed, as compared with other countries at that time; and, secondly, the belief that even this standard might be overborne lawfully by royal authority, thus foreboding that the law will not withhold me from thee.” The brutal hatred of Amnon succeeding to his brutal passion, and the indignation of Tamar at his barbarous insult, even surpassing her indignation at his shameful outrage, are pathetically and graphically told.—3. Daughter of Absalom (2 Sam.14.27). [L.C.N.]

**Tamar** (palm).—1. In I K.9.18, a Heb. reading for Tadmor.—2. In Ezk.47.19,48.28 the S. border of the Holy Land is defined as extending “from Tamar to the waters of strife [Meribah] in Kadeshi.” The latter being at S.E. corner, Tamar would be the S.W. boundary town, evidently at Tamarah, a village 6 miles N.E. of Gaza. The Talmud agrees with this passage when it excludes even Ashkelon from the Holy Land. [Juda. C. G.R.C.]

**Tamarisk** is substituted for the grove (of Beer-sheba) in Gen.21.33, by Celsius and others. [Grove.] This has been adopted by R.V. The demand for propagation exterminated all that grew at Bir-es-seba’a. The tamarisk (Tamarix gallica, var. nitidocca) is found frequently from the Jordan Valley to the Dead Sea and through Sinai, where moisture allows its growth. Other species occur sparingly, chiefly on the Mediterranean seaboard, as T. articulata (a handsome tree); probably a modern introduction and T. fruticosa. [Heath, H.C.H.]

**Tammuz**. This heathen deity is mentioned but once in O.T. (Ezk.8.14, “Behold, there sat the women weeping for Tammuz”). The prophet is, however, referring here to Jewish women practising an alien cult, and for this reason the subject is of interest to Biblical students. The name Tammuz comes from the ancient Babylonian Du-nu-er-i, meaning “son of life,” which is not, however, a Semitic name (Jensen and Jeremias). He was worshipped by Phoenicians under the name of Adonis (“adhon = lord”), by the Egyptians under that of Osiris, and by the Greeks under that of Dionysus. In each case his cult was connected with the decay and revival of vegetation. For this reason there was probably more than one festival in the year held in his honour (probably originally in spring and late summer). The mythological story tells us that he was a very beautiful youth, beloved of Astarte (the Istar of the Babylonians, and the Aphrodite of the Greeks), and killed by a boar while still in the full bloom of youth. As is always the case when a cult is taken over by different peoples, the worship of Adonis varied considerably in different parts of the world. The form which is of chief importance in the present connexion is that which obtained in Syria (according to the Talmud, Syria, vi.), the death of Adonis was mourned in Byblus once a year. Women wailed and wept, and beat upon their bare breasts, in memory of his tragic death, which was believed to have taken place on mount Lebanon; but on the next day his resurrection and ascension into heaven were celebrated. It is from the conceptions of the Babylonians concerning him that we gather that Tammuz was a vegetation god. In a Babylonian dirge annually chanted in honour of Tammuz in late summer, when the vegetation was beginning to decay, the following words occur: “Thou shepherd of the land and lord, king of the nether-world, king of the place of water, shepherd; thou art a corn-seed, which drank no water in the furrow, whose germ brings forth no fruit upon the field; a young tree, that was planted in a waterless spot; a young tree whose root was cut off; a plant which drank no water.” Another Tammuz-dirge says: “... The sun-god caused him to disappear in the land of the dead. Full of wailing was he on the day in which he fell into great anguish, in that month in which his life was cut off from completion ...” (Jeremias, Hölle und Paradies bei den Babyloniern, p. 9; 1900). It will be seen that these ideas are expressed mythologically in the Phoenician story referred to above. “The young tree” is the beautiful youth; he was killed when still quite young, or, as the song expresses it, “his life was cut off from completion.” The wild boar which killed him is the scorching sun—i.e. the sun-god—which caused him to disappear because he was dead.” The whole mythological conception probably arose in the first instance as follows:
Men saw that every spring the vegetation was renewed, and that in midsummer the scorching sun dried it up. According to the invariable rule among men in a low stage of civilization, natural phenomena were personified to make them comprehensible. Moreover, the belief that the heavens in which the spheres above is reflected on earth was axiomatic. The problem of the renewal and decay of vegetation was, therefore, explained by saying: "The fresh vegetation is Tammuz—that is the way in which he shows himself to men on earth; the scorching sun is only the way in which the wild boar appears; the dying vegetation is the way we see Tammuz dying"—the more actual reality being considered as going on somewhere else at the same time. To modern ears this sounds extremely quaint; but it was a matter of great seriousness to men of old, for they believed that the renewal of the vegetation depended on the right performance of the ritual. There are many other elements which come into consideration in connexion with the subject of Tammuz-worship, which cannot be touched upon here. It must suffice to add merely that the weeping was to do honour to the god; and mourning was more specifically the duty of women for reasons which are likewise outside the scope of this article. [W.O.E.O.]

TANACH. [TAANACH.]

TANHU'meth, father of Seraiah, 3. The omission of some words in 2 K.25.23 makes him wrongly appear as a Netophathite (cf. Je.40.8).

TANIS [Ith.1.10]. [ZOAN.]

TAU'nach, travel with, war was (7).

TA'phath, daughter of Solomon and wife of the son of Abinadab, 4 (1 K.4.11).

TAP'phon, one of the cities in Judaea fortified by Bacchides (1 Mac.9.50). Probably the Beth-tappuah of O.T. [TAPPUAH.]

TAPPU'ah, a son of Hebron (1 Chr.2.43).

TARRAH, one of the towns in the allotment of Benjamin (Jes.18.27).

TARE'a (1 Chr.8.35) = TAAREA.

TARES. Undoubtedly the šeqâna of the parable (Mt.13.25) denotes the weed called "darnel" (Lolium temulentum). [Cockel.]
The word used by the Evangelist is an Oriental, not a gk. term. The darnel before it comes into earth looks very like wheat; hence the command that the siziânà should be left to the harvest, lest while men plucked up the tares "they should root up also the wheat with them." Dr. Stanley, however, speaks of women and children picking up from the wheat in the middle of the field of Concerned. The stalks, still called by the Arabs zu'wân, "These stalks," he continues, "if sown designedly throughout the fields, would be inseparable from the wheat, from which, even when growing naturally and by chance, they are at first sight hardly distinguishable." The grain-growers in Palestine believe that the zu'wân is merely a degenerate wheat, and that in wet seasons the wheat turns to tares. Pliny speaks of "Vuraine or Darnel" as "useful in Physicke."

Target. [ARMS.]

Tar-pells, The, a race of colonists who were planted in the cities of Samaria after the captivity of Israel (Ezr.4.9). They have not been identified with any certainty.

Tarshish', an important seaport, mentioned (Gen.10.4) with countries in and near Asia Minor (see 1 Chr.1.7). The navy of Tarshish visited Palestine every third year in Solomon's time (1 K.10.22). In another passage (2 Chr.1.17; 22.9) by J. of Sol. it is apparent that some attempt is thus made to harmonize the parallel passage (2 Chr.20.36, 37), which would place Tarshish not in the Mediterranean, but in the Red Sea. Probably, however, "ships to go to Tarshish" (from Ezion-gaber) is an ancient copyist's error, the corresponding passage reading "ships of Tarshish to go to Ophir." (In Arabia). The later Jewish commentators—perhaps puzzled by this slip—rendered Tarshish "the sea," as if from a root meaning "to foam"; and the LXX. also has this reading in one passage (Is.2.16). But Josephus (1 Ant. vi. 1) places Tarshish at Tarus in Cilicia, and the name of Tarshish "would apply to the cataracts of the Cydnus, on which river Tarus stands. The city was reached in ships, up the river, as late as Antony's age (Plutarch, Life of Antony), and was always an important trading place. The Jerusalem Talmud (Megilla i. 11), the Targums (as a rule), the Midrash, and Jerome, mention "Tarshish" with Josephus' country in mind and not at Tarus; and it was evidently in the Mediterranean (Jon.1.3.4.2). Tarus appears to be the Tarzi attacked by Shalmaneser II. in 834 b.c., and may be the Taratzi of the Amarna letters (Berlin 48). The old view that Tarshish was Tartessus in Spain (Bochart, Michaelis, etc.) is undoubtedly unfounded. Tarshish is unique among the countries which we are led to believe were "peacocks" are not found in Spain, while Tartessus—if it existed at all—was probably unknown in the E. till after the foundation of Carthage, c. 850 B.C., or after Solomon's time. The LXX. sometimes (Is.23.1,16,10,14,66.19; Ezk.33.13) renders Tarshish by "Karchedon," or Carthage—perhaps the Carthage which is noticed by Esar-haddon in 7th cent. b.c. in Cyprus; for (in Is.66.19) it is coupled with Phil (or Phut), Lud, Tubal, and Javan, in Asia Minor, and with the Moschi according to LXX. The materials brought from Tarshish, and the animals, alike require consideration: they included gold and silver, ivory, apes, and peacocks (1 K.10.22); —the last omitted by LXX. in 2 Chr.9.21, while the Gk. (Vat. MS.) in the earlier passage is quite different, mentioning "gold, silver, and stones chased and rough hewn." Jeremiah (10.9) notices silver from Tarshish, and Ezekiel (27.12, 25) mentions silver, iron, tin, and lead, brought in H. In his version of Concerned (8 Ant. vi. 2) reads "Ethiopians" for peacocks (tukkiyim in
TARUS
Heb.). Silver, gold, iron, tin, and lead were all in use before 1500 B.C. in Babylonia, Mattieue, and elsewhere. The gold appears, as well as the tin (used early—see LACHISH), to have come from the Caucasus, and from E. of the Caspian Sea. The Akkadians must have known it very early, and a text speaks of "mingling the copper with the tin." There still are silver-mines near Tarsus, and at Gunish Khana, W. of Trebizond. There are iron-mines at Unieh (Oenoe) in the same region, and the Chalybes were iron miners (Hamilton, Researches in Asia Minor, 1842, 1. pp. 169, 259, 274). Lead was also commonly found in Asia Minor and Syria. The word for "ivory" (shen-habbim), or "teeth of elephants," recalls the Tamil word hab for "elephant"; but the Assyrians called it habba, and the Egyptians eb, and elephants were found wild on the Euphrates in 16th cent. B.C. The Heb. goph, for "ape," is due to late translations—Syr. and Aram.—and the word appears to Josephus and the LXX. translators. The bird was probably known early—perhaps before 1000 B.C.—to the Greeks, since it appears in retai breeck at Knossos. But they called it taos the Arab. ταύως. We might quite as well compare the Egyptian tekkh for the "ibis." But in Tamil toger is the "peacock." The Black Obelisk of Shalmaneser II. (c. 830 B.C.) represents Asiatic bringing apes as tribute, and an elephant is also represented, with a male and a female, at Ashkelon. Trade with N. India—overland to Assyria—which brought these objects, may well have been as old as Solomon's time; and they might easily have been carried farther W. on the trade route, to the important port of Tarsus, which was a Phoenician city adorning Baal-Tarsis, who is also represented (on the Gk. coins bearing the legend Μητροπόλεως Ταρσός), standing on a monster, like the old gods of Syria and Assyria. There is no difficulty therefore in accepting the Jewish opinion that Tarsus was Tarshish. In Ps. 48.7 the ships of Tarshish are broken by the "east wind," which—blowing down the gorges of Galilee and Syria—would easily have made the service of the tabernacle, on taking the census of the people (Ex.30.13), does not appear to have had the character of a recurring tax, but to have been supplementary to the freewill-offerings of 25:1-7, levied for the one purpose of the construction of the sacred tent. After the return from Babylon there was an annual payment for maintaining the fabric and services of the temple; but the fact that this begins by the voluntary compact to pay one-third of a shekel (Ne.10.32) shows that till then no such payment had been recognized as necessary. A little later the third became a half and the name of this didrachm (Mt.17.24) was paid by every town. II. The kingdom, with its centralized government and greater magnificence, involved, of course, a larger expenditure, and therefore a heavier taxation. The chief burdens appear to have been: (1) A tithe of the produce both of the soil and of live stock (1Sam.8.15,17). (2) Forced military service for a month and a half (1Sam.8.12; 1K.22; 1Chr.27.1). (3) Gifts to the king (1Sam.10.27,16.20,17.18). (4) Import duties (1K.10.15). (5) The monopoly of certain branches of commerce (9.28,10.29,29.22,48). (6) The appropriation to the king's use of the early crop (Am.7.1). [MOWING.] At times, too, in the history of both kingdoms there were special burdens. A tribute of 50 shekels a head had to be paid by Menahem to the Assyrian king (2K.15.20), and under his successor Hoshea this assumed the form of an annual tribute (17.4).—III. Under the Persian empire the financial system which gained for Darius Hystaspis the name of "keeper king," involved the payment by each.
TAXING

satrap of a fixed sum as the tribute due from his province. In Judaea, as in other provinces, the inhabitants had to provide in kind for the maintenance of the governor’s household, besides a money-payment of 40 shekels a day (Neh. 5:14,15). In Ezra 4.13-20,7,24 we get a formal enumeration of taxes, or perhaps, at least, the three great branches of the revenue. The influence of Ezra secured for the whole ecclesiastical order, from the priests down to the Nethinim, an immunity from all three (7.24); but the burden pressed heavily on the people generally.—IV. Under the Egyptian and Syrian kings the taxation of the Jews became yet heavier. The taxes were put up to auction and “farmed.” The contract sum for those of Phoenicia, Judaea, Samaria, had been estimated at about 8,000 talents. An unscrupulous adventurer would bid double that sum, and then go down to the province, and by violence and cruelty, like this second of Persian collectors, exact a large margin of profit.—V. Under the Roman Government many taxes were paid in Judaea, but it appears doubtful whether the system in vogue was that of the old publicani under the republic, referred to above under the “farming” system. [PUBLICAN.] For Julius Caesar modified the system for Judaea. Taxing. Two distinct methods of taxation, or methods of receiving taxation, are mentioned in N.T., each of them by St. Luke. (1) The first (Lk. 2.1) is stated to have been the result of an edict of the emperor Augustus that all the world (i.e. the Roman empire) should be taxed. The date is immediately before the birth of Jesus—that is, according to the received chronology, in 4 B.C. (2) The second taxing (Ac. 5.37) is associated by St. Luke with the revolt of Judas of Galilee. This taxing took place in 6 or 7 A.D. It was conducted by P. Sulpicius Quirinus, who was at that time legatus of Syria (Josephus, 18 Ant. i. 1, ii. 1). The facts as to this second taxation are not questioned; but in regard to their earlier taxing of 4 B.C., various difficulties have arisen. The following are the chief objections which have been made against the acceptance of St. Luke’s account. (1) No direct independent evidence of any such decree of Augustus exists. (2) In Augustus’s time there would have been affected by any such decree during the time of Herod the Great (d. 4 B.C.), as it was not yet a Roman province. (3) As to Cyprianus, the words of St. Luke are ἡγεμόνευσεν τὸς Σιώρας Κυπρίανον (“when Quirinus was governor of Syria”). If by this is meant that Quirinus was legatus of Syria in 4 B.C., then it appears to involve an error in chronology. Further, a number of names of the Roman legati of Syria from 9 to 4 B.C. inclusive, and we can find no place for Quirinus. These objections, however, can be severally met, as follows: (1) Our history of this portion of the reign of Augustus is deficient, as Tacitus and Dio Cassius, our chief authorities, fail us here. Further, a number of items have been collected which, though not direct evidence, tend to show that a Roman census in Judaea at this time, in accordance with some general instructions given by Augustus, is not improbable (for these items, see Plummer on Lu.2.1 in International Critical Commentary). (2) When Palestine was divided among Herod’s sons, Augustus ordered the taxation of Samaria to be reduced; and this was before Palestine became a Roman province. If he could do that, he could require information as to taxation in Palestine (this is what is meant by ἀπογραφή). Herod would not have ventured to resist him. (3) The key to the solution of the problem as to Quirinus lies in the Gk. participle ἡγεμόνευσας. This verb is generic, and may express the office of any ruler, whether legatus or procurator. It does not tell us that Quirinus was legatus in 4 B.C., as he undoubtedly was in 6 A.D. Justin Martyr (Apol. i. 34) states that Quirinus was procurator (ἐπίτροπος) at the time of this census; and in the only other place where St. Luke uses the verb ἡγεμόνευσεν, he uses it of a procurator (Pontius Pilate, Lu. 22.1). Thus, though Quintillus Varus was the legatus of Syria at the time of the enrolment, yet Quirinus may have held some office by virtue of which he undertook the census. For recent arguments in favour of this view, see Ramsay’s Was Christ born at Bethlehem? See also Plummer, Internal. Crit. Comm. (on Lu.2.1), and in Hastings, D.B. iv. 183; P. Gardner in Encycl. Bibl. iv. 399. Tear-bottle. The phrase, “Put my tear into thy bottle,” occurs in Ps.56.8[9], and expresses, in an apocalyptic way, the prayer that God will bear in mind the Psalmist’s sorrow. The parallel phrase, “Are they not in thy book,” emphasizes the figurative character of both clauses. The interpretation of the word “memoratory” to small bottles is very doubtful, though at one time generally accepted, and probably by the passage cited. [w.o.e.] Tēbah, eldest of the sons of Nahor, by his concubine Reumah (Gen.22.24). Teballah, third son of Hosah of the children of Merari (2Chr.26.11). Tebeth, first month of the Jewish year (Neh.3.1). Teenphenes (Ezk.30.18) = Tahpanhes. Tehinnah, the father or founder of Irrannah, and son of Eshton (1Chr.4.12). Tee-tree. [OAK; TURPINTREE-TREE.] Tekōa or Tekoah, a town in the tribe of Judah (2Chr.11.6). Jerome says that Tekoa was 6 Roman miles from Bethlehem, and that as he wrote he had that village daily before his eyes. In the Onomasticon he represents Tekoa as 9 miles only from Jerusalem; but elsewhere he agrees with Eusebius in making the distance 12 miles. It is not enumerated in the Heb. catalogue of towns in Judah (Jos.15.59), but is inserted in that passage of Merari for which we know a “wise man” whom Yoab employed to effect a reconciliation between David and Absalom from this place (2Sam.14.2). Ira, the son of Ikesh, one of David’s Thirty, was called “the Tekoite” (2Sam.23.26). It was one of the places which Rehoboam fortified (2Chr. 15.16) on the borders of Judah [A.V.]. Some of the people from Tekoa took part in building the walls of Jerusalem, after the return from the Captivity (Ne.3.5,27). In Je.6.1 the prophet exclaims, “ Blow the trumpet in Tekoa and set up a sign of fire in Bethharremon.” Amos was a herdsman of Tekoa (Am.1.1). It is now the ruined village Teq'āa,
overlooking from a high ridge the desert of Judah (see 1Mac.9:33), 5 miles S. of Bethlehem, and 10 miles S. of Jerusalem. Bethlehem, and even Bethel, are visible thence. Ashur, a grandson of Judah (1Chr.2:24,4,5), was the "father" of the tribe of Tekoa. [C.R.C.]

Tekoite The. IRA, one of David's warriors, is thus designated (2Sam.23:26; 1Chr.11:28,27,9). [TEKOAH.] The Tekoites repaired two parts of the wall of Jerusalem (Ne.3,5,27).

Tel-abbib, a city of Babylonia where Jewish exiles had settled, beside the river (or canal) named Chebar (Ezk.3:15). As the scene of Ezekiel's labours seems to have been Babylonia, not Upper Mesopotamia, it is impossible to locate it on the Khabir, which, moreover, for philological reasons, cannot be the Chebar. The meaning of Tel-abbib is generally regarded as being "hill of corn," but Fried. Delitzsch suggests that it may be for "Tel-in-the-neighborhood-of-the-flood." The site is unknown. [CHEBAR.]

Telah, father of Tahan, 1 (1Chr.7,25).

Telaim, the place at which Saul numbered his forces before his attack on Amalek (15Sam.15,4 only). It may be identical with Telim. On the other hand, the reading of the LXX gives "Tel-Gilead," which, whatever its meaning, is and is followed (6 Ant. vil. 2) by Josephus.

Talassar (Assar's Hill) occurs in 2K.19,12 (A.V. Thela-aw) and Is.37,12 as a city inhabited by "the children of Eden." It is apparently the Tel-asur or Til-asuri of the Assyrian inscriptions, which, according to Tigan, was the name of the royal temple, of Babylonian origin, dedicated to the Semitic god Tarhesh, and is identified with the site of the ancient city of Eshar-haddon, who conquered the place, seems to say that the people of Mihranu called it Pitunu, and informs us that its inhabitants were people of Barnaku or Parnaku. Parnaku apparently lay near Mitanni (Upper Mesopotamia), and may, therefore, be the Biblical site assigned to Helena, the mother of David, and Reseph. As Asari was one of the names of Merodach, the form Telassar agrees with the statement made by Tiglath-pileser. It has still to be identified. [T.R.P.]

Tellem, a doorkeeper of the temple (Ezk.10,15); perhaps the same as Talmon.

Tellem, one of the cities in the extreme S. of Judah (Jos.15,24). It occurs between Ziph and Bealoth, but has not been identified.

Tel-harsa or Tel-haresha, probably "hill of the wood," is a Babylonian town or village mentioned in Ezr.2,59 and Ne.7,61. It was probably in the low country near the sea, in the neighbourhood of Tel-melah and Cherub, but is as yet unidentified. In 1Esd.5,36 it is called Thelersas.

Tel-melah is mentioned with Tel-harsa and Cherub in Ezr.2,59 and Ne.7,61. It means "hill of the sailor" (?) or "of salt") and is not yet identified. [T.R.P.]

Temelah is a name of Asher (Gen.25,15; 1Chr.1,30); whence the tribe called after him (Job 6,19; Je.25,23), and also the land occupied by this tribe (Is.21,13,14). The name is identified with Teima, a small town on the confines of Syria, on the road of the Damascus pilgrim-caravan. It is near Damat el Jendel. [DUMAH.]

Teman.—1. A son of Eliphaz, son of Esau by Adah (Gen.36,11,15,42; 1Chr.1,36,53).

2. A country. The Heb. signifies "south" (see Job 9,9; Is.43,6); and it is probable that the land of Teman was S. of Edom. It is mentioned with Edom and with Dedan (Je.49,7,8; Ezk.25,13). Eusebius and Jerome mention Teman as a town in their day distant 15 miles from Petra, and a Roman post. The gentilic noun of Teman is temam (Job 2,11,22,1), and Eliphaz the Temanite was one of the wise men of Edom. In Gen.36,34 the land of Temani is mentioned.

Temeni', son of Ashur, the father of Tekoa, by his wife Naarah (1Chr.4,6). Temple. In the early days of mankind, temples are said to have been of simple construction; yet they were considered the earthly resting-place of the god or gods. In process of time the god was worshipped under the symbol of a sacred stone or stones (the maccaboth, baetuli, or stelae), not only amongst Semitic races, but very generally, amongst primitive people throughout the world—the resting-place of the stone being the house of God (Beth-el). Eventually images of the god came into use, which the soul (or "double") of the god was believed to inhabit. Thus the temple became the dwelling-place of the god, body and soul—the god having a "double," for each temple erected in his honour. The variations in the forms of temples depended in a great measure on the condition of civilization of the rulers, geographical features of the country, climatic effects, the building materials available, and the stock from which the race was derived. When all is said, we must recognize that temples can only differ, one from another, in degree. During the past 50 years, constant efforts have been made to discover from what nation the Israelites derived their general scheme and plan for the construction of the tabernacle and king Solomon's temple. The world during this period has added enormously to its knowledge of the records of the past; but the Jewish tabernacle
still remains as an original conception. It is probably more easy to say what nations cannot have influenced the plan and construction of the tabernacle. Asia Minor, Persia, Greece, and Rome may be eliminated; and there remain for consideration only Assyria, Babylonia, Egypt, and Phoenicia. In Babylonia and Assyria the early temples, or ziggurats, were elevated to a height of from 100 to 150 ft., above the plain, by creating vast cubes of brickwork upon each other, in diminishing proportions, until a species of stepped pyramid was constructed, with the little temple on the summit. No resemblance can be traced between these masses of brickwork and the tabernacle and temple of Solomon and its courts. See illustration under Babel, Tower or. In Egypt there are few temples in existence dating before the 18th and 19th dynasties, except that of Gizeh, near to the Sphinx and Second Pyramid. This temple is in size between the tabernacle and king Solomon's temple, and in shape resembles the temple of Herod. It is built of granite, and is T shaped—square to the plan and construction of the compass, the head of the Τ to the E., the entrance of the temple being in the centre of the E. face, the end of the stem of the Τ to the W. In its orientation, and in the formation of its doorway, this temple is similar to the tabernacle. In size it is about 77 ft. long, 33 ft. wide, and is measured by the Egyptian foot of 13.3 in.—an early standard found, wherever ancient civilized races have built in the past. The dimensions therefore in units are, 70×30 cubits, with a porch of 70×20 cubits. There is little in this temple that can be said to foreshadow the plan of the tabernacle. The splendid temples of the 18th and 19th dynasties, of the great Theban period, are wanting in the "precise ornamentation and careful masonry of the old kingdom, the buildings of the new race are of the past to guide us as to the general design of the tabernacle, and the assumption seems to lead that it is, so far as temples go, an original design. When we come to the temple of Solomon, however—following the general plan of the tabernacle, double in all its dimensions—we shall find that it is in all probability influenced in its details by the master-mind of the chief architect (Hiram of Tyre) and his Tyrian workmen, who were sent by Hiram, king of Tyre, to assist king Solomon in carrying out the work. And we may be certain that in all its architectural details, excepting the ruling dimensions, it was Phoenician or Tyrian. The Phoenicians were expert builders; the people of Tyre had magnificent temples to Hercules; and Herodotus says of them (ii. 44) that at the temple of Heracles, at Tyre, there were two pillars, one of gold and the other of emeralds shining by night.—The Temples of the Jews. The accounts of the measurements of the temples, successively erected to the W. of the threshing-floor of Araunah the Jebusite, present difficulties when taken singly: but when compared, the difference in the dimensions of the general plan of these temples vanish: and it is evident that the Holy of Holies and the altar remained in the same position from the time of king Solomon until the final destruction of the temple of king Herod by Titus. The continuity of the scheme can be shown as follows. From a temple square of 133 ft. (the exact dimension of the inner court of the temple thought out by Ezekiel), there were three squares of 100 cubits each, lying E. and W.; but, considering the present only the two western squares, we have a total of 100 cubits between the centre of the altar and the centre of the vail. The temple of Zerubbabel was, no doubt, restored in a great measure on the plan of Ezekiel. The temple of Herod followed suit. According to the Mishna, the distance from the centre of the altar to the centre of the vail was 100 cubits, as follows: In cubits—half altar 16, altar to porch 22, thickness of porch 6, width of porch 11, width of temple wall 5, length of holy place 40; total 100 cubits. With this dimension fixed, the records concerning the temples can be understood with greater facility.

—Solomon's Temple. The idea of a permanent house of God (instead of a tent or tabernacle) originated with king David; but as he was a man of war, and had shed blood, his work in this respect was left unfinished. In his stead Hiram of Tyre was instructed by the Almighty to king Solomon (2Sam.7:5-13; 1K.5:3; 1Chr.28:6). Detailed measurements of the building are given (1K.6 and 2Chr.2): but

there is not yet sufficient information to draw up a correct restoration of the plan and elevation of the temple buildings, in the absence of any knowledge of similar buildings elsewhere. By doubling the dimensions of the tabernacle and its courts, we arrive at the first dimension of 100 cubits from the centre of the altar to the centre of the vail; and these two centres are the centres of two contiguous squares of 100 cubits a side, lying E. and W. Thus we arrive at the dimensions of the courts of Solomon's temple, the front of the porch of the temple being flush with the line joining the two squares. The Holy of Holies, Holy Place, and porch, taken together, were 70 cubits in length and 20 in width; and the outer wall of the temple on N., S., and W. was from 10 to 16 cubits thick, according to various opinions, with three tiers of little chambers in the thickness of the wall: 5 cubits wide in the lower tier and 7 wide in the upper tier. What purpose these little chambers served we have no information. The temple measured about 80 cubits from E. to W., and from 50 to 60 cubits from N. to S., according to various estimates.—Heights. The height is given (1K.6:2) as 30 cubits, and the height of the porch (2Chr.3:4) 120 cubits. This latter height of 120 cubits for a porch of 11 cubits wide seems to be excessive; and some commentators consider this number to be corrupt, and suggest 20 or 30 cubits in lieu; but both Josephus (8 Ant. iii.) and the Talmud assert that not only the porch, but also the whole body of the temple, was 120 cubits in height.—Internal Supports. With an interior width of 20 cubits (about 34 ft.), some supports would be required for the roof; and it has been suggested by Mr. Ferguson that there were two rows of seven supports, one on each side, at 6 cubits from the wall, leaving a central aisle 8 cubits wide; thus dividing the length of the Holy Place into bays of about 8 cubits each. In the Holy of Holies, the spacing would be something less. Of any upper chamber above the Holy Place there is no mention; but if the account of Josephus is correct, there is much space that was not occupied by the holy places.—Pillars. There is no considerable difference of opinion as to whether the pillars Jachin and Boaz, at the porch of the temple, were attached to the porch; or were detached, and in front of it (1K.7:15). It is stated, however (2Chr.3:17), that these two pillars were reared up before the temple, one on the right hand and the other on the left. They were 12 cubits in circumference and 18 cubits in height, with capitals 5 cubits in height, and with, apparently (1K.7:19), an entablature 4 cubits high joining the two capitals: giving altogether a height of 27 cubits.—Inner Court. The enclosure of the court of the temple (1K.6:36), 200 cubits long and 100 cubits in breadth, was made of three rows of hewn stone and a row of cedar beams, probably 10 cubits in height, double of the height of the curtain enclosing the tabernacle. There is no mention of any gate to this enclosure of the inner court; and as the term "inner court" is used, it may be assumed that there was an outer court, to which the Temple, Shallecheth and Parbar belonged.—Position of Solomon's Temple. We have certain data as to the position. First, we have the outer wall of Herod's temple and courts, still in existence; the interior of which is called the Noble Sanctuary, with the Qubbet es-Sakhrah erected on the highest point. In this space, about 200 cubits by 100 cubits, we may be certain that the temple was situated; and this space is further circumscribed by a escarp of rock and ditch cut in the rock E. of the Golden Gate, giving a four-sided figure, about 900 by 1,000 ft., i.e. nearly square. Within this is part of the eastern hill of Jerusalem, usually called Mount Moriah, the ridge of which runs from N.W. to S.E. The only portion of the ridge suitable for the temple—with its courts at least 200 cubits from E. to W., and space for worshippers to the E.—is upon the comparatively flat summit near where the Qubbet es-Sakhrah stands. Moreover, we know (2Sam.24:18) that the altar was spread over a great space. It is upon this that the temple was erected, the space being filled in by the temple hashannah of Arahem the Jebusite. Now, threshing-floors in Palestine are placed on high exposed positions, where the wind will blow away the chaff; so that the threshing-floor would have stood without doubt on some flat and elevated space on the ridge. Again, we are told that Arahem and his sons hid themselves (1Chr.21:20), so there was probably a cave near it; and a cave is common in Palestine, for the storage of wheat. We have then here the cave of the Qubbet es-Sakhrah, with the flat space on the S. as the threshing-floor; and we may be sure of the location of the temple to within a few feet.——The Causeway and the Gates Shallecheth and Parbar. Of these there is only mention in 1Chr.26:16 in connexion with the guarding of the gates of the outer court. They are all still in existence. The causeway is on the 2,420 level, giving a passage through the Bab es-Silsileh (at Wilson's Arch)—no doubt the Gate Shallecheth. The Gate Parbar is probably one of the suburban gates still piercing the old
walls, called respectively Barclay's Gate and Warren's Gate. The store-house (Asappim) is still unknown.—Temple of Ezekiel. The vision of the temple and courts seen by the prophet Ezekiel, while residing on the banks of the Chebar, in Babylonia, in the 25th year of the Captivity (574 B.C., is entirely in keeping with the development of Solomon's temple, and its plan was probably followed in the erection of the temple of Zerubbabel.—Temple of Zerubbabel. What little is known of this temple, shows that it was in keeping with the plan of Solomon's temple and the vision of Ezekiel (Ezr.6:3). Height 60 cubits, breadth 60 cubits, with three rows of great stones, and a row of great timber, as in Solomon's temple (I Kgs.6:36).—Temple of Herod. For our knowledge of the temple of Herod we are indebted principally to Josephus (Antiquities and Wars) and to the Talmud (Tract, Measurements of the Temple, Mishna). The N.T. contributes very little to our topographical knowledge. The temple of Herod and its

inner courts occupied the same position, on plan, as those of Solomon and Zerubbabel, except that the borders were extended. The Holy of Holies, the Holy Place, and the centre of the altar occupied exactly the same sites, but the two courts, of 100 cubits a side each, were extended to N. and S. 17½ cubits, so as to measure 135 cubits in width, and there was a third court to the E. of 135 cubits a side, which was used for the people of Israel to assemble in (the Court of the Women). It is mentioned in the vision of Ezekiel, and probably was made in the time of Zerubbabel or in earlier times (2 Chr.29:4; Ezr.10:9). These courts were surrounded by buildings of great strength and

magnificence, and together were called the 'inner courts' of the temple, and none but Jews were permitted to enter them. The two eastern courts were consecrated to the use of the priests only, and the buildings around them were so arranged that the inner portions were on the consecrated ground and the outer portions were common to all Jews; so that priests and people would meet for many purposes in the same building. Beyond these buildings was a raised space, 6 cubits higher than the level of the outer courts. It was called the hil (soreg), 10 cubits wide, with a reticulated wall enclosing it, 2 cubits in height, on which were inscribed in Gk. notices forbidding Gentiles to proceed further. One of these inscriptions has been recovered, and is now in the Museum of the Palestine Exploration Fund. King Herod undertook the rebuilding of the temple and its courts; but he was obliged to intrust all work within the inner courts to the priests, as Gentiles were not permitted to enter. He very much enlarged the outer courts, making the whole space double the area which it had in Solomon's time of Solomon's temple. It is said that it has been increased to a perimeter of 6 furlongs; and this would accord with the indications of the existing remains. In thus increasing the area, the only space available was towards the S., where the buildings connected with Solomon's palace are said to have stood. The whole area of the temple of Zerubbabel was surrounded by magnificent masonry, of great height; which remains to the present day as the finest piece of masonry of ancient times left to us. The S. wall is 922 ft. in length, and in some places 200 ft. in height, and the E. wall extends to the Golden Gate, a distance of 1,100 ft. At the S.E. angle, the old wall of the palace of Solomon was taken in, and formed part of the outer wall. At the S.W. angle the work is all Herodian, and had to be built across the Tyropoeon Valley to complete the rectangle required. The outer wall (as it stands at present) is over 140 ft. high, at the S.E. and S.W. angles, from the centre of the wall to the floor of the Noble Sanctuary, 2,420 ft. The courses of stones are from 3 ft. 6 in. to 4 ft. in height, and some of them are over 30 ft. in length, and weigh nearly 90 tons. They appear to have been quarried in the royal caverns, under Bezetha, and to have been brought to the Noble Sanctuary by a rock-cut passage under the Antonia, the bed of the quarry being higher than the level of the courts of the temple. —The filling up of the space beneath the outer courts and the rocks. This filling has taken place at different epochs. The most ancient filling is probably that from the S.E. angle to the Triple Gate on the S., and to the Golden Gate on the E., probably executed by king Solomon as part of the Millo. At the Triple Gate and Golden Gate the levels of the sills near the rock (2,380 ft.) are about 40 ft. below the level of the outer courts (2,420 ft.); but at the S.E. angle the rock (2,280 ft.) is about 140 ft. below the level of the courts. The portion above 2,380 ft. is occupied by Solomon's stables (vaults); but below there appears to be solid masonry. In it is built the passage for the blood, the floor of which is at a level of 2,347 ft., near the rock. On the W. side there is, on an average, 50 ft. of
TEMPLE

filling from the rock to the level of the courts, which is either solid or vaulted. Nothing is known of this, except where it is pierced by the suburban gates, or by tanks which have been explored. At the S.W. angle is the portion of the wall added by king Herod. Here there is about 130 ft. of filling, 110 ft. of which appears to be solid, and 20 ft. of which is occupied by late Roman and Saracen buildings. On the E. side, to the N., beyond the limits of the temple, there is a very extensive filling up across the valley, near the Birket Israel, of about 140 ft., a great portion of which appears to be solid. In the centre of the courts, where the rock crops up, a number of tanks for holding water have been discovered and explored.—The outer gates and porticoes. The outer wall of the courts was adorned by cloisters or porticoes, with flat roofs, on which the soldiers keeping watch over the temple could walk. On three sides—E., W., and N.—these porticoes were enclosed by the temple wall, but on the S. side there was a great portico, or Stoa Basilica, about 60 cubits wide. Thus the interior space of the courts would be about 500 cubits a side, as stated in the Talmud. According to Josephus, there were eight gates to the outer courts of the temple; on the W. four. The first gate was called the causeway. Shallecheth, which still exists as Bab es-Silsileh, going over Wilson's Arch to the king's palace, on the level of the outer courts, 2,420 ft. The two suburban gates S. of the causeway are those of Robinson's Arch and Barclay's Gateway. At Robinson's Arch, the Stoa Basilica opened out on steps over an arch of 40 ft. span, leading down to the suburbs. At Barclay's Gateway steps went down in the courts of the temple to a gate, probably Farbar, leading to the marble pavement of the street which ran along the western wall at level 2,360. N. of the causeway is Warren's Gate, which is the gate leading to the "other elam and the land of Caspia" (Sheshan) called Antipatris, which appears in the Talmud. The level of the suburbs is reached by a flight of steps inside the temple courts. On the S. side were the two Huldah gates of the Mishna (Middoth i. 3). These are represented by the two ancient gates now existing, equidistant from the corners of the wall and from each other. One to the W., called the Double Gate, has a double passage, with a total width of 40 ft.; the roof, supported by great columns, being flat domes, highly ornamented with Herodian tracery. The other, to the E., is now a triple gate, altered probably in the time of Justinian; but there are still steps in the pavement, which shows there was a double gate and passage, similar to that on the E. Both these gates and passages led upwards as tunnels under the Stoa Basilica, to a distance of 190 ft., where they opened on the Court of the Gentiles. On the E. side there was but one gate, at the extreme N.E. corner of the Court of the Gentiles, called in the Talmud the Gate Shushan, through which could be seen the high-priest, who burned the heifer, going out to mount Olivet. This gate is mentioned by the prophet Ezekiel (44:2) as the gate that shall be shut, that no man may enter in by it, "It is for the Prince." It is now represented by the Golden Gate; and, in accordance with Moslem tradition, it is still walled up, probably owing to the words of Ezekiel. The portion of the gate which is visible to the E. is said to be Christian of the 4th to 5th cent.; but the substructures are very ancient (pre-Herodian), probably dating back to the Jewish kings or king Solomon. In the N. was the Gate Tadi, leading direct from the Court of the Priests to the outside. —Gates of the Court of the Priests. There were seven gates: on the N. three, on the S. three, and on the E. one—the Gate Nicanor, leading to the Court of the Women. Of the three S. gates we have now no record, but two of the N. gates can be identified. The westerly one, this scarped rock was the Gate Tadi, the position of which can now be traced. This gate appears only to have been used for the priests to retire by unobserved. The temple itself was 100 cubits in length and 100 in breadth at the porch, but 70 cubits in breadth W. of the porch; the porch was 22 cubits in breadth, and the building itself was 120 cubits. In the temple of Herod, the porch was double the width of the original porch of king Solomon; therefore it encroached 11 cubits into the altar square. On the E. side also the altar square lost 11 cubits, owing to the Gate Nicanor and its gallery being accounted part of the Court of the Women. Thus there were only 76 cubits (instead of 100) between the porch and the Court of the Women, as follows: From the porch to the altar 22, width of altar 32, Court of the Priests 11, Court of Israel 11; total 76 cubits. To the E. of the Court of Israel, the spot allotted for the assembly of the people (called the porch of the Women), originally 100 cubits sq., was now increased to 135 cubits sq. This court, though first appearing in the vision of the prophet Ezekiel, was probably constructed in the time of king Solomon (see 2 Chr. 29:4; Ex. 10:9; Josephus, I. 11 Ant. v. 3).—Solomon's Porch (Ac. 3, 11) was the eastern cloister, or portico, of the Court of the Gentiles, running from the Golden Gate to the S.E. angle, and so named because it was the first cloister raised up in the time of Solomon (5 Wars v. 1).—The Beautiful Gate was the Gate Nicanor, leading from the Court of the Women to the Court of Israel
and the Priests (5 Wars v. 3; 6 v. 3). Josephus states that the nine gates closing the two sides of the Priests and the Hebrews, were 30 cubits in height, and covered with gold and silver, but that the one gate which opened on the E. over against the gate of (and without) the holy house (i.e. leading into the Court of the Priests from the Court of the Women) greatly excelled in magnificence the other nine gates, and was of Corinthian brass, in height 50 cubits, and adorned after a most costly manner, as having much richer and thicker plates of gold and silver upon them than the others.

[c.w.]

Temptation. [Satan; Fall, The.]

Temptation of Christ. (1) The Records. The brevity of St. Mark's evangelist corresponds to his method throughout, and may be merely the result of condensation. It is therefore quite uncritical to employ it to disarrange the contents of the other Evangelists. St. John's omission occurred when the narratives of SS. Matthew and Luke must surely have been in process (Cf. Bovon, N.T. i. 234.). (2) The Antecedents. All temptation must be interpreted in relation to the previous experience. The records concur in placing Christ's immediately after His baptism. Spiritually, this means that the human nature is strengthened by the Spirit, before being sent to the wilderness. Intellectually, that the conscious entrance on Messianic office determined its form. Most significantly also this sequence is affirmed by all the records to be divinely determined: Mk.1.12 ("the Spirit driveth Him forth," εὐαγγέλιον); Mt.4.1 ("led up of the Spirit," ἀνήλθεν); Lu.4.1 ("was led by the Spirit," ἀνήλθεν). (3) The Actual Temptation. It is a widespread human experience that self-absorption in a great purpose will render the individual superior to, or unconscious of, physical needs, over an interval determined by the intensity of that self-absorption. The forty days may signify the actual period, or, generally, a considerable time. For the agent of the Temptation, cf. Satan. (i) The first temptation. Conscious of the purposes of more than human power, the suggestion is to employ it to Himself. Now, Jesus had done no miracle as yet. If He had yielded to this temptation, would He not have abused and perverted a trust? The sublimity of His decision consists in "declining to use for His own convenience what He regards as a sacred deposit committed to Him for the good of others" (Eecce Homo). Jesus resigns Himself, with absolute submission, to the Heavenly Father's care. The basis of this confidence is expressed in words from Dout.8.3. (ii) A second temptation follows whose exquisite subtlety consists in its being founded upon this very faith. It is further fortified by a scriptural appeal. If, in this confidence, Jesus would cast Himself from the temple heights, and descend, borne on angels' wings, into the midst of the assembled worshippers, would not give the noblest demonstration of His faith while utilizing His entrusted power, not on His own behalf, but expressly for the multitude for whose edification it was given Him? This temptation exaggerated a truth. Confidence in the Fatherly care must not be pushed to extremes by presumption or self-will. Christ's scriptural answer is a sublime illustration of His faith. His reply is, "If thou be the Son of God, cast my own body six cubits into the air; and when again, Thou shalt not tempt the Lord thy God," (iii) The third temptation. The last assault, for the moment, on Jesus' self-mastery consists in a vision of universal empire secured on condition of employing unspiritual means. This vision of the kingdoms of the world and the glory of the F. would that angels did minister etc. This early stage the universality of the Gospel was before the mind of Jesus Christ (cf. Rev.11.15). This temptation is to secure that ascendency, but by unspiritual means (cf. Mk.8.33). (1) The historic character of Christ's temptation is morally certain. (i) Contemporary thought and feeling have ascribed such ideas to Him. "The views presented by the Tempter lay closer to the sentiments of the Jewish people than the ethical ideal of the Messiah existing in the mind of Jesus" (Schmid, Bibl. Th., N.T. 50). (ii) These conceptions are in perfect harmony with the teaching of Jesus, and with His character. (iii) The singular unearthing, sublimity of the unhypocriticalness is the strongest moral evidence to its reality. These three considerations point to the imposibility of its having been invented. Accordingly even the extremes of criticism acknowledge that this narrative must have been derived from Christ Himself (cf. Holtzmann, Life of J. 143; Wendt, Teaching of T., 97). (5) Its Objective Character. The essentials of the narrative are neither the exceeding high mountain from which were rendered visible all the kingdoms of the world and the glory of them nor the rapid moment of time in which this was beheld. It is obvious that such a vision must have received at least a mental amplification. But the narrative indisputably declares that the entire experience was not a mere self-created train of thought, but objectively presented, and that from without. The personality of the Tempter was not a matter of doubt in the precipices of N.T. thought (cf. Mt.8.13, 15; R.V.); and Bergsagel, Teaching of T., 22. The gospel which dwells most on His humanity says distinctly that Satan "departed from Him for a season" (Lu.4.13). Temptations would return (cf. Mt.16.23; Lu.22.28; Jn.14.30; Heb.2.18,4.15.) (7) The Bearing of Christ's Temptation on His Sinlessness. (i) The temptations, rising far above the level which temptation assumes with men, and meeting Him on these refined and unearthly levels, in relation to His self-less devotion to the loftiest interests of mankind, are in themselves a significant revelation of character. Moreover if, as is universally recognized, these inward experiences must have been related by Christ Himself, they affirm a serene unqualified consciousness of victory which would be inconsistent with sincerity in sinful human beings, but is perfectly consistent with the self-consciousness which could say "the prince of this world cometh and hath nothing in Me"; nothing, that is, which he can call his own. And further, the moral decisions of Jesus in temptation are generally confessed to manifest a perfect judgment. Indeed we are not aware that our Lord's decisions in temptation have been adversely criticized (cf. Heb.4.15.) (ii)
Apostolic testimony declares that this is the Incarnate One. Incarnation is assumption of the constituent elements of humanity by a Person Who is divine. He took into permanent unity with Himself the faculties common to man—body and mind, etc.—so that His divine self became the center of these human elements, which had no separate human personality of their own. From this must follow that it was impossible for Jesus to sin. It was not impossible that He should be tried and tempted, and that His human faculties should feel the force of the temptation, as it felt all the natural and sinless longings inseparable from human nature. What was impossible, by the very constitution of His being, was that His human will should yield. The truth of this appears irresistibly if we attempt to realize the existence of sinfulness in the humanity inseparably united with God. Of course He could have sinned, if He had willed; but the thing impossible to Jesus was the choosing of the evil: "Hanc cupiditatem Christus et sentire posset, si haberet; et habere si velit: sed absit ut velit." —St. Aug. Op. Imperf. C. Julian, iv. xlviii.; Works x. p. 1867; Mill, "Sermons on the T.," Ch. Qfly. Rev. vol. xvi. p. 290. (8) Christ's Temptation and Adam's. Five; and a few other parallels. Certainly there seems in the gospels a conscious comparison: Adam in the garden, Christ in the wilderness; Adam in plenty, Christ in want; Adam defeated, Christ victorious,—the parallels in the Temptations themselves are surely not accidental. Christ, in originally relating them, threw light on the gospels of Christ. In the story of the Temptations in the gospels of St. Mark, and the Pauline contrast between the first man and the Second Man seems founded in the most primitive data of Christianity. (9) Christ's Temptation and Ours. The impossibility of sinfulness necessarily sets Christ's temptation altogether apart from ours. But this is no argument against the truth of this experience. For the nature of Christ's sinlessness makes His temptation entirely different from ours (Heb.4.15). And if He were merely to be regarded as an example He would surely rather discourage and depress than secure resemblance. The value of Christ's experience consists not so much in an example fitted to the limited understanding of the hearer, but in the idea of the strength to ensure our victory. The apostles who taught that we "should follow His steps Who did no sin" taught also that He Who did no sin dwelt in the believer, and that Christ in us was the hope of glory. Moderns who teach the former without the latter set indeed Christ's temptation in our own breast, and the gospels of Christ deprived it of the spiritual force which renders imitation possible. Among modern literature on Christ's Temptation see the admirable chapter in Ecce Homo: Bonon, Theologie du N.T. i. pp. 233-245; Latham, Pastor Pastorum; Hall, Christ's Temptation and Ours; Westcott, Introd. Study of the Gospels; Church Qfly. Rev. "Our Lord's Human Example," vol. xvi. No. 32; Knight, Hulsean Lectures (1907); Weston, The One Christ (ch. vii. "The Christ and Evil Spirits," 1907); W. H. Mill, Five Sermons on the Temptation (1844). [W.J.S.S.]

Ten Commandments. The law of the "ten words" (Decalogue) (Ex.34.28; Deut. 10.4 (Heb.), also called the "testimony" (Ex.25.16,16.34,31.18; 2 K.11.12), and the "covenant" (Deut.9.9), was promulgated, according to ancient Jewish tradition on mount Horeb amid thunders and lightnings, Moses alone going up to receive the Revelation. Some critics propose, however, that Moses projected the commandments to prophetic times, on the ground that they presuppose a settled agricultural life, and that they prohibit idolatry in terms which were unheard of in earlier days. It may be answered that the Israelites had lived an agricultural life in Goshen, and that the sad lapse into idolatry is characteristic of the sliding familiar in the experience of nations or of individuals. The decline of many civilizations may be adduced to support the evidence of Judges and 1,2 Samuel as to the declension of the people from earlier standards. We have only fragmentary histories of the prophets Elijah and Elisha. It is impossible to say whether he did or did not follow the traditions of C. 2, but the fidelity of the 7,000 (1 K.19.18) suggests knowledge of some such prohibition. Following Goethe, Zwei wichtige bisher unerorterte Fragcn, 1773 A.D., some critics discover an earlier ten words, referred to in Ex.34.28 and embedded in vv. 10-26: (1) Thou shalt worship the Lord thy God. (2) Thou shalt make thee no molten gods. (3) The Feast of Unleavened Bread shalt thou keep. (4) Every firstling is Mine. (5) Thou shalt observe the Feast of Weeks. (6) And the feast of ingathering at the year's end. (7) Thou shalt not offer the blood of My sacrifice with leaven. (8) The fat of My sacrifice shall not be taken to other gods. (9) Thou shalt not muzzle the ox when he is grinding corn. The first of the firstfruits of the land shalt thou bring to the house of Jehovah, thy God. (10) Thou shalt not seethe a kid in its mother's milk. This is really an arbitrary selection from a set of 12 precepts, and the mixture of moral precepts with directions concerning the ritual of outward worship by no means proves that such a code belongs to an earlier stage of national religion than that of Ex.20. Careful comparison, however, of the two versions of Ex.20 and Deut.5 reveals the fact that additions have been made to the earlier form. Thus in Ex. the reason given for keeping the sabbath (Cah.4) is that Jehovah is with them six days, when in Deut. it is said that the slave as well as his master needs rest. In C.5 parents are to be honoured, according to Ex. "that thy days may be long," according to Deut. "as the Lord thy God commanded thee, that it may go well with thee." In C.10 Ex. puts first "Thy neighbour's house," in Deut. his wife, woman taking the right place. It seems plain that the Commandments have been, so to speak, edited by prophetic writers who have added the reasons appended in several Commandments. We may reconstruct the earliest form as follows:—Law of piety. (1) Thou shalt have no other gods beside Me. (2) Thou shalt make unto thee any graven image. (3) Thou shalt not take the name of Jehovah thy God for a vain end (perhaps for purposes of magic). (4) Remember the sabbath day to hallow it. (5) Honour thy father and thy mother.—Law of probity and duty. (6) Thou shalt do no murder. (7) Thou shalt not commit adultery. (8) Thou
shall not steal. 

9. Thou shalt not bear false witness against thy neighbour. 

(10) Thou shalt not covet thy neighbour’s house; (then wife, slaves, cattle; his possessions). 

This division of the two tablets is the scheme known to Philo and Josephus. The R.C. and Lutheran Churches (differing herein from the Eastern and the Anglican) combine Cc. 1, 2 and divide Cc. 6 and 7 is reversed to bring together two Commandments which bring out the divergence of the family. This explains the order Mk.10.19, Ro. 13.9. The most important feature of this code is its combination of religion and morality. The law of piety teaches the sovereignty and spirituality of God, the law of probity and duty inculcates an austere code of morals which condemns criminality in word and thought as well as in act. Nothing more clearly shows the inspiration of such teaching wherein Moses and the prophets laid the foundations, deep and lasting, for a system of Christian ethics. Among duties to God, which carry with them no corresponding rights, in the first table comes duty to parents, who stand to young children in the image of God, until they awaken their conscience. This is an interesting point of contact with the teaching of the Lord’s Prayer, in which duty to an earthly father is made the model of duty to our heavenly Father. Christ fully recognized the divine authority of the Decalogue (Mt.5.17) at the same time that He condemned the alliance of the Law with the grace and the power of the Holy Ghost. [LAW IN O.T.] S. R. Driver, Intro. to Lit. of O.T. (1891); W. R. Harper, Amos and Hosea (1907); W. P. Paterson, art. “Decalogue,” Hastings, D.B. (5 vols. 1904). For legal points cf. Wiener’s Studies in Biblical Law; for homiletical purposes cf. R. W. Dale’s The Ten Commandments. [A.E.B.]

Tent, Tentmaker. [Handicrafts, (11,)]

Tenth deal (Ex.29,40, etc.) = one-tenth of an ephah; i.e., = an ormer. [Weights and Measures.]

Terah, the father of Abram, Nahor, and Haran, and through them the ancestor of the Israelites, Ishmaelites, Midianites, Moabites, and Ammonites (Gen.11.24-32). From the O.T. we learn that he was an idolater (Jos.24, 2), that he dwelt in Ur of the Chaldees (Gen.11, 28), and that in his old age he migrated with Abram and Sarah, and that he died at the age of 205 years (11,31,32). In Jewish and Arabic traditions Terah the idolater is turned into a maker of images; and “Ur of the Chaldees” is the original of the “furnace” into which Abram was cast (see Rashi’s note on 11.28).

Teshub (Heb. תֶשָּׁב, plural תֶשָּׁבוֹת). To call (a god) by name. The word is of uncertain origin, designating some object of idolatrous or superstitious regard, dating back to patriarchal times, and retained long among the Israelites. From Gen.31.34 it might be supposed that they were small objects, since they could be hidden under the camel’s harness; which the term might be regarded as life-size, to convey the idea of a man in bed. Laban calls them his “gods” (Gen.31.30). The R.V. preserves the word throughout untranslated, but A.V. has “images.” They seem to have been household gods, like the Lat. lares and penates, though they are also associated with the eye, and a graven and a molten image (Judg.17.4, 5), and they might be used for divination (Ezk.21.21[5.26]). Small figures in clay, supposed to be ancient teraphim, have been recently found in excavations in Palestine. Vincent, Canaan d’après l’exploration récente (1907). [W.R.T.]

Te’bimeth. [Turpentine-tree; Oil-tree.]

Te’resh, one of the two eunuchs whose plot to assassinate Ahasuerus was discovered by Mordecai (Esth.2.21,6.2). He was hanged.

Tertiuus, probably a Roman, was the amanuensis of Paul in writing the Ep. to the Romans (Ro.16.22)

Tevius, "a certain orator" (Ac.24.1) retained by the high-priest and Sanhedrin to accuse St. Paul at Caesarea before the Roman procurator Antonius Felix. Evidently he belonged to the class of professional advocates, and was of Italian origin. The oratory of his speech is designed to conciliate the good will of the procurator, and is accordingly overcharged with flattery. There is a strange contrast between the opening clause and the brief summary of the procurator’s administration given by Tacitus (Hist. v. 9).

Testament, or Will. Following the Vulg. and old Lat. versions, A.V. translates קָדוֹשׁ (Heb. קָדוֹשׁ) by “Testament,” from the Heb. קָדוֹשׁ which is the description of the blessing of the cup at the Last Supper, and in Heb.9. elsewhere the same word is rendered “covenant,” which R.V. prefers everywhere except in Heb.9.16,17, apparently considering that the context there requires the meaning of “will.” Certainly קָדוֹשׁ is the word for a will in ordinary Gk., but apparently the N.T. writers, following LXX., use it for a divine COVENANT to show that this is not an agreement between two contracting parties, but a disposition made by God alone of what is strictly His own. There is therefore no valid reason for rendering it anything else but “covenant,” though taken in the N.T. it is translated "covenant of the Hebrews" (18.10). [A.R.W.]

Testament, New. [NEW TESTAMENT.]

Testament, Old. [OLD TESTAMENT.]

Testimony (Heb. הָדַּקֵּד, plural הָדַּקּות). The word occurs 61 times, and is rendered WITNESS in A.V. (Num.17.7,8,16.2; 2Chr.24.6). The tables of the Law (oct. 10) are called the ‘hakdath’ (Ex.32.15,34. 29), and the tabernacle was the “tent of the ‘hakdath’” (Num.1.50,53). In Ex.16.34, we have a note that the pot of manna was finally
laid up "before the 'elahāh" (originally "before Jehovah," ver. 33), as was Aaron's rod (Num.17.10). The term in plur. refers to laws, and in Pent. appears to mean the tablets of the ten commandments in the ark (Ex.25.16, 36.33,34). The testimony given to king Josiah (2K.11.12) may have been the original tablets of the Law (see Deut.17.18). [c.R.C.]

**Teta** (1Es.5.28) = Hatita.

**Tetrarch**, the dependent prince of any small district; originally ruler of the fourth district in the day of the Jews, with the capital of the empire. The worship of Amon extended over the whole kingdom, and the kings erected the marvellous buildings, the reputation of which spread in foreign lands. Homer speaks of Thespes as ἅρικονεχαλαον, "with a hundred gates," meaning the numerous pylons placed near all the temples. The college of the priests of Amon was so powerful that in the time of the 21st dynasty they were unchallenged in the city, and usurped the throne. From that time dates the real decline of Thebes. The city was taken and plundered by Esar-haddon, king of Assyria, in 671 b.C., and again ten years later by Assur-bani-pal so completely that it never recovered from that blow. The 26th dynasty, the Persians, attempted to restore to Thebes something of its former magnificence; but in their time the fate of Egypt was decided in the Delta, and Thebes had become a second-rate city. A rebellion under the Ptolemies was quenched in a barbarous way by Ptolemy Lathyros; thenceforward Thebes decayed more and more rapidly. The city at the time of its great prosperity was built on both sides of the Nile. On the E. were the two great temples of Amon, the ruins of which are now surrounded by the villages of Luxor and Karnak. In the temple of Karnak is the wonderful hypostyle hall, built by the two great kings of the 19th dynasty, Seti I. and Ramses II. A temple of Zoroaster, a Persian, covers an enormous area; it may be described as a record of the history of Egypt; nearly all dynasties from the 12th to Roman times have added something to it. On the left side of the Nile is the necropolis of Thebes, with its funerary temples. There were a great number of them; a few have been preserved: Qurnah, Deir-el-bahari, the Ramesseum, and Medinet Habu, besides the substructions of others. In Christian times there have been several Coptic convents around Thebes; they are now abandoned and ruined. [E.n.]

**Thebes**, the greatest city of Upper Egypt. It does not occur under this name in O.T. It is called No-amon, "the city of Amon, or sometimes only No, the city." The Gk. translation is Drosopolis, the Greeks having assimilated Amon to Zeus. Thespes is referred to but seldom in the Bible, and only by the prophets. In their time Upper Egypt had been superseded by the Delta, which was also nearer to Palestine. Nahum (3.8) speaks of No-amon as a fallen city which had suffered from a pestilence of the Assyrians. Jeremiah (46.25. R.V.) threatens Amon of No with being delivered into the hands of Nebuchadnezzar, king of Babylon, and Ezekiel (30.14,16) also foretells the destruction of No; but it is not absolutely certain that No does not here apply to a city of the Delta. Thespes probably goes back to a very early antiquity; but it is not as ancient as Memphis. It does not appear in the inscriptions of the Old Empire, when Memphis was the centre of the political life. Apparently it was the 11th dynasty which took it as their capital and made the worship of Amon, the god of the locality, of great importance. The Hyksos, or Shepherd kings, did not rule over Thebes, where the native princes remained in power and at length succeeded in driving out the foreign kings. In the times of the 18th and 19th dynasties Thebes became a large and wealthy city and the capital of the empire. The worship of Amon extended over the whole kingdom, and the kings erected the marvellous buildings, the reputation of which spread in foreign lands. Homer speaks of Thespes as ἅρικονεχαλαον, "with a hundred gates," meaning the numerous pylons placed near all the temples. The college of the priests of Amon was so powerful that in the time of the 21st dynasty they were unchallenged in the city, and usurped the throne. From that time dates the real decline of Thebes. The city was taken and plundered by Esar-haddon, king of Assyria, in 671 b.C., and again ten years later by Assur-bani-pal so completely that it never recovered from that blow. The 26th dynasty, the Persians, attempted to restore to Thebes something of its former magnificence; but in their time the fate of Egypt was decided in the Delta, and Thebes had become a second-rate city. A rebellion under the Ptolemies was quenched in a barbarous way by Ptolemy Lathyros; thenceforward Thebes decayed more and more rapidly. The city at the time of its great prosperity was built on both sides of the Nile. On the E. were the two great temples of Amon, the ruins of which are now surrounded by the villages of Luxor and Karnak. In the temple of Karnak is the wonderful hypostyle hall, built by the two great kings of the 19th dynasty, Seti I. and Ramses II. A temple of Zoroaster, a Persian, covers an enormous area; it may be described as a record of the history of Egypt; nearly all dynasties from the 12th to Roman times have added something to it. On the left side of the Nile is the necropolis of Thebes, with its funerary temples. There were a great number of them; a few have been preserved: Qurnah, Deir-el-bahari, the Ramesseum, and Medinet Habu, besides the substructions of others. In Christian times there have been several Coptic convents around Thebes; they are now abandoned and ruined. [E.n.]

**Thebez**, a place memorable for the deaths of Abimelech (Judg.9.50). Eusebius (Onomasticon) places it in "in district of Neapolis, on the road to Scythopolis, at the 13th milestone." It is now the village Tibhās, 10 miles N.E. of Shechem (Neapolis) on the road to Beisân (Scythopolis). [G.c.r.]

**Theco-e**, Wilderness of. [Tekoa.]

**Theft**, [Curse; Deport.]

**Thelasa** (2K.19.12) = Thalassa.

**Theler'sas** (1Es.5.36) = Tel-harsa.

**The'man** (Ba.3.22.23) = Teman.

**Theocanu** (1Es.9.14) = Tikvah, 2.

**Theod'otus** an envoy sent by Nicanor to Judas Maccaabaeus, c. 162 B.C. (2Mac.14.19).

**Theophanies**. Since "no man hath seen God at any time," the special name of Theo-
Theophasies has been given to those manifestations of "the only-begotten Son" which began when the Lord God walked in Paradise in the cool of the day, and which culminate in His Incarnation and Resurrection. All these manifestations are associated in Mal. 3. of the "angel of the covenant," usually called the angel of JHVH (mal'âkh JHVH), or the JHVH-Angel. He is first mentioned by this title when He "found Hagar by a fountain of water in the wilderness" (Gen. 16:7), as He is said to have "found Jacob in Bethel afterwards (Ho. 12:4). With this appearance is connected the wrestling at Jabbok—an appearance which Genesis describes Elohistically by the words "God [âdônîm]" and "man [âškî]," not JHVH and Angel. According to Hosea, the God-man with Whom Jacob wrestled was Angel and JHVH, God of Sabaoth. The word Angel (mal'âkh) ordinarily means in Heb. "servant," from the 4th cent. (Ephph. Hacel, li), but it was that the address was to any pious reader, denoting, as it does literally, one who loved God or was loved by God. But the name is certainly that of an individual. In the first place, there is no evidence of its generic use as applicable to each and every Christian. Secondly, the name was common among both Jews (= Thessalonian Jews and Gentiles. Thirdly, the epithet spâstâre, usually applied to persons of rank, is in itself almost conclusive. This is evidently here and in Acts purely an official title, for it is prefixed to the names Felix and Festus (Ac. 23:26, 24:3, 25:25), implying that the person to whom it was ascribed belonged at least to the equestrian order, and was therefore a Gentle. Theophylact conjectured that Theophilus was even of senatorial rank. Oecumenius tells us that he was a governor. Other theories have variously assigned Antioch, Alexandria, Achaia, and Rome as the seat of his government or the place of his residence, and some writers have identified him with a high-priest of this name (Josephus, 18 Ant. v. 3), who held office for about five years, and was possibly that high-priest from whom Saul, afterwards Paul, obtained "letters to Damascus unto the synagogues" that he might bring any Christians he found there prisoners to Jerusalem. All that may with safety be inferred is that Theophilus must have been a Gentile of rank and consideration who came under the influence of St. Luke and was converted to the Christian faith. Two difficulties however arise. In the first place, it is probable that a Roman of professed Christian views would have had a high position in any part of the Roman world entrusted to him. In the second place, how would a Roman of high rank in the early part of the 1st cent. have had the name Theophilus originally conferred upon him? The answers are: first, his religious convictions, as was the ease with so many Christians at Rome in the 1st cent., may have been kept from the knowledge of his riches, for it is quite possible that the name was only given to him late in life at his baptism, and so was used and known only among Christians. [R.S.]—

The'ras (1 Esd. 8:41, 61) = AHA'VA.

Ther'meleth (1 Esd. 5:36) = TEL-MELAH.

Thessaloni'ans, First Epistle of St. Paul to the—

The Thessalonians on the sea and the great commercial road (Via Egnatia) leading from Dyrarrachium, through Macedonia and Thrace, to the mouth of the Hebrus, and so connecting Italy with Asia, made it a flourishing commercial town, great, rich, populous by its trade (Strabo, vi.), luxurious and licentious by its riches. Its population was mostly Greek; next in number were the Roman colonists, and there was a considerable Jewish population, having not a mere προσευχή, but a synagogue proper (Ac. 17:1). St. Paul's first visit to it was on his second missionary journey, when he first came into Europe (Acts 17:1). He then journeyed the sea route from Amphipolis and Apollonia (17:7), with two assistants, Silas (or Silvanus) and Timotheus (17:4, 16, 3:12; 17:14; Ph. 2:22). He turned first to the Jews, and gained few converts, but obtained greater access among the proselytes and Gentiles (Ac. 17:4). After a few weeks (cf. Ph. 2:22), where was a municipal community, Jews and Gentiles, the latter much more numerous (1Th. 1:8) and more numerous (1Th. 1:9) and more numerous (1Th. 1:9) and more numerous (1Th. 1:9) and more numerous (1Th. 1:9) and more numerous (1Th. 1:9) and further information or instruction for the Gospel. Thenceupon the Thessalonian Jews hastened to Berea, stirred up the multitude, and expelled him hence also; his associates Silas and Timotheus remained behind for the confirmation and instruction of the Bereans. St. Paul went to Athens and thence to Corinth, where he stayed a year and a half (17:5). Later on, the third great missionary journey led him repeatedly back to Thessalonica (20:1, etc.)—Occasion. The persecution against St. Paul soon attacked the Church (1Th. 2:14, 3:1, 6). Thus, not only personal love (2:17, etc.), but also anxiety (3:3), urged him back to Thessalonica. Twice he resolved to return, but circumstances prevented him (2:18). No longer able to resist their solicitude, he sent Timotheus from Athens (3:2) to obtain information, and strengthen and encourage them. The return of Timotheus (3:6), and his message, were the occasion of the eclipse. The message was mainly one of advice and counsel; and in spite of persecution and trial, was steadfast.
and unshaken (1.6.2.14), so that its members could be named as examples for the Christians in all Macedonia and Achaia (1.7); their heroic faith was everywhere spread abroad (1.8). Distinguished by active brotherly love (1.3.4.9.10), and on the whole by faithfulness, adhesion to St. Paul's rules of conduct (4.1), they kept alive the remembrance of him (3.6), and their church life had so flourished that the gifts of the Spirit (5.19) and prophecy (5.20) were manifest. But there were also defects and incompleteness (3.10); the two cardinal vices of heathenism, sensuality and covetousness (4.3, etc.), not always respected by presbyters (5.12), and, in consequence of inordinate attention to Second Advent, an unsettled and excited habit, with neglect of ordinary duties, and idleness (4.11, etc.). Lastly, there was perplexity as to whether deceased friends would share in the blessings of the Advent (4.13), about which probably a question had been asked (4.13, etc.).—Design. The period of apostolic life, the whole conduct, would strengthen them to persevering steadfastness in Christian confession. (2) Exhortation to relinquish moral weaknesses, by which they were still enfeebled. (3) Consolation concerning the deceased by more minute instruction about the Advent.—Contents. Two parts: (1) Introduction (1.1). (2) Joy and thanksgiving for the Christian soundness of the church (1.2.3). (3) The operation of the grace of God manifest in their conversion to Christianity: (a) the Gospel preached by himself with energy, confidence, unadulterated, pure, self-sacrificing love for his divine calling; (b) received by them with eager desire, and steadfastly maintained amid suffering and persecution (1.4-2.16). (4) The longing that came upon him, the mission of Timotheus, and the consolation imparted by the return of Timotheus (2.17-3.13). II. Moral and dogmatic (4.1-5.28). (1) Exhortation to make progress in holiness, to renounce the world, to continue in their profession (4.1-5.2). (2) To increase yet in brotherly love (4.9,10); and instead of surrendering themselves to unsettled disposition and excitement, to be diligent and laborious in their worldly business (4.11,12). (3) Comfort concerning those deceased before the Advent, and exhortation to be watchful and prepared for it (4.13-5.11). (4) Divers counsels, and wish that God would sanctify the Thessalonians wholly for the coming of Christ (5.12-24). (5) Concluding remarks (5.25-27). (6) Benediction (5.28).—Time and Place of Composition. (1) The time was not long after the founding of the church of Thessalonica. If Paul is aware of the impression made on him by his residence there; he lives and moves so entirely in the facts of the conversion of the Thessalonians and his conduct to them, that only recent events can be treated. The longing felt soon after his separation from them (2.17) still endures when he is writing (3.11). The whole moral and dogmatic part shows that this church, though already eminent and flourishing, as yet consisted only of novices. (2) When he wrote this epistle, he had already preached the Gospel in Achaia (1.7,8). According to 3.6, "now " (ἐπί), the epistle was written immediately after the return of Timotheus from Thessalonica. From Ac.18.5,6 we learn that Timotheus and Silas, returning from Macedonia, rejoined St. Paul at Corinth when he had not long been there; for until then the Gospel had been preached by him chiefly to the Jews. Therefore, there is no reason to doubt that this epistle was written at the beginning of St. Paul's stay at Corinth, in the year 53, perhaps half a year after his arrival in Macedonia or his flight from Thessalonica (Wieseler, Chronologie des apostolischen Zeitalter, p. 40 ff.).—The Subscription, "written from Athens," is probably a mistaken inference from 1Th.3.1. St. Paul sent Timothy to Thessalonica when at Athens on his way to Corinth. The view of Theodoret and others that it was written during the first visit to Athens does not fit in, nor the view of others that it was drafted in a later visit. There is no reason to imagine a short, unrecorded return to Athens during the year and a half at Corinth, merely to write a short and important epistle. Genuineness. The epistle is not clearly mentioned by the apostolic Fathers, because, being of an intimate personal character to an elementary church, it does not present such obvious points for quotation as other epistles. But the historic attestation is so old, continuous, and uniform, even to the possibility for doubting its authenticity on external grounds is inconceivable. Iren. Haeres. V. vi; Clement Alex. Paedag. i. p. 88 D; Tertull. De Resurr. Cœrn. 24; Orig., Contra Celsum ii. 65; Canon Murat.; Pessinţă; Marcion (in Tertull. Adv. Marc. v. 15), etc. The arguments of Schrader and Baur on internal grounds are purely fanciful and arbitrary, and will not bear examination. [Paul] W.M.S.

Thessalonians, Second Epistle to Occasion. After sending his first epistle, St. Paul received further news of the Thessalonian church. It had actively progressed in Christianity; faith had been confirmed; brotherly love had gained ground; the whole had increased in its enduring steadfastness under persecution, lately renewed, had been to St. Paul a glory in all the churches (2Th.1.3,4). But the thought of the Second Advent had given rise to new discontent. The question had advanced another stage; perplexity about deceased friends in reference to the Advent had been allayed by the first epistle; but now they thought it immediately at hand, to be daily, hourly expected. Some felt fear and consternation; others fanatical longing for the coming of the Lord and the completion of His kingdom. No wonder that unsteadiness, excitement, and neglect of worldly business, which had probably afflicted the church, greatly increased. Some maintained that they had received divine revelations about the nearness of the Advent, and even forged an epistle in the name of St. Paul. Appeal was made to some oral word of St. Paul (2.2), and explanations of the first epistle may have promoted that view; for though nothing was said about imminence, St. Paul said it would be sudden and unexpected (1Th.5.2,4), and spoke as if he and his contemporaries might hope to be alive (4.15,17).—Design. Threefold. (1) The apostle wished, chiefly, to
oppose the disturbing and exciting error that the Advent was even at the door, by further instructions. (2) He wished strongly and emphatically to dissuade from that unsettled, disorderly, and idle disposition into which the church had fallen. (3) He desired, by recognizing and praising their progressive goodness, to encourage them to steadfast perseverance. —Contents. (1) Salutation (1.1-2). (2) Introduction or retrospective portion (1.3-12). (a) Thanksgiving for progress made (1.3-4). (b) Hopes thus afforded in preparation for the Advent (1.5-10). (c) Prayer for continuance in that happy state (1.11,12). (3) The Instructive and Hortatory Section (2.1-3.15). (a) On the date of the Advent. (a) Caution against believing the Advent close at hand (2.1-3). (b) What must happen first (2.3-10). (c) Terrible fate of the apostates (2.11,12). (d) Thanksgiving that the Thessalonians' fate is so different (2.13,14). (e) Further advice for the preservation (2.15-20). (f) On the necessity of work. (a) Request for prayers for himself, which skilfully serves to predispose the readers to obey the ensuing commands (3.1-4). (b) Prayer for the same purpose (3.5). (c) Commands to make all work, and to communicate their refractoriness by the outward appearance of tranquility (3.16). (f) Final benediction, with attention drawn to the autograph (3.17,18).—Time and Place of Composition. Interpreters and chronologists agree that this second epistle was composed shortly after the first; with the exception of Grotius and Ewald, who hold that the second and first epistles were composed contemporaneously, which has nothing for it, but much against it. The arguments of Grotius may be measured by the fact that he holds 2.1-12 to refer to Caligula; whereas Caligula was dead in A.D. 41, 10 years before St. Paul came to Thessalonica. Ewald's chief argument is that this epistle has all the signs of first epistle. Paul's letter to the recently founded church; whereas in 2.15 it is clear that St. Paul had already sent some letter to the Thessalonians. In fact, everything in the second naturally follows on from the first. The following reasons prove that the second was composed not long after the sending away of the two assistants. Silas and Timothy, who was still in the company of the apostle (1.1), whereas Acts, at least, never informs us that after St. Paul left Corinth (Acts 18.18) these two apostolic assistants were again together with him. We find Timotheus again in the apostle's company, first at Ephesus (19.22), whilst there is no further mention of St. Silas in the Acts after his Corinthian residence. Besides, the relations and wants of the church are throughout analogous to those which are presupposed in the first. The same circle of thought occupies the writer; similar instructions, exhortations, warnings, and wishes are found throughout in both epistles. It is therefore to be assumed also that the second epistle was written during the first residence of St. Paul at Corinth; but, according to 2 Thess. 3.2, at a time when he had already suffered hostility on the part of the Jews, and, according to 1.4 ("the churches"), cf. 1 Cor. 1.1, Ro. 16.1, when branch churches had already been founded from Corinth—probably at the beginning of the year 54.—Genuineness. (1) As to the external evidence of Christian antiquity, the epistle is completely unassailable. Polyc. Ad Phil. 11 fin.; Just. Mart. Dialog. cum Tryph. col. 1686, p. 336 E, p. 250 A; Iren. Adv. Haeres. iii. vii. 2; Clem. Alex. Strom. v. p. 554, ed. Syrh.; Tertull. De Resurr. Carn. xxv.; Canon Murat.; Peshîṭû; Marcion, etc. (2) Doubts from internal grounds did not arise till the beginning of the 19th century. The arguments are purely arbitrary, and easily answered. This is the sign in every epistle: so I write, is specially for the Thessalonians, as they had been troubled by spurious letters; not for every church. —Interpretation of the Man of Sin, and the Prophecy (2 Thess. 2.3). It is founded on the language and threats of Joel, Zech. 14, Malachi, and especially of the book of Daniel. Westcott shows that there was probably not a portion book of Daniel. The prophecy for the Jews was more valued among the Jews of the apostle age than was Daniel. It was regarded with full reverence as an inspired revelation; our Lord Himself founded discourses upon it (Mt. 24:15; Mk. 13:14). The taste for apocalyptic literature was very strong at that time. St. John is a Praying book of prophecies in that book pointed to the existing era. Tacitus (Hist. v. 13) and Suetonius (Vesp. c. 4) allude to the expectations of the Jews founded on their ancient literature. The predictions are contained in Dan. 2, 7, 8, and 11, and give two descriptions of five monarchies, the first referring to Nebuchadnezzar, and the fifth the kingdom of God, which had been the main subject of St. Paul's preaching at Thessalonica. The seventy weeks had pointed to the existing era, so that men saw in the fourth monarchy, which was to be crushed by the kingdom of God, the Roman empire. "In the very same manner Daniel also wrote concerning the empire of the Romans," says Josephus (Ant. xi. 7). To St. Paul the fifth monarchy meant in all probability the First and Second Advent of Christ; the more readily because he did not see how vast an interval was to elapse between the two. The idea of sending the Thessalonians not to expect the Second Advent so soon as they thought; and reminds them of "what withholdeth"—i.e. the Roman empire or the Roman emperor, not yet crushed. The great opponent cannot be developed till "he that withholdeth" is gone; that opponent seems the same as the little horn of Daniel, which cannot appear till the fourth empire has broken up into ten monarchies. St. Chrysostom says, "Seeing that he says this of the Roman empire, he naturally puts it enigmatically and very obscurely, for he has no wish to subject himself to unnecessary hostilities and unprofitable perils. For had he said that the Roman empire would shortly after be dissolved, they would soon have transfixed him for a miscreant, and all the believers with him, as living and fighting for this end." St. Paul had been able to speak more clearly about it when he was with them; so how much more would he do now at Corinth. 2 Cor. 2.2-3. With regard to the Man of Sin, St. Paul draws his characteristics from the little horn in Dan. 7.
and 8.5. The Jews held that Antiochus Epiphanes had not exhausted the meaning of the prophecy, but looked on him as the type of some other Anti-christ, whom they still hoped would appear and be destroyed by the Messiah. The Christian interpretation only differed from the Jewish in holding that the Man of Sin, or Anti-christ, Daniel's little horn, would appear near the Second Advent instead of the First. This they had a right to do, as in Dan.12.2 the Rabbins first, and then the Christian Church, made the development of the Anti-christ. Dr Lightfoot thinks that St. Paul himself expected to see the development, and that he found the materials for it in the bitter, hostile, arrogant, persecuting, unbelieving Jewish spirit. The fulfilment did not come in St. Paul's time; but the spirit would be the same. The characteristics of the Man of Sin are that he is a human being, a single person, heading a movement, not atheistic but claiming personal worship, with power, signs, and lying wonders, not necessarily breaking with the Church, but forming an apostasy, and (according to Daniel) "wearing out the saints of the Most High", thinking to change times and laws." Against such a spirit men need constant warning; but the climax is not yet seen. [W.M.S.]

Thessalonica. The original name of this city was Therma; and that part of the Macedonian shore on which it was situated was called throughout the Roman period the Thermaic Gulf. The history of the city under its earlier name was of no great note. It rose into importance with the decay of Greek nationality. Cassander, son of Antipater, rebuilt and enlarged it, naming it after his wife, the sister of Alexander the Great. As the modern Saloniki, it is still, after Constantinople, the most important city of European Turkey. Under the Romans, when Macedonia was divided into four governments, Thessalonica was made the capital of the second; afterwards, when the whole was consolidated into one province, this city became practically the metropolis. Strabo in the 1st cent. speaks of Thessalonica as "the most important city of Greece." The region lay between Macedonia. To this busy city came St. Paul (with Silas and Timothy), during his second missionary journey, and thus Christianity was introduced into Thessalonica. Two facts illustrate the importance of this visit and journey, and throw light upon the two epistles to the Thessalonians. (1) This was the chief station on the great Roman Road, called the Via Egnatia, which connected Rome with the whole region to the N. of the Aegean Sea. Thus Thessalonica was an invaluable centre for the spread of the Gospel, being a close rival with Corinth and Ephesus for the commerce of the Levant. (2) The fact (vst.171) that here was the synagogue of the Jews in this part of Macedonia. This had evidently much to do with the apostle's plans, and also doubtless with his success. Trade would inevitably bring Jews to Thessalonica; and it is a fact that, ever since, they have had a prominent part in the scene of the apostle's work at Thessalonica. The synagogue of the Jews continued for three weeks (ver. 2); we are not obliged to limit to this time the whole stay of the apostles at Thessalonica. A flourishing church was formed there. "The Christian epistles show that the elements were much more Gentile than Jewish. The narrative in the Acts shows close familiarity with the political constitution of Thessalonica. Not only is the demus mentioned (Ac.17.5) in harmony with what has been above said of its being a "free city," but the peculiar title of 'proconsul' of the city is a title which would not be granted to a mere governor. (Ac.17.10) The term occurs in no other writing; but it may be read to this day conspicuously on an arch (the Vardar Gate) of the early Imperial times, which spans the main street at the W. end of the city. From this inscription it would appear that the number of politarchs was seven. At the E. extremity is another Roman arch of later date, probably commemorating some victory of Constantine. The main street, containing these arches and intersecting the city, is undoubtedly part of the Via Egnatia. During several centuries this city was the bulwark both of the later Gk. Empire and of the Christian Church, and was largely instrumental in the conversion of the Slavonians and Bulgarians. Thus it was known as "the Orthodox City"; and its struggles are very prominent in the writings of Byzantine historians.

Theudas (Gr.Θέυδας=Θεοδόρος αφιΘεοδότος: Schmiedel in Encycl. Bibl. iv. 5051) is Schmiedel's name for Theudas. The full name of Theudas in the Acts is Theudas, called Theudas, the first of the names. (Ac.5.36) in Gamaliel's speech before the Jewish Council at the time of the arraignment of the apostles. The date of this speech cannot be placed later than 37 A.D. According to Gamaliel, Theudas had pretended to be some great person. He was joined by about 400 men, but was slain, and his followers were scattered and brought to nought. Gamaliel then continues: "After this time rose up Judas of Galilee in the days of the taxing (ἐν ταῖς ἡμέραις τῆς ἁγγελίας); but he also perished, and his supporters were dispersed." The taxing here referred to is the famous registration with a view to taxation which took place in 6 or 7 A.D. in the Roman cities of Syria and Macedonia. (Lk.2.1). Hence the defeat and death of the Theudas mentioned by Gamaliel must have taken place before 6 A.D. Josephus, however (20 Ant. v. 1), gives an account of a certain Theudas who lived in the time of the emperor Claudius, when Fadus was procurator of Judaea. This Theudas persuaded many of the people to follow him across the Jordan, but Fadus attacked him suddenly, scattered his followers, and put Theudas himself to death. The date of these events is fixed, by the reference to Fadus, as falling between 44 and 46 A.D. The defeat and death of the Theudas of Ephraim was, at earliest, seven years after Gamaliel's speech, and nearly forty after the death of the Theudas referred to in that speech. If, then, there was but one Theudas, either St. Luke or Josephus is guilty of a chronological blunder. Interpolation has been suggested, but the differences between the Acts and Josephus are only conceivable when we regard this particular question of Theudas, the dependence of St. Luke on Josephus or vice versa
THICK TREES

THOMAS

has not been conclusively demonstrated. Hence we conclude that the Theudas of St. Luke is distinct from that of Josephus. Of those who take this view some identify the Theudas of St. Luke with one or other of the various insurrection leaders who (as we know from Josephus, e.g. 17 Ant. x. 8, 2 Wars iv. 1) were prominent in the last days of Herod the Great. Thus Sonntag identifies him with Simon, a slave of Herod; Wieseler with Matthias ("gift of God," cf. Θεοβάς, i.e. Θεόβαρος), a teacher of the law: see Josephus, 1 Wars xxxiii. 2. But these identifications with specified leaders are merely fanciful, and we conclude that the Theudas of the Acts is an otherwise unknown insurgent leader, whose defeat and death, in the circumstances recited by Gamaliel (Ac.5.35-39), took place some time before 6 a.d. See also A. C. Headlam in Hastings, D.B. (5 vols. 1904) iv. 750; P. W. Schmiedel in Encyc. Bibl. iv. 504-91; and F. C. Burkitt, The Gospel History and its Transmission, p. 106. [J. A. N.]

Thick trees are mentioned (as the translation of τευχά σύκηῳ) in Lev.23.40, Ne.8.15, and Ezk.20.28. According to the Talmud, Targums, and the Syr. version, the myrtle is intended. The names most commonly found in the context in the two latter passages, which makes it an improbable rendering. Trees full of boughs, or barrenness, is the Wycliff rendering. In Leviticus (l.c.) several ancient authorities read for "goody trees" (the translation in E.V. of τευχα σύκηαί), the citron-tree, but it is perhaps inadvised the citron-tree or North African cypress. [H. C. I.]

Thieves (R.V. Robbers), The two (Mt. 27.38; Mk.15.27), called Malefactors Lu.23.32-43. Possibly comrades of Barabbas, a robber, under similar sentence of death at same time (Jn.18.40; Lu.23.19). They accompanied to death Him in preference to Whom Barabbas had been set free, and were crucified on either side of Him (Mt.27.38; Mk.15.27). joining at first in the general exclamation of the rejected " King of the Jews" (Mt.27.44; Mk.15.32). One, however, changing his tone, first rebuked his companion and then exclaimed: "If thou art the Son of God, save thyself," (Mt.27.42), the prayer Jesus Himself answered Amen, promising relief from the cramps and tension of the Crucifixion before sunset in words on which Bossuet comments: " To-day — what speed! " In Paradise — what rest! 'With Me' — what companionship! " In the Gospel of Nicodemus the penitent thief is called Dismas, and the name has passed into the hagiology of the Syr., Gk., and Lat. Churches. According to the legend, he had been one of a band of robbers that attacked the holy travellers in the flight from Bethlehem, and he had then pleaded for their lives. The Virgin mother had blessed him. The child Christ had foretold his suffering and repentance. Now, as he gazed on the Divine Sufferer, he recognized the features of the infant Jesus. But, legend apart, he protested from his cross the innocence of Jesus, and became the special type of those who " are justified by the belief of the law," the precursor of all those who find salvation through "deathbed repentance." [C. R. D. H.]

Thigh (Gen.32.25). Jacob's thigh is dislocated or sprained in his conflict with the angel, and the writer's comment deduces from the incident the origin of the Israelitish custom of not eating the part of the thigh (injury to which causes limping), as being sacred because of the touch of God. Whether the sciatic nerve at the back of the hip, the nervus ischiaticus, or the tendon of the psoas, or the adductor longus — sinews in the groin which if cramped cause agonizing lameness — is doubtful. In Gen.46.20 (see A.V. marg.), et alia, the thigh is spoken of as the centre of procreative energy; hence the thigh was regarded in primitive times as peculiarly sacred, and an Oath might be taken upon it (e.g. Gen.24.2, etc.). In Rev.19.16, despite the ingenious allegorical meaning suggested by ancient interpreters, the phrase merely means that the rider on the white horse bears a third name displayed on his habit where it falls over the thigh, and so cannot escape notice. [S. N. S.]

Thimnathah, a town of Dan (Jos.19.43 only), named between Elon and Ekron. Now the ruin Tibeineh. [T. M. N. H.]

Thisbe, a name found only in Tob.1.2 as that of a city of Naphthali from which Tobit's wife, Tobit's son, Tobit's father, and Tobit himself were expelled by the Assyrians. The site is unknown. [C. R. C.]

Thistle. [Thorns and Thistles.]

Thomas, one of the Twelve. The name is a transliteration of the Heb. for twin, Didymus being the Gk. equivalent. He is called Judas Thomas in the apocryphal Acta Thomas and his traditional name is recorded by Eusebius. The ascription of the name Judas to him led in time to his identification with "Judas of James" and Judas the Lord's brother (Mt.13.55; Mk.8.3). In the lists of apostles he is coupled with St. Matthew in Mt.10.3, Mk.3.18, Lu.6.15, and with St. Philip in Ac.1.13. No incident is recorded of him by the synoptists, but St. John relates three important facts. First, when the other apostles tried in vain to dissuade Jesus from the risk of a visit to the bereaved sisters of Bethany, Thomas, though he could see nothing but death before them, said, "Let us also go, that we may die with Him." (Jn.11.16). Again, after the Last Supper, our Lord, speaking of His departure, said to those around Him, "Whither I go ye know, and the way ye know." (Jn.14.4). But Thomas, forgetting the former teaching of our Lord, made this despondent reply, " We know not whither Thou goest; and how can we know the way?" Moreover, a week after the Resurrection, Thomas, although he had expressed most unreasonable doubts as to its reality, is found in the company of the other apostles, presumably for worship and conference. Even the emphatic testimony of 10 competent witnesses failed to convince him. He refused to believe until he too had satisfied himself by sight and touch that there was no mistake (Jn.20.25). But when this test was offered to him, his recognition of his Master was immediate and adoring: " My Lord and my God." No greater confession of faith is recorded in N.T. And the answer of our Lord gives the moral of the whole narrative, accepting the tardy faith of Thomas, but censuring his culpable incredulity, "Because thou hast seen Me, thou hast believed; blessed are
they that have not seen, and yet have believed" (Jn.20.29). These notices, few as they are, place the character of Thomas before us with great clearness. In the Bible he is shown to have had all the difficulties of a case, subject to despondency, and yet full of ardent love for his Master. In N.T. we hear of Thomas only twice more, once as present at the sea of Galilee with six other disciples (Jn.21.2), and again among the apostles after the Ascension (Ac.1.13). His field of operations was the West when the latest of these three occurred. It seems that he had been to India, where he suffered martyrdom at the point of the spear. There are to-day Christians, as there have been from the earliest times, dwelling near the tomb of St. Thomas in Malabar. Some believe that this tomb is that of the apostle, others that of a Nestorian merchant-prince. These "West Indians" observe his day on July 2. By the Lat. Church it is observed on Dec. 21, and by the Gk. on Oct. 6. [R.S.M.]

**Thomoi'** (τῆς Ἑλλάντες) = THAMAH.

**Thorn in the flesh** (see 2Cor.12.7; Gal.4.14,15; 2Cor.10.10). Various explanations of this phrase have been suggested. (1) The personal opposition of the devil (2Cor.12.7); (2) Active opposition and persecution on the part of enemies both within and without the Church (see 2Tim.4.14; 2Cor.11.26); supported by St. Chrysostom. (3) *Temptatio horrendi*—i.e. the mental suffering caused by intense personal temptation. (The modern Roman theory.) (4) Bodily ailment. However, the oldest and most frequent view, is that of Tertullian and St. Jerome and (among recent scholars) Bp. Lightfoot. Among various ailments suggested are epilepsy and malaria. The former has considerable recent support (see, e.g., art. PAUL, I. (s) (i) in this Dict.), and a man constantly travelling in the East is especially liable to mental atmospheres (see 1Cor.15.58). The oldest and most frequent view, is that of Tertullian and St. Jerome and (among recent scholars) Bp. Lightfoot. Among various ailments suggested are epilepsy and malaria. The latter has considerable recent support (see, e.g., art. PAUL, I. (s) (i) in this Dict.), and a man constantly travelling in the East is especially liable to mental atmospheres (see 1Cor.15.58).

**Thorns and Thistle** (see 1Sam.13.15; 2Sam.16.2; Ps.105.15; Gen.3.18). These plants are different in form, but point to different kinds of prickly or thorny shrubs, and which are variously rendered in A.V. by "thorns," "briers," "thistles," etc. We shall confine our remarks to some of those which afford indications as to the plants they denote. (1) *'dlath occurs for some spinous plant in Judg. 9.14.15, where A.V. renders it "bramble" (marg. thistle), and in Ps.58.9 (A.V thorns). It is supposed to be Lycium europaeum or L. afrum (box-thorn), both of which occur in Palestine. The Arab. name is identical with the Heb. *Lycium europaeum* is a native of the S. of Europe and the N. of Africa; in the Grecian islands it is common in hedges. It readily establishes itself near the sea in small places in England and Ireland, where it is known as "the tea-plant." (2) *hadag occurs in Pr.15.19 and in Mi.7.4. Celsius, referring the Heb. term to the Arab. *hadag*, thinks that some spinous species of Solanum is intended; the Heb. term is some kind of Solanum; either the S. malengelo, var. esculentum, or the S. sodomeum ("apple of Sodom"). The Heb. term may be generic, and intended to denote any thorny plant suitable for hedges. (3) *'habh a word of very uncertain meaning in the theme, as "sedges," "rushes," etc., 1Sam.3.14; 1K.9.6, Pr. 26.9, Can.2.2, 2K.14.9. Cf. Job 31.40, "Let *'habh [A.V. thistles] grow instead of wheat." Celsius believes that the blackthorn (*Prunus sylvestris*) is denoted. Perhaps the term is used in a wide sense to signify any thorny plant. (4) *dardar* is mentioned twice in connection with the birds in Nestorian Christ. to Bp. Abu' (Jn.20.29). (5) *sha'ānir, almost always found in connexion with the word *shayit thsp., occurs several times in the Heb. text: it is variously rendered by the LXX. According to Abu'ifadl, cited by Celsius, the "*samur of the Arabs is a thorny tree; it is a species of *sidra which does not produce fruit." No thorny plants are more conspicuous in Bible lands than different kinds of *Rhamnus Lycium* (thorn) and *Zizyphus spinus christa; the latter is the *neveb of the Arabs, which grows abundantly in Syria and Palestine. The *naddaric of Is.7.19, 55.13 probably denotes some species of *zizyphus.* [CROWN OF THORNS; NETTLE.]

**Thracia.** A Thracian horseman is incidentally mentioned in 2Mac.3.35, apparently one of the bodyguard of Gorgias, governor of Idumaea under Antiochus Epiphanes. Thrace at this period included the whole of the country within the boundary of the Strymon, the Danube, and the coasts of the Aegean, PropONTIS, and Euxine—all the region, in fact, now comprehended in Bulgaria and Roumelia. In the early times it was inhabited by a number of tribes, each under its own chief. The wars on a large scale which followed the death of Alexander furnished an outlet for the mutual tendacies of the Thracians, who found a demand for their services as mercenaries everywhere. Cavalry was the arm which they chiefly furnished, and the principal object of Roumelia abounding in horses. The only other passage, if any, in the Bible alluding to Thrace is Gen.10.2, where *Thiras* has by some been supposed to mean Thrace.

**Thrasteus, father of APOLLONIUS, 1 (2 Mac.3.5).**

**Three Children, Song of the.** [DANIEL, APOCRYPHAL ADDITIONS TO.]

**Three Taverns,** a station on the Appian Road, along which St. Paul travelled from Putecoli to Rome (Ac.28.15). The distances, reckoning southwards from Rome, are given as follows in the Antonine Itinerary: "to Aricia, 16 miles; to Three Taverns, 17 miles; to Apitius Forum, 10 miles"; thus "Three Taverns" was near the modern Cisterna. Here a road came in from Antium on the coast. Doubtless "Three Taverns" was a frequent meeting-place of travellers.

**Threshing-floor** (Heb. *goren; Fellah, jurn,). [AGRICULTURE; ARAUNAH; JERUSALEM; PEREZ-IZZEL; ROCHEL; THRESHOLD—].

**Threshold.**—1. (Judg.19.27; 1Sam.5.17; Ezk.43.8.) The threshold was an object of superstitious reverence amongst ancient peoples,
owing to its marking the inner dividing line between all that was ruled by the outside law of the community and all that which was subjected to the will of the individual who was, suuriris, master of free persons, slaves, and objects of property in the house. Probably for this reason Ezekiel (43.8) calls the sanctuary the threshold of God, and the temples of the idols their thresholds. At the present day in Asiatic Turkey and Persia the people regard with reverence the thresholds of mosques, tombs, houses of high personages, and also, in a minor degree, of private houses.—2. (Ne. 12.25.) [ASUPPIM.] [C.W.]

**Throne.** The Heb. kisst, which in A.V. is usually rendered "throne," is used for any seat of honour. In the East, where it is usual to sit on the ground or recline on couches, the single elevated seat is a sign of honour or authority. It was used by Eli as high-priest (1Sam.19.4, 13.18) and by the provincial governors of Persia (Ne.3.7). It was bestowed on Elisha as a token of honour (2K.4.10). But this term is especially used to express the royal seat, as that of Pharaoh (Gen.41.40 ; Ex.11.5, 12.29), of David (1K.2.30), Solomon (1K.2.19), and of Ahasuerus (Esth.5.1). The royal throne had a footstool as part of its insignia (2Chr.9.18 ; cf. Is.66.6).

**ASSYRIAN THRONE OR CHAIR OF STATE.** (Layard, *Nineveh, ii. 301.*

1). The throne of Solomon is elaborately described as unique in its design (1K.10.18-20). The thought of God's sovereignty is frequently brought out by allusion to His throne, seen in vision (Is.6.1 ; Ezk.1.26,10.1) or described in poetry (Job 26.9 ; Ps.11.4). As used metaphorically to stand for the sovereignty of God, the term occurs in poetry only (Ps.47.8,89.14, 93.2,97.2,103.19 ; Je.14.21), which is part of a passage of poetic parallelism ; Lam.5.19). On the other hand, it is used to symbolize the power of evil (Ps.94.20). In N.T. ὑπέρεσσα is used to express kingly power (Lu.1.52,55 ; Ac.2.30), and thence is frequently used of the sovereignty of God (Mt.5.4) and of Christ (Mt.19.28). It is the seat also of judicial authority (Lu.22.30) and of heavenly honour (Rev.4.4). It stands for the power of Satan (Rev.2.13) and of the "Beast" (Rev.16.10).

**J.C.V.D.]** **Thummim.** [URIM AND THUMMIM]

Thunder is in summer very rarely heard in Palestine, but thunderstorms sometimes occur in harvest-time (1Sam.12.17). Poetically it is regarded in O.T. as the voice of God, and the instrument of divine punishment (1Sam.2.10 ; 2Sam.22.14 ; Job 37.2-5 ; Ps.18.13,29.3,9,81.7 ; 15.30,30.31). [C.R.C.]

**Thyatira,** a city on the Lycus, founded by Seleucus I Nicator, after the destruction of the many Macedonian colonies established in Asia Minor after the destruction of the Persian empire by Alexander. It lay to the left of the road from Pergamus to Sardis, on the southern incline of the watershed which separates the valleys of the Caicus (Bakyr-Ichali) and Hermus, on the very confines of Mysia and Ionia, so that it was sometimes reckoned in the one, and sometimes in the other. In earlier times it had borne the names of Pelopia, Semiramis, and Euhippia. In the 1st cent. A.D. the Macedonian element so preponderated that Strabo calls it a Macedonian colony. The original name of the city is obscure. It existed in surrounding hamlets when Thyatira was founded. During the Attalic dynasty Thyatira scarcely appears in history ; and of the various inscriptions found on its site, now called Ag Hisdr, not one is unequivocally anterior to the Roman empire. The prosperity of the city seems to have been under Vespasian. Dying apparently formed an important part of the industrial activity of Thyatira, as also of Colossae and Laodicea (Ac.16.14). The principal deity of the city was Apollo, worshipped as the sun-god under the surname Tyrinnas. He was no doubt introduced by the Macedonian colonists, for the name is Macedonian. A priestess of Artemis is also mentioned in the inscriptions. Another superstition, of an extremely curious nature, existed at Thyatira. A fane stood outside the walls, dedicated to Sambatha—the name of the sibyl who is variously called Chaldean, Jewish, and Persian, in the midst of an enclosure designated "the Chaldean's court." This seems to illustrate the obscure passage in Rev.2.20,21, which Grotius interprets of the wife of the bishop. Now, there is evidence to show that in Thyatira there was a great amalgamation of races. But amalgamation of different races, in pagan nations, always led to a syncretism of different religions. If the "prophetess" Sambatha was not discomfited by the authorities of the Judaeo-Christian church at Thyatira, both the censure and its qualification become easy of explanation.

**Thyine wood** occurs once only (Rev.18.12), where the marg. has "sweet" (wood). [A.L.G.U.M.] There can be little doubt that the wood referred to is that of the conifer *Thuja articulata*, Desfont., the *Callitris quadrivalvis* of present botanists. This tree was much prized by the ancient Greeks and Romans, on account of the beauty of its wood, for ornamental purposes. By the Romans it was called *citrus*, the wood *citrum*. It is a native of Barbary, and grows to the height of 15 to 25 ft. Pliny says that it was abundant in Mauritania,
but he does not identify it with "the tree Thuya," (xiii. 15, 16). He refers to Homer as reporting that "dame Circe (whom he would have to be reputed a goddess) burnt of this

**THUYA ARTICULATA.**

Thyon." Theophrastus wrote that "all carpenters work of temples in old time was made of the same; as of a timber everlasting," and that it grew in Cyrenaica. The derivation is probably from _thvnr_, to sacrifice.  

**TIBERIAS.**

Tiberias, the capital of the tetrarchy of Herod Antipas, who built the city and named it in honour of Tiberius, removing the seat of government there (after 14 A.D.) from Sephphor, N. of Nazareth. Tiberias was thus a great city in our Lord's time (Josephus, _Life_, 9, 18 Ant. ii. 3), but regarded as unclean, because built over ancient tombs. It had a royal palace, decorated with figures of living creatures, in spite of the law, and full of treasures (_Life_, 12, 13); but it also had a Jewish place of prayer (54). Agrippa II. afterwards restored Sepphoris to the rank of capital. Tiberias was apparently an open town, and its walls were not built till 67 A.D. (2 _Wars_ xiii. 2, xx. 6). According to Talmuds it was on the site of Rakkath (Jos.19.35; Tal. Jer. Megilla i. 1; Tal. Bab. Sanhed. 12a), a "shore city" near Hamath, or the "hot baths" still existing S. of Tiberias. From this city (on its W. shore) the sea of Galilee was called the sea of Tiberias (Jn.6.1.21.1). Our Lord does not appear ever to have entered this unclean city, which is only once noticed (Jn.6.23). Coins of Tiberias under Tiberius, Claudius, Trajan, Hadrian, and Antonius Pius are known (Robinson, _Bib. Res._ ii. p. 390). Under the last named the Jews enjoyed toleration, and the Sanhedrin settled at Tiberias, where the Mishna was compiled (150 to 200 A.D.) by Rabbi Judah. Justinian (527-565 A.D.) built walls at Tiberias (Procopius, _De Aedif._ v. 9), and the line of fortification on the slope W. of the modern town (surveyed by Mr. Schumacher) probably belongs to this age. The ruined walls of the present small town represent the fortress of the 15th cent. built by the Franks. The population is about 3,000, of whom half are Jews, 100 Christians, and the rest Moslems. The tombs of the famous Rab- bis, Jochanan, Maimonides, Meir, and even of Akiba, are shown near the town. The modern walls were built in c. 1738 A.D. (Sure. _W._ Pal. i. pp. 367, 371, 418-420).  

**Tiberius** (in full, Tiberius Claudius Nero Caesar) was born 42 B.C. His parents were T. Claudius Nero and Livia. His mother, however, after divorce, was married to Augustus, and Tiberius was thus his stepson, and subsequently, in 14 B.C., his successor on the imperial throne. A soldier for 20 years, he commanded in several campaigns, notably in Germany, and in Illyricum, which he subdued, and in 12 A.D. he enjoyed a triumph for his victories in Germany and Dalmatia. As emperor, he gained esteem for his provincial administration, but in Rome his rule was arbitrary and cruel. Velleius Paterculus, contemporary historian, who served under his military command for nine years, leaves a favourable impression of him. Two later writers, Suetonius, a retailer of gossip, and Tacitus, a biased partisan, draw terrible pictures of the man, crediting him, especially during the last years of his life and his retirement at Capreae, with monstrous vices. Their estimate must be considerably discounted. Tiberius died in 37 A.D. It was in his reign that our Lord was crucified. See Velleius Paterculus (_Hist._ Rom. ii.), Suetonius ( _Tiberii_), Tacitus ( _Annals_, vi.), and, for a warm vindication of his character, J. C. Tarver's _Tiberius the Tyrant_.  

**Tibnî**, son of Ginath, and Omri's rival for the throne of Israel (I K.16.21, 22). The struggle lasted four years (cf. vv. 15 and 23) and was only ended by the death of Tîbînî.  

**Tidal** , "king of the land of the Persian-Parthians" in Gen.14.19 as one of the vassal kings who assisted their suzerain Chedorlaomer of Elam in suppressing a rebellion in Canaan. In the cuneiform texts his name is written Tugdhula, "national" being a close translation of the Babylonian _Ummân Manda_ or "hordes" of Kurdistan over whom Tidal would have ruled.  

_Tiglath-pileser_ (2 K.15.22; in 1 Chr.5.26 and 2 Chr.28.20, wrongly written Tilgath-pilneser). The native Assyrian form is _Tukulti-apili-šarra_, for which the Tiglath-pileser of 2 K. is a fair rendering. He was the third of the name, and the third Assyrian king to come into contact with the Israelites. He succeeded Assār-nirari in 745 B.C., on Iyyar 13, but by what right he came to the throne is not known. His identity with Pul (2 K. 15.19) is practically proved by the Babylonian Canon, which has _Pul_ (Ptolemy's _Tigrus_) for the Tiglath-pileser of the Babylonian Chronicle and in the years corresponding with 729 and 728 B.C. His first campaign,
which took place five months after his accession, was to Babylonia, to crush the Aramean tribes. On his way back he annexed N. Babylonia. In 744 B.C. he marched to Namri and occupied Damascus, which was harassed by the Assyrian frontiers. In 743 B.C. he defeated Sarduri II., king of Ararat, at Arpad, where the latter lost 72,950 men captured. Rezin of Damascus, Hiram of Tyre, and Pisiris of Carchemish gave tribute on this occasion. Arpad, having again revolted, became the object of the Assyrian king's campaigns during the years 742-740 B.C. In 739 B.C. he marched to Ulluub in Mesopotamia, and the positions occupied enabled him to put an end to Syrian and Phoenician resistance there during the year 738 B.C. Kullan (possibly the Calno of Is.10.9), which was apparently his objective, was taken. Rost (Keilschrift texte Tiglat-Pileser III.) thinks it possible that Arziru or Izria (Aziriah) of Judah was in some way connected with this campaign, but this is doubtful. Menahem of Samaria, however, was one of those who paid tribute. In 737 B.C. Tiglath-pileser restored peace in Media, setting up, in the course of his campaign, bards and burglars with his name in certain of the cities which he occupied. The next year (736 B.C.) he led his arms against Mesopotamia, penetrating as far as the Nal mountains, and capturing many cities and the country of Mugaania. The consequence of this march was, that Ararat was conquered in 735 B.C. so that the king became passive. Though Tiglath-pileser reached the capital, Tushpi (Van), for some reason he did not take the city. Pilistia (Philistia in the sense of the coast-lands as far as Joppa) was the object of attack in 734 B.C., his intention being to use it as a basis for future operations. Hanun of Gaza decided not to meet him, and fled to Mushri (Egypt or an Aruan tract), leaving his capital a prey to the conqueror, who took his throne and set up his own image in the royal residence. Affairs in Judah claimed Tiglath-pileser's attention in 733 B.C. After the death of Aziriah, and the short reign of Ahaziah, Tiglath-pileser invaded Judah and mounted the throne. Pekah of Israel thereupon profited by the change to ally himself with Rezin of Damascus and attack Judah (2K.16.5f.), whereupon Ahaz, fearing ultimate defeat, turned to Tiglath-pileser with a gift of gold and silver from the temple and from the palace, asking for help. This being accorded, the allies retreated, but instead of joining their forces against the common foe, each awaited attack in his own territory. Assuring himself first of the submission of the rulers in N. Phoenicia, Tiglath-pileser invaded N. Israel, taking Ijon, Abel-beth-maacah, Janoah, Kedesh, Hazor, Gilead, Galilee, and all Naphtali, carrying the people captive to Assyria (2K.15.29). The inscriptions do not give us these names, but Hommel has suggested that "the broad [land of] . . . Hill," which is mentioned as having been annexed to Assyria, may be the last named. Pekah seems to have surrendered with his heart in it, but when his ally, was defeated, and compelled to take refuge in Damascus, his capital, which was besieged by the Assyrians, and taken in 732 B.C.

Hadara, Rezin's ancestral home, and 591 towns in addition, were then destroyed. The annals record, in conclusion, an attack upon Samni, queen of the Arabians, who had to submit, while her land was parcelled out. Whether that nation in Yemen sought Tiglath-pileser's favour with gifts. Apparently whilst these things were taking place, the conspiracy headed by Hoshea came into existence, and having murdered E'kah, its leader mounted the throne (2K.15.30), and gained the recognition of the Assyrian king, who was still devastating Syria, by a prompt payment of tribute. The fate of Rezin, king of Damascus, so strongly affected Miiniti of Ashkelon, that he is said to have gone mad, and his son and successor, Rukipto, followed Hoshea's example, and thus atoned for his father's hostility to Assyrian overlordship. Even Menefit of Tyre became tributary. Damascus was now annexed to Assyria, the people were carried captive (following the Assyrian custom) to Kir (2K.16.9), and Rezin was slain. It was in Damascus that Ahaz met Tiglath-pileser, and saw the altar which served him as the pattern for that which he caused to be made, and afterwards used for burnt-offerings (2K.16.10). He was sufficiently confident that he had nothing to fear with regard to Assyrian influence in Palestine, left the country in peace, and its states remained tributary as long as the rulers thought that Assyria was strong enough to enforce her claims. In 731 B.C. Ukim-zêr, a Chaldean prince, accosting Tiglath-pileser, attempted to persuade him to invade the country, when the pretender was captured in Sapia, his capital (729 B.C.). The next year (728 B.C.) the Assyrian king mounted the throne of Babylonia, but beyond "taking the hand of Bel" as king of the country, during two successive years, took part in no expeditions. He died in 727 B.C., the year when an expedition was being made against a city whose name is lost, and Shalmaneser IV. ascended the Assyrian throne (Tebet 25). When in his own country, Tiglath-pileser resided either in Nineveh or Calah. In the latter city he reared his famous record, recorded to 721 B.C., in the Central Palace in imitation of the Hittite style, decorating it with Hittite and Chaldean objects sent as tribute. The reign of this king may be regarded as having been one of the most brilliant in Assyrian history. [r.g.p.]

**Tigris**, in the L.X., is the Gk. form of the Heb. hiddeqel, and occurs also in the apocryphal books Tobit (6.1), Judith (1.6), and Ecclesiasticus (24.25). Like the Euphrates, the Tigris has two principal sources, the more distant (and real) source being the western one, a little S. of the high mountain lake called Golikh or Golenik (lat. 38°10; long. 39°20' nearly), in the sharp bend of the Euphrates which begins at Karput, and not many miles from the course of that river where it returns to about the same longitude. The course of the Tigris is at first nearly E., but after about 25 miles it sweeps to the S., and descends by Arghana Mudon to Diarbekr. Here it again begins to ascend, and after 30 miles runs near the town of Sеван, but near that city, in a comparatively narrow bed, it receives a large stream, the Bohlan-Su, from the N.W. At Osman Kieui it receives the eastern Tigris, which descends from Niphates
TIKHVAH, the

(Ala-Tagh), with a course almost due S. From Til the Tigris runs S. for about 20 miles through a long, narrow, and deep gorge, emerging upon the comparatively low but hilly district of Mesopotamia near Jezirah. Its course to Mosul is S.E., then S. past Namroud-Dagh to Qal'ah-Shergat, and afterwards S.S.E. to Tekrit and Samarrah, where the hills end, and the river enters upon the great alluvium. Continuing S.E., it passes the ruins of Opis, and at Baghdad approaches to within about 20 miles of the Euphrates. After a while its course becomes eastward again, and passing Qut al-'Amarah, it again turns S.E. some distance beyond E. Mendelau, and joins the Euphrates at Qorna, where the united stream takes the name of Shatt al-'Arab, and runs into the Persian Gulf. Omitting the numerous bends, the course of the whole stream is reckoned 991 miles; but to all appearances it may be given an average width, where it enters the alluvium, of 200 yds., and a considerable depth. Besides the three head-streams of the Tigris, it receives the Zakho or eastern Khabur, the Great Zob (Zob 'Ala), the Lesser Zob (Zob Afdah), the Adhem, and the Diyaleh or ancient Gyndes, which all flow from the hills and mountains of Persia, and reach it early in March, when the river rises rapidly owing to the melting snow on the S. flank of the Pamirs. Its breadth gradually increases at Diabekr from 100 to 120 to 250 yds. The river reaches its full height in the first or second week of May, and soon after begins to fall, reaching its natural level by midsummer. In Oct. and Nov. there is another, but comparatively insignificant, rise and fall due to the autumnal rains. It is better fitted for traffic than the Euphrates, but does not seem to have been much used for trade in ancient times. In Gen.2.14, under the name of Hiddekel, it is correctly described as looking toward the E. of Assyria; but in Is.11.15 it is given as the stream flowing between the Medes and the Persians. It is well stocked with fish, and the jungles on its banks, where they exist, are the haunt of the wild boar and the lion. See Smith, D.B. (4 vols. 1893), s.v.; and our art. HIDEKEL. [T.G.P.]

Tikvah.1. Father-in-law of the prophetess Huldah (2K.22.14).—2. Father of Jashua (Ez.10.15).

Tikvah (properly Tèkheth, or Tohkath, 2Chr.34.22) = Tikvah, i.

Tile. The A.V. rendering of Lu.5.19, "through the tiling," has given much trouble to expositors, the word perhaps meaning a "lean-to roof" [House]; or did St. Luke (a native, probably, of Greek Antioch) use the expression "tiling" as the form of roof (as a person is familiar to himself and his Gr. readers without reference to the particular material of the roof in question? [Brick; Writing.]

Tilgath'-pilneser. [Tilgath-pilneser.] Tilon; son of Shimon (1Chr.4.20).

Timæ'us, father of blind Bartimaeus (Mk.10.46).

Timbrel, Tabret. By these words A.V. translates the Heb. töph, which is derived from an imitative root occurring in many languages not immediately connected with each other. It is the same as the Arabic and Persian duff, which in Spanish becomes adufe, a tambourine. Ta-bouret (of which tabret is a contraction) and tabourine are diminutives of tabor, and denote the instrument now known as the tambourine. The Heb. töph is undoubtedly the instrument described by travellers as the duff or diff of the Arabs. It was used in very early times by the Syriacs of Padan-aram at their merry-making (Gen.31.27). It was played principally by women (Ex.15.20; Judg.11.34; 1Sam.18.6; Ps.68.25[26]) as an accompaniment to the song and dance (cf. Jth.3.7), and appears to have been worn by them as an ornament (E.31.4). The diff of the Arabs is described by the Arabians as a song (sometimes with pieces of brass fixed in it to make a jingling) over which a piece of parchment is distended. It is beaten with the fingers, and is the true tymanum of the ancients, as appears from its figure in several reliefs. "In Barby it is called tar, Timna, 1. A concubine of Eliphaz son of Esau, and mother of Amalek (Gen.36.12); presumably the same as Timna, sister of Lotan (ver. 22, and 1Chr.1.39).—2. The name of a duke of Edom, and probably also of a town or district (Gen.36.40; 1Chr.1.51).

Timnah.1. A place which formed one of the limita of N. of the Arabian desert, and was the residence of the family of Jether, which settled there (Gen.15.10). It is probably identical with the THINMA'AH of Jos.19.43 and with the Timnath (R.V. Timnah) of Samson (Judg.14.1,2,5). Now the ruin Tibneh, 2 miles W. of 'Ain Shens (Beth-shemesh).—2. A town in the mountain district of Judah (Jos.15.57). Now Timna, a ruin 9 miles W. of Bethlehem, and 2 miles N.W. of a ruin ed. (Jth.3.7), with which it is noticed. [C.R.C.]

Timnath' (R.V. Timnah; Gen.36.12,13,14), near Chezib and Adullam. [TIMNAH, i.] [C.R.C.]

Timnath'heres' (Judg.2.9), or Timnath-serah (Jos.19.50). The latter reading has the same letters, but is written backwards, and probably means "rugged heritage," not serah, but heres. It was a place in Mt. Ephraim, N. of the hill Gaash, a mountain with ravines (2Sam.23.30; 1Chr.11.32). Jewish, Samaritan, Christian, and Moslem tradition alike point to the same site—now the small village of Kefer Haris, on high ground in the mountains about 9 miles S.W. of Shechem, and S. of the brook Kaniah. It is thus within the border of Ephraim. Three sacred places are shown, by Moslems, as the tombs of Nun, Joshua, and Caleb. Eusebius (Onomasticon) says that Joshua's tomb was shown in his time, and the three tombs were shown in 1337 A.D. Jerome (Piligrim of Paula, xxv.) compas the site with Gibeah of Pheinehas, which is 8 miles N.E. of Kefer Haris. The Samaritan Chronicle and all the Jewish Itineraries point to this site. Modern Samaritans believe Nun, Joshua, and Caleb (Nebi Kif) to have been buried here (Surv. W. Pal. ii. p. 285). [C.R.C.]

Timnito, the, Samson's father-in-law, a native of Timnah (Judg.15.6). [TIMNAH, i.]
Timotheus. — I. An Ammonite leader repeatedly defeated by Judas Maccabaeus 166 and 164 B.C. (1 Mac.5:6,11,34-44; 2 Mac.8:30, 9:3), and finally killed at the capture of Gaza by Judas (2 Mac.10:24-37). — 2. The gk. name of Timothy (Ac.16:1,17,14, etc.).

Timothy: — 1. The son (Od. of St. Paul) of the younger companions of St. Paul, was probably a native of Lystra in Lycaonia (Ac.16:1). He was the offspring of a mixed marriage. His father (whose name is unknown) was a Greek; his mother (named Eunice, 2 Tim.1:5) was a Jewess (Ac. l.c.). The absence of any personal allusion to the father of Timothy in the Acts or epistles makes it probable that he died during Timothy’s infancy. Thus upon Eunice, his mother, and Lois, his grandmother, devolved the care of the boy’s education. He was trained by them in the O.T. Scriptures (2 Tim.1:5,3:14), but reached manhood without being circumcised (Ac.16:3). Timothy’s in- troduction to St. Paul, had probably begun already in the second missionary journey. SS. Paul and Silas found Timothy already a member of the church at Lystra (16:1). His high character recommended him as one likely to be of value in missionary work; and by the laying on of hands he received the office of an evangelist (Tit.1:5; 2 Tim.1:6). He was also circumcised by St. Paul, in order to allay the susceptibilities of the Jews. He accompanied SS. Paul and Silas to Europe; and at Philippi (Ac.16:12) and Thessalonica (1 Th.1:2) he proved his energy. His relations with Philippi were exceptionally close (Ph.2:20-22). He thence passed to Berea (Ac.17:14), and rejoined St. Paul at Athens. After another visit to Thessalonica, he returned to St. Paul, who had meanwhile gone to Corinth (18:5). At Corinth he shared St. Paul’s work; and was associated with him in both epp. to the Thessalonians (1 Th.1:1; 2 Th.1:1). We next meet with Timothy in Epirus, and then again in the third missionary journey (Ac.19:22). He was sent by St. Paul on a mission through Macedonia to Corinth (1 Cor.4:17), and returned to Ephesus. He next accompanied St. Paul to Corinth (see Ro.16:21, written from Corinth), and returned with him to Asia (Ac. 20:3-6). Though not named by St. Luke as a companion of Paul on his voyage to Rome, yet he certainly was at Rome during St. Paul’s imprisonment (Col.1:1; Ph.1:1). After the apostle’s release, Timothy visited Ephesus once more (1 Tim.1:3). He there represented St. Paul, who hoped to come to Ephesus shortly; and his task was to check false teaching, and to enforce discipline throughout the Ephesian church. St. Paul wrote 1 Tim. to encourage his friend, and to give him guidance on certain points. He had fears for the youth and inexperience of Timothy; and, after his second arrest, sent from Rome another letter to Timothy, to come to him. Timothy was perhaps himself arrested when visiting Rome in response to this appeal; his liberation is recorded in Heb. 13:23.

Tradition regarded Timothy as bishop of Ephesus. He was held to have suffered martyrdom there towards the end of 1st cent. A.D., in making a protest against the licentiousness of the Corinthian festival. He was then known to us chiefly from 1 Tim. and 2 Tim. His youth and timidity, his affectionate nature and delicate constitution, are mentioned in several passages of these epistles—e.g. 1 Tim.4.12,5,23; 2 Tim.1.4,5,22. St. Paul also expresses anxiety as to Timothy’s capacity to meet the difficulties of his situation at Ephesus; but he also speaks of his great esteem and regard for him in various descriptive phrases; thus he calls him his “genuine” or his “loved” son (1 Tim.1:2; 2 Tim.1:2) and his “fellow-worker” (Ro.16:21); while Timothy’s religious zeal is commemorated when he is described (Ph.1:1) as the “slave of Jesus Christ.” — W. Lock in Hastings, D.B.IV. 767; J. Moffatt in Encycl. Bibl. IV. 5074. — [J.A.N.]

TIMOTHY AND TITUS, EPP. TO DATE AND AUTHORSHIP. The external evidence for the Pauline authorship of the epp. to Timothy, and of the ep. to Titus which is inseparable from them, is very strong. It includes the witness of the Collection of the Apostolic Constitutions, and of early heretics (e.g. Polycarp and Justin Martyr and Marcion, 112-146 A.D.); of ancient versions (e.g. the Peshitta-Syriac and the Old Latin, 130, 150 A.D.); of the Gallican, Alexandrian, African, and Roman Churches (e.g. Irenaeus, Clement, Tertullian, Muratorian Fragment, 180-220 A.D.); of Irenaeus, Justin, Clement, Tertullian, Eusebius (339 A.D.); and of the Councils, being included in the Canon of the N.T. by the third Council of Carthage (390 A.D.)—Their Date in St. Paul’s Life. (1) There is no time possible before the end of the Acts. (a) 1 Timothy could not have been written on some visit to Macedonia during the three years’ stay at Ephesus. To such an absence we should have to add the stay in Crete with Titus and the winter at Nicopolis (Tit.1:5). And then St. Paul cannot have been long enough at Ephesus for his “reasoning daily in the school of Tyrannus,” which “continued two years” (Ac.19:9,10), if he was also “restored” and “preserved” for three years” (20:31). Nor could it have been written when he did go to Macedonia (20:1) and “gave much exhortation” there (20:2), for he was not expecting then to return to Ephesus (1 Tim.3:14). (b) Titus was not written before St. Paul’s arrival at Ephesus, since Apollos, who was unknown to him before this, is referred to (Tit.3:13); nor during the stay at Ephesus, for the reason given above; nor on the voyage as prisoner to Rome, because then St. Paul could not be expecting to winter at Nicopolis in Epirus or Macedonia (3:12). (c) 2 Timothy supposes St. Paul at Rome expecting death. But this cannot have been at the time of Ac. 28, because then the words “Trophimus I left at Miletus sick” (2 Tim.4:20) must refer to the visit to Miletus of Ac.20:4,17; but Trophimus was not left there then, but was with St. Paul when taken prisoner at Jerusalem. (2) There is a time possible after the end of the Acts. For (a) this could not be before the time of Ac. 28, because the mention of the name of Trophimus would then have been favourable, and not such as to lead to death. (b) St. Paul was expecting release when he wrote, “Find me a lodging” (Ph.22), i.e. at Colossae; “I know I shall abide...with you”
TIMOTHY AND TITUS, EPP. TO

(Ph.1.25). (c) If St. Paul's death had occurred at the end of the two years, the writer of Acts must have named it, if only in a sentence. (d) Tradition speaks of other journeys: "The departure of Paul for Spain" (Mur. Frag. 220 A.D.); "Having reached the end of the West" (Clem. Ep. Cor. 95 A.D.). The Epistle raised from St. Paul's own statement, "I know that I shall not see you again at Ephesus" (Ac. 20.25), is met by the still stronger words, "I know with a sure conviction that I shall see you again at Philippi" (Ph. 1.23). (3) St. Paul's last years may then quite possibly have been spent somewhat at Rome. "First journey eastward, to Colossae, Ephesus, Crete. Laying the foundation for these epistles (see Ph.2.24; Ph.22; and 1Tim.; Tit.; 2Tim. passim)." 65 A.D. (spring) to autumn. Second journey eastward, from Crete to Futeoli and Rome to Spain and Massilia (where 1Timothy was probably written), Philippi, Corinth (where Titus was very possibly written), Nicopolis (see Tit. 3.12). 66 A.D. (autumn). At Nicopolis arrested and brought to Rome. 67 A.D. (spring). First part of second trial; 2 Timothy written. 67 A.D. (June 29). Second part of second trial, condemnation, and execution. Internal Evidence. The subject-matter is the natural sequel to the teaching of the former groups of St. Paul's epistles, "the gospel of the individual soul" and that of "the church" as defined by the apostle. The whole of the latter part of this epistle seems to form a conclusion to the teaching of the former. The language has many new words for new business needs and details. Recent light on N.T. Gk. from contemporary literature and archaeology lessens materially the difficulty still felt by many under this head, as to the authorship. Dr. Nageli, for example, quite seriously believed that St. Paul uses the language which inscriptions and papyri of second century, and later, have been the language of daily intercourse; his doubts about the "Pastorals" may yet be removed by more inscriptions and fresh papyri.

Theme and contents. The principle underlying this three-part Manual of Pastoral Care is individual headship in each district—Timothy and Titus as the apostolic men of the apostles. For this headship character is the absolute essential. And in the brief passages dealing with "priests" and "deacons" it is their qualifications for ordination by the apostolic head that are chiefly named. The bishop's standard is rather than the priest's; the latter is taken, so to speak. Still, we do get in them the chief sample method of conducting the government by the apostolic head, the supplying of and working with and through a fit succession of "fellow workers unto the kingdom"—the method, as we know it, of diocesan synods. Hence "Manual for Bishops is a more correct synonym for "Pastoral Epistles" than is "Manual for Clergy"—with the very same meaning that the Latin "Pastoralis Regula" or "Pastoralis Cura" has throughout Gregory the Great's well-known treatise on the episcopal office. Contents. 1 Timothy: Ch. 1. Apostolic succession. The work is begun immediately after St. Paul's death by a duly commissioned successor, Timothy, his "own son in the faith." Ch. 2. One Mediator. Public worship is to be under the control of the apostolic head and his clergy; all is to be done remembering Christ Jesus the "One Mediator." Ch. 3. The assistant ministry. How a bishop's jurisdiction is to be exercised: the bishops, the "bishops," the "priests," the "deacons," in the service and the guidance of the church. Titus: Ch. 1—3. A bishop's work. How Titus should carry on as bishop the apostolic office, by selecting duly qualified presbyters for "teaching the word," and by repressing unrighteous teachers. To uphold not only sound teaching, but also holy living in public, social, and private; in the teaching to be given by the bishop, the "succession of grace" and the "succession of grace," and the "succession of grace." Ch. 4. The old bishop and overseer calls for work. "The old prophet is again appeals to pure life and apostolic doctrine, in view of St. Paul's own past and the evil future. Ch. 5. The old evangelist's last warning and encouragement to Timothy for the "evangelistic succession." Ch. 7. The last word the assurance of his Lord's presence "all the days."—Presbyter and episcopus are identical in N.T. This generally accepted view has been recently denied, and it is important to re-examine certain chief passages.

(20.28). Here "presbyter" is the technical official title, but "episcopus" describes the presbyter's work; perhaps recalling the familiar Gk. usage in Ephesus for the organization of social clubs. If this speech (20.33) is supposed to be in two parts, A. B, the presbyters down to ver. 27, and then to those of them only who were bishops—we must imagine (a) the administration of alms to belong to the episcopus, in opposition to, e.g., 11.30; (b) the guarding of the faith against heresy as a duty of the episcopus, not the presbyter, in opposition to, e.g., 15.42 ff. (c) the summing up (20.52) as
addressed to the episcopal portion of the hearers, with no farewell to the presbyters. (2) "Ordain presbyters in every city," followed by "a bishop must be blameless" (Tit. 1:5-7). Here again the presbyter's office is described by the title episcopus. Against this, it is argued, presbyters are in the plur., episcopus markedly in the sing. and with the definite article. But it is argued afterwards, "if presbyters we have the singular (ver. 6), "if any be blameless." And then (ver. 7), when the title episcopus is used, the reason is given for this requirement of blamelessness "as the steward of God." (3) Those who have offered the gifts of the bishop's office, followed by blessed are those who obtain the office. The "members" are "presbyters" here is shown: (a) By the previous sentence, where the apostles are said to have appointed bishops and deacons; for Clements could not have omitted the presbyters, when his one object was to defend their authority, which had been assailed. (b) By the fourth verse, and it is not at all argued that episcopus has been said to show that presbyters appointed and deposed bishops; but this is from the wrong identification of "other approved men" with "other men of repute" just above; while the Gk. (episcopos, the word used for "other of the same class") clearly shows that the first "other" refers to the presbyter class, but the second to the apostolic class. It is "other apostolic men of repute" who appointed "other approved presbyters," after receiving the "injunction" from the apostles. And our Pastoral Epistles give us just a sample of this injunction. As to two words for one thing, a parallel is seen in "Saul who is also Paul," where Saul was Joseph, "paulus" was used in LXX. For the term "presbyter" was essentially Jewish, the term "episcopus" essentially Greek. Both were in use in LXX. for official dignity and position. But we find "presbyter" was definitely used of office in Jewish synagogue or Sanhedrin, and "episcopus" definitely of office in Gk. social class. Hence, the use of the two words is interchangeable, for the office of the church generally in evidence and resident, where Jewish and Gk. life was intermingled. Hence also the greater prominence given in the Acts to "presbyter," when Jewish surroundings were prominent, and to "episcopus" in the Pauline epistles, as the Gk. surroundings eclipsed the Jewish. Hence, therefore, of the two names, the one transferred to the higher office, hitherto filled by an "apostle" or "prophet" or "angel," was the one connected with the dominating Gk. and Gentile life, episcopus. Cf. (112 a.d.), "I am devoted to those who are subject to the bishop, the presbyters, and the deacons" (I. n. Pr. Polyc. vi. 1) [Bishop; Church]. For a summary of contending views on the episcopus, see Schmiedel, "Ministry," Encyc. Bibl. Of the best German ccm., Holtzmann rejects, Weiss accepts, the Pauline authorship. Recent English ccm. are Humphreys, Epp. to Tim. and Tit.; Bernard, Pastoral Epistles. Among the latest writers, Prof. Clemen, Paulus sein Leben und Wirken (1904), accepts some fragments only as Pauline, because of the subject-matter; Dr. Resch, Der Paulinismus und die Logia (1904), defends the whole as Pauline; Dr. Nagell, Der Wortschatz des Ap. P. (1905), has doubts, because of the language. [A.E.B.] 

**Tire** was one of the metals found among the spoils of the Midianites (Num. 31:22). It was known in the form of an alloy to Hebr. metal-workers (Is. 1:25; Ezk. 22:18, 20). The markets of Tyre were supplied with it by the ships of Tarshish (27:12). It was used for plummets (Ezech. 4:10), and was so plentiful as to furnish a figure to express the wealth of Solomon (Eccles. 47:18). In the times described by Homer the Greeks were familiar with it. Twenty layers of tin were in Agamennon's cuirass. Copper, tin, and gold were used by Hephæstus in welding the famous shield of Achilles. The melting of tin in a smelting-pan is mentioned by Hesiod (Theog. 862). Bronze, an alloy of Copper containing about 10 per cent. of tin, was used in Egypt under the 12th dynasty, or at least 2,500 years n.c., and over 8 per cent. of this metal is present in a 3rd-dynasty ring. Tin was known very widely in early India (Ezra. 2:70). In Crete bronze has been found in the older or pre-Mykenian palace ruins, and it must have been widely known some centuries before the Exodus. Tin is not found in Palestine. Whence, then, did the ancient Hebrews obtain their supply? Only are tin mines are known to contain any considerable quantity of it: Spain and Portugal, Cornwall and the adjacent parts of Devonshire, and the islands of Junk, Ceylon, and Banca, in the straits of Malacca" (Kenrick, Phœnicia, p. 212). Spain may have been a chief source of supply, but by 5th cent. n.c. (Herodotus, iii. 115) the metal was also obtained from the Cassiterides, or tin districts of Britain. Pliny (vi. 30) identifies the cassieros of the Greeks with the plumbum album or candidum of the Romans, which is our tin. Stannum, he says, is obtained from an ore containing lead and silver, and is the first to become melted in the furnace. It is the same as the Hebrew call Werk, and is apparently the meaning of the Heb. b'dhil in Is. 1:25.

**Tiphshah** (crossing).—1. A city on the Euphrates (1 K. 4:24), the limit of Solomon's dominions. It is mentioned by Xenophon, Arrian, and Strabo, as Thapsacus, and Lay N. of Rezeph (2). A town stood on the site, at a time when he could not have reached Thapsacus, while all Syria was held by the Assyrians. It is evidently the present Tafsah, which preserves the final guttural—a ruined village 6 miles S.W. of Shechem, where the road "crosses" a great valley. This place Menahem would easily reach from Tirzah (Surv. W. Pal. ii. pp. 169, 198). [C.B.C.]

**Tirah,** the youngest son of Japhet (Gen. 10:2). We have no clue in the Bible to identification with any particular people. Josephus (1 Ant. vi. 1) and the Targums understand the Thracians, which is etymologically improbable. The known tribes of the list belong to Asia Minor and Armenia. [C.R.C.]

**Tirathites,** one of the three families of scribes residing at Jabez (1 Chr. 2:55), the others being the Shimeathites and Suchathites. The passage is obscure.

**Tire,** an ornamental headdress worn on festive occasions (Ezk. 24:17, 23). [Headdress.]
with the typical face of an Egyptian king, and he seems to imitate the style of the 11th dynasty; nevertheless it is almost certain that he was a negro, as proved by the successful enemy, Esar-haddon, shows him as of the negro type, and we have no reason to doubt this testimony. About 670 B.C. Tirhakah joined a coalition against Esar-haddon, king of Assyria, but was defeated; the king of Assyria invaded Egypt and took and plundered it. Afterward, Tirhakah, having been succeeded by his son Assur-bani-pal, Tirhakah marched against Egypt and conquered the whole country a second time. But he could not resist Assur-bani-pal, who reconquered Egypt. Thebes was again plundered. Tirhakah fled to Ethiopia, where he died. [E.K.]

Tiphah', son of Caleb ben-Hezron by his concubine Maachah (1 Chr. 2:48).

Tiria', son of Jehdealeel (1 Chr. 4:16).

Tirshatha', The (Ezr. 2:63; Ne. 7:65,70,78,9:10,1), properly "the prefect, procurator", Pers. title given to Nehemiah when on his mission to Jerusalem. His Babylonian title, adopted by Ezra, was "rūshāțhā (tiršāțhā); the fuller and older bel paḥātī), "procurator", " governor"; and this (Ne. 5:14) shows the meaning of "the tirshāțhā"; tirshāțhā (properly ti-shāțhār), from ti, contracted for Akhaem. Pers. ati, Skt. ati, "over"; cf. Skt. ati-maṇusha, "superhuman," and Avest. šōšātha (later form of Akhkaem, kshāṭhāra, Skt. kshātraṃ), "district, Mod. Pers. shahr, "city," ti, for ati, is used in Armenian; e.g. inti-kiš, "over-woman," "queen," "lady," "tī-ežerki, "over-limits," "world," etc.), has puzzled all ancient translators; hence LXX. and Vulg. merely transliterate (Aḇeṭāraṭ, Aḇeṭāraṭ Aḇeṣṭāraṭ, Aḇeṣṭāraṭa, and Peshīṭa Syr. renders 'chief of the priests'). With ti-shāțhār cf. ti-šāṭhā (Arāḫaḏ, cf. Aʾrāḫaḏ, Mod. ter. plur., ti-pāti, "over lord," Dan. 5:2,3. The derivation from Avest. tarshta (ti-tars, or teres), "to be afraid," Skt. ātiras, is hopeless, because the word then was used meaning "the terrified," Mod. Pers. tarsīd, etc.)

Tirsah' (delight).—1. The youngest daughter of Zelophehad (Num. 26:33, etc.), in Gilead.—2. A royal Canaanite city (Jos. 12:24), where Jeroboam I. lived (1 K. 14:17), and Baasha of Israel ruled (15:21, 33) and was buried (16:6). Elah was here slain (2 K. 8,9), and Omri here besieged Zimri (vv. 15,18), who perished in the flames of his palace. Omri reigned in Tirzah 6 years, before he transferred the capital to Samaria (vv. 23,24). Thence Menahem attacked Tiphssah (2 K. 15:14,16). Solomon's bride (2 Sam. 5:4) is likened to this ancient CELTIC place, and to the prophet, "Thou art beautiful, O my love, as Tirzah, comely as Jerusalem, terrible to look on." There is no indication of the situation of the town, which must, however, have been in Samaria. The most probable site is Tedsir, a village 11 miles N.E. of Shechem, at the junction of two Roman roads leading to Beisan. The name has the required radical letters, though inverted—as in some other cases. Brocardus, in 1283, placed Thrisa about 10 miles E. of Samaria, from which Tetsir is 12 miles N.E. The village is small, but ancient tombs are numerous, and the lands round are fertile. A fine monument on S. appears to be a tomb of the Persians. [Sure. W. Pal. ii. pp. 228,245]. See Zereda. [G.R.C.]

Tishbite', The, the designation of Elijah (1 K. 17:1,21,17,28; 2 K. 1.3,8,9,36). The name naturally points to a place called Tishbeh, or Tesheb, as the residence of the prophet. If a town is alluded to, it is not improbable that a town, a seat of mystery, was named after him, or that the prophet came thence (cf. Thisbe in Naphthali, Tob. 1.2). But hālāššībī has not always been read as a proper name. It was pointed by Michaelis so as to make it mean "the stranger."

Tirhakah. (1) Animals. Jacob vowed at Bethel to give a tithe of "all that thou shalt give me" to God if he brought him back in peace (Gen. 28.22). As his wealth was pastoral, the custom of tithing animals must have been pre-Mosaic. The law provides that the tithe of herd or flock "shall be holy," and shall not be exchanged (Lev. 27.32,33). A "holy" animal was withdrawn from ordinary use and sacrificed. Though intended to lead to bring tithing animals to the temple. Later the law was interpreted otherwise, and the animals seem to have been brought to Jerusalem and applied to the support of the priests (2 Chr. 31.6). (2) Vegetables. It is possible that a tithe of seed and fruit shall be holy. If redeemed, 1/10 was added to it. In 2 years out of 3 it was to be taken to the temple and consumed there at a sacrificial feast by the peasant and his family and dependants. In the third year (i.e. allowing for the sabbath year 2 years out of 7) it was to be given to the Levite, the stranger, the fatherless and the widow," a declaration being made by the peasant of the fulfillment of the duty, concluding with a prayer (Lev. 27.30,32; Deut. 14.22-29,26.12-15). In Num. 18.21-24 (addressed to Aaron) we read "to the children of Levi behold I have given all the tithe in Israel... the tithe of the children of Israel which they heave [offer, set apart] to God as a heave-offering [offering, separation]." I have given the Levites, and in 25-32 it is provided that the Levites shall give a tithe of their tithe to the priests; cf. Ne. 10.38f.[37f.]. It has been thought that this tithe in Num. is a different tithe to that enjoined in Deut.; but the passage only
deals with the internal arrangements of the priestly tribe, and probably refers only to the tribe contributed in the third year. In that case the expression *all the tribe* in Israel "is used not to denote the first of the portions went by strangers, etc., but rather to show that the whole of what was set aside to priestly uses (the tribe which they have) went in the first instance to the Levites, exclusive of the priests. Later the law was thought to require three tribes: one for the feast, one for the Levites, and, in the third year, for the poor (2 Chron. 14:18; Josephus, 4 Ant. viii. 22). (3) Secular. Abram gave a tithe of his spoils to Melchizedek (Gen. 14:20) and Samuel foretold that the king would take a tithe of the vegetables and animals (1 Sam. 8:15, 17) as a secular tax. Other views in Driver, Deut. 16:16-17; Van Hoonacker, Sacerd. Levitique, 38, see the Talm., Talm. 39, 40; the Heb. and Talm., 2nd ed. i. 1071-1072. Parallels in Lancel, Sacred Tenth, i. 11-38. [H.M.W.]

**Title on the Cross.** [Cross.]

**Titles of Psalms.** [Psalms, Titles of-]

**Title.** [Writing.]

**Titus,** a companion of St. Paul, always mentioned by the apostle with great affection. His name never appears in the Acts, and only rarely in the epistles (Gal. 2 Cor., and 2 Tim.), besides that to Titus himself. His birthplace is uncertain, perhaps in Crete. He was a Gentile (Gal. 2:3); and was at Antioch when the dispute arose as to the bearing of the Mosaic law (and especially circumcision) upon Gentile Christians. St. Paul took him to Jerusalem, and successfully opposed an attempt to have Titus circumcised (2:5). Titus next appears in connexion with the events recorded in 1 and 2 Cor. He paid two visits to Corinth—the first, in the year before 2 Cor. was written, with a view to organize a collection for the saints (2 Cor. 8:6); probably the mission to Dalmatia (2 Tim. 4:10) was from Nicopolis. Titus appears to have been older than Timothy, and also stronger in character (see 1 Cor. 16:10; 2 Cor. 7:15). St. Paul speaks of him in warm terms: as his "brother" (2 Cor. 1:9), his "partner and helper" (8:23), his "genuine son" (Tit. 1:4), whence it has been inferred that he was converted by St. Paul himself. According to tradition, Titus became Bp. of Crete, and lived there till an advanced age. Lock in Hastings, D.B. iv. 782; J. Moffatt in Encycl. Bibl. iv. 5105. [J.A.N.]

**Titus, Epistle to.** As this epistle involves subjects for discussion as Timothy, Ep. 70, it is more conveniently discussed under that head.

**Titus Manlius.** [Manlius.]

---

**Tobit,** the designation of Joph, one of the heroes of David's army (1 Chr. 11:45). It occurs nowhere else, and nothing is known of the place or family which it denotes.

**Tobiah**, or Tobia (1 Chr. 8:17), is the same as Tobiah, son of Hanani, 1 Chr. 8:17.

**Tobit, Land of.** (Judg. 11:3-5), a region in or near Gilead. The Ish-tob, or "men of Tob" (2 Sam. 10:6, 8), who fought against David in Gilead, may have come thence. It appears to be the Tobie of 1 Mac. 5:13, in Gilead; and the Jews called Tobie (2 Mac. 12:17) were in that part of the country, of Tobie. The word means "good," and in Arab. would be Ta'ayibeh. The most likely site is the district in N. Gilead in which the village Ta'ayibeh now stands, 9 miles S. of Gadara. It is a large place, and was till recently the chief town of a district. A number of dolmens are found scattered over a distance of 2 miles to W. (Schumacher, Northern Arabia, pp. 123, 131-134). [C. C. C.]

**Tob-adoniah**, one of the Levites sent by Jehoshaphat through the cities of Judah to teach the law to the people (2 Chr. 17:8).

**Tobiah,—1.** "The children of Tobiah" returned with Zerubbabel, but were unable to prove their pedigree (Ezr. 3:26; Ne. 7:62).—2. The name is borne of Tobis (in the title of a play).—3. Tobiah was in the opposition made by Sanballat and others to the rebuilding of Jerusalem (Ne. 4:3, 7, 13, 4, 8). Though a slave (2:10, 19), unless this is a title of opprobrium, and an Ammonite, he allied himself with a priestly family, and his son Johanan married the daughter of Meshulam (2:18). Tobiah himself was the son-in-law of Shechaniah the son of Arah (6:18), and these family relations created for him a strong faction among the Jews. Ewald conjectures that Tobiah had been a page ("slave") at the Persian court, and, in being favour there, had been promoted to be satrap of the Ammonites.

**Tobías**, the Gk. form of Tobiah, or Tobijah.—1. Tobit's son, holding nearly as prominent a position as his father in the book of Tobit.—2. The father (seemingly grandfather in Josephus) of Hyrcanus, a man of high standing, who had deposited some of his wealth in the temple, a privilege reserved to those who had been born in Jerusalem (viz. to Heliodorus c. 175 B.C.). 2 Mac. 3:10-13. In the high-priestly schism which happened afterwards, "the sons of Tobias" took a conspicuous part (Josephus, 12 Ant. v. 1).

**Tobie.** [Tob.]

**Tobiel,** the father of Tobit (Tob. 1:1).—2. Tobiel, or Tobie (1 Chr. 8:17), is the same as Tobiah, son of Hanani, 1 Chr. 8:17.

**Tobih, the name of a Levite sent by Jehoshaphat to teach the law in the cities of Judah (2 Chr. 17:8).—2. One of a deputation that came from Babylon to Jerusalem with contributions of gold and silver, from which crowns were to be made for the high-priest Joshua, the crowns being preserved in the temple as a memorial to Tobijah and his companions (Zech. 6:10-14). [H.C.B.]

**To bit,** son of Tobiel, husband of Anna, father of Tobias, of the tribe of Naphtali. Before being exiled to Nineveh, where he attained an office at court, he (alone of his family) attended the sacrifices at Jerusalem. At Nineveh he keeps his house, and buries the dead (at great risk and loss) until protected by Achiacharus, his nephew, a high official. Being unequal through burying, he sleeps out of doors, and
his sight is ruined by birds. A slight dispute with Anna leads him to pray in grief. He directs Tobias to fetch, from GABEAL at RAGES in Media, no talents of money, and watches over him on a former journey. He gives Tobias much good advice, and tells him to hire a companion, Azarias, who satisfies him as to his suitability. Anna fears for her son, but Tobit reassures her. Unaware of the delay caused by Tobias' marriage to Sara, daughter of Kiepert Streane, while the latter was engaged in a long, and Anna fears the worst; but Tobias returns with wife and money, to their great content, and heals his father's eyes with the gall of a fish caught in the Tigris. When it was proposed to pay Azarias, he declared himself, to the amazement of father and son, to be the angel RAPHAEL. Tobit utters a panegyric, with prophetic passages, chiefly addressed to Israel and Jerusalem. He lives in piety to a great age, and before his death gives a prophetic address to Tobias, advising him to quit Nineveh before its downfall. According to his wish, he and Anna are buried by Tobias in one grave. Tobit's character is simple, devout, and picturesquely spiritual.

To'bit, Book of.

This book consists of family memoirs of home life and of journeys undertaken during the Captivity; many interesting incidents and examples of religious observance being interwoven therewith. They are, therefore, of private and homely character, and yet contain a moral subject, this forming a contrast with Judith. Tobit's simple, naturally told, domestic tale, full of faith and benevolence, shows the blessing of God on pious households, and is as touching as almost any O.T. story. If all Jews had practised such piety as Tobit's, Christ would have had little occasion for reprobating His well-known woes. Tobit's life has some parallels with Job's; but the problem of the suffering of the innocent is less profoundly considered. The activity of spirits, Raphael and Asmodæus, good and bad, taking part in human affairs, is very prominent. The duty of paying tithes (4.6, 7) and of burying the dead (12.8-9) are insisted on; and possibly the value of prayer (3.16, 4.19, 8.4-8, 15-17); the sanctity of marriage, including the doctrine of affinity (10.12), are exemplified. The spiritual results of almsgiving are perhaps a little disproportionately extolled (4.10, 12.5). Still two Offertory Sentences are chosen from 4.7-9; the Marriage Service is indebted to Tobit for some phrases; and the Homilies quote the book as "Scripture." Though constantly used in the early Church, opinion as to the canonicity of this book was much divided; but, though never in the Jewish canon, it gradually won its way, partly as admitted into the LXX., partly on its own merits as a work of piety and moral teaching,—Language. The existing texts yield no certain result—witness the opposite opinions of competent scholars; but, on the whole, a Semitic original has rather the stronger probability, and accords best with the intensely Heb. character of the story. Of this Neubauer's Aramaic and national version is the best, though attempts have been made to show that it is only a rendering from the Gk. The linguistic indications of our present documents can hardly be deemed decisive: but the earlier the book is dated, the less likely does a Gk. original become to us, while the existence of a Aramaic text in Jerome's day is certain. The doubt which exists as to the author's country unfortunately deprives us of a valuable clue.

Text and Versions. The Sinaitic text, probably the basis of the Old Latin, differs largely from the ordinary LXX. type. Early variations—not merely verbal, but divergences in the narrative itself—suggest the currency of oral traditions of the tale. Jerome professes (Pref.) to have rendered Tobit for the Vulg., like Judith, very hurriedly from a Chaldee MS. Doubtless the Old Latin, as well as the Gk., was also before him. The extant Heb. texts are of late date, and cannot claim to represent an original of any late date. A date proposed by Kohut: while it makes the Hadrian period supported by Graetz and Neubauer improbable. On the whole, from 200 to 170 B.C. seems a likely period for the origin of the book. Certain parallels with Eschylus, and the absence of Macceabaean traces, fit in well with this date; but certainly the text is somewhat later than the Chaldee, Chaldee Tobit, etc. (1878) W. Erbdt, in Encycl. Bibl., s.v.; Speaker's, S.P.C.K., and Bissell's Comm.; arts. in Hastings (5 vols. 1904) and Vigouroux's D.B.; Steene, Age of the Maccabees (1898); L. E. T. André, Les Apocryphes (Florence, 1903).

Tobit's fish. [Fish.]

To'chen, a town of Simeon (1 Chr. 4.32).

Togarmah" (Gen. 10.3) was the third son of Gomer, brother of Ashkenaz and Riphath. Geographically, the name is connected with Armenia, and Ezekiel's references to Togarmah as trading with Tyre for war-horses and mules (Ezk. 27.14, 38.6) accord with this. Fried. Delitzsch connected Togarmah with the garimmi of Assyrian texts. It was the capital of Melitene, and Sargon of Assyria states that the capital was re-colonized and renamed. According to Sennacherib, who took T'il-garimmu and destroyed it, it was on the borders of Tabal (Tubal, g.v., and cf. Ezk. 27.13). It is difficult to say how this settlement came to be, but the position agrees fairly well. Kiepert and Dillmann, however, make it to be S.W. Armenia.

[T.G.P.]
TOHU

Tohu', an ancestor of Samuel the prophet, perhaps = Toah (1Sam.11.1; cf. 1Chr.6.34).

To'i, the king of Hamath who sent his son Jeram, bearing presents of gold, silver, and brass, to congratulate David upon his defeat of their mutual enemy the Syrian king Hadadezer (2Sam.8.9,10).

Tola'.—1. The first-born of Issachar, and ancestor of the warlike Tolaites (Gen.46.13; Num.26.23; 1Chr.7.1,2).—2. (Judg.10.1,2.) Son of Puah, a man of Issachar, who, after Abimelech, judged Israel for 23 years at Shamir in mount Ephraim.

Tolad', one of the towns of Simeon (1Chr.4.29). [EL-TOLAD']

To'latites, The. [TOLA, 1.]

To'lanes (1Esdr.9.25) = TELEM.

Tomb. Heb. rock-cut tombs consisted of square chambers, with tunnel graves (kōkim, Mishna, Baba Bathra vi.1) running in from the walls. These tombs were whitewashed outside (Mt.23.27; Mishna, Sheqaitim i.1). Phoenician tombs [SIDON; TYRE] were usually reached by a shaft from above, as in Egypt, though the Heb. type occurs also near Tyre. After c. 100 B.C. a new type of tomb appears, often in lower chambers cut behind the old kōkim chambers, which are entered from the face of the rock. In this three sarcophagi, parallel with the walls, occur on three sides of the chamber, each under an arcosolium, or arched recess, as in the Roman catacombs. The "new sepulchre" (Jn.19.41) was evidently of this type, which was then used at Jerusalem, since it would be impossible, in the case of the old kōkim, for the angels to be seen, "the one at the head, and the other at the feet, where the body of Jesus had lain" (Jn.20.12). [BURIAL.] See Mem. Surv. W. Pal., vol. Special Papers, pp. 280-293. [C.R.C.]

Tongues, Confusion of. The unity of the human race is clearly implied, if not positively asserted, in Gen.1.27 (cf. 2,1-4). It is regarded as of the most rigid nature, all mankind being conceived as descending from a single pair. This naturally presupposes the doctrine of the unity of language, handed down from parent to child by the process of imitation which perpetuates it still. No explanation is given of the origin of speech, but it was regarded as coeval with the creation of man (cf. 1.29 with 2.19,20). Whether the speech of man developed into dialects and languages between this period and the Flood is not stated; but if so, its unity was restored in Noah, and must have continued down to the time of the tower of Babel and the dispersion (11.1ff.). Recognizing, apparently, the tendency to dispersion, the human family, or a portion of it, sought to check it by the building of a great central edifice, and a city which should serve as the metropolis of the whole world. This, however, was not the Creator's design—the human family was instead to be gathered all in one place; hence the confounding of their language, and the consequent dispersal of men to the various regions of the earth (11.7,8). We are left to imagine that this dispersal was because they could not understand each other, and that the change in speech which took place affected entire groups or families. Whether the language in existence before the confusion of tongues continued to exist is not stated. Though spoken of in 11.7,8 as practically contemporaneous events, the scattering would follow the confusion, though but at a short interval. The confusion of tongues must have been conceived as having been very thorough, as it was not a mere sudden development of dialects (though this is involved), but also a creation of new languages. A chronological period is also implied—the confusion took place as soon as men grew numerous enough to have towns and build a metropolis, so ch. 11 is chronologically precedes ch. 10 (cf. vv. 5,20,31,32). The Mosaic table in ch. 10 does not aim at describing the process of the dispersion, but assumes it as an accomplished event, and the narrative presupposes a certain amount of geographical knowledge on the part of the reader. It records, therefore, the ethnic relations between the various nations affected by it, these relations being expressed under the guise of genealogies. The ethnic character of the document, however, is clear from the names, some of which are gentile in form, as Ludim, Jebusite, etc., others geographical, as Mizraim, Sidon, etc.; and these different, though combined, points of view are admitted and stated in the formula which concludes each section—"after their families, after their tongues, in their countries, and in their nations" (vv. 5,20,31). That the table is geographical as well as ethnological arises from the accepted practice of designating nations by the countries they occupied. The whole human race is referred back to Noah's three sons, Shem, Ham, and Japheth, and is divided into
TONGUES, CONFUSION OF TONGUES, CONFUSION OF

three divisions corresponding therewith. Apparently that the continuity of the narrative followed. Wherefore might not their order, the order of the two sons of Japheth, Javan and Tubal, described first and Shem last, thus making the geographical order, roughly, from W. to E.

(i) The Japhethite list contains 14 names, of which 7 represent independent, and the remainder affiliated, nations: (i) Cush, Ethiopia, and probably the Asiatic Kusu and Kasu of the Assyrian inscriptions, the eastern Kasu being the name associated with the Arabian tribes. Associated therewith are (a) Ashkenaz, (b) Riphath, and (c) Togarmah. (ii) Magog, the Scythians. (iii) Madai, the Medes. (iv) Javan, the Ionians and Hellenic race in general, with which are associated: (a) Elishah, (b) Tarshish, (c) Kittim, Cyprus, (d) Dodanim, if for Rodanim, probably Rhodes, (e) Tubal, the Tibrantes, (vi) Meshech, the Moschians. (vii) Tiras. (2) The Hamitic list contains 30 names, of which 4 represent independent, and the remainder affiliated, nations: (i) Cush, Ethiopia, and probably the Asiatic Kusu and Kasu of the Assyrian inscriptions, the eastern Kasu being the name associated with the Arabian tribes. Associated therewith are: (a) Seba, (b) Havilah, (c) Sabtah, (d) Raamah, (e) Sabtecah, (f) Nimrod, Baby-
lonia. From Raamah came: (a') Sheba, the Sababs; (b') Dedan. (ii) Mirraim, Egypt, with which are associated the following 7: (a) Ludim, (b) Anamim, (c) Naphtuhim, (d) Pathrok. (e) Pasha, (f) Cashlhum, (g) Caphtorim. From Cashlhum came (e') Philistim, the Philistines, though this is regarded as incorrect—it should be from Caphtorim (in that case f'). (iii) Phut, evidently regarded as one of the original nationalities, which is, perhaps, confirmed by a Babylonian inscription, which mentions Putu-Yawam, Phut of Ethiopia. (iv) Canaan (well known), to which belong the following 11: (a) Sidon, the renowned coast-town (language Semitic); (b) Heth, the land of the Hittites (language seemingly Arayan); (c) the Jeb-
husites, of Jebus or Jerusalem; (d) the Amorite (language seemingly Semitic); (e) the Hivite, the Hivites, in the same district; (g) the Arkite, in Phoenicia; (k) the Sinites, in Phoenicia; (i) the Arvadite, of Aradus in the same district; (j) the Zemarite, probably of Simyra; (k') the Hamathite, of the city now called Hamah, where the ancient Hittite script was in use. (3) The Semitic list has 25 names, 5 being those of independent, and the remain-
er of affiliated, nations: (i) Elam, an early Semitic possession. (ii) Assur or Assy-
ria. (iii) Arphaxad, probably Chaldea. With these are associated: (a) Salah or Shelah; (a') Salah's son Eber, the Hebrew nation; (b) Eber's two sons, (e') Japheth and (b') Joktan, the tribes of Arabia, whose names are then given—(a') Almodad, (b') Sheleph, (c') Hazarmaveth or Hazramaut, (d') Jerah, (e') Hadoram (f'), Uzal, (g') Dilkah, (h') Obal, (j') Abimael, (j') Sheba, (k') Ophir, (l') Havilah, (m') Jobab. (iv) Lud, possibly Lygur, the Lygurians. (v) Lud, possibly Lygur, the Lygurians. (vi) Lud, possibly Lygur, the Lygurians. (vii) Lud, possibly Lygur, the Lygurians. (viii) Lud, possibly Lygur, the Lygurians. (ix) Lud, possibly Lygur, the Lygurians. (x) Lud, possibly Lygur, the Lygurians. (xi) Lud, possibly Lygur, the Lygurians. (xii) Lud, possibly Lygur, the Lygurians. (xiii) Lud, possibly Lygur, the Lygurians. (xiv) Lud, possibly Lygur, the Lygurians. (xv) Lud, possibly Lygur, the Lygurians. (xvi) Lud, possibly Lygur, the Lygurians. (xvii) Lud, possibly Lygur, the Lygurians. (xviii) Lud, possibly Lygur, the Lygurians. (xix) Lud, possibly Lygur, the Lygurians. (xx) Lud, possibly Lygur, the Lygurians. (xxi) Lud, possibly Lygur, the Lygurians. (xxii) Lud, possibly Lygur, the Lygurians. (xxiii) Lud, possibly Lygur, the Lygurians. (xxiv) Lud, possibly Lygur, the Lygurians. (xxv) Lud, possibly Lygur, the Lygurians. With this general, with which are associated: (a) Uz, perhaps the Assyrian Ussá, N.W. of Aleppo; (b) Hul; (c) Gether; (d) Mash, apparently the Assyrian Més, a desert country (Syrian or Ara-
bian). The total number of the names men-
tioned in this table amounts to 70, which has been raised by ancient writers to 72, so as to make six dozen, which suggests divine influence. It is difficult to fix the date of this ethnographical table, as arguments can be deduced for a period as early as 2000 B.C. and as late as the Jewish Captivity. In all probability some date between these two would best suit the case, and it has been pointed out that the absence of any mention of Tyre and Assyria seem to indicate an early date for the composition of the table. [TYRE.] Whatever may be its date, it is noteworthy that the writer, even then, had recognized the fact that language was no test of nationality, for he has no hesitation in stating that Canaan and Phoenicia speaks Hebrew, which is correct.

By contrast, the table is compiled, without Negritic strain, it is noteworthy that the Hamitic Hittites spoke a language differing from the Hamitic Egyptian, and the Hamitic Babylonians (Nimrod), again, spoke a tongue differing considerably from either, and quite peculiar in its forma-
tion. To the Hamitic stock, however, was attributed the Kelts, Teutons, and Scandinavians, but to all appearance no provision for the classification of the Mongolians has been made, unless they be regarded as Hamitic too—which indeed would be their designation if the non-Semitic language of Babylonia be Mongolian, as Rawlinson and Lenormant, etc., have maintained. According to the old interpreters, Ashkenaz represents the Teutonic race, and according to Knobel, the Italian would be Tar-
shish (which he identifies with the Etruscans), the Slavonian would be represented by Magog, and the Lithuanian possibly by Tirass. Knobel also makes Riphath to be the Gauls, as dis-
tinct from the Cymri or Gomer; whilst he sug-
gests that Kittim may be the Carians, who at one time were prominent in the islands of Asia Minor. Those who advocate the Mongolian origin of the Scythians would naturally regard Magog as belonging to this family. But we are seldom to the interpretation of these verses are accepting mere theories. The Biblical narra-
tive of the confusion of tongues is undoubtedly due to a desire on the part of the ancient Hebrews to account for the diversity
of languages known to exist on the earth. There is no attempt therein to account for the diversity of race, though diversity of language, notwithstanding that it is no real test of race, is nevertheless dependent upon it. In all probability it was regarded sufficiently accounted for by the statement that Shem, Ham, and Japheth were the three sons of Noah, who developed, as we may suppose, by divine will, the three racial types with which the Hebrews were acquainted. And here we are again met by a difficulty, for, admitting the miracle of the confusion of tongues, we have still to find time for the increase of the families of mankind, and we know from the ancient inscriptions that, at the date of the Flood (2501 B.C. according to Ussher, 3066 B.C. if we accept the LXX, chronology), there were at least four distinct languages spoken—Sumerian or merchants visiting that ancient city in those early days, noticing the many languages spoken there, and seeing an unfinished ziggurat or temple-tower, regarded it as an evidence of man's self-exaltation checked by God in the manner related. Nebuchadnezzar speaks of the temple-towers of Babylon having an unfinished form in that it is doubtful whether its present form is strongly Hebraic is shown by the mention of brick and bitumen as building-material, if they were unusual (which a Babylonian would not have done), and to this may be added the incorrect etymology of Babel, which, though it may not have been used in its original sense of the Hebrew language seems not to have possessed the grammatical form involved. See Prof. Driver in Hastings, D.B. (vol. iv. 1902); and the Rhyi Church Congress Report (1891), p. 167. [RACES: SEMITIC LANGUAGES, p. 46.]

Tongues, Gift of. The chief problem in the meaning of the gift of tongues which threw light on the nature and purpose of the gift in question are Mk.16.17, LXX. 2.13.10.46, 19.6, 1Cor.12.13, 14. We assume that, whatever interpretation may be put on these passages, they at least imply a special manifestation of the Holy Spirit promised to the disciples, not only to give them understanding, but also new power of expressing their moral courage was to be strengthened, that they might be good witnesses; even before kings (Mt.10.19, 20; Mk. 13.11) should Galilean peasants speak freely, The reading of Mk.16.17, 'with new tongues,' is doubtful; but in any case it refers to something which probably corresponded to the Day of Pentecost. Together with the sound as of the rushing of a mighty wind," there appeared, apparently to all who were in the house, "tongues parting asunder like as of fire, and it sat upon each one of them. And they were all filled with the Holy Spirit, and began to speak with other tongues as the Spirit gave them utterance<a name="n1"></a> (Ac.2.1-4). The word used for speaking, ἐφοροθαγγοθα, is used in the LXX. for the speech of prophets with a suggestion of solemn, musical tone (1Chr.25.1; Ezk.13.9). They spoke "the mighty works of God" (Ac.2.11) in a kind of hymn of praise. When the multitude came together, some sat, others stood, and they were caught at words in their own language and expressed surprise that the speakers were Galileans, men of a marked provincial dialect. The list given of the nationalities represented in the crowd is "one of countries, not of languages (Robertson). All these Jewish pilgrims were supposed to have spoken either Greek or Aramaic, no doubt with differences of dialect, and it is possible that the difficulty overcome was only the roughness of Galilean speech. Even so it was a marvellous triumph of spiritual influence over natural deficiency. The difficulty about accepting the traditional interpretation that the tongue-speaking is described as an ejaculatory prayer, uttered in rapturous devotion; not always the same, for there were "kinds of tongues" (1Cor.12.10); occurring in prayer only (14.2) addressed to God. The speaker edified himself, but sometimes lost self-control (ver. 14). He was not understood unless he could interpret the present which was a kind of ecstatic worship, uttered in a language unknown. <a name="n2"></a>One who speaks in a tongue should pray for ability to interpret (Ver. 13). We may suppose that unusual words, such as Maranatha, Abba, imported from the Aramaic, may have mingled with other words and sounds of ecstatic joy. The use of such expressions would not be improbable in a state of high spiritual tension, and in fact the last-named word is regarded by St. Paul as specially characteristic of the Spirit (Ro.8.15; Gal. 4.6). But in the case of one singing in the spirit but without understanding, a strain of ecstatic melody is alone perceived. The spirit prays or praises, but the mind takes no part, is, in St. Paul's word, "unfruitful" (1Cor.14.15). The impression made on Paul is that only the members of the Church, who had been promised to the disciples, not only to give them understanding, but also new power of expressing the truth, their moral courage was to be strengthened, that they might be good witnesses; even before kings (Mt.10.19, 20; Mk. 13.11) should Galilean peasants speak freely.
Toparchy (Gk. τοπαρχία), applied in one passage of the LXX. (1Mac.11.28) to indicate three districts to which elsewhere (10.30,11.34) the name ναοῦς is given. R.V. translates in the first-named passage "provinces," but in the latter two "governments," which A.V. uses in all three passages. The three "toparchies" in question were Apherim, Lydda, and Ramath. The "toparchies" seem to have been of the nature of the Turkish agaliks, and the passages (e.g. 2 K.18.24, etc., LXX.) where the toparch (τοπαρχης) is men-
tioned harmonize with the view that, like the ağa, his duty would be to collect the taxes and administer justice in all cases affecting the revenue, and, for the purpose of enforcing payment, he would have the command of a small military force.

Topaz (Heb. תופז; Ex. 23.17, 39.10; Ezk. 28.13; Job 28.19; Rev. 21.20). It is clear from the account given by Pliny (Nat. Hist. xxxviii. 32) and other ancient writers that their topazius was not the mineral now bearing the name topaz, but that called Chrysolite or peridote, a choice variety of olivine. The yellower kinds were first obtained from an island in the Red Sea, of which some specimens are still found near Akaba. It, however, does occur in Egypt near the emerald-mines. [T.G.B.]

To'pheth, a place mentioned Deut.1.1, which has been identified with Tâfleh, a ruined site N.E. of Petra in Edom. [C.R.C.]

To'pheth. To'pheth. The word occurs almost always with the definite article in Hebrew (kahaloth'pheth), thus showing it was first a common noun and only a proper name later of a locality. Topeth (once topheth, Is.30.33; "a To'pheth, R.V., more correctly "a pyre, "a funeral pile") gave its name to a part of the valley of (the son, var. the sons of) Hinnom (Je.7.32,19.2,15.14; cf. Jos.15.8), and stood to the S.E. of that valley, of which some marvellous stories are told. It was near the Ridon, the source of the Euphrates, and the Gate Harsith, or of potsherds (R.V.). For its history, see Gehenna. The name Topeth no longer occurred in N.T. times, or even after the Captivity. The LXX. spell the name Τάφεθ, Θάφεθ, Θάφθα, etc., and hence the Peshitta has Tapheth. Possibly this change of vowels throws light on the derivation of the name, which is said to be taken from the Syr. verb lîphdha ("to heat"), whence lêphâyad ("fireplace," "tripod"). If the Heb. form is right, it is from the verb which in Syr. (Apeth) is awphî ("to perfect," "finish"), cf. Heb. yâphâ ("to be perfect," hence "beautiful"), Arab. waÂdî ("to keep a promise," "pay a debt," "ate," "conclude, God") and Syr. verb ephâd ("to cook") may be mentioned. The word must mean "a burning-place," "pyre," or "place of atonement," made by fire. The later Jewish explanation, "place of spitting," is impossible. Thomson, Land and Book; Neil, Pal. Explorèd. [W.S.T.C.R.]

Tortoise (Heb. כבש). The word כבש occurs only in 11.25, as the name of an unclean animal, and is translated tortoise in A.V. (R.V. great lizard). It is probably the equivalent of dab, the Arab. name of the spined-tailed lizard (Uromastix spinipes). These lizards, which grow to a length of nearly 2 ft., are common in the deserts of Arabia, Syria, and N. Africa, where they live in burrows. They take their generic name from the rings of stout spines girdling the tail, which is often left exposed when the creatures are in their burrows. [R.L.]

Tou' (1 Chr.18.9,10) = Toi.
Tower. A.V. so renders seven Heb. words (1) bāḥōn (Is.22.13), bāḥōn (Je.6.27), or bāḥān (Is.32.14), a “watch tower” on a mound. [OPHEL.] (2) mīḏābdāl (2Sam.22.51; mīḏābdāl in the q.v.), a “great” building. (3) mīḏābdāl, the common word (Arab. māḏafel) for a “strong” or “high” building, or “castle” (1Chr.27.25), rendered tower in 46 passages, and by “tower” on 8 other occasions, towers to round = mīḏābdāl (Ezk.29.10,30.6). (4) māḏor (Hab. 2.1), occurring in 28 other cases, rendered siege (i.e. siege tower), bulwark, defence, stronghold, fortress, fenced place. (5) [OPHEL.] (6) pīnān, a “corner tower” (Zeph.1.16,3.5) or bulwark (2Chr.26.15). (7) misgābh, a high tower (2Sam.22.23; Ps.18.14), the title ascribed in E.V. to otherwise rendered refuge, defence, high place. Town walls were very early strengthened by projecting towers [CITIES; LACHIS] like that on Opheš (Ne.3.25), of which the foundations still remain. Vineyard towers, 2 or 3 ft. high, served—as they still do—for a platform on which a watchman sat (Is.5.1; Mt.21.33, Mk.12.1). [C.R.C.]

Tower of David (Curtis 4.14).] The neck of Solomon’s bride is compared to David’s tower (probably at Jerusalem) built “to talpiyoth (R.V. marg. ‘with turrets’)”. The meaning of this word is doubtful, but it is perhaps best rendered “with slopes” (Arab. lafa’a) diminishing upwards like the neck. The gold doors of theвера are compared to round shields of heroes hung on the wall (see Ezk.27.10,11), such bucklers being represented on town walls in Assyrian pictures. The site has been localized at the ancient tower near the Jaffa Gate (Phasaelus), but this was built by Herod the Great. [JERUSALEM; C.R.C.]

Trachonitis. (L.u.3.1 only).] From Josephus we gather that it lay S. of Damascus and E. of Gaulanitis, and that it bordered on Auranitis and Batanaea, from Ptolemy that it bordered on Batanaea, near the town of Saccaca. In the Jerusalem Talmud (Shebith vi. 1) it is made to extend as far S. as Bozrah of Arabasus. [Arabic: Trachonit.] Trade. [COMMERCE.]

Tradition. The most scrupulous endeavors made to keep the exact letter of the law led during the four centuries before Christ to the creation of a great body of Midrashim (from da’arash, to “seek”); i.e. interpretations or inquiritis into the meaning of the Scriptures. These were of two sorts—legal and homiletical, Halakoth and Haggadoth; for which and for their history in O.T. times see TALMUD. In the time of Christ, these Midrashim (“traditions of the elders,” Mt.15.2,3,6, etc.) were considered of equal, if not superior, authority to the Scriptures, and their character is well illustrated in Mk.7.3, etc. (cf. Mt.23.26ff.). Their minutiae (e.g. cf. the 39 prohibited labours on the sabbath; cf. Lu.6.1ff.) involved the poorer people in hopeless entanglements (see Jn.7.49), and provoked the strong language of Christ. Care must be used to distinguish between the “traditions of the elders” which evoked our Lord’s indignation, and the Christian tradition of the apostles. Three times St. Paul uses the word παράδοσεως, παράδοσιν, of the instructions which he had given to his converts in the faith (1Cor.11.2; 2Th.2.15,3.6). Obviously, all the first Christian teaching must have been based on what was “traditioned” by the apostles; and St. Paul would have used such an expression as “traditions.” The Jewish doctrines that he had formerly held, he does call his own traditions (τῶν παρατίκων μοί παράδοσεως, Gal.1.14). Pocock, Portia Mosis; art. “O.T.”, Curtis in Hastings, D.B. (5 vols. 1904); Ederseim, Life of Christ, vol. ii. pp. 9ff.

Trance. An abnormal suspension of the faculties of the body while the mental faculties may or may not be active. Possibly a form of catalepsy. It is a remarkable fact that in all ages and nations extreme religious fervour seems apt to produce in special cases extraordinary ecstasies. Although the word “trance” was the only term used on various occasions in A.V. (Num.24.4; 2Esd.12.3; Ac.10.10,23,17), yet the state indicated, in which the person affected acts in an entirely abnormal fashion while under the influence of an external spiritual power, is fairly frequent. Thus Abraham in his “horror of great darkness” (2Co.12.1), Balaam’s vision meaningless visions, the vision of God (Num.24.4), Saul prophesying naked on the ground (1Sam.19.24), Ezekiel and Daniel at the time of their prophetic visions, all appear to have been in a condition of trance. Possibly, too, the apostles were in a similar state on the Day of Pentecost; almost certainly the three chosen ones were on the Mount of Transfiguration (Mk.9.2ff.; Lu.9.32). St. Paul again did not know whether soul and body were together or not at the time of his revelation (2Cor.12.1ff.), and St. John saw the Apocalypse when he was in the Spirit on the Lord’s Day (Rev.1.10). But these trances are by no means restricted to Bible times. Everywhere they have been prevalent, till they have almost come to be regarded as a mark of a special degree of sanctity. Here, of course, we are on difficult ground, for so many would-be reformers have been possessed with a mad hysteria which has simulated the religious trance or ecstasy that one is almost tempted to dismiss the whole thing as a mere form of neurosis. This, however, it is impossible to do in the face of the extraordinary variety of the people who have experienced these ecstasies. And after all,
there is a very palpable difference between the mad ravings of a Joanna Southcote and the devout trance of a St. Francis of Assisi. No sane person believes in the former; every devout mind reverences the latter. [TONGUES, GIFT OF; VISION.]

**Transfiguration (Mk.9.1-10).** This is intimately connected with Jewish ideas of death. Neither O.T. nor N.T. regard human death as natural. The retribution pronounced in Gen.2.17 would certainly convey to our Lord's contemporaries the idea that physical death was a consequence of sin (cf. Ps.39.10; Is.3.12-16, 2.23; Eccles.25.24; 2 Esd.3.5-7). According to Scripture, the possession of an animal constitution rendered physical death a necessary evil. But it converted it into a necessity was sin. No one can reasonably argue that physical dissolution as now experienced is the only possible method of transition into a higher existence. The universality of sinfulness involves the universality of death. Now, the historic entrance of the Son of God into the human race was produced, not that instance, new moral conditions within mankind. The N.T. asserts repeatedly the sinlessness of Jesus Christ. But if physical death is the wages of sin, not the debt of nature, it will follow that moral perfection excludes exemption from the necessity of such experience. If Christ was sinless, then, according to Biblical conceptions, He need not die. And this is exactly what our Lord asserts (Jn.10.17,18). "In the case of Christ, even death itself was voluntary" (Westcott, *In loc.*). "Christus autem et nos positus, et quando voluit, positus" (St. Aug. In Joannis Ev. tract. xlvii. ii. Gauze's ed., iii. 2153). Transition, therefore, into the human race is not in probability the reason why the penalty of death belonged by right to Him Who had advanced along the lines of a sinless development. This was offered Him when He was transfigured. The moral glory transfiguring the flesh suggests a higher method of transition. He stood on the verge of the other world. Moses and Elijah, the law and the prophets, acknowledge Him. If the Incarnation had occurred in a sinless environment, we may suppose that our Lord's earthly life would have terminated with an ascension at the Transfiguration. But what was individually His right would, if accepted, have left mankind unaided in the race against the irresistible power of the sinful. The law and the prophets had, relatively to mankind, another ideal—the idea of redemptive work. Accordingly Christ speaks of His decease which He must shortly accomplish at Jerusalem. Thus the death of Christ is absolutely voluntary. Others may consent to an experience which they cannot avoid. He alone consented to death which He need never have experienced. And that death, so accepted, would have unique results is implied in the Father's expressed approval: "This is My beloved Son" (Lu.9.35). Thus the Transfiguration had its primary significance for our Lord Himself. Yet, since it was permitted to occur in the sight of His selected brethren, it was intended, subordinately, to convey to the Twelve instruction and strength at an extremely critical hour. For it followed upon our Lord's first announcement of His death. This heavenly glory as a right answer to the spiritual willingness of His sacrifice and the profound value of such an experience of the Sinless voluntarily endured. We know how this impressed St. Peter (2Pe.1.16-18). B. Weiss, *Life of Christ*, ii. 98 ff.; *Our Lord's Resurrection* (Oxf. Lib. Theol.), pp. 207 ff.; Weber, *Zum Zorne Gottes*; Mastin, *Sentiment of the Gospel*.  

**Treasure-house.** Treasurer, Treasury. Four distinct Heb. and Aram. roots are represented by these words in A.V. (1) Heb. 'ōdār, the common word for "store," or "treasure," is rendered *treasury* in Jos.6.19, 24; 1Chr.28.12, Ne.13.13, Ps.135.7, Je.38.11; otherwise *steward*. (2) Heb. 'ārūnāyā; Jer.15.25, 27; Mal.3.10; *architect*, Je.50.25; *cellar*, 1Chr.27.27-28. (2) Heb. šōkēn (Is.22.15, *treasurer*; R.V. marg. *steward*), meaning a "resident" (Ass. šākanu). (3) gezērā, Ezr.1.5 (Heb.) and 7.21 (Aram.), or gdabbēravyā (Aram. def. plur.) in Dan.3.2, 3, "treasurer" (Syri. gezzārō), thought to be a Persian word from its termination (cf. Esth.3.4, 9, 7; *treasurers*; Aram. gisānī, Ezr.5.17, 7.20), properly "treasures" or "collections," as in 61, beth-ṣifrahyyād; *house of rolls* (R.V. archives), or "of writings" [WRITING]—i.e. the storehouse of official records. The Heb. ganāzāth (1Chr.28.11) for *treasury* does not seem to be a Semitic word, and might be Akkadian (ganāzā) for "tablet building," meaning a library for sacred writings in the temple (2K.22.8). [C.R.C.]

**Trespass-offering.** [SACRIFICE, 3, ii. a; 3, v. a.]  

**Trial.** See JUDGE, LAW in O.T., SANHEDRIN, PONTIUS PILATE. A few judicial proceedings in N.T. may be mentioned here. (1) The trials of the apostles, of St. Stephen, and of St. Paul before the high-priest, were conducted according to Jewish rules (Ac.4, 6, 37, 6,12, 22, 30,25,1). (2) The trial, if it may be so called, of SS. Paul and Silas at Lystra (Ac.16.16), was held before the council, or, as they are called, στρατηγοῖοι, praetors, on the charge of innovation in religion—a crime punishable with banishment or death. (3) The interrupted trial of St. Paul before the proconsul Gallio was an attempt made by the Jews to establish a similar charge (Acts.18.12-17). (4) Those of St. Paul at Cesarea (24, 25, 26) were conducted according to Roman rules of judicature. (a) In the first of these, before Felix, we observe the employment, by the plaintiffs, of a Roman advocate to plead in Latin. [ORATOR.] (b) The postponement,
TRIBE

after St. Paul’s reply. (e) The free custody in which the accused was kept, pending the decision of the law (Deut. 17.19, 20; Esth. 8.10; Acts 25.28, 29). The second, the formal trial (25.7, 8) presents two new features: (a) the appeal, *appellatio* or *provocatio*, to Caesar, by St. Paul as a Roman citizen, which at once removed the case to the jurisdiction of the emperor. (b) The conference of the prosecutor with the "counsel" (25.12)—i.e. either the assessors, who sat with the prosecutor as consiliarii, or the deputies from the Sanhedrin. (5) We have, lastly, the mention (19.38) of a judicial assembly which held its session at Ephesus.

Tribe. If we take the Bible, which derives the twelve tribes from Jacob’s sons, at its own view, and consider the sons of Jacob to be set before us as men of flesh and blood, they will be for us neither clans nor chieftains of clans, but actual fathers of tribes; though foreign elements might be incorporated in their tribes (Gen. 17.12, 13) by circumcision, with the restriction indicated in Deut. 23.2ff. Nor shall we be able to derive, as Jeremias and others have thought, from the signs of the Zodiac any relation to which could only have arisen in later times. The same number in Nahor’s sons (Gen. 22.20 ff.) and Ishmael’s sons (17.20, 25.13ff.) need not at all be regarded as an artificial imitation by Israel, but simply as a fact. Notice the difference in the method of reckoning from two wives and two concubines, the sons of Nahor from one wife and one concubine, the Ishmaelites without mention of the mothers, but see 21.21); and the varying numbers in the posterity of Esau (Gen. 36), of Joktan (10.26ff.), of Keturah (55.2ff.). To keep to the number twelve, which was disturbed by the adoption of Ephraim and Manasseh (ch. 48), either Levi, because of his separation to God and his deprivation of inheritance amongst his brethren (Num. 18.20 ff.; Deut. 18.1), was not counted (Num. 1,2,10,14ff. 13.4-16; Ezek. 48.1-29, or Ephraim and Manasseh were reckoned as separate (Gen. 49.22; Deut. 35.13; Ezek. 48.30ff.). The order of the tribes was considerably, often without any clear principle being distinguished; but Leah’s sons, as being those of the first wife, are preferably set first, and the order of camping is grouped according to descent on the mother’s side (Num. 2, 10.13ff.). The system of division was patriarchal, as the influence of the family connexions in nomad peoples generally makes it. The tribes (called *malte* genealogically [cf. Ezek. 19.10 ff., Heb.], politically *shibbet*; so that these terms are not available as indications of sources) are divided into clans (*mishpaḥaḥ*), these into houses (*ḥālām* or *ḥabulḥ*), these into families (*gibborim*); see especially Gen. 3.1ff. (A.V. confuses this distinction by translating both *mishpaḥaḥ* and *gibborim* as "families.") Yet the conceptions are not constant, the first two being interchangeable (Jos. 7.17; Num. 4.18, Heb.), and the last but one being used for any of the others (Num. 17.2-17; Josh. 6.14, 15.3). As a rule more than the six are named (yet see Num. 26.21, 29, 36, 40; 1 Chr. 4.1ff.), the houses from the grandchildren, the families from the great-grandchildren of the tribal father. Groups that were too small were put together (1 Chr. 23.11). The word *eleph* for *mishpaḥaḥ* cannot, however, be connected with either *qiddush ha-shem* or *mishna* (Rashi, 12ff.), but with *allāp*.

The head of the tribe was the “prince” (*nāši*), at the head of the clan and the house the *rōsh*, at the head of the family the *gebher*, though here we find interchanges. All chief men together form “the whole congregation or church,” as Ezek. 34.16 is repeated in Exod. 12.17, 18; in the tribe of Levi (11.16), and are identical with the “elders” (cf. Ex. 16.22 with 17.5). This already existing tribal institution was taken up by Moses and made part of his theocratic system (see Deut. 1.15; Num. 1.1ff., 11.16ff., 12ff., 34.18ff.). By the law of inheritance, according to which one descendant of a father must be the *heir* (Num. 21.12), the *prince* (Num. 21.12), and the head of the family (Num. 21.12), this also was made by the Romans, who so understood also the word *tribus* (1 Chr. 1.50, 51). The word probably means “tribe” in a more restricted sense, in the sense of the Latin *tribus* as a semi-autonomous group of settled people, under the sovereignty of an emperor, as in the tribe of Judah (Num. 21.12), or the tribe of Levi (Num. 21.12).

Tribe. (Mt. 17.24, 25). For the general Biblical facts connected with the payment of tribute, see TAXES. A few remain to be added in connexion with the above passage. The payment of the half-shekel (= half *stater* = *drachmae*) was, though resting on an ancient basis (Exod. 30.13), and from the time of Ezra (Ezra 4.21) a charge exacted as a fixed annual rate, of late origin. It was proclaimed, according to Rabbinic rules, on Adar 1, began to be collected on the 15th, and was due, at latest, on Nisan 1. It was applied to defray the general expenses of the temple. After the destruction of the temple it was requisitioned by Vespasian and his successors, and transferred to the temple of the Capitoline Jupiter. In Mt. 22.17, Mk. 12.14, and other places the reference is to the annual imperial taxes levied on behalf of the Roman Treasury, whether on persons, houses, or land. In O.T. the word "tribute" is used as the equivalent to several distinct Heb. words—in Num. 31.38, 2 K. 23.33, 2 Chr. 17.11, Ezr. 4.13—of an impost, duty, or indemnity. But where it represents the Heb. *ḥaẓar* as in 1 K. 5.13 (A.V. marg.), the word means the forced labour exacted from his subjects by a king. [MONEY.] [S.N.S.]

Tripositions. (Tit. 1.11). Tri- *polis,* the Gk. name of a city of great commercial importance, which served at one time as a point of federal union for Aradus, Sidon, and Tyre. It was at Tripolis
that, in the year 351 B.C., the plan was con-
cocated for the simultaneous revolt of the
Phoenician cities and the Persian depend-
encies in Cyprus against the Persian king
Ochus. When Demetrius Soter, the son of Seleucus, succeeded in wresting Syria from the
young son of Antiochus (161 B.C.), he landed
there and made the place the extreme of his op-
tations. It is this circumstance to which allu-
sion is made in the only reference to Tripolis in
the Bible (2Mac.14.1). The city continued
to be important ever after, and is still a large
town. The port—el Minch—2 miles W. of the
city of Tripolis, is considered the best in Syria.
The harbours which may preserve its ancient name, but it is
not noticed in early records. [c.r.c.]

Troas, the city from which St. Paul first
sailed, in consequence of a divine intimation,
to carry the Gospel from Asia to Europe
(Ac.16.8,11). It is also mentioned in Ac.20.5,
6; 2Cor.2.12; 1 Tim.4.12; Acts.20.15; where
it is called Troas under the name of Antigone-
Troas, and peopleed from some neighbouring
cities. Afterwards it was embellished by
Lysimachus, and named Alexandra Troas (Liv. xxxv.42), sometimes called simply Alex-
aandrea, as by Pliny and Strabo, sometimes
simply Troas. It is situated on the coast of
Mysia, opposite the S.E. extremity of the
island of Tenedos. Under the Romans it
was one of the most important towns of the
province of Asia. In the time of St. Paul,
Alexandra Troas was a colonia with the Jus
Italicum. The modern name is Eski-Stamboul,
and the ruins there are considerable. The
word Troas may represent the Enriya—rocky
ridge opposite the city in the apostle's time, enclose a rectangu-
lar space, extending above a mile from E. to
W., and nearly a mile from N. to S. The
harbour is still distinctly traceable in a basin
about 400 ft. long and 200 broad.

Trogyllium. The island of Samos is
exactly opposite the rocky extremity built by
the ridge of Mycale, called Trogyllium in N.T.
(Ac.20.15), and by Ptolemy (v.2). A little to
the E. of the extreme point there is an an-
chorage still called St. Paul's Port.

Troop, Band. These words are employed
to represent the Heb. word g'dhudh, which has
invariably the meaning of an irregular force,
gathered with the object of marauding and
plunder.

Trophimus, one of the companions of St.
Paul. He was a Gentile and a native of
Ephesus (Ac.21.28,29). With Tychicus he ac-
companied St. Paul on the third missionary
journey and over part of the return route from
Miletus. He appears to have remained in Asia, while Trophimus
journeyed with the apostle to Jerusalem.
There he was the cause of the tumult leading
to St. Paul's arrest (21.27-29). He is men-
tioned but once more, in 2Tim.4.20, from
which we learn that he had been with St. Paul,
had been left, by reason of illness, at Miletus.
[A.C.D.]

Trumpet. [Cortet.]

Trumpets, Feast of, better known,
from Jewish tradition, as the New Year's Day.
It fell on the first day of the seventh month
(Tishri), reckoned by the national year be-

Tubal. [Tryphena.]

Tubal (Gen.10.2; Ch1r.1.5) is placed, with
Javan and Mesech, among the sons of Japheth,
and all three are again classed together in the
enumeration of the sources of wealth of Tyre.
TUBAL-CAIN

(Tubal and Javan (Is.66.19), Mesec and Tubal (Ezr.32.26,38.2,3.39.1), are described as nations of the North (38.15,39.2), and in some cases as the names of Tubal's sons, with the Iberians—not the Spaniards (Jerome), but the inhabitants of a tract between the Caspian and the Euxine, nearly corresponding with modern Georgia. This is similar to the view of Bochart and Lagarde, that Mesec and Tubal are the Moschi and Tibareni. These two nations are named, under the names of Mushaba and Tubalada, in the Assyrian inscriptions. In the time of Shalmaneser II. mât Tabali, "the land of Tubal," comprised 24 petty kingdoms, whose tribute he received. Uassurnare of Tubal also paid tribute to Tiglath-pileser, but afterwards refused to do so, and was apparently deposed, and Helli set on the throne. Later, Sargon of Assyria placed Ambaris on the throne of Helli, and gave him his own daughter in marriage with Cilicia as a wedding-gift. Nevertheless, Ambaris plotted with Armenia and mât Muski (Mesec) against his benefactor, the result being that Amris (Ambaris), with all the royal house and the nobles, was carried captive to Assyria, Assyrians taking their place. The exact limits of Tubal are difficult to determine, but Prof. Rawlinson placed the Tibareni between Cape Yason (Iasonium) and the Meliti-Imnak (the river Melanthius). In the time of Xenophon the Tibareni were an independent people. [T.G.P.]

Tubal-ca'In, a son of Lamech the Cainite (Gen.4.21). He is called "an instructor of every artificer in brass and iron" (A.V. and R.V. marg.), a rendering of the Heb. which agrees roughly with that of the amended text of Olsenhoun and Gunkel, "he was the father of all such as forge copper and iron." The R.V. reads, "the forger of every cutting instrument of brass and iron." The derivation of the name is obscure, but it may mean "the forger of the spear." [H.C.B.]

Tubale'ni. The "Jews called Tubaleni" (2Mac.12.17)—i.e. men of Ton, who lay near Amman, are called by this name in the Greek writers, "the Jews "in the places of Tobie" (R.V. land of Tubias). [C.D.]

Tertirnent-tree occurs only once (Eccles. 24.16). The τερπηνόδος or τερπυνός of the Greeks is the Pistacia terebinthus, terebinth-tree, common in Palestine and the East, supposed by some to represent the 'êd of the Heb. Bible. It occasionally grows to a large size, and belongs to the Anacardiaceae. In Is.6.13 the Heb. word 'êdâ is rendered teil-tree in A.V.; in Wyclif, "terebint"; R.V. "terebinth." But the teil-tree is also the name of the linden, or lime, which seems to have misled some commentators. See Harris (Nat. Hist. of B., 1824) on the linden. The terebinth or turpentine-tree was generally classed with oaks. [H.C.H.]

Turtle, Turtle-dove (Heb. tôr). The Heb., like the English, name is onomatopoetic, derived from the cooing of the bird, and is first mentioned in Scripture in Gen. 15.20. Turtle-doves (Turtur communis) visit two different tribes. The turtledove is common during the winter; but other kinds, such as the Egyptian or palm turtle-dove (Stigmatopelia senegalensis), are summer visitors to Palestine. Both kinds may have supplied the sacrifices in the wilderness, as the last-named is found in numbers wherever palms occur. From its habit of pairing for life, and its fidelity to its mate, the turtle-dove was a symbol of purity and an appropriate offering. The regular migration of the Egyptian turtle-dove and its return in spring are alluded to in Je.8.7 and Can.2.11, 12. It is from its plaintive note that David in Ps.77.19 compares himself to a turtle-dove. For other species of doves, or pigeons, mentioned in the Bible, see Dove. [R.L.]

Ty'chicus, described with Trophimus as "of Asia" (Aσανροί, Ac.20.4). They travelled with St. Paul through Macedonia, and went in advance of him to Troas. At the time of the apostle's first imprisonment in Rome Tychicus was again with him (Col.4.7,8), and was the bearer of his epistle to the Colossian Church, and, most probably, with Onesimus of that to Philemon. On two occasions he acted as St. Paul's messenger to Ephesus (Eph.6.21,22; 2Tim.4.12). In Tit.3.12 St. Paul speaks of sending him or Artemas to Crete, and this suggests some likelihood that he and Trophimus may have been the two brethren (2Cor.8.16-23) dispatched with the epistle cited to Corinth. According to tradition, he became Bp. of Chalecedon. [A.C.D.]

Type. The Gk. τῶτος (a blow, or a mark made by a blow, and so a model or image) is used in N.T. in several shades of meaning; but the sense in which "type" has become familiar in religious phraseology, i.e. a divinely designed parallel or correspondence between some person, institution, or event in O.T. and Christ Himself, or the ordinances or experiences of the Christian Church, is most nearly to be seen in Ro.5.14 or +Cor.10.11. That such correspondences would be found to exist between the old and new covenants seems to have been a Jewish belief which was adopted unhesitatingly by Christians, and has always played an important part in the orthodox Christian interpretation of O.T. Although the word "type" is rarely used in this sense in Scripture, the principle of typology marks the whole attitude of Christ and His apostles towards the older Scriptures. Thus we have such authoritative types as Jonah, of the

Ex. 25:40; Ac. 7:44; Heb. 8:5.

A "type" should properly be distinguished from an "allegory," which is a fictitious narrative designed deliberately to convey spiritual truths. It is independent of the knowledge and torical event suggested by pious imagination. The interpretation of types stand on a higher level, and is more akin to prophecy. To recognize and interpret the typical meaning of O.T. belongs to the prophetical office of the Church. For types are significant illustrations of the later spiritual affairs of the Church. In the mind of the Church is guided by the Spirit to recognize and teach. "A type presupposes a purpose in history wrought out from age to age." (Westcott.) Typology may be rightly regarded as the application of scientific method to spiritual truth. It recognizes the individual prophecies that are fulfilled in the Church and sacred history, and sees the development of revelation as a connected whole. Thus to the spiritual mind typology supplies one of the most remarkable evidences of the truth of revelation. It should be noted that this typical view of the events and characters of O.T., while in no way diminishing their historical and miraculous character, is an independent of the knowledge and immediate purpose of the actors and authors, and may not be recognized till long afterwards, like the Messianic meaning of many utterances of the prophets (cf. 1 Pe. 1:10-12). The development of typology beyond what is actually suggested in O.T., while interesting and fruitful, demands great caution and a sense of proportion. For typology in mediaeval and even in patristic exegesis degenerated at times into mere fanciful allegorizing. Hence the Reformation produced a reaction in favour of literalism, and even tended to reject typology altogether. The basic Protestantism of Bengal and the Württemberg school emphasized, however, the broader aspects of typology, and in the present day the typical value of O.T. history and institutions is again becoming widely recognized as an element that needs taking into account to form a true conception of inspiration. [A.R.W.]

TYRANNUS, a man in whose school or school of Phœnicians taught the Gospel for two years, during his sojourn at Ephesus (Ac. 19:9). The reading adopted in R.V., "the school of Tyrannus," seems to imply that he was well known, and in this case the probability is that he taught in a public place. On the other hand, the reading which A.V. follows, "the school of Phœnicians," suggests that the name will be unknown to the reader. If so, Tyrannus was probably a private teacher, who taught pupils in a lecture-room attached to his own house. [A.G.D.]

TYRE, TYRUS (Heb. ʕārû; Arab. ʕārū, "rock"), the Phoenician city on a rocky island in N.W. corner of the Holy Land. It was a "strong city" outside the limits of David's kingdom (Jos. 19:29; 2 Sam. 24:7), whose king Hir'am sent cedars, firs, carpenters, and masons to Jerusalem, and aided in building the palace and temple (2 Sam. 5:11; 1 K. 5:1, 7, 13, 14; 1 Chr. 21:1; 2 Chr. 2:3, 11). Solomon ceded 20 cities of Gaulle of Nebuchadnezzar to him to destroy (1 K. 14:12). Tyre is unnoticed in the historic books after Solomon's time. An early Psalm (45:12) speaks of the "daughter of Tyre" offering a gift; but later (83:7) Tyre joins the general league, under Assyria, against Israel. Isaiah (apparently c. 728 B.C.) speaks of troubles which will afflict Tyre "when her troubles begin in 727 B.C., and continued till 664 B.C., or even later. Je. 25:22 speaks of the approaching desolation due to Nebuchadnezzar's attack. Tyre sent messengers to Zedekiah, probably as to mutual aid against the Babylonian conqueror (27:3), but its fate was worse. Ezekiel foresaw (47:15, 17) the desolation of Tyre, the ruin of Tyre, just about the time, apparently, when Nebuchadnezzar besieged and took the city. The prophecy of Isaiah that Tyre should be restored (Is. 23:17) had then been fulfilled, and Ezekiel gives a full account of the prosperity of the city under the later kings of Assyria (Ezk. 27:2-25), and just before the accession of Nebuchadnezzar. The city was a commercial centre and trading port, and 2 Kgs. 25:25-31 gives a full account of the destruction and desolation of Tyre. It was a "merchant of the people of many coasts." It was then and built "in the midst of the seas." It had fairs from Senir, cedars from Lebanon, ships with oars of Bashan oak, benches or (hatches) of boxwood inlaid with ivory, the sails being of Egyptian linen, and the masts of Lebanon. The ships were brought from Elath and from the coasts of Elath. The mariners came from Sidon, Arvad, and Gebal; the mercenary troops from Persia, Judah (Lydia), and Phut, as well as from Arvad (Gammadims). Precious metals came from Tarshish and from the regions of Javan, Tubal, and Mesecch, and from Asia Minor. Horses, chariot horses, and mules were brought from Togarmah (Armenia), ivory and ebony from Dedan (or from Rhodes, according to LXX.). From Syria came gems, brodered work, and linen; from Palestine, corn, honey, oil, and balm; from Damascus white wool and wine of Helbon. The Danai and Ionians brought metals [Dan. 11:13]. While Indian trade was considerable, it seems to have been by Arab trade from Uzal. Tapestry from Dedan, flocks from Arabia and Kedar, came with gold and spices and gems from Sheba and Kedar. From Assur, Haran, and other lands to the E. were brought corded boxes of cedar, with building materials, which was traded with Ionia on the W., with India on the E., with Egypt and Arabia on the S., and with Armenia on the N. The mention of Persia in this early
TYRE, TYRUS

age is explained by the yet earlier appearance of Persians in the texts of Sennacherib, &c. The prince of Tyre (Ezk.28.2) was then perhaps a šokhen, or "protector"; but the "king of Tyre" (ver. 12) was regarded as divine, unless we are to understand the deity of the city to be intended by the "anointed cherub" (ver. 14), who had been in the garden of God; for the Phoenicians, like the Assyrians and Babylonians, represented on their seal cylinders the Kiriblu (or "guardian") as a winged figure—human or monstrous—in pairs flanking the tree of life, or 'āshērā, and the winged sun, "brooding" or "settling" above those whom he protected. The "mountain of God" (Harsak-Kalama, or "world mountain") was also an ancient Akkadian name for the Caucasus (see ver. 14), and Phoenician mythology was of Babylonian origin. But all this wealth, pride, and trust in Melqart, the deity of Tyre, was to be abused by Nebuchadnezzar (29:18). The earlier prophets say little of Tyre. In Ho.9:13 the meaning seems to be "Ephraim looks to me like a rock set in a meadow"; and this does not refer to the city. Jl.3:4 refers apparently to the old Phoenician slave traffic at Tyre and Sidon; and as concerning the site of ancient Tyre, "besieged by the Captivity, c. 1881 B.C., and, after the Captivity, Zech.9:2,3 alludes to the revived prosperity of Tyre under the Persians. Later notices are scarce (Esd.5:55; 1 Mac.5:15,11,59), and in N.T. Tyre is only noticed as visited by our Lord (Mt.11:21, 22,15:21; Mk.3:8;7,24,31; Lu.6:17,10:13,14), as having traffic with Agrippa (Acts 23:20); and the port touched at by St. Paul (21:3,7).—The Site. Tyre was built on a flat rocky reef of about 100 acres in area, including a smaller rock, on S.W., of some 25 acres, which seems to have been early filled in by the sand between it and the main island. It is always mentioned as having two ports, the oldest notice of these being c. 1330 B.C., when the Egyptian Mohar (see Brugsch, Hist. Egr. ii. p. 105) says (according to Chabas) that it was called "Tyre of the two ports." "The drinking water is brought to her in boats. She is richer in fishes than in sands." The Greeks then knew only the city on the mainland at Palae-Tyre, which Strabo places 30 stadia away (xvi. ii. 23) by streams. This is the present Râs el-'Ain, about 3½ miles S. of the island, with two springs, whence an aqueduct led to the shore near the city. Strabo also refers to the "two ports," and these are mentioned (by Diodorus Siculus and Arrian) in connexion with the seven months' siege by Alexander the Great, in 333-332 B.C. The N. port is the present harbour, about 10 acres in area. It was called the "Sidonian Harbour." The southern harbour, surveyed by swimming, in 1881 (by Capt. Conder and Lieut. Mantell, R.E.), was previously supposed to have disappeared. It is also about 10 acres in extent, formed by reefs, and divided into an outer and an inner port by a cross quay. This was the "Egyptian Harbour." There were also small landing-places between reefs on W. side of the city. Alexander made a mole to join Tyre to the mainland; and this being levelled by sand now makes an isthmus about 500 yds. wide, joining the island to the shore. The ruins include the 12th-cent. walls, and a cathedral S. of them (where Origen was buried in 253 or 254 A.D. and Frederic Barbarossa in 1190 A.D.), with a Phoenician shaft tomb on S.W., explored in 1881. The main cemetery is on the rocky mainland, presenting tombs with kâkon or tunnel graves, as in Babylon, with two shafts 6 to 10 ft. deep, as in Egypt. The springs at Râs el 'Ain were dammed up in five tanks, of which three were apparently ancient. The aqueduct thence to Tyre fell, from a level 80 ft. above the sea, to about 40 ft. or less opposite the island. It is mainly medieval; but Lieut. Mantell discovered, in 1881, that at one point there are remains of false arches, which may be as old as the time when (according to Menander, as quoted by Josephus, in Ant. xiv. 2) Shalmaneser IV. besieged Tyre (before 722 B.C.), and cut off the water supplied by an aqueduct. The modern town, within the medieval walls, occupies only about half the island, towards N.W. It has a small trade in fruits, and a population of about 3,000 persons, half of whom are Gk. Christians, and the rest fanatical Metawaleh, or Moslems of a Persian Shi'ah sect (Sury. W. Pat. i. pp. 51, 69, 72-81; iv. pp. 433-135).—History. As in the Bible, Tyre is mentioned (v.19, 22, 28, 28). so in the Egyptian and Assyrian accounts the city is also noticed as on an island. The Gk. idea that Palae-Tyre ("Old Tyre") was on the mainland, 30 stadia away, and Piny's assertion that the city stretched 16 miles (Hist. Nat. v. 17), were unfounded, though it is noticed that Tyre, as Strabo says, may, in Strabo's time, have been older than the flourishing city on the island appeared to be. Ramses II. must have passed Tyre, since he left records at Sidon and Beirût, and the Mohar (as above) describes the island-city in his reign. It is not yet known how early it was built, though its priests gave to Herodotus (ii. 44) a date answering to 2700 B.C. There is nothing impossible in this statement, if we accept the Babylonian date which makes the Akkadians enter Syria a century earlier. [PHENICE; SYRIA.] The Amarna letters, in 15th cent. B.C. include five from Tyre (Berlin 99, Brit. Mus. 28 to 31). Rautenstrauch lists 12 philologically connected letters, and it appears that Zarephath (Zarpitu) was then placed under Tyre. Aineileche was attacked by Aziru the Amorite, with chariots and infantry, aided by ships from Arvad, and the water supply was cut off. Menander (see 9 Ant. xiv. 2) appears to have had historic information as to the reigns of Tyrian kings, though Josephus (8 Ant. iii. 1) is wrong in supposing Tyre not to have been founded till c. 1240 B.C. He appears to be correct, on the other hand, in giving the foundation of Carthage as the great Tyrian colony of the W. c. 870 B.C. (Against Apion, i. 17). Beginning with Abibalus (Abibal), the father of Hiram, he follows the Phoenician history of Dios and the records of Menander. Hiram had reigned 12 years when Solomon built the temple, and was succeeded by Baalezer, "Abd"-Astarta, and his son, followed by "Astartu, Asher-ammu, and Phelish. The next king, Itu'-baal, built by the date recorded in detail, according to the total in the present text of Josephus) be contemporary with Ahab. His name (as the Babyo- lions Itu-bel shows) meant "Baal is with
him." He was also king of Sidon (see 9 Ant. vi. 6) and was the Ethbaal whose daughter Ahaz married. He reigned 32 or 33 years, and being a川d by Bodon and Matlun, and Pugum-'aliun in whose 7th year Carthage was built by his sister. His reign of 47 years brings us to the time when (in 842 B.C.) Tyre became tributary to Shalmaneser II. of Assyria. There is a gap in Tyrian history till the reign of Luliya (or Eluluya), who ruled only from the sea, and but from Sidon to Accho, for 36 years (see 10 Ant. xiv. 2). He was attacked by Tiglath-pileser III. and also by Shalmaneser IV. (according to Manender), when Sidon and Accho deserted him, and the water supply from the aqueduct was cut off for 5 years. He was again attacked by Sennacherib in 703 B.C., and though Tyre was not taken, an Assyrian nominee (Tubel) was set up in Phoenicia. Luliya would thus have acceded c. 740 B.C. In the reign of Esar-haddon, Baal of Tyre was tributary, but joined Tirhakah of Egypt in 670. The Eponym Canon states that when Esar-haddon proceeded against Tirhakah he sent a force to cut off the food supply to the sea, and this caused its submission. On Esar-haddon’s death Baal again joined in an Egyptian revolt, and Tyre was again besieged by Assur-bani-pal, who appears to have desired peace with Phoenicia. In 680 B.C. he had given Baal his first revolt; in 664 B.C. he besieged "Baal of Tyre" and dried up the sea, and forced the Tyrians to submit when they had only sea water to drink. Even then he restored Yahi-melek, the king’s son (a famous warrior), to his father, and accepted daughters of Baal and of his brothers, with large dowries, as wives. The history of Tyre in the time of Nebuchadnezzar is taken by Josephus (Against Apion, i. 21) from Phoenician records. Another Ithu-baal then reigned, and was blockaded by the Babylonians for 13 years (600 to 587 B.C.), being succeeded, or replaced, by another Baal, ruling till 577 B.C. Nebuchadnezzar then appears to have appointed Phoenician judges (shôpî’tîm), instead of kings, till 570 B.C.; and, after the capture of the city, Meri-baal and another Hiram were sent in succession from Babylon. The latter reigned for 20 years, and in his time Cyrus took Babylon (538 B.C.). The Tyrian kings under the Persians are unknown, and Sidon may have been the capital city of Phoenicia in this age. In the time of Alexander the Great, ‘Az-melek was king of Tyre, and alone remained faithful to the Persians, who had destroyed Sidon. The famous seven months’ siege (333-332 B.C.) is described by Diodorus Siculus in detail (xvii. iv.), and Arrian repeats his account (ll. 18-24). When the great mole had forever destroyed the irregularity of Tyre, and the Greek-Phoenician fleet had burst the boom of the Egyptian harbour, 8,000 Tyrians are said to have fallen fighting, and 2,000 were crucified by Alexander round the walls. Women, children, and slaves, to the number of 30,000, were sold; and the conqueror, after sacrificing to Melqarth, and establishing a memorial to Alexander on the site of Tyre, built, the Moslems, and the Franks (who held it from 1124 to 1291 A.D.), but yet later, till its harbours were destroyed by Fakhri-ed-Din early in 17th cent. A.D.—Antiquities. Coins of Tyre are known, belonging to the Persian and Roman ages (Taylor, Alphabet, i. p. 223), beginning with those of ‘Az-baal (456-424 B.C.), and others under Artaxerxes III. (360-339 B.C.). The Gk. and Roman coins range from 145 B.C. to 153 A.D. One of these represents Melqarth as a Hercules, and on the reverse are the "two ambrosial stones," which (according to a Phoenician legend) existed under the sea at Tyre. No remains of the famous temple of Melqarth have yet been found. It stood perhaps where the cathedral was built, in the centre of the island; and the columns of Egyptian granite, lying in the ruins of the latter, may have once belonged to it. Many of the Tyrian tombs have been rifled; none having yet been found intact. The only Phoenician text in the city (Clermont-Ganneau, Rechell, ii. p. 87) is a much-damaged inscription of nine lines, found by natives in 1885 near the Serai, or court-house. It is cut on a white marble block like an altar, and is evidently votive. It records the presentation of a "basin," costing "ninety of silver—Tyrian coinage," by two "judges" (shôpî’tîm) who seem to have shared the expense of the object, given in fulfilment of a vow. The names are interesting in connexion with Tyrian mythology. One donor is "Adon-baal the Shopheṭ, son of ‘Az-melek," who apparently had ancestors, also judges, named Bod-Melqarth and D’a-melek; and the other, apparently his father, also "a Shopheṭ." If the latter were the Tyrian king of Alexander’s age, the text might be as early as 300 B.C.; but probably it belongs to a later period of prosperity in Tyre, under the Ptolemies. [Phenic; Sidon.] [C.R.C.]

**Tyre, used for Tyre in A.V. of Jeremiah, Ezekiel, Hosea (Joel has ‘Tyre’), Amos, Zecharijah, 2 Esdras, Judith, and the Maccabees. Tyre, Ladder of. [Ladder of Tyrers.]**

**U**

**Uca’l.** In the received text of Pr.30.1 (A.V. and R.V.) Ithiel and Uca’l appear as proper names. The R.V. marg. reads, "I have wearied myself, and am consumed." The passage is very obscure. See Encyclopaedia Biblica, "Ithiel and Uca’l." [W.E.B.]

**Uel, one of the Ten Bani, who had married a foreign wife (Ezr.10.34).**

**Ula’i** (Dan.8.2,16), the Eulaeus of the Gk. and Roman geographers, is mentioned as the river flowing past Susa or Shushan, where
Daniel saw his vision of the ram and the he-goat. Aššur-bani-āpī records that in the battle which his army fought outside the city, the Ulai (Ula or Ulaa) was choked with the bodies of the fallen, andarchers who surrounded the citadel. It is now the Karun, a large river which enters the Shatt al-‘Arab at Mohammerah. Ancient writers seem to identify the Upper Euæus with the Kerkhah and the Lower Euæus with the Karun. The surveys show that the Kerkha formerly divided at Pur, and after 20 miles N.W.of Susa, sending out a branch which passed E. of the ruins, and receiving the waters of the Shatpur, flowed in a S.S.E. direction until it joined the Karun at Ahwaz. The two might, therefore, have been anciently regarded as a single stream. Concerning the Euæus an Assyrian copy of an old Babylonian (student’s) tablet says “Let him explain the Ulâ as that which carries its abundance to the sea,” confirming the general opinion that it flowed anciently into the Persian Gulf. [T.G.P.

Ulam.—1. A descendant of Manasseh, and father of Bedan (1Chr.7.17). [Rakem.—2. Firstborn of Eshek, a descendant of Saul and president of a family of archers (1Chr.8.39,40).

Ulla, head of an Asherite family (1Chr.7.39). Ummah, one of the cities of Asher (108.19.30 only). Possibly ‘Alma, as suggested by Thomson, since the Heb. begins with the guttural ‘ayin. Now a village in the hills 6 miles N.E. of Achzib (ez Zib), next to which town Nehemiah (Neh.2.c.3), and the Persian Gulf, and the Ganges, are mentioned.

Unclean Meats. The distinction between clean and unclean animals is anterior to the Mosaic law. The first mention of the division occurs in the Flood story, when Noah took into the ark seven each, male and female, of all kinds of clean animals and fowls, and two each, male and female, of the unclean animals and fowls (Gen.7.2,3,8). The distinction seems then to have been made with reference to sacrifices only. Noah offered of each kind of clean beasts and fowls on the altar that he made after the Flood (8.20); whereas every moving thing that liveth shall be clean” (8.21). Rabbinic theologians held that the division into clean and unclean is made the basis of an important food-law (Lev.11.46,47). Living creatures permitted for food are “clean” or “pure,” those forbidden are “unclean” or “an abomination.” (1) Beasts and animals permitted: those that chew the cud and divide the hoof. Four which fulfill only one of these two conditions, and therefore were prohibited, are mentioned by name (Lev.11.1-7; Deut.14.7,8): (a) the camel; (b) the coney or hyrax, the flesh of which is eaten by the Arabs of Arabia Petraea, and also by the inhabitants of Lebanon; (c) the hare, which is eaten by the Arabs; (d) the swine. (2) Fish: “whatsoever hath fins and scales” was permitted (Lev.11.9; Deut.14.9). (3) Birds: no distinguishing feature of clean or unclean birds is given, but from the list of forbidden birds (Lev.11.13-19) it would appear that all birds of prey and nearly all water-fowls were forbidden. (4) “Winged creeping things that go upon all four, which have legs above their feet, to leap withal upon the earth,” were permitted, and four kinds of locusts are mentioned (11.21,22); all other creeping things were forbidden (11.20,31-38,42,43), of which a list is given in vv. 29,30. Other restrictions were: (i) Blood was not to be eaten (Lev.17.10,14). This prohibition was older than the Mosaic law, so that the food of the Noachic precepts (Gen.9.4). The blood of fowl and beast was forbidden; the penalty for transgression was “cutting off” (Lev.7.26,27). This law applied to the stranger as well as to the Israelite (17.10,12). The blood of an animal taken in hunting was to be drawn off (ver. 13). Probably because the blood remained in the body, a clean animal that had been torn by a beast was not to be eaten (Ex.22.31); or one that had died a natural death (Deut.14.21), but this might be given or sold to a stranger. An instance of the transgression of the law occurs in 2Sam.14.32, and the narrative shows that the sin was considered a great one. Two reasons are given for the prohibition against eating blood: (a) it is the seat of life, or the life itself (Lev.17.11,14; Deut.12.23; cf. Gen.9.4); (b) the blood on the altar made atonement for souls, and therefore should not be eaten by man (Lev.17.16). The early Christian Church were exhorted to abstain from blood (Ac.15.29,21.25). (ii) The fatty parts of sacrificial animals to be burned on the altar were prohibited; the fat, like the blood, seems to have been considered to be the seat of life (Lev.2.7). The prohibition does not “cutting off” (7.25). (iii) The command not to seethe a kid in its mother’s milk is three times repeated (Ex.23.19,34.26; Deut.14.21). The Targ. Onk. renders the phrase “Thou shalt not eat meat in milk,” and it is understood in this sense by later Jewish teachers. (iv) The fruit of a tree during the first three years was “as uncircumcised,” and was not to be eaten (Lev.19.23). (5) Meaning of the prohibition. The only reason given for the division into clean and unclean is that Israel may be holy as God is holy (11.43). [Holy.] The prevailing opinion among the Rabbis was that the laws of the clean and unclean were the arbitrary decrees of God; others (e.g. Grotius, Spencer, Michaelis) that they are purely sanitary laws, intended to promote physical well-being; others again (Ewald, Anc. of Is. 144 ff.) that they were designed to form a barrier between Israel and the surrounding nations. Whether the latter was the original intention or not, the laws have had this effect. [Medicine, Hygiene.] This is seen in N.T.: e.g. St. Peter says, “It is an unlawful thing for a man that is a Jew to join himself or come unto one of another nation ” (Ac.10.28); and the first thing necessary to the removal of this barrier was the abolition of the distinction between clean and unclean as applied to peoples. With the abrogation of the law as applied to animals there fell the barrier between men (Ac.10.9-16). These laws have contributed largely to the continued existence of the Jews as a separate people, and to self-control through the exercise of self-denial in food matters. Various reasons have been suggested for the division of animals, etc., into

ULAM

UNCLEAN MEATS
the two classes, but no one theory meets all the difficulties. [LAW IN O.T.] [H.H.]

Uncleanness. The Mosaic law regarded certain acts and states of the body as rendering the person unclean, and as the state could be transmitted to others by personal contact or separation from the congregation. This provision was prescribed until an act of purification had been performed. The matter does not concern health, nor is the act or state of nature of sin. The cases of uncleanness are arranged in three classes (Num.5.2)—leprosy, issues, and death. These again fall into two classes: (1) matters connected with the propagation of life, e.g. conjugal intercourse, all kinds of sexual discharges, childbirth; (2) those connected with the other extreme, death; leprosy being in a peculiar sense a death in life. Some, including Jewish writers, divide all the cases into two classes, the greater and lesser degrees of uncleanness according to the period required for purifying, the lesser requiring one day the greater a longer period. The Mosaic division is probably the most convenient. — I. Leprosy. It is evident from the description given in Lev.13 that the kind of leprosy intended is the malignant form, the symptoms being so distinctive that the word for leprosy is not uncommon in Syria at the present day. The dishevelled hair and rent garment (13.15) are the signs of mourning for the dead (10.6), and suggest that the leper was regarded as already dead, and therefore contact with him would defile like contact with the dead. [Law and Prophecy]. There is reference in 14.33-53. The house was subjected to the same process of examination as the man suspected of leprosy, and when found to be infected with a malignant type, it was to be demolished, and the materials deposited in an unclean place without the city. Any one entering a leprous house was unclean till the evening (14.40). The leprous garment was to be destroyed by fire as unclean (13.47-50).—II. Issues. Those specified are: (1) In woman. (a) The menses. She was to be unclean seven days; any thing that came in contact with her was unclean, and any person touching the unclean person and his habitation till the evening (15.19-24). Any man who was stained with her taint was unclean for the same period as the woman, and he impeded his uncleanness to the bed (ver. 24). (b) Issue of blood (16.25-28). The conditions were the same as in the preceding case, the uncleanness continuing as long as the issue. Collins is not mentioned. (c) Childbirth (12.2-6). The uncleanness lasted seven days for a boy and fourteen for a girl, with 33 days for the former and 66 days for the latter spent in her home. During this period she was not to touch anything holy nor enter the sanctuary. (2) In man (15.2-12). (a) Two kinds of issue, the conditions of uncleanness being as in woman’s (na supra). If the unclean man spilt on one who is clean, the latter is unclean till the evening (ver. 8). (b) (15.16-18). Discharge of semen, involuntarily or in coitus, rendered the man, and in the latter case the woman also, uncertain till the evening; and if the woman was unclean, the same. III. Death. It was not death itself that defiled, but the dead body, whether of man or of clean or unclean animal (Num.19.14-22). (1) The dwelling in which a man died, and all open vessels in it, were unclean for seven days, as was also one who entered it, or who touched the body of one who had died in a clean house, till the evening. If a bone, or even a grave. A thing touched by the unclean man, or one who came into contact with the thing so defiled, was unclean till the evening (19.22). (2) Contact with slaughtered animals, clean or unclean, did not defile, but the carcase of any animal defiled a man till the evening (Lev.11.24-26): eight kinds of smaller animals defiled also things, domestic utensils, etc. (vv. 29-38), and the objects were unclean till the evening. The animals are enumerated in vv. 29,30, and the things defiled in ver. 32.—IV. The following instances represent a different class of defilement. These were unclean until the priest who superintended the offering of the red heifer (Num.19.7), the man who burnt it (ver. 8) and he who collected the ashes (ver. 10); on the Day of Atonement the man who conducted the scapegoat out of the city (Lev.16.26) and he who burnt the bullock and the other goat (ver. 25). The soldiers who slew the Midianites were unclean for seven days (Num.31.17ff.). [CRIMES].—V. There can be little doubt that in every instance (I.—III.) the cause of defilement was contact with decomposition and corruption. This is clearly the case where dead bodies are concerned (animals slaughtered are in a different category). There is defilement when a living leper, and the same element of corruption in the defiling discharges. The Israelite was to be Holy as God is holy. Sin defiles the soul, and for this defilement sacrifices were provided; contact with corrupt or decomposing animal matter defiles the body; and for this defilement purifications were provided, as an integral part of the Levitical system. These were not expiatory, because the defilement was not sin, but they did for the body what the sacrifices did for the soul—they brought it into covenant relationship with God, between Whom and His children defilement raises a barrier.

Uncion. [Anointing]

Undersetters (kâhêph). The Heb. means lit. “a shoulder”; the A.V. word expresses admirably the meaning in 1K.7.30,34—viz. “supports,” which held up the laver. [W.O.E.O.]

Unicorn (Heb. rîem, rîm), the rendering by A.V., following the LXX., of the Heb. rîem, which occurs seven times in O.T. as the name of some large wild animal. That the rîem was not a one-horned animal (whatever the mythical “unicorn” may have been) is evident from Deut.33.17, where, in the blessing of Joseph, it is said, “His glory is like the firstling of his bullock, and his horns are like the horns of an unicorn,” not, as the text of A.V. renders it, “the horns of unicorns.” The two horns of the rîem are “the thousand of Ephraim and the thousands of Manasseh.” Some difficulty arises from the fact that rîem is the modern Arab. name of Loxor’s gazelle from central Africa. Tristram indeed suggests that this name may have been transferred to the
gazelles (and perhaps other antelopes) after the extermination of the wild ox, but this is doubtful. The idea that the buffalo is intended is very unlikely, seeing that this animal only exists in a domesticated state in Palestine, where it appears to have been introduced at a comparatively late epoch. Little else can be urged in favour of the AssurianUMPULLU, the horned rhinoceros, for that animal does not exist in Syria, and even if it had been a native it would have been forbidden to be sacrificed by the law of Moses, whereas the re'em is mentioned by Isaiah as coming down with bullocks and rams to the Lord's sacrifice. Again, the skipping of the wild ox (cf. 29:6) is incompatible with the habits of a rhinoceros. With regard to the claims of any member of the antelope group, it may be observed that all the Syrian species are harmless unless wounded or hard pressed by hunters, nor are they remarkable for the possession of extraordinary strength. Considering, therefore, that the re'em is the wild ox, the animal of greatest strength and ferocity, that it was evidently well known and often seen by the Jews, that it is mentioned as an animal fit for sacrificial purposes, and that it is frequently associated with bulls and oxen, the inference is that a wild member of the same group is referred to. Moreover, the allusion to the animal of great strength and ferocity may be a reminiscence of Egyptian wild bull-worship, but without proof that the name Chaldæa was ever extended to the region above the Sinjar; and in any case the Jews meant, by Chaldæa, exclusively the lower country, the upper being called Mesopotamia or Pādan-aram (Job 1.17; Is.13.19,43.14, etc.). That being the case, the tradition connecting Ur with the name of the Babylonian inscriptions seems to be the most probable. It is quoted by Eusebius from Eusebius, and is to the effect that in the tenth generation there lived in Camarina, which is by some called Ur, the 13th in descent, Abraham, "a man of noble race, and superior to all others in wisdom." There is really any doubt that Camarina is to be connected with the Arab. qamar, "the moon," and the inscriptions tell us that the god of Ur, or Uruwa, as it was called by the Sumero-Akkadians, was Sin or Nannea, the moon-god. This city, which is represented by Magar or Umgar (Magannu) on the Euphrates, nearly opposite its junction with the Shatt-al-Hai, is now not less than 124 miles from the sea, but a reference, in a bilingual list, to "the Urite ship" gives ground for believing that it was an ancient day's march on the sea route.

The most remarkable building is the remains of the temple dedicated to Nannea, the moon-god, near the northern end of the ruins a true Babylonian tower in stages. (BAHEL, TOWER OF.) The bricks of the structure bear the name of Ur-Engur, who reigned c. 2700 B.C. Among other rulers whose names are found in connexion with this ruin are the very rare (Du Dungi, son of Ur-Engur, and Kurd-mubuk and his son Arad-Sin or Eri-Aku (= Amouk, 1). It was here that the four cylinders with identical inscription of Nabonidus mentioning his son Belshazzar were found, and from them we learn that the temple-tower was called Ę-lugal-gala-siga, and belonged to the temple Ę-gis-nu-gala. S. of the temple-tower of Ur was the temple of the goddess Nin-gala, and to the S.E. was Ę-gi-para, "the temple of the lady of the gods." Ur was the capital of the kingdom of which it formed the centre until the consolidation of the states of Babylonia into a single kingdom during the time of Hammurabi and his suc-
URBANE

The ruins measure about 1,000 yds. by 800, and consist of a number of low mounds within an enclosure. It is completely surrounded by graves, having evidently been one of the sacred places to which the dead were taken for burial. The statement of Eupallemus is important, as we have said, but it is needful to point out that the comparison of Ur with Uru is not altogether satisfactory, the original (Sumero-Akkadian) form of the word being Uriwa, the termination of which is not reproduced in the Heb. Ur. It is therefore possible that Ur of the “Chaldees” may have been the country of Uru or Uri—i.e. Akkad or N. Babylonia. (See Shinar.) This would give a wide field for a pastoral family such as that of Terah, though in the province to which Uru (Muqeir) belonged they would have found no lack of pasture. The principal objection to its identification with Uru or N.

URIEL

officers (23.34), and hence, perhaps, Uriah’s first acquaintance with Bath-sheba. In the first war with Ammon he followed Joab to the siege, and with him remained encamped in the open field (11). He returned to Jerusalem, at the king’s order, sent on the pretext of asking news of the war—really in the hope that Uriah’s return to his wife might cover the shame of the king’s own crime, but the austere fidelity of Uriah disappointed the king’s expectation. Finding it impossible to screen Bath-sheba from the death-punishment to which she was liable (Lev.20.10), David sent Uriah with a letter to Joab containing the command, “Set ye Uriah in the forefront of the hottest battle, and retire ye from him, that he may be smitten, and die.” Joab did as he was told; an assault was made on Rabbah-ammon, and Uriah, with his fellow-officers, was shot down by the archers on the wall.

Babylonia is that the name Chaldea was not applied to that part of Babylonia until a comparatively late date. That Terah was a worshipper of the moon-god, and went to Haran because, like Ur, it was a centre of his worship, is also possible, and would confirm the identification of Ur with Uru.

Urbane (better, as R.V. and Genevan Bible, Urbanus, Gk. Οὐρβανός), the name (masc. in gender) of a Christian quoted by St. Paul in Ro.16.9. Nothing further is known of him.

Uri. Two. A man of Judah, grandson of Caleb ben-Hezron, and father of Bezaleel, 1 (Ex. 31.3, 35.30, 38.22; 1 Chr. 2.20; 2 Chr. 1.5).—2. Father of Geber, 2 (1 K. 4.19).—3. A gate keeper of the temple who put away his foreign wife (Ezr. 10.24).—4. Uriah. One of David’s mighty men (2 Sam. 23.39; 1 Chr. 11.41). Like others of the king’s officers, he was a foreigner—a Hittite; but his name and manner of speech (2 Sam. 11.11) indicate that he had adopted the Hebrew religion. He married Bath-sheba, the daughter of Eliam—possibly the same as the son of Ahithophel, and one of his brother-

RUINS OF TEMPLE AT MUGHEIR (Muqeir). (After Loftus.) W.I.A.

(vers. 24). It is one of the touching parts of the story that Uriah falls unconscious of his wife’s dishonour.—2. High-priest in the reign of Ahaz, summoned by Isaiah as one of the two witnesses to his prophecy concerning Mahershalal-hash-baz (Is. 8.2). He is probably the same as Urijah the priest, who built the altar for Ahaz (2 K. 16.10-16).—3. A priest of the family of Hakkoz, head of the seventh course of priests (Ezr. 8.33; Ne. 3.4, 21, R.V.). [H.C.B.]

Urias. 1. Uriah, the husband of Bathsheba (Mt. 1.6).—2. (1 Esd. 9.43) = Urijah, 3.

Uriel (fire of God; cf. the demand, 2 Esd. 4.5, “weigh me weight of fire”), the angel who questions and teaches Ezra (2 Esd. 4.1, 36 [Jeremiah], 5.20, 10.28). Also in Eth. Enoch ix. 1 (one of the four archangels), x. 1 (Gk.), xix. 1, xx. 2, xxii. 5, lxvii. 1. He is “over the world and over Tartarus,” and accompanies Enoch through chaos and the prison of the angels, and also teaches him the laws of the heavenly bodies. For his position in later Judaism, see Jews. Encycl. s.v. [A.L.W.]

Uriel. 1. A Kohathite chief (1 Chr. 6.24[6]).—2. Chief of the Kohathites in the reign of
David (15.5.11).—3. Uriel of Gibeah was the maternal grandfather of Abijah (2 Chr.13.2).

Urijah.—1. Urijah the priest, in the reign of Ahaz (2 K.16.10); = probably Uriah 2.—2. Uriah. A priest who stood at Ezra’s right hand when he read the law to the people (Ne.8.4).—4. The son of Shamera of Kirjath-jearim, slain by Jehoiakim for prophesying against Jerusalem (1 B.26.20).—5. Uriah the Hittite, a valiant warrior who was killed by David in the battle of the city of Rabbah (2 Sam.18.1-17; cf. Je.39.3-7 and Lam.4.21), near the Sabeans and Chaldeans (3 K.15.17). The LXX. places it in the same direction, reading in the verse added to 42.17. "in Uz, on the borders of Idumaea and Arabia." Josephus places it more N., including the city Damascus (1 Ant. vi. 4). It is probably (though this is not absolutely certain) identical with the Assy r. Uzzai (Briedt, Delitzsch, Paradies). The Arameans are spoken of as a race widely distributed throughout Mesopotamia, and even in parts of Palestine, especially in places bordering on mount Seir. For literature, see Jon. [c.h.h.w.]

Uzza, the father of Palal (Ne.29.12).—2. The sixth son of Joktan (Gen.10.27; 1 Chr.1.21), whose settlements are clearly traced in the ancient name of Sana’ad, the capital city of the Yemen, which was originally Azzāl. It has disputed the right to be the chief city of the kingdom of Sheba from the earliest ages of which any traditions have come known, and has been, in the best portion of that kingdom, it must always have been an important city. Niebuhr says that it is a walled town, situate in an elevated country, in lat. 15° 2’, and with a stream (after heavy rains) running through it. It has a citadel on the site of a famous temple.

Uzzai, son of Abinadab. Together with his brothers, he of a tribe of the north of the land. On an occasion when the ark was removed from Kirjath-jearim (2 Sam.6.3,6ff.; 1 Chr.13.7,6ff.). At the threshing-floor of Nachon (or Chidon), the oxen stumbled, and Uzzah took hold of the ark to steady it. For this God smote him, and the place received the name Perek-uzzai. His error or sin is not explained. [c.r.c.]

Uzzz-en-sherah, a town founded or rebuilt by Sherah, an Ephraimite woman, the daughter either of Ephraim himself or of Beriah. It is named only in 1 Chr.7.24, in connection with the two Beth-horons. It is perhaps Beil Ṣira, a village 2 miles S.W. of the lower Beth-horon. [c.r.c.]

Uzziah.—1. A Benjamite (1 Chr.8.7).—2. (13.7ff.) = Uzziah.—3. The head of a family of Nethinim who returned with Zerubbabel (Ezr.2.49; Ne.7.51).—4. Properly Uzzah, as R.V.; the head of a Merarite family (1 Chr.6.29[14]).

Uzza, Garden of, the spot in which Manasseh, king of Judah, and his son Amon were both buried (2 K.21.18,26). It was the garden attached to Manasseh’s palace (ver. 18).

Uzziah, son of Abinadab. Together with his brothers, he of a tribe of the north of the land. On an occasion when the ark was removed from Kirjath-jearim (2 Sam.6.3,6ff.; 1 Chr.13.7,6ff.). At the threshing-floor of Nachon (or Chidon), the oxen stumbled, and Uzzah took hold of the ark to steady it. For this God smote him, and the place received the name Perek-uzzai. His error or sin is not explained. [c.r.c.]

Uzziah, one of David’s guard: a native of Asherethoth Karnaim (1 Chr.11.4).

Uzziah (Heb. my strength),—1. Uzziah, king of Judah, also called (eg. 2 K.15.1)
Azariah (Jehovah hath helped me). After the murder of Amaziah, his son Uzziah was chosen by the people to occupy the vacant throne. He was a contemporary of Jeroboam II. He lived a life filled with success, activity, and pious rule. He began his reign by a successful expedition against his father's enemies the Edomities, who had revolted from Judah in Jehoram's time, and penetrated as far as the head of the gulf of 'Aqaba, where he took the important town of Eloth (the Elath of his father's time), waged his success wars in the S., especially against the Mehuim, or people of M'aan, and the Arabs of Gurbaa. Towards the W., Uzziah fought successfully against the Philistines, razed the walls of Gath, Jabneh, and Ashdod, and founded new fortified cities in Philistine territory. He strengthened the walls of Jerusalem. He was a great patron of agriculture; and also brought his army to a state of high efficiency. He never deserted the worship of the true God, and was much influenced by Zechariah, a prophet who is only mentioned in connexion with him (2Chron.26.5). So the southern kingdom was raised to such prosperity as it had not known since the death of David. Solomon's walls were not actually built by Uzziah (1Chron.26.8). The king of the valley of the shadows (Ps.25.4) was such a grove, naphal, a torrent bed. The word occurs 133 times, rendered in A.V. as "brook," "stream," "flood," "river," "valley." It applies to the valleys of Gerar, Eschol, Zarek, Arnon, Zered, Jabbock, the River of Egypt (Jos.15.4), Kanah, Kishon, Sorek, Besor, Chereth, Mechoz Ab, and Maan; Ghon, Willows, Shittim (in J.J.3.18). In Job (6.15) the drying of such torrents is noticed, as also in Is.17.7 of Cuthah. In Job 51.33, probably, the reading should be, "elods of the bees" (Arab. nahl), as meaning honeycombs used in embalming. (4) qay'ed. (5) qoph thul, or low child. (6) heth. (7) terms are not interchanged in the Heb. in the case of the sites named. [C.R.C.]

Vaniah, a son of Banai who put away his foreign wife (Ezra.10.36).

Vashi', the first born of Samuel, according to A.V. of 1Chron.6.26[1]; but in 1Sam.8.2 the name of his first wife, probably in Chronicles the name of Joel has dropped out, and "Vashi" is a corruption of washni, "and (the second)." Crl. R.V.

Vashi', possibly a modification of the Old Pers. vahista (excellent), or to be identified, though by no means satisfactorily, with Amestris, the only wife of Xerxes who is known in secular history, the badness of whose character appears from the story of the daughters of Abrahim, and the being readily interchangeable. Refusing to risk insult by appearing at the king's command in a scene of drunken revelry, she was forthwith deposed, at the advice of the wise men and princes (Esth.1).

Veil. (1) masaw'; used of the veil which Moses assumed to veil his face when he came down from the mount (Ex.34.33-35). (2) mispatbol; used of the veils which the false prophets placed upon their heads (Ezek.13.18,21; A.V. kerchiefs). (3) ralol; used of the light veils worn by females (Is.3.19; A.V. veilers). (4) anna; understood by A.V. of "locks" of hair (Can.4.1,3,6; Is.17.2), but the en-tents of the passages favour the sense of veil. For other words improperly translated veil, see Dress. The use of the veil was by no means so general in ancient as in modern times. Much of the modern scrupulousness dates from the promulgation of the Koran, which forbade women to appear unveiled before any but their nearest relatives. In ancient times, the veil was adopted only in exceptional cases, either as an article of ornamental dress (Can.4.1,3,6,7), or by betrothed maidens in the presence of their future husbands, especially at the wedding (Gen.24.65,29.25), or by women of loose character for purposes of disguise (Gen.38.14). Among the Jews of N.T. times it appears to have been customary for the women to cover

Uzziel

Val. [Tabernacle; Temple.]

Vajezath'a, one of the ten sons of Hannah whom the Jews slew in Shushan (Esth.9.9).

Vale. Valley. The A.V. so renders five Heb. words. (1) temeq, a "deep valley," occurring 69 times, including the vale of Siddim [Cities of the Plain], of Shaveh, of Henbro, of Middot, of Ajifer, and of the Valley (Jos.13.27), that of Rephaim, of Jezreel, of Keziz, of Beth-rehob, of Elah; the "King's Dale" (2Sam.18.18), the valley of Berachah, of Succoth, of Ba'a, and of Jehoshaphat, the order being that of first occurrence in O.T. (2) gay or ge', a narrow valley, or a winding river, as the valley (1Sam.17.3), a word occurring 56 times; especially of Hinnom [Gehenna], Charashim, and Hamon-gog. For Jiphthah-el (Jos.19.14,27), see Dabbasheth. The valley of Salt was in Edom (the Talmud applies the word to the gorge leading to Petra), and see also that of En-gedi (1Sam.13.18). The valley of the shadows (Ps.25.4) was such a grove, naphal, a torrent bed. The word occurs 133 times, rendered in A.V. as "brook," "stream," "flood," "river," "valley." It applies to the valleys of Gerar, Eschol, Zared, Arnon, Zered, Jabbock, the River of Egypt (Jos.15.4), Kanah, Kishon, Sorek, Besor, Chereth, Mechoz Ab, and Maan; Ghon, Willows, Shittim (in J.J.3.18). In Job (6.15) the drying of such torrents is noticed, as also in Is.17.7 of Cuthah. In Job 51.33, probably, the reading should be, "elods of the bees" (Arab. nahl), as meaning honeycombs used in embalming. (4) qay'ed. (5) qoph thul, or low child. (6) heth. (7) terms are not interchanged in the Heb. in the case of the sites named. [C.R.C.]
their heads (not necessarily their faces) when engaged in public worship. For the use of the word (O.T. veil, N.T. veil) as a curtain, see Tabernacle; Temple.

Vermilion. [Colours.]

Version, Authorized. The desire to enable the people of England to read the Holy Scriptures in their own language first finds expression in the works of Bede. But none of his translations have survived; and, though fragmentary efforts were made in the meantime to render portions of the Bible into English, it was not till the 14th cent. that the great era of Bible-translation began. Then the work of John Wyclif led the way to that remarkable series of versions which culminated in our A.V. in 1611. Since therefore the A.V. is the lineal descendant of other English versions that preceded it, we shall best understand its characteristics by tracing its historical antecedents.—I. We begin, then, with the work of John Wyclif. Wyclif was born in Yorkshire of a wealthy family, conscious of the evils that had arisen from the corruptions of the Church, the wealth of the hierarchy, and the oppression of the people. He felt that no remedy was possible unless the Church could be restored to a Scriptural basis, and that for this purpose the Scriptures must be rendered in the reach of the people in a language they could understand. So, in spite of fierce attack, especially from Archbishop Arundel, his great work of translation was set on foot. With him was associated one Nicholas of Hereford, to whom was assigned the work of translating the O.T., Wyclif himself working on the N.T. In 1382, however, Nicholas came under ecclesiastical censure for preaching Wyclifite doctrines at Oxford and was excommunicated. The result was that his share in the work of translation ended abruptly, and the O.T. was completed by another hand, perhaps by Wyclif himself. So the first complete English Bible was made, probably in 1383. But Wyclif did not rest content with his first attempt. He saw that revision was needed, and at once set to work to prepare a new edition. He had a valuable helper in John Purvey, who completed this new edition after Wyclif's death in 1384 and has left an account of the procedure adopted. The translation had been made from the Vulgate. The existing texts of the Vulgate were, however, full of errors. The translators were therefore at pains to search for old copies of the Latin Bible, which gave a better text than those in common use. In order to determine the meaning of difficult words, and passages they used the Glossa Ordinaria of Walafrid Strabo, and, for the O.T., the Commentary of Nicholas de Lyra, a converted Jew. Another important aim in Purvey's revision was to improve the English idiom in Wyclif's Bible. The first translation bore obvious signs of having been made from the Latin; for the English rendering often retained the Latin idiom, and was in consequence difficult to understand. Purvey's revision is therefore an improvement on Wyclif's first Bible in that its English is more idiomatic. In spite of the hostility of those in authority and the great cost of making copies, the new Bible circulated widely and was eagerly sought after, as is shown by the fact that even now nearly 200 MSS. copies of the whole or a part of the Scriptures in this version are in existence.—II. A century passed by before the next great advance was made; and in that interval the art of printing was invented. The fall of Constantinople had brought the treasures of Grk. learning within the reach of the West; and so the New Learning arose, with Erasmus as its leading exponent. It was through him that the Greek Text reached the Western Church. The advance of the New Learning brings us to the next great name in Bible-translation. William Tindale was born in the last quarter of the 15th cent., and, first at Oxford and then at Cambridge, came under its influence. From quite early days it had been his desire to bring the Scriptures within the reach of all the people of England in their own tongue. He would cause the lads at the plough, he said, to become more familiar with the Bible than were the clergy of his own day. Wyclif had been kept at a distance of London to enable him to carry out his scheme. But he met with no encouragement; indeed, as he said subsequently in his preface to the Pentateuch, he found that "not only was there no room in my Lord of London's palace to translate the N.T., but also there was no place in England where the need of a translation was driven to the Continent to carry out his great work. His special claim to honour lies in the fact that he was the first to go behind the Vulgate and to translate from the original languages. First at Cologne and, when driven thence by persecution, then at Worms, Tindale pursued his work upon the N.T., and in 1525 there appeared the first printed copy of the N.T. in English. The printer's name is not given, but it is generally considered to have been issued at Antwerp. The appearance of this volume in England was followed quickly by its official condemnation, in which Tunstal, Bishop of Durham, pronounced, probably in the words of a lute, that "they must be burnt; for the author of such a book has written nothing...; he has altered one syllable of God's word against my conscience." We cannot be too thankful that Tindale set this example of faithfulness in striving to render the true meaning of the original and to render it faithfully into English. His work is singularly free from scholasticism, and whenever he comes upon a place which has been mistranslated, as he says, "he alters the word of God's word against my conscience." We cannot be too thankful that Tindale set this example of faithfulness in striving to render the true meaning of the original; for his version exercised a great influence upon his successors in the work of translation. It is true he often made mistakes; his renderings are sometimes free and his language rough. But these are faults which in such an early stage of the new scholarship were inevitable and could be removed in subsequent revisions. Tindale died a martyr to the cause for which he had laboured so faithfully. By an act of treachery his enemies
entapped him and imprisoned him in the castle of Vilvorden, where, after over a year's confinement, he was strangled and burnt in 1536. "Lord, open the king of England's eyes," were the last words he uttered.—III. The work of translation was carried forward under very different conditions by Miles Coverdale, a native of Yorkshire. Thomas Cromwell was now in authority and was anxious that the Bible in English should be in the hands of the people. The bitter opposition which the bishops had offered to Tindale's work, associated as it was in their minds with his controversial treatises, made it impossible to hope that a translation bearing his name would ever be received by ecclesiastical authority in England. So Cromwell looked round to find a scholar who should be competent to make a new version. He fixed on Coverdale, who indeed had been one of Tindale's associates. The peculiar conditions which he assumed to undertake the task. Coverdale set to work with unremitting diligence, and his Bible was printed (probably at Zurich) and published in 1535. In point of scholarship, Coverdale was inferior to Tindale, for he made no attempt to translate from the original languages. The claim made upon the title-page of his Bible was that it had been "faithfully and truly translated out of Dutch and Latin into English." In other words, Coverdale's principal authorities were Luther's German version and the Latin Vulgate. In his dedication, however, he speaks of other versions which he had consulted, and it is generally considered that the Greek and the Hebrew are the product of Coverdale's genius, may be said to have set for all subsequent workers the standard in this respect of what an English translation of the Bible should be. His rendering of the Psalmus, in the revised form which he subsequently made for the Great Bible, so endued with the character of the original, that it was adopted for inclusion in the Prayer Book of 1562 in preference to the version of 1549.—IV. The next edition of the Bible was that which bore the name of Thomas Matthew (1537). This name, however, was a pseudonym, the real editor being John Rogers, a friend of Tindale's and the proponent of the Marian persecution. The translation was essentially one. It incorporated Tindale's N.T. ; and in the O.T. the Pentateuch is also that of Tindale. The books from Joshua to 2Chronicles seem, from internal characteristics, to be similarly from Tindale's hand; and the rest of the O.T. is taken from Coverdale's Bible. The special characteristic of Matthew's Bible lies in the strong Protestant bias of its very diffuse explanations and annotations. This Bible claims to be set forth "with the king's most gracious licence," and is therefore the first A.V. Permission was granted for it to be freely sold and read within the realm. Taverner's Bible, which appeared in 1539, was little more than a new edition of Matthew's Bible. Changes were sometimes made in the text with a view to greater accuracy or to a more idiomatic rendering, but the principal modification was the softening down of the strong controversial bias shown by the notes.—V. Meanwhile, Cromwell was anxious for the preparation of a new translation which should be free from the manifest defects of Matthew's controversial production. So for the second time he entrusted the work to Coverdale. Matthew's Bible was to be employed as the basis for this new work, but no private opinions were to be introduced into it. The outcome of this scheme was the production of a volume which, from its size, was known as the Great Bible. Of this version seven editions were issued between 1539 and 1541. The title page describes the contents of the volume as having been truly translated after the verity of the Hebrew and Greek texts, by divers excellent learned men in the foresaid tongues." The method adopted by Coverdale was somewhat as follows: Matthew's Bible was taken as the basis of the new translation, but such portions as had been incorporated from Tindale's Bible were now coloured. Coverdale's earlier translation was in the whole was revised in point of scholarship by the aid of those experts in Greek and Hebrew of whom he speaks on the title-page. The Great Bible was ordered to be set up in all the churches throughout the kingdom. In the second and later editions a long preface by Cranmer was inserted, and this version is consequently known as the Cranmer Bible. It is an edition of the Great Bible, and was accompanied by marginal notes, which, as was to be expected from the circumstances of its compilation, showed a strong Calvinistic tone. This GENEVA BIBLE, called commonly the "Breeches Bible," from its rendering of Gen.3.7, attained a wide and lastling influence. For while it was long the A.V. itself was able to outst it from public favour. Its popularity was due in part to the convenient size of the volume, partly to the clearness of its type; for the old black-letter was discarded and the book was printed in Roman characters, with an employment of italics for all words not found in the original. The English Bible. As the result of this was the first English Bible to adopt the division into verses.—VII. It is not surprising that the Elizabethan bishops should have disliked the growing popularity of a version which emanated from such a source, the more so as it attacked episcopacy. They resolved, therefore, under the direction of Archbishop Parker, to prepare a new version of their own, to which official sanction could be given. The various books of the Bible were parcelled out among the bishops, who worked independently of one another, taking the Greek Bible as their standard, though rather curiously they allowed the Geneva version to exercise an obvious influence upon their work. A volume so
composed was naturally unequal in merit, and though the Bishops’ \textit{Bible}, as it was called, had the support of Convocation, it was not able to secure the royal licence.—\textit{VIII.} In the meantime, the activity displayed by the Reformers in producing successive translations of the Bible was reacting upon the Romanists. The Bull of \textit{Vatican} V. obtained by the Bishops in 1557 resulted in the Romanist schism and in the flight from England of many who adhered to the Pope. They accused the existing English versions of being false and heretical, and resolved that they would put out a new version of their own. The initiative came from Dr. William Allen, one of the leading men in the founding of the English college at Douay. The disturbances in Flanders had made Douay insecure, and so the college removed to Rheims, where the work of translating proceeded. The task seems to have been completed in 1582, but the poverty of the exiles did not allow them to publish at first more than the N.T., which appeared in the O.T. of Rheims. The version was published in 1609 at Douay, to which place the seminary had in the meantime returned. The Rheims and Douay Version was \textit{made} from the Vulgate, which, however, as the preface tells us, was diligently conferred with the Hebrew, Greek, and other editions in diverse languages. This version was originally disfigured by its frequent latinisms; but in subsequent editions these have been considerably reduced and the renderings have been improved by borrowing from A.V., just as A.V. itself admitted the influence of the Rheims and Douay Version upon its own choice of expressions. The two versions that emanated from English exiles upon the Continent were alike in this, that their margins were filled with annotations of a controversial kind. While the Geneva Bible was employed to claim the support of the Scriptures for Calvinism, the marginal notes of the Rheims and Douay Version vigorously inculcated Roman doctrine.\footnote{\textit{Ibid.}} A more complete survey of the history of the English Bible up to the close of the reign of Queen Elizabeth will have shown that when King James came to the throne the position was unsatisfactory. The most popular version of the Scriptures in use was disfigured by Calvinism, and, on the other hand, the official version was hardly worthy of its imprimatur. Among the points raised by Dr. Reynolds in the name of the Puritan party at the Hampton Court Conference was a request for a new translation of the Scriptures, on the ground that “those which were allowed in the reign of King Henry VIII. and Edward VI. were corrupted.” The proposal was received with disfavour by the bishops, who were satisfied with the official version put forth in the late reign by their own order. “If every man’s humour should be followed,” said Bishop Bancroft, “there would be no end of translating. The King, however, took up the idea with enthusiasm, and selected a body of fifty-four divines to undertake the work. These were divided into six companies, two of which sat at Westminster, two at Oxford, and two at Cambridge. A set of rules was drawn up for their guidance. The translation was not to be made \textit{de novo}, but the Bishops’ Bible was to be taken as its basis, and as few alterations were to be made in it as should be consistent with faithfulness to the original. Proper names were to be rendered in the forms commonly accepted. The old ecclesiastical words were to be retained—\textit{e.g.}, the word “church” was not to be altered to “congregation.” The works to come under the lead of the English Church to Christian antiquity appeared in the instruction that, when the meaning of a word was doubtful, it was to be interpreted in that sense in which the most eminent of the Fathers had understood it, provided always that such interpretation was consistent with the context and the leading principles of the translators. The arrangement of the chapters was not to be changed, or as little as possible. The tendency of previous versions to develop into controversial treatises led to the laying down of the rule that no marginal notes were to be affixed except for the explanation of the Heb. or Gr. words. Marginal references from one place of Scripture to another were not to be added. The whole book of the Bible was assigned to one or other of the six companies into which the translators were grouped. The method to be adopted by each company was as follows. Each chapter was to be revised on the basis of the Bishops’ Bible by all the members of the company working separately. Then the company was to meet together and each member was to present his own translation or emendations, and so, by means of a conference, agreement was to be reached as to the form in which the chapter was to stand. When in this way a book had been completed by the company to which it had been assigned, it was to be sent to the other companies for their consideration. By this provision a greater uniformity of language was secured than would have been the case if the several companies had acted quite independently of one another. Differences of opinion between the companies were to be referred to a conference, and no survey of the progress of the work will be of special difficulty, the translators were not tied to their own number. They were bidden to consult any learned men in the country whose opinion would be of value. Finally, the safeguard was added that a general supervision in regard to points of Gr. and Heb. scholarship was to be committed to three or four of the principal Biblical scholars in the two Universities. The directors of the work were to be Lancelot Andrews, Dean of Westminster, and William Barlow, Dean of Chester, who presided respectively over the two Westminster companies. Though the Bishops’ Bible was to be revised, and as true to the original as the revisers were directed to make use of other English versions where they agreed better with the meaning of the original, such as those of Tindal, Coverdale, Matthew, Whitchurch (\textit{i.e.} the Great Bible), and that of Geneva. No record has come down to us of the progress of the work; no correspondence connected with it has been preserved; no minutes of the meetings of the translators exist. In their preface, however, they speak of the great pains they had bestowed upon their work, which seems to have occupied them for rather less than three years. The fruit of their labours was published in 1611, and bore upon its title-page
the words "Appointed to be read in churches." No evidence in support of this statement has ever been found. The new version does not seem to have been publicly sanctioned by any constituted authority. Neither Convocation nor Parliament nor the king gave it authorization, so far as we now appear. Its claim to be known as the Authorized Version rests therefore not upon formal edict but upon the position which its own merits have won for it. Owing to the circumstances of its production, it rapidly displaced the Bishops' Bible as the official version; but as a Bible for the people it had long to remain the standard of the English language of the time. It was too popular to be superseded at a stroke, and it was not till the middle of the century that the new version was in anything like universal use. By that time the popular verdict had justified the claim of king James's Bible to be the Authorized Version. It remains to consider some of the characteristic features of this time-honoured translation. It comes to us from the stateliest period in the development of the English language, and, considered merely as a monument of English prose, it is a worthy example of the period to which it belongs. The Revisers of the N.T. have borne ungrudging testimony to its excellence of style. But they had to study what they called "the great version," they say, "carefully and minutely, line by line: and the longer we have been engaged upon it, the more we have learnt to admire its simplicity, its dignity, its power, its happy turns of expression, its general accuracy, and, we must not fail to add, the music of its words, jarred upon by none of the defects. But the beauty of this version must not blind us to its defects; indeed, this richness of language was to some extent purchased at the expense of exact scholarship. For in their anxiety that as many standard English words as possible should find a place in the pages of the English Bible, the translators used a variety of expression hardly consistent with faithfulness to the original. The same words, even when occurring in the same context, were variously rendered. Moreover, the method adopted of dividing the Bible between different companies was the cause of many inconsistencies. The MSS. of the Massoretic text are known to exist of an earlier date than the 10th cent., and all belong to the same recension; though the evidence of ancient versions, and notably the LXX., proves that other recensions existed. Hence the method adopted by the Authorized translators of taking as their standard the Massoretic text and only departing from it in exceptional cases gives substantially the best text that can even now be constructed. But in the N.T. the case is different. The translators of 1611 were able to use the Complutensian Polyglot, published in 1517, the Gk. text of Erasmus, and Robert Stephens's edition, which represented a revision of these two; but they principally relied upon Beza's edition of 1598. The great Gk. MSS. of the 4th and 5th cents. were then quite unknown, the intricate science of textual criticism had not yet come into being, and hence inevitably the renderings of A.V. alone were based upon MSS. which are now in some cases seen to be erroneous. In the course of three centuries the English language has necessarily undergone a change, and many words which A.V. uses have altered their meaning, while others have become obsolete. That the change of language has not in this long space of time lessened the value of the text is undoubtedly put down to the influence of this version. Its language so endeared itself to the people as to set the standard of what English writing and speech should be; and it is interesting to note that certain words and phrases which occur in A.V., but which have passed out of general use, and are still employed in some Bible of our day, show that the language of the Bible is better than the language of the Bible, 1872; and the Bible in the Church (1875). [J.C.V.D.] Version, Revised. It would have been impossible in the nature of things for the A.V. of 1611 to have remained the standard of accuracy and diction, partly because expressions, tolerable among the Tudors and Jacobites, have passed from the tongue of the people to that of learned men, partly because the growth of scholarship led to the recognition that some translations were faulty, and that by adopting readings from MSS. discovered since the Reformation it was possible to get nearer to the original text. The desirability of some authoritative revision was often urged in the middle years of the 19th cent., Parliamentary interest being shown by Mr. Heywood's motion in 1856 for an address to the Crown praying for the appointment of a Royal Commission to consider amendments of the A.V., and by the inauguration in 1863 of The Speaker's Commentary, one express object of which was "a revision of the translation." In 1870 action was taken in the Convocation of Canterbury, that of York having refused to co-operate, by the adoption on May 5 of resolutions (see Preface of R.V.) to the effect that a revision of the A.V. should be undertaken by a body of its own members, who should take into account the views of others than its own. The following day the Committee was appointed, which chose its associates from other bodies, and the new joint Committee held its first meeting on May 25, 1870, when the principles and rules were agreed to (Preface to R.V. § 2). Amongst the revisers of O.T. were Prof. Miller, the Bishops Thirlwall, Ollivant, Harle, Browne, and Hervey, with Dean Payne Smith, Drs. Driver, Kay, Lumby, Perowne, and Profs. Birrell, Cheyne, A. B. Davidson, Sayce, Stanley Leathes, and Robertson Smith, and Mr. W. Aldis Wright of Shakespearian fame; and of N.T., Bishops Ellicott, Moberly, and Charles Wordsworth, Archibishop Trench,
Deans Bickersteth, Alford, Scott, Stanley, Blakesley, and Vaughan, Drs. Lightfoot, Kennicott, and Horsley, were, and the Directors of the Cambridge, and Drs. Angus, Eddie, Milligan, Newth, and Vance Smith, with Archdeacon Palmer and Dr. Scrivener. The actual sessions of the O.T. Committee commenced on June 30, of the N.T. Committee on June 22, in the Jerusalem Chamber, and thenceforward worked in a succession of four successive days in every month but August and September until the completion of the work. The task of presenting the case for or against deviations from the Received Text of the Gk. was generally left to Drs. Scrivener and Hort, who were the ablest exponents of opposite points of view. From 372 to 377, a new association was formed with two companies of American Biblical scholars, whose final conclusions, where they differed from those of the English revisers, were printed as a supplement to the complete work. The actual American Revision, containing further work than that of the complete English R.V., was published till 1901; but the English Revisers were able to bring out the N.T. on May 17, 1881, the O.T. on May 19, 1885, and the Apocrypha in January, 1895. In the Apocrypha the Revisers have treated the texts as a rule (less for the O.T. than for the N.T.) as a body of Scriptural passages intelligible which were not so great. But owing to the work having been done by four different committees, there is a want of uniformity in execution, e.g., in the printing of poetical passages, and the rendering of proper names; and a freer use of the Oriental versions would have secured greater accuracy. E.g., Ecles. 25.15, "There is no head above the head of a serpent," should be, "There is no poison more virulent than the poison of a serpent," and Ecles. 51.10, "I called upon the Lord, the father of my Lord," should be, "I called unto the Lord, my father, O Lord," etc. In the O.T. the Revisers have aimed at keeping the Hebrew in the later stages of their work by the criticisms which had appeared on the N.T. They certainly published, in proportion, far fewer changes in the translation and text, intimating in their Preface that renderings preferred by a mere majority of the Company were in many cases placed in the margin, and that a two-thirds majority being required to give them a place in the text. Their treatment of archaisms and coarse expressions was generally satisfactory, and the improvement in the sense of such passages as Is. 9.1-6 and Job 28 was sincerely welcomed, the latter becoming intelligible as a description of the miner's underground search for treasure. In Ecclesiastes they were less successful; "a striving after wind" (2.11) and "the caperberry shall fail" (12.5) were repellent. In the earlier books a very clever change was that of "meat for meat offering," and the substitution of "offering" made for the congrega tion" made for a truer understanding that it was where God met with His people (Ex. 29.42). Elsewhere the transference of proper names such as Sheol, Abaddon, and Aserah, made for cleanness, and the Revisers rightly lay stress on the gain to the reader of the use of the plural "people," Ps. 87.3, 5, Is. 56.9, etc., to express the Gentile element in the N.T. the struggle of which Drs. Hort and Scrivener were the respective leaders resulted in the compilation of a new Gk. text, and consequent English version, which contained departures from A.V. much greater than had been contemplated at the commencement of the Revision. The heavenly witnesses disappeared from 1 Jn. 5.7 with general approval; but the omission of the angel troubling the water (Jn. 5.6) and of the eunuch's profession of faith (Ac. 8.37); the marginal notes throwing doubt on the authenticity of the last twelve verses of S. Mark, of the pardon of the adulteress (Jn. 7.53), and of the first cry from the Cross (Lu. 23.34); the abandonment of the reading "God" in 1 Tim. 3.16, and the variant form of the Lord's Prayer in Lu. 11.2-4, provoked much feeling, as also did the translation in Mt. 6.13, "Deliver us from the evil one." The effort to render the same Gk. word by the same English word, as exemplified in the R.V., is such a characteristic of the second gospel as the use of "straightway," deprived the reader of the familiar "charity" in 1 Cor. 13, but gave him "rober" in a number of passages illustrative of the wild disorder of the times (Jn. 18.40; Lu. 10.30; Mt. 21.13, 26.55, 27.38), and the expression of a prevalent aroma of words, which led to such a comparative inspection of the Revised and of the King James Version, as has been rare. The carefulness of the R.V. in the treatment of the O.T. (cf. Mt. 19.28) is for the study of which Bishop Westcott wrote (Some Lessons of K.J.V. p. 63), "He who has mastered the meaning of the two prepositions now truly rendered 'into the Name,' in Christ (Mt. 28.19; Ro. 6.23), has found the central truth of Christianity. Certainly I would gladly have given the ten years of my life spent on the Revision to bring only these two phrases of the New Testament to the heart of Englishmen." J. W. Burgon, The Revision Revised (1893), B. F. Westcott, English Bible, also arts. in Expositor, 2nd ser. ii, and The Revisionists, ath. iii-vii; New, Versions on Bible Revision. [C.R.B.] Versions. One important aim in studying the ancient translations of the Scriptures is, to try to reach a more original form of the text of O.T. and N.T. than that which has come down to us. The earliest known Hebrew MS. of
O.T. is very late (9th cent. A.D.); the earliest Greek MS. of N.T. belongs to 4th cent. A.D., i.e. much earlier, but still some 300 years later than the original text. Many versions trace their history back to a time anterior to that of the earliest MSS., and therefore sometimes contain elements of great importance. In the following description of the ancient versions the order is, for the sake of convenience of reference, alphabetical not chronological, nor yet in order of importance. Whenever possible, a version will be treated under a single heading, comprising both O.T. and N.T., but this cannot always be the case, for some versions only contain the O.T. or parts of it, while others only contain the N.T. or parts of it. Unless otherwise specified, it will be understood that both O.T. and N.T. are referred to. — I. AETHIOPIAN VERS.

This should more strictly be called the Ge'ez version; Ge'ez was the language of the Abyssinians, and the first bishop of Axum. Frumentius was consecrated at Alexandria by St. Athanasius (Apologia ad Constantium, §§ 29-31), a fact which makes it probable that the first Aethiopic version was made from the Greek text from the time of Constantine the Great by Frumentius, the first bishop of Axum. Frumentius was consecrated at Alexandria by St. Athanasius (Apologia ad Constantium, §§ 29-31); moreover, the Aethiopic shows the closest relationship with this MS. in Kings and in the Pentateuch, as also later in the O.T., 84 ff., ii. 54 ff., besides striking points of resemblance in other books; hence the supposition amounts almost to certainty that the Aethiopic Version rests ultimately upon Cod. B, or a MS. very much like it. There are, however, good grounds for Lagarde's contention (Materialien i. 3, Ankündigung . . . . . , p. 25) that this version did not derive directly from the Greek, but that its parent was an Arabic version, and that it belongs to the 14th cent., a striking piece of evidence in support of this being contained in two poems composed in praise of Abbâ Salâmâ, as the Abyssians called Frumentius, because he translated the Ge'ez Bible from the Greek, and also shows that the ge'ez version is more recent than that of the Arabic. Contra, however, it can be shewn that parts of this version are certainly of much earlier origin. The version itself contains a number of transpositions from the Hebrew, to which it approximates in other respects as well; there are distinct signs of the influence of some Hexaplaric text, e.g. some striking agreements with the version of Aquila; and yet, upon the whole, it is a verbal translation from the Greek, as regards O.T., while as regards N.T. its text shows a relationship which is closest to Cod. B, though the Frumentius and Syrian elements are not wanting. The conclusion to be drawn from this conflicting evidence is, that the original basis of the version was a genuine L.X.X. text, that later, when it was revised with the (one) official Hebrew text, some of the L.X.X. MSS. with Hexaplaric elements on the other, while in later times still it was corrected from Arabic and Coptic texts. The various MSS. of the version exhibit these various influences, and must be classified accordingly. About 100 Aethiopic MSS. exist; for the most part late in date, the earliest being the Paris one (14th cent.), which "exhibits the gospels in an unrevised text" (Nestle). The Aethiopic O.T. contains all the books of the Alexandrian canon excepting 1-4 Mac, but it includes a number of pseudepigraphic works not found in L.X.X. MSS., e.g. the book of Jubilees, the book of Enoch, 24 Esdras, Baruch, etc.; the N.T. contains, in addition to the usual 27 books, a work in 8 books called the "Synodos" on Canon Law, so that the books of N.T. are reckoned as 35 (Nestle). No good critical edition of this version has yet been published as a whole, though single books have appeared, e.g. the book of Deuteronomy (Pratorius, Untersuchungen über die O.T. in Grk. p. 110), the Octateuch and four books of the Kingdoms, by Dillmann, the book of Enoch, by Charles; no publication of N.T. books has yet appeared which is of any value. — II. ARABIC VERS.

Egypt and Syria were the only two countries in which the Arabic-speaking nations were situated, and it was therefore natural that Arabic versions should have been made from the Greek and the Syriac; besides these, there are other Arabic versions from the Hebrew, Coptic, and Samaritan. (i) Arab. Versions of O.T. Translations from the Greek exhibit a relationship to Cod. A. Hexaplaric elements are characteristic of the corrigible (Cornill, Eschatel, pp. 49-57, where many illustrations are given). Other MSS. are translations of a Coptic version of the Greek. The Arabic text of the Paris Polyglot is mixed; it is based upon an Egyptian MS. of the 10th cent.; the Pentateuch and Joshua are from the Hebrew; Judges, Samuel, Kings, Chronicles, 1 and 2 Chronicles, 1 and 2 Kings, 1 and 2 Samuel, and Job are from the Syriac, and the other poctical books and the prophets are from the Greek. Some MSS. are wholly translations of the Peshitta; the Pentateuch, in others, is direct from the Samaritan; other MSS., again, are from the Hebrew. These latter follow strictly the Massoretic text; most of the Arabic books that have been translated are homiletic, or devotional in nature; the labours of Sa'Adayy the Gaon, a native of Upper Egypt (d. 942); those published are the Pentateuch, Joshua, Isaiah, Canticles, Job, and part of Proverbs. The Apocrypha does not seem to exist in this version. (ii) Arab. VERS. of N.T. The oldest Arabic MS. of any part of N.T. is Cod. Venetianus Arab. 13, belonging to the 8th cent.; this was formerly in the possession of the convent of Mar Saba, near Jerusalem, and is a translation from the Syriac (Peshitta). It belonged to Daniel of Emeisa, and contained originally the Psalms, the Gospels, Acts, and all the Epistles; only some fragments of the gospels and of the Pauline epp. now remain (Burkitt, art. "Arabic Versions" in Hastings, D.B. 1. p. 136). Another translation from the Syriac is found in a 10th cent. MS., Syr. and Arab.; part of it is in Leipzig and part in the Brit. Museum. An Arabic translation from the Syr. of the Pauline epp. is contained in a later century MS. at St. Petersburg; this was printed the
editions of Erpenius and the Carshuni edition (1824). The textual and Catholic app. are contained in a 17th cent. MS. at Sinai; it is translated from the Syriac. Among Arabic translations from the Greek are those of the gospels, which are "perhaps ultimately derived from a bilingual Gk.-Arab. uncial MS. generally quoted as 99, of which only four leaves remain" (Burkitt); these translations are found in some MSS. of the 9th cent. The 14 Pauline epistles translated from the Greek are contained in a 9th-cent. Sinai MS.; this has been published by Mrs. Gibson (1894). No MS., so far as is known, has come down to us containing the Acts and Catholic epistles in an Arabic translation made from the Greek. The Apocalypse, which was not a canonical book among the Eastern Churches, is contained in the printed edition of Erpenius; it presents an Arab. version translated partly from the Greek and partly from the Coptic. An Arab. version is found in most Coptic MSS. of the N.T.; of these Cod. Vat. Copi. 9 seems to have been of special kind of standing (Burkitt). The official Arabic version, however, is the product of translations made from the Syriac, Greek, and Coptic, i.e. a revision of all the various translations made from the 8th cent. onwards. This revision was made in the middle of 13th cent., and at the end of that century represents a further process of revision; from this last the printed editions were made, viz. the Roman edition (1591), that of Erpenius (1616), and the Paris edition of 1824. Although the Arabic versions are of interest and importance from the point of view of history and literature, they are of but small value for textual criticism, as they offer nothing which cannot be got in a far fuller and more accurate form from much earlier authorities.—III. ARAMAIC PARAPHRASES, or "TARGUMS." Strictly speaking the Targums are not versions in the sense in which this word has hitherto been used, as they present paraphrases, or renderings, of selected portions of Scripture, and not translations properly speaking. While the Targums offer much that is useful for textual criticism, their main importance lies in the fact that they embody the traditional exegesis of the Scriptures. The word "Targum" meant originally, a translation of any kind, but came to be applied specifically to a translation into Aramaic. The "Targoman," or "wethurgemin" (cf. the modern "Dragonman," a corrupt form of the same word), was a synagogue official who translated into Aramaic the Hebrew Scriptures when read in the synagogue. This was necessitated by the fact that during the centuries immediately preceding the Christian era Hebrew, as the current language, became displaced by Aramaic. For a long time the Targum was oral, but even so it gradually assumed a stereotyped character. It is difficult to say exactly when the Targums were written. There are references in Rabbinical literature to written Targums early in the 3rd cent., but it cannot be doubted that they existed still earlier in literary form (see below); at any rate, they embody material which goes back to the time of the second temple. As by degrees Aramaic ceased to be a spoken language, and gave place to Arabic, the use of Targums was discontinued; from the 10th cent. onwards they were no more read in the synagogues. The Targums may be classified as follows: (i) Targums to the Pentateuch. (a) The "Targum Babli" (Babylonian Targum), or the Targum of Onkelos, was, according to the most probable view, written in Palestine, but re-edited in Babylon; hence its title. The compiler of this pupil of Rabbi Gamaliel the elder (Tosefta Sabbath c. 8), who died in 70 A.D.; the fact that this Targum was written almost within the life-time of Christ and that it embodies material which was centuries older shows its value as representing Jewish exegesis and post-Exilic Jewish anthropomorphisms, from the Babylonian Talmud (Megillah 36a) it is said that "the Targum to the Pentateuch was composed by the proselyte Onkelos at the dictation of Rabbi Eliezer and Rabbi Joshua." This statement regarding the proselyte Onkelos "seems to be due to an erroneous application of the tradition current in Palestinian regard as Aquila of the O.T. Reference is made in the Jerusalem Talmud (Megillah 71a) to the proselyte Aquila having translated the Pentateuch. The translation here referred to is, of course, the Greek one of Aquila; but in Babylonia it was misinterpreted to refer to the Aramaic translation of the Pentateuch, Aquila and Onkelos being a confusion of one and the same person" (Oesterley and Box, The Religion and Worship of the Synagogue, p. 46). This Targum is especially valuable on account of the literalness of its translation (Nöldeke, Die alt-testamentliche Literatur, p. 257); like all the Targums it avoids, whenever possible, the "Targum of Jonathan ben Uzziel on the Pentateuch," but this is a mistake arising thus: "The Targum was often indicated more briefly as 'Targum J' (i.e. Targum Jerusalem); the J was mistaken for an abbreviation of Jonathan, and it was supposed that the Jonathan ben Uzziel, to whom the prophecy is ascribed, was also responsible for this Targum on the Pentateuch" (Oesterley and Box, op. cit. p. 47); it is now usually described, more correctly, as the "Targum of pseudo-Jonathan." The other form is called the "Jerusalem Targum," but it is also known as the "Fragment Targum," for only fragments of it survive (see Ginsburger's edition, Das Fragmententargum, Berlin, 1899); the form in which we now have it belongs perhaps to the 7th cent. As to its origin the opinions of experts differ. On the one hand it is held to have been from the beginning only "a collection of detached glosses, not on the Pseudo-

"in it in the to in need. Job been. the positior translation, than the way This comprises to the way we show the Syriac which anterior to the Christian era; Nöldeke has shown that fragments belonging to the time of John Hyrcanus are to be found in them (op. cit. p. 256). No Targums to Ezra, Nehemiah, or Daniel are known to exist.—IV. ARMENIAN VERSION. (i) O.T. The evidence as to the origin of this version is conflicting. In favour of a Syriac origin we have the following facts:

\[\text{...}
\]
as also the Apocalypse, which were translated and incorporated into the Armenian canon in the 14th cent. and not added to the MSS. until 12th cent. In the Etchmiadzin MS., belonging to the year 936, the verses which follow Mk. 16. 8 are headed: "Of Ariston the Presbyter." As Nestle remarks, "We learn from this, what is evidently correct, viz. that the present conclusion of Mark Gospel is due to a certain Aristion, who may perhaps be identified with Aristo, the teacher of Papias, in the second century" (Textual Crit. of the Gk. Test. p. 142).—V. EGYPTIAN, COPTIC, VERSIONS. The Versions now to be considered are called Egyptian because Egypt was the land of their origin, or Coptic (Gnostic, Arabic)—At7i'tos—because the various dialects in which they are written are all varying forms of the original script so named. The different versions of the original Coptic (all the letters of which, except seven, are from the Greek) arose from the existence of different popular dialects in the various Egyptian provinces. The names of these versions are somewhat confusing on account of differences of opinion among scholars as to their correct designations, it may be well to state first what these names are. (i) Sahidic, from es-sa'id=the Arabic name for Upper Egypt. This version was formerly known as the Thaëtic, from the districts of Thaëis. (ii) Very closely allied to this dialect is the Akhmimic, but it is sufficiently distinct to be treated as a different version; it is so called from the town and neighbourhood of Akhmim, the ancient Panopolis. (iii) Fayyumic, from the district known as the Fayyum. This version was formerly called the Bisäonic, or sometimes "Middle Egyptian," to distinguish it from those of Upper and Lower Egypt. (iv) Bohairic, from El-Bohäirah (=lake), a district S. of Alexandria, between Lake Mareotis and the W. arm of the Nile. This settlement was formerly a district as the Memphitic, from the province of Memphis. These versions, therefore, represent the different dialects which were spoken respectively in Upper, Middle, and Lower Egypt; it was "perhaps the geographical form of Egypt which gave special opportunities for the growth of popular dialects" (Swete, ob. cit. p. 295). As to the date of their origin we have the following data: In Ac. 2. 10 we read that among those who were present in Jerusalem at Pentecost, and heard the preaching of St. Peter, there were some from Egypt (cf. 6. 9, 18. 24); it is extremely probable, therefore, that some of these accepted the new faith and took back to Alexandria (which had for centuries been a Jewish colony) the knowledge of Christianity. Unquestionably these converts, as well as others of their race who embraced Christianity, were Greek-speaking Jews; but it cannot have been long before the new faith spread from the urban settlements to the country districts and villages, where different Egyptian dialects were spoken. These native Egyptians would in course of time have required the Scriptures in their own vernacular. No doubt from the time that the Gospel was first preached among these native Egyptians the sayings of Christ must have been translated, so that there was a before the actual written MSS. and not the MSS. were added at a certain time before they were actually made; and therefore, though proof is not forthcoming, it is probable that the earliest of these versions, at all events of N.T., began to be made almost immediately after the original was in the hands of the bishops of the various sees. Under the influence of the Alexandrian bishops, who were the actual presiding bishops, there was an increase of the Episcopate in Egypt, a fact which suggests also an increase in the extension of Christianity, and the consequent need of having the Scriptures in the vernacular. Heracles, the successor of Demetrius, consecrated a far greater number of new bishops in Egypt than his predecessor had done in twenty-six years. (ii) Sahidic, as regards O.T., this version was unquestionably made from the LXX., and apparently represents, like all the Egyptian versions, the Hesychian recension, which was well known in Alexandria and Egypt. As regards N.T. the most interesting points are that this version has some very striking "Western" readings and interpolations, and that in many readings it supports Ν or B, or both, where these great MSS. stand almost alone. "We learn, therefore," says Prof. Burkitt, "from the evidence of the Sahidic version, that a text similar in essentials to that of Ν and B, though slightly more "Western" in character, was current in Egypt about the beginning of the 4th cent." In both O.T. and N.T. there are a few MSS. of complete Biblical books, but for the most part only fragments of this version survive; these of O.T. have been gathered and edited by
Ciasca, Sacrorum Bibliorum Fragmenta Copto-Sahidica Musei Borgianii, Rome, vol. i. (1885), vol. ii. (1889), and Lagarde, Aegytiaca, pp. 65 ff. (1883); those of N.T. by Amélineau, "Fragmentes Thébaines inédits du N.T.," in the Zeitschrift für de Gesellschaft für Altertumskunde des eit. ordens xxvi. (1886–1888); see also an art. by the same author, Athenaum, No. 3601, pp. 599 ff. (ii) Ahkmimic. This sub-division of the Sahidic is at present known only by fragments of Exodus, Ecclesiastes, 2 Macceeses, and the Minor Prophets, as well as by part of a very ancient MS. of Psalms. Ed. (ii) Fayumic, or Middle Egyptian. Although the date of this version is unknown, it betrays certain relationships with the Sahidic, than which it is probably not much later. Very little of O.T. has come down to us—fragments of Isaiah, Lamentations, and the Ep. of Jer.; of N.T. more exists (see Hyvernat, Etudes sur les versions Copi'ex de la Bible," in Mr. Conybearique, v. 3, 4, vi. 1: Forbes Robinson, "Coptic Apoc., Gospels," in Texts and Studies, iv. 2). (iv) The Bohairic Version is still in ecclesiastical use among the Copts., or Egyptian Christians; of O.T. there are several MSS. of the Pentateuch, Psalms, Proverbs, Job, Minor Prophets, Isaiah, Jeremia, Daniel, Ezekiel; the earliest MSS. of N.T. are of the 12th cent., though some fragments probably belong to the 9th; it is a later recension of the Sahidic (see Guindi in Nachrichten von der K. Geselsch. der Wissenschaften, pp. 49–52, Göttingen); many of the MSS. have an Arabic translation, the Bohairic differing in this respect from the Sahidic MSS. In both versions the full Gk. is represented, though the order of N.T. books varies in each; the Apocata-lypse was not regarded as canonical, and is never bound up with MSS. of N.T. A new translation of N.T. was published by Horner in 1898–1905.—VI. GEORGIAN OR IBERIAN Ver-SION. This is of subordinate importance; the O.T. is based upon the Gk., the transliteration of Gk. words putting this beyond doubt; the N.T. is a version of the Old Syriac, according to F. C. Conybearae (American Journ. of the Gk., N.T., 1817, p. 185 ff.) of the Greek or Aramaic, according to Nippes. It dates from the 6th cent., and as we have it represents a revision, made before the 10th cent., of an earlier form, a fact which may possibly be found to account for the varying opinions as to its origin when the MSS. have undergone a more thorough-going examination. The printed edition of 1743 (Moscow) is partly an old translation of the Gospels, so far as it is practicable, and as far as the MSS. are concerned.—VII. GOTHIC Ver-SION. This was made for the Teutonic tribes who dwelt in the Danubian provinces by Ulfilas, the apostle of the Gths., in the middle of 4th cent. According to Philostorgius, "he translated the whole of the O.T. except one book of the Kingdoms, which he omitted, as likely to inflame the military temper of the Gothic race by their records of wars and con- quests" (quoted by Swete, op. cit. p. 117). Of O.T. only a few fragments have been preserved. All the N.T. books, in part or whole, have been found except Acts, Eph., and Phil., and the Apocalypse. In the latter part of the 16th cent. the existence of a MS. of this version was known, through Morillon having mentioned that he had observed one in the library of the monastery of Werden, on the Ruhr, in Westphalia. In 1648, almost at the conclusion of the Thirty Years' War, this was lost, and purchased by Stockholm, amongst the spoils from Prague, a copy of the Gothic Gospels, known as the Codex Argenteus. This MS. is generally supposed to be the same that Morillon had seen. On the abdication of Queen Christina, of Sweden, a few years later, it disappeared. In 1655 it was in the possession of a Jesuit priest in Holland. In 1662 it was repurchased for Sweden by Count Magnus Gabriel de la Gardie, who placed it in the library of the university of Upsala. While the MS. was in the hands of Vossius a transcript was made of the text by Derrer, from which Junius, his uncle, edited the first edition of the Gothic Gospels, at Leyden, in 1665. Ten leaves were stolen from the MS. between 1821 and 1834, but restored after many years by the thief upon his death-bed. "This magnificent Codex was written in the 5th or 6th cent. on purple, with gold and silver lettering. It now comprises 187 leaves out of 330, and contains fragments of the four Gospels, and St. John, beginning with the order Matthew, Mark, Luke, John (Nestle). New light dawned on Ulpilas and his version in 1817. While Cardinal Mai was engaged in the examination of palimpsests in the Ambrosian Library at Milan, he noticed traces of some Gothic writing under that of one of the codices. This was found to be parts of St. Luke and Nehemias or Nenhe-mis. The next was to light four more palimpsests containing portions of the Gothic Version; the result was that, besides some portions of the O.T., almost the whole of the 13 Pauline Epp., and some parts of the Gospels, were recovered. Another MS. is the Cod. Carolinus, which contains among other matter some 40 verses of Romans. This was published in 1762. The edition of Gabelenz and Loebe (1836–1845) contains all that has been discovered of the Gothic version. In 1854 Upström published the text of Cod. Argenteus; in 1855–1856 Massmann issued a small edition of all the remains of the Gothic Scriptures known to be extant; St. Mark was edited by Skeat in 1882. The O.T. text of the Version is interesting as exhibiting a text which is clearly Lucanian (see Lagarde, Librorum V.T. canoniconrum, pars. p. xiv. (1883), Kauffmann, op. cit.). "Ulfilas was in Constantinople for some time about 340 A.D., and his MSS. of the L.XX. were doubtless obtained in that city, which, according to Jerome, was one of the headquarters of the Lucanian L.XX." (Swete). As regards N.T. Kauffmann says that "the Goth to whom we owe Matthew used the Gk. text current in the diocese of Constantinople" (op. cit. xxxi. p. 120); he holds the same to be the case with St. John's Gospel. For the relationship between this version and the Old Latin see Burkitt (Eccles. Bibli. iv. 499, 501). For textual criticism this version is only of subordinate importance.—VIII. GREEK Ver-SIONS. (i) The Septuagint (see the article on this). When the L.XX. had ceased to be the exclusive property of the Jews through having been adopted by the Christian Church, it was natural that the Jewish authorities should
have desired to have a version more specifically Jewish for the use of Hellenistic Jews. This desire was accentuated by the fact that a Heb. text had received the official sanction of the Rabbis which differed considerably from the earlier Heb. text which had been the basis of the LXX; translation; thus, from the Rabbinical point of view, it became imperative that a Gk. version should be made which would have for its basis this later and officially accepted form of the Heb. text. Of these later Gk. versions we know six; fragments, in greater or less numbers, of each are still extant, and the number is gradually increasing. (ii) Aquila. Originally a Gentile, and related to the emperor Hadrian, Aquila became a Christian while living in Jerusalem, whether he had been sent by the emperor to superintend the building of the new city, Aelia Capitolina, on the site of the ruins of Jerusalem. He was, however, excommunicated on account of practising heathen rites; thereupon he became an Aramaic. He was thus a strict folk of Rabbinical lore and tradition, and is not infrequently quoted in the Talmud. As far as is known, his version was the earliest of the Gk. post-Septuagint ones, and it may be stated with tolerable certainty that it was completed c. 125-130 A.D. The chief characteristic of this version is: first, the literal rendering of the Massoretic text. Origen says that he was "a slave to the letter," and that "whatever was wanting in the Heb. text was not to be found in Aquila"; Jerome writes to the same effect. This is borne out by comparing the Aquila-fragments which we possess with the Massoretic text. In many instances the translation is so literal as to leave the Gk. meaningless. Secondly, in giving the Gk. equivalents for Heb. proper names the translations of Aquila are more faithful to the Heb. than is the case with the LXX.; on the other hand, in some few cases Aquila translates a Heb. name a word, its etymology; sometimes they are taken from one or other of the versions, at other times transmuted from the Heb. His avoidance of anthropomorphic terms and phrases is marked. (v) Quinta, Sexta, Septima. These are the names given to the three exceptions. He translated the 5th, 6th, and 7th from their relative positions in the columns of Origen's great compendium. They belong probably to the beginning of the 3rd cent. or the end of the 2nd; of their authors nothing is known excepting what can be gathered from the fragments still extant. Probably none of these versions covered the whole O.T., for Eusebius uses the word παλαιστοις in reference to them, meaning, according to a highly probable interpretation, that one version represented some books of the Bible, another other books, and a third yet others; however this may be, it is certain that the same books figure in more than one of these versions. In rendering the Minor Prophets, fragments of which have been found belonging both to Quinta and Sexta. Field, in speaking of the later Gk. versions, says of Quinta that it is "omnia elegantissimum." The author, according to St. Jerome, was a Jew. Sexta likewise makes use of good Gk.;
V. Greek (I K. 20, part of ver. 10), 5th or 6th cent. From Burkitt's "Fragments of the Books of Kings according to the translation of Aquila; the original fragment came from the Cairo Genizah.

VII. Slavonic (Mt. 4. 25), 1332 A.D. Brit. Mus. Add. MS. 26839.

VIII. Syriac, Curetonian (Jn. 6. 67), 4th or 5th cent. Brit. Mus. Add. MS. 14451.

IX. Syriac, Peshitta (Mt. 7. 8), 5th or 6th cent. Brit. Mus. Add. MS. 14470.

SPECIMENS OF SCRIPTS (B).
the author was a Christian, judging from the rendering of Hab. 3:19. Thou wentest forth to save thy people through Jesus Thine Anointed (διὰ Ιησοῦν τοῦ χριστοῦ σου). Of Septima nothing is known excepting that it is mentioned by Eusebius. (vi) A much later Gk. version belonging to the late Middle Ages is known as the Græcus Venetus: this is a translation of the Massoretic text, use being made, however, of the other Gk. versions; it consists of the Pentateuch, Ruth, Proverbs, Canticles, Ecclesiastes, Lamentations, and Daniel. The author was a Jew whose "chief guide appears to have been David Kimchi, whose interpretations are closely followed" (Swete). The best printed edition is von Gebhardt's Græcus Venetus Syriarum. Nothing is known Two other Gk. versions are: a 15th-cent. Psalter (see Klostermann, Anal. p. 30), and a version into modern Greek of the Pentateuch printed first in 1547, and published again in 1897 by Hesselberg.—IX. Latin Versions. [See Vulgate]—X. Slavonic Version. The Slavs were converted to Christianity by brothers Cyril and Methodius, by whom the Slavonic version was made from the Gk. In its present form, however, this version is translated partly from the Gk., partly from the Heb., and partly from the Vulg. The date at which it was made is "too late to represent any Gk. text more closely preserved" (Burkitt). The only point of importance about it is that, as regards the O.T., it was, in the main, made from a Gk. text representing the Lucianic recension.—XI. Syriac Versions. Of all the translations of the Bible dealt with in this article none can approach in interest and importance the earliest certain as to the origin of Christianity in the Syriac-speaking countries, i.e. the districts in the valley of the Euphrates and neighbouring provinces, but "it is certain that the new religion was well established in Edessa (the literary head-quarters of the Syriac-speaking church) before the capital was absorbed into the Roman empire in 216 A.D. during the reign of Caracalla; the political independence of the little state accounts for the early translation of the Scriptures into the vernacular of the Euphrates Valley" (Burkitt). The early date of this version is one of the indications of its value as a critical authority for the Biblical text. i. The O.T. (a) The Peshittâ O.T. version was made direct from the Heb., most likely by Jews, and was the work of different translators, for in some books the translation is very literal, in others more paraphrastic; the Heb. text underlying the Syriac is that of the Massoretes. In the prophetic books the influence of the LXX. is observable. Does this extraordinary phenomenon mean that in certain books the LXX. was believed to represent, in some respects, a more faithful text than that of the Massoretes? Jews of the Dispersion had settled in Mesopotamia before the Christian era. Of MSS. there are some very ancient; the oldest is Cod. Add. 14,425, in the Brit. Mus., which contains the Pentateuch with the exception of Leviticus. It is a transcription, and is dated 604 A.D., which makes it the oldest known dated MS. of any portion of the Bible extant in any language. Cod. Ambrosianus (6th cent.), also in the Brit. Mus., contains the whole O.T., and has been published entire in photo-lithographic form by Ceriani (1876-1881). The only other MS. known is an unsatisfactory one issued by the Brit. and Foreign Bible Soc. 1823. Some single books have, however, been issued: Min. Proph., by Sebôk (1887); Job, by Manal (1892); Apoc. of Baruch, by Charles (1896); Macce., by Bensly and Barnes (1896); the latter has also published Lamentations, by Schwartz (1897); Kings, by Berlinger (1897); Sam., by Schwartz (1897). (b) The Philoxenian Syriac. Only a few fragments of Isaiah are left of this version so far as O.T. is concerned. It is called after Philoxenus, bishop of Mabpôg, for whom it was made in 508 A.D., and is the earliest known attempt to give a Syriac version translated from the LXX. "It seems to have been a free revision of the Peshittâ by a Lucianic MS., producing a curious mixed text." Ceriani has published the fragments in Monumenta Sacra et Profana, v. i. 1-40. (c) The Syro-Hexaplar was a translation, made at Alexandria in 382 A.D. by Patriarch Cyril of Tella. As its name shows, it was a translation of the fifth column of Origen's Hexapla, i.e. of O.T. of the LXX.; but it also gives the asterisks and obel at employed by him, together with many other marginal renderings from Gk. versions; moreover, the translation is exceedingly literal, so that it is obvious that very valuable this version is for textual criticism. Nearly all the books of O.T. are still extant; Middeldorp published 2 Kings, Is., Min. Prophets, Prov., Job, Cant., Lam., Eccles.—2 Kings from a Paris MS., the other books from Cod. Mediolanensis—in 1835; and in 1892 Lagarde published what remains of the Pentateuch and the other historical books. (d) The Palestinian Version. That the Bible should have been required by native Christians of Palestine in their own dialect is obvious. This dialect was very closely akin to that of the Jews of Galilee, and is therefore of very great interest (see Dahan, Grammaire des dialectes Palästina, pp. 334 f.); for, as Prof. Burkitt says of this version: "Its linguistic interest, therefore, is very great, for although it is a somewhat literal translation from the Greek, the language in which it is written comes nearest of all known Christian dialects

59
to that spoken by Jesus and the apostles" (Encycl. Bibl. iv. 505). Only a few fragments of O.T. remain, but that these will in time be increased seems highly probable. Those which have so far come to light have been published by the following scholars: Land, Anecdota Syriaca, iv. (1875); J. Rendel Harris, Biblical Fragments from Mt. Sinai (1890); O.T. and New Testament: E Wigram, The Syriac Versions of the Bible and Semitic Series I. v. i. (1893-1896); Margetliouth, Liturgy of the Nile (1897); Mrs. Lewis, Studio Sinatico, vi. (1897); for the passages from Scripture which have been so far discovered, see Swete, op. cit. p. 115. It is said that another version, under this heading, of the LXX. was made by the Nicanian patriarch Mar Abbas in 552 A.D., but it is no longer extant (see further Nestle, Utext, pp. 227 ff.). (ii). The N.T. The Syriac versions of N.T. offer problems of an entirely different kind from those of O.T., and the subject must therefore be treated from a somewhat different point of view. It will be found most convenient to deal with the various versions of N.T. books thus: (a) The Gospels; (b) Acts and Epp.; (c) Catholic Epp. and Apocalypse, by far the most important being the first. The results of Prof. Burkitt's researches have entirely revolutionized all previous theories as to the history of the Syriac Gospels; his conclusions are generally accepted, so that in this section we shall be entirely guided by him; to his name must, however, be added those of Mrs. Lewis and the late Prof. Bensly. It will be well to state at the outset the special literature to be studied for this section: The four Gospels in the Old Syriac Version ..., by Bensly, Rendel Harris, Burkitt, and Mrs. Lewis (1894); Some Pages of the Four Gospels retranslated from the Syriac Palimpsest, by Mrs. Lewis (1896); the art. "Texts and Versions," by Burkitt, in the Encycl. Bibl. (1903); Evangelion da-Mépharréshe, the Curetonian Version of the Four Gospels ..., vol. i. Introduction and Notes, by Burkitt, J. H. Jackson, and Mrs. Lewis (1906); Early Eastern Christianity, pp. 39-78, by Burkitt (1904); besides various articles in the Journal of Theological Studies, the Expositor, and the Expository Times. (a) The Gospels. That a Jewish colony lived in Edessa (Oshornen) some considerable time before the Christian era is an ascertained fact; sooner or later, as in the case of every other Jewish colony, Christian missionaries would have reached Edessa. From a number of indications (see Burkitt's Early Eastern Christianity, pp. 1-38) the new faith was first brought there during the former half of the 2nd cent. The chief authority for the early history of Christianity in Edessa is a 5th-cent. work called The Doctrine of Addai; although this probably contains more legend than history, there is much in it which is of historical value. According to it, Addai (one of the 72 disciples) was sent by the apostle St. Thomas, immediately after the Ascension, to Abgar, king of Edessa, to preach the Gospel. Special mention is made of the Jews of Edessa, who are represented as being friendly to the new teaching. Addai is wholly successful in his mission, and a Christian community is founded. It is scarcely possible to conceive of the Jews having been without a copy of the law and the prophets; when, therefore, they were converted they at first had nothing but the Scriptures—of course in their own vernacular—which they would have interpreted in a Christian sense. This is what must have been done wherever Jews were converted and no copy of the Gospels was available. From this we may take for granted that a Syriac O.T. was of the Christian time; but, of course, the first Christians here must probably had no copy of the Gospels for at least a generation. Tatian, the philosopher, was the first to supply this want, and he gave to this Christian community a Syriac translation of his " Harmony of the Gospels," known as the Diatessaron (c. 150 A.D.). The extant authorities for the Diatessaron are the Commentary of Ephrem Syrus (d. 373), of which only an Armenian translation exists; some quotations from the original work found in some Syriac commentators on the Gospels; and an Arabic version of it (11th cent.) which is, however, almost useless, as it represents a later edition of the text. There are, however, no traces of a work which was almost wholly assimilated to that of the Peshitta. This, then, represents the earliest form in which the Gospels existed in Syriac, and "the circumstance that on Syriac ground it had no rivals made the Syriac Diatessaron an instant and assured success." As to its antecedents we have no certain knowledge, but, to quote Prof. Burkitt again, "the Greek name that Tatian gave to his Harmony, the fact that he himself was a Greek author, and—most important of all—the existence of direct, though degenerate, descendents of the Diatessaron in the Codex Ful densis and the mediæval Syriac Harmonies, all these things tell us that the Syriac Diatessaron is not an original work, but a translation of a previously existing Greek Harmony. In the absence of evidence to the contrary there is, I consider, no reason why we should not accept Tatian as the author and compiler of this Greek Harmony. But I think that it was not with him that when finally returned to the East, c. 173 A.D. Doubtless it was very soon rendered into Syriac, probably under his immediate supervision " (Evangelion ..., p. 206). The textual character of the Diatessaron is of high importance and interest, because there is a great affinity between Dutch and Eastern authority and some texts of the far West. We are met with the extraordinary phenomenon that the Diatessaron contains many readings which are found nowhere else but in Cod. D and in some other Old Latin texts; thus the Gk. text that underlies the Diatessaron represents more closely the text of the West in the latter half of the 2nd cent.; this Western character is apparent throughout, as can be seen by comparing the Diatessaron with, e.g., Cod. D; and the only and obvious way of accounting for this is to suppose that Tatian brought with him to the East a text with which he had become familiar while sojourning in the West. The next great event known to us in the history of the Edessene church is that persecution broke out during the last decade of the 2nd cent. The Bp. of Edessa at this time was Aggai, who was martyred before he could consecrate his successor, Palû, who therefore went to Serapion, Bp. of Antioch, for his
consecration. Serapion, according to Eusebius (Hist Eccles. vi. 12) was Bp. of Antioch from 190-203 A.D. "there is absolutely no reason why the Edessene church should have traced their succession to him, except that historical fact compelled them to do so." Serapion is known to have been especially active in promoting the ecclesiastical use of the four Gospels, and all the facts combine to make it probable that when he consecrated Palić he influenced him in the direction of the use of the Antiochene text of the Gospels; so that when the latter returned to his diocese he brought with him a copy of the Gospels which was considered more authoritative than the Diatessaron which had hitherto been in use in the Edessene Church. If this was so, we are justified in recognizing in what is now usually known as the "Old Syriac Version" the text of the four Gospels which Palić introduced into the Edessene Church. In each of the two extant MSS. of this version the Gospels are described as Evangelion da-Mepharresēh, i.e., "The Gospel of [or, according to] the separated ones." Burkitt has shown that this term is used of the four Gospels in the thirteenth century by the "Harmony" of Tatian, in which the four Gospels are combined in one single narrative. The two extant MSS. of the Evangelion da-Mepharresēh are: a palimpsest discovered in 1892 in the convent of St. Catherine in Mt. Sinai by Mrs. Lewis and Mrs. Gibson; this is usually quoted in the abbreviated form in 560 A.D. is most probably the best extant witness; it contains the four Gospels in the usual order. Almost the whole of the original MS. is still preserved, only 450 verses being missing. The other MS. is that known as the Curetonian, quoted as S.; belonging formerly to the library of the convent of St. Mary Deprisa in the desert of St. Samael, it was brought to England by Mrs. Proctor in 1842-1847 to the Brit. Museum, where it is numbered add. 14,451; it belongs to the middle of the 5th cent.; and originally contained the Gospels in the order Matthew, Mark, John, Luke; less than half of the original whole is all that is now left. The respective Gk. texts with which the Syr. is compared in the following, were the Syriac differ radically, as we should expect, since the former represents the Roman, the latter the Antiochene type of text. But the Evangelion da-Mepharresēh did not displace the more popular Diatessaron form of the Gospels; the two existed side by side, the former being perhaps more a reference authority, while the latter was used in the daily services of the Church. The next step in the history of the Syriac Bible is connected with the name of Rabbula, Bp. of Edessa, 411-435 A.D. This man's influence on the Edessene Church was many-sided, and, among other things, he very naturally occupied himself with the text of the Scriptures. We read in his lite that "he translated by the wisdom of God that was in him the N.T. from Greek into Syriac, because of its variations, accurately just as it was" (Life of Mar Rabbula, in Overbeck's collection of Syriac writings, 172, pp. 18 ff.). The Diatessaron and many other Gospels were translated into Syriac, which he would find in his diocese varied greatly from the Gk. text with which he had become familiar in the Catholic centres where he had been baptized and had hitherto lived; moreover, that Tatian, the author of the Diatessaron, had been a heretic would be a strong reason for getting rid of this version. Therefore he introduced a new version, and it was this which became known later as the Peshittā. The O.T. was left very much as it was, the need of revision being less than in N.T. The strongest proof that it was during the episcopate of Rabbula that this new version of N.T. came into being is the fact that from this time the N.T. quotations of Syriac writers are all influenced by the Peshittā, beginning with Isaac of Antioch (d. 460); but the quotations in Syriac writers earlier than Rabbula agree with the known peculiarities of the Diatessaron and the Ev. da-Mepharresēh; hence "there can be little doubt that the translation of the N.T. was made under the direction of Rabbula was the Peshittā itself." The Peshittā is thus an edition of the Ev. da-Mepharresēh, revised into closer conformity with the Greek, and published by authority with a view of superseding both the Diatessaron and the then current Syriac text of the four Gospels (Burkitt); and it has ever since this time been the authoritative or ecclesiastical text of the Syriac Church. Many MSS. of it are still extant, some as early as the 5th cent., but all exhibit the same type of text. Among the Monophysite Syrians, however, two other revisions of N.T. were made: the Philoxeniān (so called after Philoxenus, Bp. of Mabbog, for whom it was first published in 508 A.D. by the version of the Peshittā, supplemented by those books of the Gk. canon which were not included in the Syriac (see below); and the Harkelean, a revision of the Philoxeniān made in 600 A.D. by Thomas Harkel, Bp. of Mabbog; this is a literal translation of the Gk., its text agreeing with the later Gk. MSS. One other Syriac version of the Gospels needs mention, viz. the Palestinian, which is represented by a few fragments in the "Palestinian" dialect (see above); besides these fragments, there are three complete Gospel lectionaries, all belonging to the 11th cent. or later. The version itself probably dates from the 6th cent.; the text is a mixture of the Palestinian and the Syriac being, however, often apparent. The best editions of the various versions referred to are: The Diatessaron: Zahn, Tatian's D. (1891); Hill, The Earliest Life of Christ (1893); Hogg, The D. of Tatian (1897). Ev. da-Mepharresēh: the Curetonian and Sinaic, as mentioned above. The Philoxeniān: Nestle, Die Peshittd. in der Peschito fehlienden Briefe... der Phlox, entstammender Übersetzung, in Zeitschrift für Assyriologie, xii. 240 ff., 348 ff., xiii. 1-28. The Apocatalepsis has been published by Gwynn (1897). The Harkelean: Bensly, The Harkean. Vers. of Ep. to Hebrews (1859). The Palestinian: The various fragments published by Land; Mrs. Lewis, Nestle, and Mrs. Gibson have published "A Palestinian Syriac Lectionary" (Studia Sinaica, No. vi., 1897). (b) Acts and Pauline Epp. As regards the Old Syriac Version no MSS. of either Acts or the Pauline Epp. are known to exist; at one time the text which must have existed was thought to be among the early Syriac writers like Aphraates and Ephrem Syrus, who quote from these books,
with the Peshittâ, that shows the latter is not the original form of the Syriac Version of these books. In the Philoxenian Version, likewise, nothing from these books has been preserved. Of the Harklean Version several MSS. have survived. This version was published by White (1782-1803); a missing portion of Hebrews was edited by Bensly in 1889. The Peshîta N.T. was published in New York in 1886 in the Nestorian character. (c) The Catholic Ep. and the Apocalypse. These never formed part of the Old Syriac Version; in the Philoxenian Version 2 Pe., 2, 3 Jn., and Jude are preserved, and are usually found bound up in the modern editions of the Peshîta. The Apocalypse and the minor Catholic Ep. were never included in the Syriac Vulg., and whenever they appear in editions of the Peshîta they belong to another version.—

Literature: In addition to the works cited in the text the following selected books may be mentioned: Firstly, comprehensive authorities, such as W. O. E. Oesterley, Field's Histor. Apo.
apla: Wellhausen in Bleek's Einleitung in das alte Testament, §§ 275-298; Nestle's U.
solina. . . ; Slavonic Version: Church Qly. Rev. pp. 219 ff. (Oct. 1895). SyriacVersions: see above. [w.o.e.o.]

Vial (pahl.) This word occurs twice only in O.T., at each time of a small vessel containing oil for anointing to the kingship (1 Sam. 10:1; 2 K.9:1,3). The root meaning is "to trickle." In N.T. "vial," or "bowl (φαλαρία)," is used in a figurative sense in the visions of the Apocalypse (Rev.5:8, etc.). [w.o.e.o.]

Village. (1) Heb. ḫaqîr [Hazer], an "enclosure." (2) kâphâr. [Caphar.] (3) ḫâbîb, a hamlet only inhabited in summer. (4) Caphar. These terms are often used in the Talmud as contrasted with cities (1 Chr. 27:25; Can. 7:11). The first also includes unfortified places (Lev. 25:31) having "suburbs" (ver. 34). Heb. migârich, a term meaning an "open space," or a "pasture," to which cattle were "driven" (גârâṣ). This word occurs 109 times (always "suburbs" in A.V.), but does not apply to houses. The towns had villages belonging to them (Mk. 8:27). [c.r.e.]

Vine, the well-known valuable plant (Vitis vinifera), very frequently referred to in O.T. and N.T., and cultivated from the earliest times. The first mention of it occurs in Gen. 9:20, 21. The Egyptians said that Osiris first taught men the use of the vine. That it was abundantly cultivated in Egypt is evident from frequent representations on the monuments, as well as from Scriptural allusions (Gen. 40:9-11; Ps. 78:47). The vines of Palestine were, and are, celebrated for luxuriant growth and for the great size of their clusters. They are planted on terraces cut in the valley of Eschol one cluster of grapes which had to be carried by two men on a staff (Num. 13:23). Schulz speaks of a vine near Ptolemais, whose stem was (according to him) about 18 in. in diameter, whose height was about 30 ft., and whose branches formed a flat spreading bush of many clusters of grapes. The size of these extraordinary vines," he adds, "are so large that they weigh 10 or 12 pounds, and the berries may be compared with our small plums. Special mention is made in the Bible of the vines of Eschol (Num. 13:24, 32-9), of Sinaih, Heshbon and Echalah (Is. 16:8, 9, 10; Je. 48:32), and of Engedi (Can. 1:4). The vine is a frequent subject of metaphor in Holy Scripture. To dwell under one's vine and fig-tree signifies domestic happiness and peace (I K.4:25; Ps. 128: 3; Mi. 4:4). The rebellious people of Israel are compared to wild grapes, "an empty vine," "the degenerate plant of a strange vine," etc. (Ezek. 19:12; Jer. 2:21). Christ himself, it is said, said that the Lord selects a vine to show the spiritual union which subsists between Himself and His members (Jn. 15:1-6). The training of cultivated vines upon supports appears to be alluded to by Ezekiel (19:10-12). The vintage (bâyîr), formerly a season of general festivity (cf. Judg. 9:27), commenced in September. During it the people lived among the vineyards in lodges and tents. The grapes were gathered with shouts of joy by the "grape-gatherers" (Je. 25:30), and put into baskets (see 6:9). They were then carried on the head and shoulders, or slung upon a yoke, to the "wine-press." In Palestine the finest grapes, says Dr. Robinson, are now dried as raisins (cîmmûâ), and the juice of the remainder, after having been trodden and pressed, "is boiled down to a syrup which, under the name of dibs, is much used by all classes, wherever vineyards are found, as a condiment with their food. Raisins are mentioned several times, as in 1 Sam. 25:18, 30:12; 2 Sam. 16:1; 1 Chr. 12:40. [Flagon.]" Tristram gives praise to the raisins of Eschol of his time. The vineyard, which was generally on a hill (Is. 5:1; Je. 31:5; Am. 9:13), was surrounded
VINE OF SODOM
by a wall or hedge to keep out wild boars (Ps. 80.11,12), jackals, and foxes (Num. 22.24; Can. 2.15; Ne. 4.3; Ezk. 13.4,5; Mt. 21.33). Within the vineyards were towers of stone in which the vine-dressers (κορήμαμι) lived (Is.1.8,5,2; Mt. 21.33). [WINE-PRESS.]
Vine of Sodom (Deut. 32.32). Though it is generally assumed that this passage alludes to the celebrated apples of Sodom, it is Josephus who is responsible for the statement that the latter “semble edible fruit in colour, but, on being plucked by the hand, are dissolved into smoke and ashes.” Some travelers, as Matteucci, regard this story as a fiction. Pococke supposed the apples of Sodom to be pomegranates. Hasselquist suggests the egg-shaped fruit of the Solanum melongena when attacked by some species of tetthredo, which converts the whole of the inside into dust, while the rind remains entire and keeps its colour. Seetzen, however, thinks the whole story monstrous. There are several species of apples in the area of Sodom in the fruit of a kind of cotton-tree (known as ‘oshser) which grew in the plain of El Ghor. Dr. Robinson pronounced in favour of the ‘oshser fruit being the apples of Sodom. He identifies it with the Asclepias (Calotropis) procera of botanists. Mr. Walter Elliot suggested oak-galls, which are found growing in quantities on the oak Quercus inferior in the country beyond the Jordan. Dr. Hooker wrote, “The vine of Sodom I always thought might refer to Cucumis colocynthis, which is bitter and powdery inside; the term vine would scarcely be given to any but a trailing or other plant of the habit of a vine. This last, as well as the honey locust (Gleditsia triacanthos) the honey of all the plants previously suggested for the vine of Sodom, which in the Bible is merely represented as a poor kind, though the ‘oshser suits the “apples” of Josephus. [THORNS.]
Vinegar. The Heb. term Ḫōmez was applied to a beverage consisting generally of wine or strong drink turned sour, but sometimes artificially made by an admixture of barley and wine, and thus liable to fermentation. It was acid even to a proverb (Pr.10.26), and by itself formed a nauseous draught (Ps.69.21), but was used by labourers (Ru.2.14). A similar beverage was the actum of the Romans—probably a fermented apple cider. Of this the Saviour partook in His dying moments (Mt.27.48; Mk.15.36; Jn.19.29,30).
Vineyards, Plain of the (Judg.11.33). The name Beitt el Kerm (house of the vineyard) was found by De Saulcy N. of Kerak. This name may be modern, but the site is near Anath, within which it is noticed, and the acclaves of Sodom in the fruit of a kind of cotton-tree (known as ‘oshser) which grew in the plain of El Ghor. Dr. Robinson pronounced in favour of the ‘oshser fruit being the apples of Sodom. He identifies it with the Asclepias (Calotropis) procera of botanists. Mr. Walter Elliot suggested oak-galls, which are found growing in quantities on the oak Quercus inferior in the country beyond the Jordan. Dr. Hooker wrote, “The vine of Sodom I always thought might refer to Cucumis colocynthis, which is bitter and powdery inside; the term vine would scarcely be given to any but a trailing or other plant of the habit of a vine. This last, as well as the honey locust (Gleditsia triacanthos) the honey of all the plants previously suggested for the vine of Sodom, which in the Bible is merely represented as a poor kind, though the ‘oshser suits the “apples” of Josephus. [THORNS.]
Viole [Psal. 8.1]. The Old English viol, like the Spanish viole, was a six-stringed guitar. Etymologically, viol is connected with the Dan. Fiol and the A.S. fīnle, through the Fr. viole, Old Fr. vielle, Med. Lat. vitellā.
Viper. [SERPENT.]
Vision (ὄνωπια, ὑπαί, ὑπάρχον LXX. N.T.) implied a state of divine inspiration, in which, unlike a dream, consciousness remains. In O. and N.T. alike prophets and inspired teachers see God’s purposes by visions. Thus Israel (Gen.46.2), Balaam (Num.24.2), Samuel (1Sam.3.15), Micah (Is.4.2,19). The “seer” is in direct communion with God, and sees and declares His inner purpose. Canonical prophets ascribe to “visions” their knowledge of God’s will (Is.1.1; Ob.1; Na.1). A false prophet “speaks the vision of his own heart, not from Jehovah’s mouth” (Je.23.16). Later prophets like Ezekiel clothe their “visions” in literary form (Ezk.38). As, before Samuel, there was “no frequent vision” (1Sam.3.1, R.V. marg.), so, with the cessation of the prophetic, visions ceased except in apocalyptic literature, e.g. Daniel. Joel foretells the future outpouring of God’s Spirit, “when your young men shall see visions,” N.T. visions, also, are signs of prophetic intuition (Lu.1.12; Ac.9.10), often directed by the apostles (Ac.16.9,10,26,19; 2Cor.12.2), and are apocalyptic (Rev.9.17). [TRANCE; DREAMS.][C.C.T.]
Vophsi’, father of Nahbi (Num.13.14).
Votive-offering. [Sacrifice, 3, ii. c.]
Vow (Heb. nedher), a promise made to a deity in the belief that it will be pleasing in his sight. The promise may not be relative to a gift or to conduct. A vow differs merely in motive from an oath declaring intention. Thus Uriah uttered an oath that he would not go home (2Sam.11.11). Had he spoken the same words for the purpose of pleasing God, they would have constituted a vow. Again, a vow differs from a promissory oath addressed to God. Vows were frequently conditional: e.g. Gen.28.20ff. (on God’s giving Jacob a safe return); Num.21.2, Judg.11.30ff. (on God’s giving victory), etc. The general principle governing vows is clearly stated in Deut.23.21-23(22-24). There is no sin in not vowing; but a vow once made must be strictly observed (cf. Num.30.2-13; I Mal.1.14). For the capacity of women see Oaths, A. ii. (a). A vow could be made by simply uttering the phrase “(it is) holy,” and rash vowing appears to have been prevalent at one time (Pr.20.25). In offerings the law requires that a votive peace-offering must be unblemished and perfect (Lev.26.17-25; cf. Mal.1.14), but permits its flesh to be consumed on the day of sacrifice and the next day (Lev.7.16-18). All votive sacrifices were to be brought to the temple (Deut.12.6,11,17,26). For rules as to the accompanying offerings, see Num.15.2-16. Certain earnings were on account of their vocation being brought to God’s house for any vow (Deut.23.18[19]). Redemption was permitted in the case of certain vows. Human beings were redeemed according to a fixed scale, subject to abatement in cases of poverty (Lev.27.2-8; Z.12.4[5]). [Poor. Animals capable of being sacrificed were not subject to redemption (Lev.27.9,19). Unclean animals and houses might be redeemed at six-fifths of their estimated value (Lev.27.11-15). Fields were also subject to redemption, but the details are obscure. The valuations were calculated on the number of years to the Jubilee, the sowing of a homer of barley being valued at 50 shekels for the whole period from one jubilee year to the next, and some abatement was made if the vow was uttered at any intervening period. The owner could then redeem at six-fifths of the valuation in the case of a field he had inherited; but if he refused to redeem or had sold the field to another, it would not be subject to redemption at all, but to
fall to God at the next jubilee, the possession being the priest's. In the case of a purchased field, the owner, who dedicated it by vow, could redeem at a valuation calculated on the number of years left to the next jubilee, when it returned into the original vendor (Lev. 27:16-25). 

Firstlings could not be consecrated by vows, being already holy by operation of law (Lev. 27:26,27). Perhaps it should be inferred from 2K.12:4.[5], Pr. 20:25, that other articles dedicated by vow (e.g., a cup) were subject to redemption. A fragment form of vow is found when the Nazarite. The Jews held that ‘issār, ‘ēsār, a word meaning bond, and so used in Num.30, denoted a special form of vow (abstinence) in Num.30:13.[14]; but it is clear from the scope and language of the chapter that the reference throughout is only to the bond which was bound on the soul by any oath (ver. 5,9, etc.). The poser, and of a devoted bond, was most holy (Lev. 27:28). Devoted persons (Family) and animals were put to death, no sale or redemption being allowed (Lev. 27:28,29; cf. Ex.22:20.[19]).

Devoted clean animals fell completely to the priests (Num.18:14; Ezek.44:29), instead of being sacrificed and eaten by the owner, as were things vowed and ordinary holy things. The priest, and of a devoted field fell to the priest (Lev. 27:21-23,28). The penalty for taking of that which was devoted was death by burning (Jos.7:15, etc.). [Anathema,] Realeycl as, für Protest, Theol. und Kirche, vi. 485-487. [H.M.W.]

But if the practice of evading the duty of helping parents by vomiting a thing to God as Corban (Mt.15:5-9; Mk.7:11-13), St. Paul took upon himself the Nazarite vow on two occasions—Ac.18:18 (some think this refers to Aquila), probably at the time of his troubles in Corinth, and 21:23,26, when he undertook to defray the expenses of the sacrificial offerings of the four Nazarites who had "a vow on them" in Jerusalem. In 23:12 certain Jews bound themselves under a curse to abstain from food till they had killed St. Paul—an illustration of a vow having the force of and being associated with an oath. For instances of Anathema in N.T. sense of accursed, delivered over to destruction, see R.V. of Ro.9:3,1Cor.12:3,16:22,Gal.1:8,9. [H.H.]

Vulgate, The. The Vulgate Version was almost the sole form in which the Bible was known to Western Christendom for more than 1,000 years; it is still the official version of the Roman Church. Directly or indirectly it was the parent of all the vernacular versions of Western Europe, the Gothic Version of Ulflæs alone excepted; its effect was felt on Luther's translation and on our own A.V.; and it may claim to have exercised a wider influence on the Christian Church than any other version or even than the original Gk. and Heb. Its language has been the model on which the language of modern theology has been formed; in the N.T. it is one of the most important elements in assisting to settle the Gk. text; and it is, both in O.T. and N.T., one of our most valuable witnesses for the history of Biblical interpretation. For Englishmen the Vulg. has a peculiar interest. Some of the most important theological works brought to England in the 15th cent. were the works of Northumbria in the 7th cent.; an Englishman, Alcuin, at the bidding of Charles the Great, completed a careful revision of the text at the beginning of the 9th cent.; another, Stephen Langton, in the 13th cent., introduced our present division into chapters, which has spread to every part of our theological literature. As adapted to the vernacular of the Hebrew and Gk.; among other leading authorities for the history of the Vulg. text we may reckon Lanfranc, Stephen Harding, Roger Bacon, John Mill, Humphrey Hody, and Richard Bentley; the critical edition of N.T. of the Vulg. (now in course of publication by the English Benedictines) was from the English translation by Bp. John Wordsworth; and Pope Pius X., who in 1907 entrusted the Benedictine Order with the task of revising the whole Vulg. Bible, placed at the head of the commission Dom Gasquet, abbot of the English Benedictines.—

1. Origin and History of the Name Vulgate. The term Vulgate is derived from the name of the Latin version, which is earlier in the sense of "current," and is undoubtedly an equivalent to the Gk. ἡ κοινὴ ἔκδοσις, the usual designation for the Septuagint translation of the O.T., and was applied to it to distinguish it from the emended text of Origen's Hexapla. It thus acquired the meaning of a popular, uncorrected text as compared to other versions. It was so called because the Latin version gradually became the current text of the West, it ultimately acquired the name of Vulgata editio; yet it took a long time for this to become, as it now is, the exclusive designation of his Latin version. When the Council of Trent, in 1546, provided for the revision and publication of a Latin text, the term Vulgata editio was adopted, to describe the text then in use. The Benedictines, in their "Biblia Sacra Vulgatæ Editionis" which fixed the name "Vulgate" in its modern sense.—

II. Latin Versions previous to Jerome's Revision. The most important specimens of early Latin versions which we possess are of N.T., those of O.T. being far more fragmentary; and Jerome's work upon N.T. was a revision of existing versions, whilst in O.T. it ended in being a new translation direct from the Heb.; the critical problems are therefore not the same in the two Testaments. The origin of a Latin version of N.T. is usually placed not in Rome but in Africa. During the first two cents. the Church in Rome seems to have been mainly Greek, or at any rate Greek-speaking, and the same may be said of Gaul; but the Church in N. Africa was Latin-
speaking, and a Latin Bible, or at any rate N.T., would be indispensable. With this inherent probability accords the fact that such Old Latin MSS. as Cod. Bobiensis, 5th or 6th (Cod. Fleury Palimpsest, 6th or 7th) of the Acts agree with the q texts in the African Fathers, especially Cyprian († 257 a.d.), and with the language and style of African writers; while their texts seem to show all the marks of extreme antiquity and primitive translation. On the other hand, there has been an increasing tendency of late years to doubt whether "Africanisms" in style and vocabulary may not be the characteristics of 2nd and 3rd cent. Latin generally, rather than of African Latin in particular; while the fact that some of our earliest Old Latin MSS. (Codex Bezae Gospels and Acts), and the Laudian Acts (both 6th cent.), are bilingual, may point to such a city as Antioch as the home of the version. At Antioch Greek would be the ordinary spoken language, but there would be a large Latin-speaking element in connexion with the Alexandrian Bishops, and "notarii" would be accustomed to write public notices in the two languages. There is, at any rate, no doubt that a Latin version of N.T. was current in Proconsular Africa early in the 3rd cent., and was used by the African Fathers for some considerable time. In the 4th cent. it is clear that the Latin translation current in Western Europe and especially in N. Italy, called by Dr. Hort the European. Scholars are not yet agreed as to whether this was an independent version, or a revision of the African text in the direction of smoother Latinity; the principal MSS. of it are a (Codex Vercellensis, 4th or 5th cent.), b (Codex Vercellensis, 5th or 6th), c (Codex Corbeiensis, 6th), f (Codex Vindobonensis, 6th or 7th), r (Codex Userianus, 7th), all of the Gospels. A third type, named by Dr. Hort the Italian, is considered by him to be a revision of the European, made (1) to obtain a still smoother Latin text, and (2) to amend the ungrammatical acrostics of the "Syrian" type. The name "Italian" was given because Dr. Hort supposed this type to be that referred to by St. Augustine when he praises the "Itala interpretatio" as being clearer and more accurate than others (de Doctr. Christ. i. 15), and because St. Augustine's Biblical citations agree on the whole with this type. The principal MSS. of this family are f (Codex Brixianus, 6th cent.) and g (Codex Monacensis, 7th), both of the Gospels. It is to be noticed, however, that the readings of the "Italian" group agree in many instances so closely with Jerome's text, that many scholars maintain that the group is not Old Latin at all, but essentially Vulg., with a certain admixture of Old Latin readings. It is a harder task to classify our MSS. of the Old Testament. This is partly because they are fewer and more fragmentary; the early circulation of O.T. in the West was probably far smaller than that of N.T., and its antiquity and primitive extent of text surviving in more than one MS. Moreover, patristic citations do not help us to anything like the same extent. Speaking roughly, however, we may say that for most books of O.T. we possess fragments of MSS. which, judged by patristic quotations and by the nature of their Latin, may be assigned to the European or Italian. On the other hand, as Johannine, archeological, and post-apostolic, there must have been a number of independent translations; both Jerome and Augustine use language which, even allowing for exaggeration, demands this. Grave inconvenience and confusion naturally followed from the absence of one standard version; and (c. 383 A.D.) Pope Damasus commissioned St. Jerome to prepare a revision of the New Testament which should serve as an "Authorized Version." The choice was a wise one; Jerome was probably the one scholar living who combined knowledge of the Bible with a great knowledge of the original tongues in which both Testaments were written. His aim of expressing himself in clear, forcible Latin enabled him to produce a translation suitable for the simple and learned alike. Eusebius Hieronymus, to give him his full name, was born of Christian parents c. 340 A.D.; he was educated at Rome; in 374 he retired to the desert of Chaldea, and his translation was the first Latin translation to be printed in the beginning of most Vulg. Bibles that we learn its nature. Damasus had bidden him judge which of the numberless Latin translations of N.T. most faithfully represented the original Gk.; and Jerome now presented him with a first instalment of the work, consisting of the four Gospels and the Gk. MSS.; he had not altered the Latin save when the sense of the original required. The Gospels appeared in 383 and, as Jerome clearly intimate, were to be followed by the rest of N.T. These books must have appeared (probably in the order, Pauline epistles, Hebrews, Acts, Catholic epistles, Apocalypse; see the letter to Paulinus, Frater Ambrosius, also printed at the beginning of most Vulg. Bibles) during the course of the next year. It has indeed been doubted whether Jerome ever did revise the rest of N.T. because (a) the Latin does not show the same signs of correction as in the Gospels; (b) the other books do not possess the four prefaces which Jerome was wont to write; and (c) Augustine, in a letter (Ep. lxxi. 6) written as late as 403 A.D., mentions Jerome's translation of the Gospel only. On the other hand, Jerome affirms repeatedly that he revised all the N.T., and replying to this very letter of Augustine (Ep. cxxii. 20) he emphasizes the point with which to correct him. The other books of N.T. were not treated with the same care as the Gospels, but a thorough examination of the evidence makes it practically certain that they were revised.
and that the Vulg. MSS. represent a type of text distinct from the Old Latin. The absence of prefaces may be due to the fact that Pope Damasus, the inspirer of the Psalter; the Old Latin Psalter was simply emended from the Gk. of the LXX. without any very thorough examination of the text. This is the Psalterium Romanum, still in use at St. Peter's and at Milan. In 385 Jerome left Rome, and, after a short time spent in travel, settled for the rest of his life at Bethlehem; and now his serious work at O.T. translation began. The dates of his various works are not always easy to fix, but they probably appeared in the following order. Shortly after his arrival at Bethlehem (c. 385) he found that the Psalterium Romanum had been so carelessly copied that he proceeded to revise it more thoroughly; he corrected the underlying LXX. from the other Gk. versions, and appended to his translation the critical signs by which Origen had marked (a) passages largely differing from the LXX. but supplied from the version of Theodotion (an *asterisk*), and (b) passages present in the LXX. but absent from the original Hebrew (an *obelus*). This is the Gallican Psalter, so called because it afterwards obtained wide popularity in Gaul, apparently through the efforts of Gregory of Tours (379-414). This ultimately became the current version in the Latin Church, and this, not Jerome's later translation from the Heb., appears in his Vulg. Bible. This was probably followed by revised translations of the other O.T. books from the LXX. (though such a translation survives only in the case of Job, together with prefaces only to Proverbs, Ecclesiastes, Song of Songs, and Chronicles). For this reason it has been plausibly argued that Jerome did not proceed very far with his version from the LXX., but abandoned it for the more ambitious scheme of a new translation direct from the Hebrew. This is quite probable. On the other hand, it asserts more than once (e.g. Ep. Lxxii. 5; Contra Ruff. ii. 24, iii. 25) that he translated the whole O.T. from the LXX. In these passages (written in 398 and 402 A.D.) he refers to it as having been undertaken "ante annos plurimos," which would probably mean during the earliest years of his stay at Bethlehem. The conditions under which the O.T. was translated from the Heb. were different from those which brought about the revision of the New; the latter was undertaken at the instance of the Pope, and was intended to be the authorized version in the West, so far as the Pope could make it such; the former was undertaken by Jerome in his private capacity, at the desire of friends or from his own sense of the need of a new translation, and the work was spread over a far greater number of years. Allusions in the prefaces to the various books, and references in his letters, enable us to follow him in the prosecution of his great task almost book by book and year by year. He began with Samuel and Kings, introduced by the famous Prologus Gallicanus (for this and his other prefaces, see the beginning of any ordinary Vulg. Bible); though attached to these books only, it is really an introduction to the whole O.T. and shows that he must have already contemplated a new translation of all the books. By 393 (Ep. Lxxix.) he had translated all the O.T., except the Octateuch, and was now working at that; by Octateuch he probably meant the five books of Moses, Joshua, Judges and Ruth (counted as one book), and Esther. The Octateuch was therefore translated between 398 and 405, for in the preface to Joshua, written soon after the death of Paula (404 A.D.), Jerome says he has finished the Pentateuch and is now at work on Joshua, Judges, Ruth, and Esther; and these remaining books were probably finished in the following year. The fact that Esther is described as being still in hand after the Octateuch brings out the difficulty of the dedication of the book to Paula and Eustochium (vide preface to Esther); and the insertion of Esther in the first case, or of Paula in the second, must be a scribe's error. With regard to the books of the Apocrypha, the evidence is conflicting. In his preface to the books of Solomon (justa LXX.), written probably in 399, he states that he did not then correct Wisdom and Ecclesiastes, "tantummodo Canonici Scripturas vobis emendare desideras." In the Prologus Gallicanus he enumerates the books of the Heb. Canon, "ut scire valeamus, quidcumque extra hos est, inter apocrypha esse ponendum," and then says of Wisdom, Ecclesiastici, Judith, Tobit, and the Shepherd (of Hermas), "non sunt in Canone." In the preface to Ezra and Nehemiah he refuses to include the third and fourth books of Esdras (i.e. 1 and 2 Esdras of our Apocrypha) in his translation; and when translating Jeremiah, he refused to add the apocryphal Book of Maccabees he simply remarks in the Prologus Gallicanus, "Machabaeorum primum librum Hebraico reperi. Secundus Graecus est." This would suggest that he did not translate either of them. He does not mention the Prayer of Manasses. In the case of Daniel, however, he consented to retain the Story of Bel and the Dragon, and the Hymn of the Three Children, though with a warning that they were not found in the Heb. (vide preface to Daniel); and he followed the same practice with regard to the apocryphal parts of Esther, placing the additional pieces all together at the end of the book. The preface to his translation of the books of Solomon from the Heb. (398) concedes a sort of middle position to the Apocrypha: "Sicut ergo Judith, et Tobiae, et Machabaeorum libros legit quidem Ecclesia, sed eos inter canonicas scripturas non recipit; si eis haec duo volumina i.e. Ecclesiasticius et Wisdom legat ad aedificat ium plebis, non ad auctoritatem Ecclesiasticorum dogmatum confirmandum" (this is the passage referred to in the 5th Article of the English Church). At the request of friends he made a rapid translation of Tobit and Judith, pleading that the latter was said to have been
reckoned amongst the Holy Scriptures by the Council of Nicaea (there is no other authority for this statement). As these books were written in "Chaldee" he obtained the help of a translator, probably a Trappist, who in turn translated into Latin, probably after the canonical books were finished. It is also worth bearing in mind that the late M. Samuel Berger, a high authority on the Vulg., was of opinion that the text of Wisdom and Ecclesiasticus shows signs of having been revised by Jerome himself. The Psalter was probably retranslated by him.—IV. The History of Jerome's Translation to the Invention of Printing. It is the fate of Revised Versions to be unpopular at first; and Jerome's was no exception. This may have been due in part to personal reasons: Jerome himself had never been popular, and his bitter tongue and ready pen did little to conciliate opponents. But there were other and inevitable reasons: he was accused of disturbing the peace of the Church, and shaking the foundations of faith; and especially of placing his own work above the LXX. Popular legends as to the miraculous character of his work, harmonized with the fact that N.T. writers used their work in quoting from O.T., had invested them with a halo of sanctity, and even Augustine held that their version was as much inspired as the original Heb. [Septuagint.] Jerome replied that he had the utmost reverence for the Hebrew, but in order to produce a translation which should be clear where the LXX. was obscure; that he was only doing what Aquila, Symmachus, Theodotion, and Origen had done; and that N.T. writers did quote occasionally from the Heb. In the time the opposition calmed down and Jerome's version gained wider acceptance. Augustine approved of it, at any rate in the Gospels; Pelagius used it in his commentary on St. Paul's Epistles; throughout the 5th cent. it was gaining favour with ecclesiastical writers in Gaul, and in the 6th it had apparently become (except in Africa) the reigning version; towards the end of the 6th century the Greek spoke of it as used equally with the Old Latin by the Roman See, while personally he preferred it. In one book only (the Psalms) Jerome's version from the Heb. has not to this day won the battle; the "Gallican" Psalter was too deeply rooted in the affections of the faithful to be supplanted even by a more accurate version, and the "Psalterium juxta Hebraeos" has no more chance of displacing Jerome's earlier work than our own R.V. has of displacing the Prayer Book Psalter. The Old Latin Bible was never authoritatively deposited by the Roman Church or the Vulg. formally installed in its place; partly by its own merits, partly through the reputation of its author, partly through the example of the Roman Church, the version of Jerome won its way in the West; but long after the 6th cent. we find traces of the older versions surviving, sometimes in lectionaries and service books, sometimes in glosses. The companion volume of the Vulg. at this time the Vulg. had established itself, its text was already degenerating, especially in the N.T., where its Latin did not differ so widely from that of the older versions. There is scarcely a single Vulg. MS. which has not suffered from "mixture" with the Old Latin as well as from the inevitable errors that creep into texts multiplied by scribes. It is to Italy that we can trace the most distinct influence of the Vulg. text, but it was in England that they were most carefully preserved: the Codex Fuldensis of N.T. was transcribed in the middle of the 6th cent. for Victor, Bishop of Capua, and corrected by him; the Lindisfarne Gospels (7th or 8th) were written in England, but copied from a MS. that belonged to Northern Northumbria; the magnificent Codex Amiatinus of the whole Bible (beginning of the 8th cent.) was copied in Northumbria from an Italian exemplar and taken to Italy by Ceolfrid as a present to the Roman pontiff in 715. It was with Archbishop Theodore in 668, and during the numerous journeys to Rome (653-684) of Benedict Bishop and Ceolfrid (abbots of Wearmouth and Jarrow), not during the earlier mission of St. Augustine, that the best examples of these Italian texts were brought to England; and it was in Northumbria that they were preserved, carefully and beautifully copied, and thence carried by monks and papal envoys to the S.E. of France, and also through the N. of France, Switzerland, and Germany back into Italy. But a more corrupt type was spreading in the South, Spain was separated from the rest of Europe by the mountains as Britain was by the sea, and it developed its own national type; but the character of the Spanish scribes became more and more "Contribute" readings, and the later the Spanish MSS. are the less valuable is their text. At the end of the 8th cent. the first authoritative effort to revise the text of the Hieronymian Bible was made—not by the papal power, but on the initiative of Charles the Great, who was anxious to obtain a good uniform Bible text for Church use, and commissioned Alcuin, the abbot of St. Martin's at Tours, to prepare him such an edition. Alcuin was an Englishman educated at York, and he wisely sent to that city for MSS.; in the N.T. his revision seems to have followed the Northumbrian type of text which had been preserved there, but his MSS. have been dependent on the Codex Fuldensis or MSS. resembling it. At Christmas, 801 A.D., Alcuin presented his revised Bible to Charles the Great; and in the splendid writing-school at Tours copies of its text could be multiplied with ease. "Alcuinian" Bibles were soon in great request and the revision was spoilt by its own success, the demand for copies being so large that they were produced hurriedly, and the numerous fine MSS. of this period show wide diversity of text, the Codex Vallicellianus at Rome (9th cent.) being probably the best specimen. Another revision was undertaken at much the same time by Theodulf, bishop of Orleans (787-821), who seems to have tried honestly to correct the Spanish type of text by the MSS. current in the S. of France, but his work had no popular success or influence; its best representative is the beautiful 9th-cent. Bible, sometimes called the Codex Memmius, now in the National Library (Paris). From this time forward the history of the Vulg. text is one of increasing degeneration. Efforts were made at emendation, but with very little effect, by Lanfranc, archbishop of Canterbury 1069-
VULGATE, THE

of 1089; Stephen Harding, abbot of Citeaux; Cardinal Nicolaus Manetia; Herveius of Bourges, and others during the 12th cent.; while the 13th saw the formation of several correctoria, or lists of various readings, with authorities, prepared by bands of scholars mainly belonging to the religious orders, such as the Franciscans or Dominicans. But the same century was marked by a acceleration in the process of decay. The fame of the university of Paris drew great numbers of theological students to it and caused a large demand for Bibles; these were copied hastily from any MS. that happened to be at hand; and Roger Bacon complains bitterly and justifiably of the wretched state to which Exemplar Parisiense, or type of text current at Paris, had been brought by such carelessness. The vast majority of 13th, 14th and 15th cent. Vulg. MSS. represent what we may call the "mediaeval" text, and are full of mistakes and interpolations. The earnest attempts of Laurentius Valla (†1457) to amend the Vulg. by the quality of the Greek-text without result, but deserve to be remembered with gratitude.—V. The History of the Printed Text. The earliest and most beautiful productions of the printing press were Bibles; the famous "Mazarin" or "42-line" Bible, printed at Mainz by Gutenberg (or Schoeffer, or Fust), in 1455 is one of the finest and most valuable books in the world. During the 15th cent. more than 90 editions of the Latin Bible were printed; the printers, even those of the first Roman Bible (a.d. 1471), were mainly German. The printers chose cheap, late MSS. for the rough usage of the printing-office, probably not suspecting that their text was unsatisfactory. Succeeding editions were as a rule reprints of the earlier, and thus by the time scholars were beginning to examine the text the thousands of printed copies circulating in Europe presented it in its most corrupt form. Thus though the rule is, the later editions were more correct in text, yet the later a printed edition, the nearer it is as a rule to the earliest and purest MSS. The 16th cent. was, however, the great age of the Latin Bible. The number of editions published during it was enormous—438, according to Copinger—and its last years witnessed the establishment of an official version, to be used henceforth and reprinted "ne minimis quidem particulae de textu mutata, addita, vel ab eo detracta," by all members of the Roman Church. Some scholars, both Catholic and Protestant, made independent Latin translations of the N.T.; others set themselves to revise the current Hieronymian text, either by correction from the Gk. or by collating more ancient Vulg. MSS. The famous Complutensian Polyglot Bible (1514 and following years), published at the expense of Cardinal Ximenes, was, in its Latin text of N.T., corrected mainly from the Gk. An earlier Bible, printed by Froben at Basel in 1502, seems to have been set up from good Vulg. MSS., and often preserves right readings almost alone amongst early editions; but the Latin Bible of Robertus Stephanus (Paris, 1528), was the first genuine attempt at a critical edition. Three good MSS. were collated for it, and seventeen for the larger edition (printed 1538-1540, reprinted 1546), which is practically the foundation of the official Roman Vulg. The modern verse divisions appear first in his small 1555 edition. Similar attempts at revision were also being made by the Catholic theologians at Louvain. The fine folio edition of Joh. Hentenius (Louvain, 1547, and often reprinted) was based on the 1540 text of R. Stephanus, but some 30 MSS. were also collated for it, and the text was thus greatly improved. It was, however, the Council of Trent in 1546 that first ordered an official edition of the Vulg. in accordance with the traditional Hieronymian text; but it was nearly half a century before it appeared. Nothing of importance was accomplished till the pontificate of Sixtus V. (1585-1590), who appointed a commission, with Cardinal Caraffa (†1591) at its head, to effect a complete revision of the text. Good MSS., such as the Codex Amiatinus, were consulted, and reference made to the Heb. and the Gk.; Sixtus was advised by a board of experts, which was assisted by Franciscus Toletus and Angelo Rocca. The volume was printed at the Vatican press, and the proofs were revised by the pope himself; errors that were discovered after the sheets had been printed off were corrected either with the pen or by pasting a more correct leaf on it with the right hand. It appeared in 1590, and was prefaced by the famous bull Aeternus ille, which declared the edition to be the actual Vulg. prescribed by the Council of Trent, ordained that its readings should be introduced into all missals and service-books, forbade the publication of future editions without careful collation with the official copy, and prohibited the printing of various readings in the margin—all this under the pain of the greater excommunication. After the death in 1590 of Sixtus V., Bellarmino persuaded Pope Gregory XIV. that a new edition was necessary. A new commission was appointed, under the presidency of Cardinal Colonna; current report at the time, and the inscription which commemorates the event at Zagarola (the country seat of Cardinal Colonna, where the work was done), maintained that the revision occupied only nineteen days; but this is hardly credible. In the beginning of the work the Clementine edition, he gave orders that the copies of the Sixtine edition should be as far as possible recalled and destroyed. The final revision of the new edition was entrusted to Fr. Toletus, and the printing was done by Aldus Manutius the younger. The whole was finished and published by the end of 1598. The decree that no future edition of the Vulg. was to be printed before it had been carefully collated with the Vatican copy; nor were variant readings to be allowed in the margin. The first edition of the Clementine Vulg. was succeeded by a second in 1593 and by a third in 1598; these are the second is said to be the most, and the third the least, accurately printed; but each contains some obvious errors, and the real "authentic" Clementine edition must be found (as Hetzenauer says in his careful reprint of the Bible, 1906) by a comparison of them all. The Clementine Vulg., which is a real improvement on the Sixting
has remained the Authorized Version of the Roman Church, and though individual scholars have at times collected materials for a further revision, the prohibitions of the bull have prevented them from publishing a new text or even a critical edition with variant readings. Ultimately, however, Pope Pius X. in 1907 entrusted the Benedictine Order with the task of preparing a revised edition of the Hieronymian Bible, and we may hope that the Latin Church may at length possess St. Jerome's Version with his own words. —VI. Language. The question of "Africanisms" has been shown above (§ II.) to be probably due to the time, rather than the place, of the origin of the versions, and likewise the so-called "archaisms" were probably never such in colloquial Latin, at any rate in the Province of Africa, as are frequently found in African texts, made for popular use, and by men who did not belong to the literary classes, they reproduced the familiar idioms and expressions of their time, Jerome, in turn, retained them as far as was possible. The Latin of the Vulg. is therefore largely the Latin of the earlier versions, and the archaisms are at least in their simplest form the inheritance of a scholarly translation and the simple force of popular language. We may classify its main characteristics under the following heads, bearing in mind that there is a good deal of cross division.

1. Africanisms. Such words as claritas, clarifico (for gloria, glorifico), excicere (in auctor), nequam as a substantive, nun- sura (for tributariam), saeculum (for mundus), are all characteristic African translations of the Greek which have passed here and there into the Vulg.; as are also such long complex verbs as collabrorare, inhonorare, obnecere, redacticare, subsanare. Characteristics of style and construction which, though not peculiar to Africa, are more frequent in African than in European Biblical MSS., are, e.g., the use of co-ordinate verbs instead of the participle and the verb, the use of cum with the imperfect or pluperfect subjunctive instead of the present participle or the ablative absolute, the use of ne or non with the perfect subjunctive instead of the perfect passive and passive of the verb, and also a tendency to throw the verb to the end of the sentence. It is only sometimes true that Graecisms are characteristic of Africa; simul- tanteus and sacramentum, not parabolae and mys- terium, are the African renderings of παραβολή and μυστήριον, while linguere was only in time replaced by baptizare. (2) Graecisms and Hebraisms. Every page of the Vulg. N.T. shows how deeply its Latin has been modified by the underlying Gk. text; of a very large collection of peculiar Vulg. constructions given by Kaulen (Handbuch zur Vulgata), most are simply exact reproductions of the Gk. The lack of the definite article in Latin was saved here in a large measure by the addition of the genitive singular, and hic mundus = ò κόσμος; sometimes the literalism breaks through the laws of Latin grammar, as when dominari and impleri are made to govern a genitive case. In vocabulary, too, it is surprising how many familiar Biblical words have come to us from the Gk. that have never been used by it, or have adopted the different meaning. e.g. apostolus, baptizatmos, ma, diabolus, evan- gelium, haeresis, penicloctes, schisma, synagoga, give a flavour of the original Gk. to many versions whose language was drawn from the Latin. To Graecisms must be added Hebraisms, for the Gk. of N.T. itself strongly resembles the Heb. of its own time. Later translators of the O.T. from the Heb. deliber- ately tried to reproduce its construction and idioms; such sentences as "non additid ultra querere eum" (1Sam.27.4) or "adposuit ut adprehenderet et Petrum" (Ac.12.3), or expres- sions like "a facie, in spectu, de manu, in ore (allcujus) O.T.", which in the book where in the West was written in the East. On the other hand, the reader of the O.T. cannot fail to be struck with Jerome's habit of translating the names of places; e.g. the land of Moriah in Gen.22.2 becomes terram visionis; Beer-lahai-roi in Gen. 16.14 becomes Puteum Graecis Videntes (Paris, 1867); etc.; this made many of the narratives far more intelligible than could a simple transliteration. (3) Finally, many words which have for centuries been common theological terms in the Western Church either appear for the first time in the Vulg. (e.g. predestinatio, justificatio, sanctificatio, authentico, etc.). (4) The versions (i.e. Vulg. and Prolegomena to the i.e. vols. of Tischendorf's Novum Testamentum Graece, 8th ed. Leipzig, 1894), pp. 948-1108; Burkitt, The Old Latin and the Itala, in vol. iv. of Texts and Studies (Cambridge, 1896); E. Nestle, Uebersetzungen der Bibel. Leipzig, 1897 (= vol. iii. of The Prot. Realencyc.), pp. 84-118; from Soden, Biographie des neuen Tes- tamentes, i. iii. (Berlin, 1907), §§ 350-362; arts. on Latin Versions, in D.B. (5 vols. 1904). (b) Life and works of St. Jerome: the best complete edition of his works is that of Vallarsi (15 vols. folio, Verona, 1734-1742; 4to Venice, 1766-1772). For his life, see O. Zöckler, Hieronymus; sein Leben u. Wirken, etc. (Gotha, 1865); A. Thierry, St. Jerome, in The Fathers for Eng. Readers (S.P.C.K.: 1877); Frenamte, Hieronymus in the Dict. Christian Biogr., and his Life of Jerome in Wace and Schaff's Select Library of Nicene and Post-Nicene Fathers, vol. vi. Grützmacher, Hieronymus, Eine Biographical Studie, etc. (Leipzig, 1901). (e) History of the text: Van Ess, Pragmatisch- exegetische Geschichts Bildung der Textkritik (Frankfurt a. M., 1925); Kaulen, Gesch. d. Vulgata (Mainz, 1868); others cited under (a). (d) Grammar, Latinity, etc.: Kaulen, Handbuch zur Vulg. (Mainz, 1870); Roesch, Itala u. Vulgata (Marburg, 1875); Goetzler, Latinität u. S. Jerome (Paris, 1884). (e) editions of the Vulg.: Vercellone's reprint of the Clementine Vulgata, Biblia Sacra Vulgatae Editionis ... Romae, Tipis S. Congregationis de propaganda fide (1861), is a hand-
some and careful reprint of the Clementine text; its place, however, will probably now be taken by Hetzenauer's Bibliæ Sacrae Vulgatae Editionis, etc. (Oeniponte, 1906). Hetzenauer not only prints the text well, but provides the variants of the three "official" Clementine editions, and of the Sixtine. For N.T. Hetzenauer has also published a handy small edition of the Clementine text, Novum Test. Vulgatae Editionis, etc. (Oeniponte, 1869), and Nestle, Novum Test. Latina, etc. (Stuttgart, 1906). Nestle gives the variants of the Sixtine edition, and also of the most important Vulg. MSS. Dr. P. Cursen published a critical edition of the Ep. to the Galatians in 1885 (E. P. ad Galatas, Berlin); the Oxford critical edition of the Vulg. by Bp. J. Wordsworth, of Salisbury, and the Rev. H. J. White, is still in course of publication; the four Gospels and the Acts have already appeared. [H.J.W.]

Vultu, the A.V. translation of the Heb. dâ'a, dayyâ (Lev. 11:14; Deut. 14:13; and Is. 34:15), and also in Job 28:7 of 'ayyâ. There seems no doubt that the A.V. translation is incorrect, and that the words refer to some of the smaller birds of prey, such as kites or buzzards. dayyâ is synonymous with k'dayah, the Arab. vernacular for the kite, especially the black kite. 'ayyâ almost certainly indicates the kîrû, which in other passages it is taken to represent. Vulture should be the translation of the Heb. nîsher, which only occurs in the book of Ezekiel, where the scavenger-vulture is alluded to under the name Gier-eagle. [Gledè; Össifrage.] [R.L.]

W

Waffer (râ'âqî), a thin cake, used only for offerings, and therefore always made of unleavened bread (Ex. 29:2, 23; Lev. 2:4, 7, 12, 8, 26; Num. 6:15, 10; 1 Chr. 23:29). Once, in Ex. 16:31, "a wafer" is used for the Heb. qappîbhîth, or a small piece of unleavened bread. Wafer cakes were made with honey. [W.o.E.0.]

Wages. The earliest mention of wages in the Bible is of a recompense, not in money but in kind, to Jacob from Laban (Gen. 29:15, 20, 30:28, 31:7, 8, 41). In Egypt, money payments of wages were in use (Ex. 2:9), and though the terms there cannot now be ascertained, they were doubtless regulated by law, as they were in Babylon by the Code of Hammurabi (c. 2100 B.C.). In the parable of the householder and the vineyard (Mt. 20:2) the labourer's wages are one denarius per day, probably = 71/2, a rate which agrees with Tob. 5:14, where a dracula is mentioned as the rate per day, and may be fairly taken as equivalent also to the usual pay of a soldier (ten asses per diem) in the later days of the Roman Republic (Tac. Ann. i. 17; Polyb. vi. 39). In earlier times the rate was probably lower. But most likely labourers, and also soldiers, were supplied with provisions. The law was very strict in requiring daily payment of wages (Lev. 19:13; Deut. 24:14, 15). The employer who refused to give his labourers sufficient victuals is censured (Job 24:11), and the iniquity of withholding wages is denounced (Je. 22:13; Mal. 3:5; Jas. 5:4).

Wagon. The Oriental wagon (Arab. 'arâbi) is composed of two or three planks, fixed to two solid runners, or wheels, of wood or stone, 2 to 5 ft. in diameter, which serve as wheels. To the floor are sometimes attached wings, like those of a wheelbarrow. For the conveyance of passengers straw or clothes are laid in the bottom, and the vehicle is drawn by buffaloes or oxen (Num. 7:3-6, 5; Heb. 'agâlû). [C.A.R.]

Wall. The Artful C. renders nine Heb. words. (1) 'nshsharâh (Ezr. 5:3), a "vertical" wall. (2) 'gâ'dhûr (Num. 22:24), a stone fence protecting vineyards by the roadside, also rendered wall in Ezr. 9:5, 13:5, 5:5, Ho. 2:6, Mi. 7:11; but otherwise fence (Ps. 62:3) or hedge (80:12; Ec. 10:8; Ezk. 13:22, 30); and pointed gedhêr in Pr. 24:31, Ezk. 42:10 (A.V. wall). (3) hâmâm, the common word for a masonry wall, used symbolically of a "protection," as in Ex. 14:22, 29, when the waters flanking the shoals protected the Israelites in crossing the head of the Red Sea. (4) hîl, a "fortification" (1 K. 21:23; Ps. 122:7), occurs on ten times. (5) hîma'â (outer wall), host, bulwark, and rampart. (6) hayyâî (Arab. heit), an ordinary wall (Ezk. 13:10). (7) hâzîrân (Dan. 9:25 R.V. moat). (8) kôsthel (Can. 2:9) or kethal (Ezk. 5:5; Dan. 5:5); apparently a cemented wall. (9) qîr, a common word for house and city walls. (10) shâ'âr (Arab. shur), in the Holy Land a wall of a city. Perhaps (Gen. 49:22) the terrace wall of a fruit garden or vineyard. Walls were often not founded on the rock but, as now, on the surface soil, or on older ruins (Lu. 6:48), as is shown by recent excavations in Palestine. [C.R.C.]

Wanderings in the wilderness. [Exod. 17:14.]

War. Before entering on a war of aggression the Hebrews sought the divine sanction (Judg. 1:1, 20:2, 27, 28; 1 Sam. 14:37, 23, 20-30) by consulting either the Urim and Thummim (1 Sam. 28:6) or the prophets (1 K. 22:6), hence the regular term sanctify war. Formal proclamation to the army was practiced. Before entering the enemy's district, spies were sent to ascertain the character of the country and the preparations of its inhabitants for resistance (Num. 13:17; Jos. 2:1; 1 Sam. 28:4). When an engagement was imminent, a sacrifice was offered (1 Sam. 7:9, 13, 6) and an inspiring address delivered either by the commander (2 Chr. 20:20) or a priest (Deut. 20:2). Then followed the battle-signal or shout (1 Sam. 17:52; Je. 50:42; Ezk. 21:22). The combat assumed the form of a number of hand-to-hand contests; hence the high value attached to fleetness of foot and strength of arm (2 Sam. 1:23, 2:18; 1 Chr. 12:8). Various strategic devices were practised, such as the ambuscade (Jos. 8:2, 12; Judg. 20:36), surprise (Judg. 7:16), or circumvention (2 Sam. 5:23). The siege of a town or fortress was thus conducted: A line of circumvallation was drawn round the place (Ezk. 4:2; Mi. 5:1), constructed of trees laid down (Deut. 23:9) with cartloads and other materials at hand. This line both cut off the besieged from the surrounding country and served as a base of operations for the besiegers. From this line one or more
WAR-CLUB

"mounts" or "banks" were thrown out in the direction of the city (2Sam.20.15; 2K.19.32; Is.37.33), and gradually increased in height until about half as high as the city wall. On this security of the city were erected (2K.25.1; Ezk.4.2; 17.17; 21.22), whence the slingers and archers might attack with effect. Battering-rams (Ezk.4.2; 21.22) were brought up to the walls by means of the bank, and scaling-ladders might also be placed on it. The Assyrian sculptures depicting the siege and capture of Lachish by Sennacherib illustrate what has been said (see Brit. Mus. Assyrian Room, Nos. 21-32); but sieges are described and represented on monuments occurring in Palestine as early as 1600 and 1500 B.C. (Conder). The treatment of the conquered was extremely severe in ancient times. The bodies of the soldiers killed in action were plundered (2Sam.21.18; 2Mac.8.27); the survivors were either killed in some savage manner (2Sam.13.1; 2Chr.25.12), mutilated (Judg.1.6), or carried into captivity (Deut.20.14). Sometimes the bulk of the population of the conquered country was removed to a distant locality. The Mosaic law mitigated somewhat the justice of this ancient usage. The conquered. The conquerors celebrated their success by the erection of monumental stones (1Sam.7.12), by hanging up trophies in their public buildings (1Sam.21.9,31.10), and by triumphal songs and dances in which the whole population took part (Ex.15.1-21; Judg.5.13; 6.8-18; 15.16-27).

War-club. [Arms, Offensive, (1).]

WARS OF THE LORD, Book of. There is no information afforded concerning the book cited once under this name in Num.21.13-15. All that can be said rests purely on conjecture. It may have contained, as Dillmann has conjectured, the Song of Moses sung on the occasion of the overthrow of the Egyptians at the Red Sea, and even the narrative related in Num.22-24 concerning Balaam, or the expeditions against Sihon king of the Amorites and Og the king of Bashan, which are briefly recorded at the end of the 21st century of B.C. Delitzsch published some interesting articles on the subject of those poetical extracts entitled "Urmosaishes im Pent." in Luthardt's Zeitschrift (1882). Furst's conjecture that the book contains pre-Mosaic elements seems extravagant; while the attempts of Knobel, Stade, and others to make out that the book was composed in post-Solomonic days or even later may be dismissed as pure fancy. The LXX. reading is interesting—"Therefore it is said in a book; the war of the Lord burned up Zoph" (Heb. süph), etc. [C.H.W.]

Washing the hands and feet. It was necessary that the hand, which, in eating, was thrust into the common dish, could be scrupulously clean; and, as sandals were ineffectual against the dust and heat, washing the feet on entering a house was an act both of decency and of refreshment to the traveller. The washing of the hands was made by the Pharisees of the N.T. age a matter of ritual observance, and special rules were laid down as to the times and manner of its performance. Washing the feet only rose to the dignity of a ritual observance in connexion with the services of the sanctuary (Ex.30.19,21). It held a high place, however, among the rites of hospitality. Immediately a guest presented himself at the tent-door, it was usual to offer the necessary materials for washing the feet (Gen.18.4,19.2-4; 32.43-44; Judg.19.21). It was a yet more complimentary act, betokening equally humility and affection, if the host actually performed the office for his guest (1Sam.25.41; Lu.7.38.44; Jn.13.5-14; TIm.5.10). Such a token of hospitality is still occasionally exhibited in the East.

Wash-pot (sir rakah), a term of contempt applied to Moab (Ps.60.8 = 108.9). It is only used in this figurative sense. [W.G.E.O.]

Watches of night, a division of time, probably of military origin. In O.T. times the night was divided into three watches, "the beginning of the watches" (Lam.2.19), probably from sunset to about ten o'clock; "the middle watch" (Judg.7.19), till about 2 a.m.; "the morning watch" (Ex.14.24; 1Sam.11.11), till sunrise. See also Ps.63.6, 90.4, 119.148. In the Greek and Roman periods there were four watches, and this was the division of the night in our Lord's time. They are sometimes called named according to order: the 2nd and 3rd (Lu.12.38); the 4th (Mt.14.25; Mk.6.48). The four are mentioned in order ( Mk.13.35): (i) Even, 6-9 p.m. (cf. 11.11; Jn.20.19). (ii) Morning, 9-12 o'clock. (3) Cockcrow; 3-6 a.m. (4) Morning, 3-6 a.m.; cf. Jn.18.27. [H.T.]

Water of Bitterness. The term refers to the trial by ordeal of the woman suspected of unfaithfulness to her husband (Num.5.17-24). If a man suspected his wife but could not prove her guilt, he took her to the priest, carrying with him an offering of memorial (ver.15). The trial took place in public, in later times at the Gate Nicanor (Soloth 1, 5.6). The priest poured holy water into an earthen vessel and mixed water from the sanctuary floor (5.17). He then loosed the woman's hair, put the offering into her hands, and adjured her, she answering "Amen, Amen." The words of adjuration were then written on a little scroll, which was soaked in the water to dissolve the ink. She drank the water, and her guilt or innocence at once became apparent. According to the Mishna, the ordeal only took effect if the husband also was innocent of the same offence (v, i and Gemara). Adulterers became so numerous that the ordeal lost its power, and it was suspended by Johanan ben Zakkai (60-70 A.D.) (b. ix. 9; ef. Jn.8.7-9; Mk.10.19; Mk.8.38). [Ordeal of JEALOUSY; ADELTERY; ADULTERY.]

Water of Jealousy. [Water of Bitterness; Ordeal of Jealousy; ADELTERY.]

Water-carriers. Usually women (Gen.24.13; Ex.2.16; 1Sam.9.11; Jn.4.7), though, as at the present day, children most likely were also so employed; as were also men who were captives (Deut.29.11; Jos.9.21ff.). In Mk.14.13, Lu.22.10 we read of a man carrying water; but this is exceptional. Water was carried in "bottles," i.e. skins (nēbbel, nōdḥ;
In houses for washing the hands, according to Jewish usage, before and after meals. The water-pots mentioned in Jn.2:6,7, are stated to have contained "two or three firkins apiece". A "firkin" (= approximately the Heb. bath) was about 72 pints. 

Water-spouts (Ps.42:7; see 2Sam.5:8). Although the Mediterranean is often troubled by water-spouts, the Heb. קְרַמִיוֹן קָרְמִיִּון (kadh; Gk. κεράμιον) (water-channel") and it is used of the ditch crossed by Job (A.V. gutter) as well. The psalm refers to the noise of torrents. [C.R.C.]

Wave-offering. [Sacrifice, 3, v. c.]

Weapons. [Arms.]

Weasel (הַיָּדֶה) occurs only in Lev.11:29 in the list of unclean animals. According to the old versions and the Talmud, the Heb. הַיָּדֶה denotes a "weasel"; but if the word is identical with the Arab. خِلْد and the Syr. خلد, a truly burrowing animal, such as one of the rodent mole-rats akin to Spalax typhus (for there are no true moles, Talpa, in Palestine), must be intended. [Mole.]

Weaver, Weaving. [Handicrafts, 6.]

Wedding. [Marriage.]

Week. In the Heb. Scriptures the institution of the sabbath accounts for the week or cycle of seven days. God's creative acts extended over six defined periods; the seventh was shabbath, cessation or rest. Hence His people must observe the seventh day likewise as a day of cessation from all work (Ex.20:11). But in Deut.5:15 the reason given is a national one: the seventh day is to be observed as a rest-day in commemoration of the deliverance from slavery. This distribution of the work of creation over six days is peculiar to the Heb. and is traced of it in the Assyro-Babylonian literature. There may be traces of a ten-days' cycle in Gen.24:55, Ex.12:2, Lev.16:29, etc., and in the story of the Flood the seven days' intervals occur together with multiples of ten, viz. 40 and 150. The ancient Egyptians had a cycle of ten days. The number seven was sacred in Babylonia, and the seven-day week was an old institution connected with the new moon and the lunar month. The Assyrians perhaps had a week of five days. It has been suggested that the Heb. week was originally a division of the lunar month, the first day of the first week coinciding with the New Moon. This could not have been the case when a seventh-day sabbath was observed, since there would be an interval of a day and a half between the fourth week and the next new moon. The week was used as a convenient measurement of time—e.g. one (Gen.29:27), two (Lev.12:3), three (Deut.7:12), seven (Deut.16:9; Dan.9:25; cf. Lev.23:15,25,8), [Sabbath; Seven.] [N.N.]

Weighs, Feast of. [Pentecost.]

Weights and measures. The Bible references are explained by the discovery of actual inscribed weights, and of standard measures of length and capacity; and the statements of Plutarch, Herodotus, Polybius, Archimedes, and Epiphanius are also explicable from the same evidence. The standard measures must be taken as somewhat in excess of the specimens, on account of wear; and there was some deterioration, in later times, from the old standard. Imperfect specimens must also be discarded.—1. Weights. A standard of weight ("the king's standard") existed in Babylonia as early as the time of Abraham, or 2100 B.C. (Hammurabi's laws, No.51), and silver and gold were weighed (Gen.23:16; J.e.32.9). The Balance was used (Heb. מָזָ'נָנ, Arab. مِزْان, "scales") and had apparently also a running weight, like a steel-yard (I.46.15). The Heb. מָזָ'נ (balance) is used in the first person, Ps.1.7, and in the form מָזָ'נִים (balances), and is used of the scales used in the weights and measures of the ancient world, and in those of antelopes and geese. This explains the Heb. גֵּשִׁית, or "lamb" (A.V. piece of money; Gen.53:19; J.e.24:32; Job 42:11). The specimens whence we may obtain actual weights include a hemi-iluatite weight from Nippur in Babylonia (perhaps 1500 B.C. or earlier), inscribed "ten shekels of gold of the merchant," and weighing 1,320 gr.; weights in the British Museum (850 to 700 B.C.), from Nineveh and Babylon, giving a "main" (A.V. pound) of 7992 gr., and a talent (בּוַקָּר) of 9593 gr. Precious metal weights of 235 gr. and 120 gr. for a Heb. weight from Samaria (perhaps as old as 800 B.C.) marked "quarter shekel" on one side, and "quarter half" on the other; another from Tell Zakariya marked "half"—the first.

Maimonides (Sheqalim, v. 6) gives the weight of the old Heb. shekel (heavy system) as 320 gr. of barley, and of the shekel in use after the Captivity (4th cent. B.C.) as 320 gr. of bronze, or 1 gr., and the later shekel thus agreed with the oldest known Gk. Tetradrachm — of the Aegina coins — which was of Semitic origin. Little is known of Egyptian weights (see Proc. Bib. Arch. Soc., Dec. 1901, p. 394); but the gold unit of 120 gr. is apparently the Phoenician light shekel, and the bronze unit the same.

The Kot of 144 gr. was also three-fifths of the Phoenician heavy unit. In O.T. the shekel (or "weight") consists of 20 Gerahs, or "beams" (16 gr. each: Ex.30:13; Num.3:17; Lev.27:25; Ezek.45:12), this being the "Shekel of the Sanctuary," half of which was the Bekah (Heb. beqâ'; Gen.24:22; Ex.38:26). The Hebrews were forbidden to keep shekels of the two systems in the same bag (Deut.25:14), and bidden to use standard weights, "assayed for the merchant" (as the LXX. translates in Gen.23:16). We find notice also of a "tongue of gold" (Jos.7:21) weighing a Manceh, or racim, or "pieces of silver (Ps.88:50); and of an "éghard, Piece of a Shekel," or "little shekel" (Assyr. igiru, "tile"). The statement in Ezek. 45:12 that the maneh is to consist of 20, 25, and 15 shekels is explicable as referring to the older and later shekel, and to the Phoenician unit. Thus, 15 shekels of 320 gr. = 20 of 240 gr. = 25 of 192 gr. = 480 gr. for the maneh. The kikkâr, or talent (as rendered in Gk. by LXX.), is noticed as weighing gold and silver (Ex.25:39; 1K.9:14,28,10,10; 2K.5:22). The "talent" and the "maneh" are also mentioned in N.T. (Mt.25:14-30; Lu.19:12-27), the latter being rendered pound in A.V.—II. COINS. The oldest known coins — those of Aegina and Lydia — are supposed to date as early as 700 B.C. The Persians introduced a currency in which the gold was even purer than that of our currency: and the silver bore to it a proportion of 13½ to 1, being purer than the old silver, which included a sixth part of copper, and may have had a proportion of 16 to 1 of gold to silver. The theory of "coins of their own gold, and its present value is about 31½. But we must remember that the purchasing value in ancient times was considerably greater than now. Double Darics also occur, and this coin appears in O.T. as the dark'môn, rendered "dram" in A.V. (Ezr.2:69; Ne.7:70-72). The Persian silver unit was called Siklos, and was of 84 5/6 gr.; but to this the name of this coin has probably no connexion with Darius, but comes from the Aryan root Dargh (whence also Dram), as meaning a "fixed" value. The Greeks took their measures from the Babylonians and Phoenicians, and the drachma of the three systems (Hussey, Ancient Weights and Measures), as found in the "fixed" value. The Greeks took their measures from the Babylonians and Phoenicians, and the drachma of the three systems (Hussey, Ancient Weights and Measures), as found in the "fixed" value. The Greeks took their measures from the Babylonians and Phoenicians, and the drachma of the three systems (Hussey, Ancient Weights and Measures), as found in the "fixed" value. The present value of the silver Drachma of 96 gr. is a shilling, and the Jews, after the Captivity, used the Tetradrachma, or 253 9/16 gr., as their gold coin. The Tetradrachma of Babylon was two, the Rigia three, and the 7thalia four, Zusas. These systems were, however, in turn replaced by the old Thracian Drachma of 170 gr., used in Macedonia, and by the Ptolemies in Egypt, being apparently the light Aramean shekel, of 111½ gr., very slightly devalued, and the "Tribolus" of the Seleucid system. The old Philistine "Shekel," like the Phoenician, denoted 220 gr. (of the older silver), with a present value of about 15. 10d., bear in old Heb. characters the legend "shekel Israel," with "year 1" (or 2, or 3, or 4) on the obverse, and "Jerusalem Holy" on the reverse, apparently representing the "shekel of the sanctuary" (Ex.30:13); and they were called half-shekel, and were apparently those used for the half-shekel temple tax. The years are thought to date from 359 B.C., and not to refer to the sabbatical year, though new shekels were required, apparently, for the tax (Mishna, Sheqalim v. 5). The copper coins of the same period apparently follow the Phoenician unit of 220 gr., and are inscribed "year four of the redemption of Zion." Copper coins of John Hycranus and Judas are inscribed in Heb.; and Alexander Jannaeus (105-75 B.C.) is the first to inscribe his name both as "Jonathan the king" in Heb. and "Alexander the king" in Gk., his successors' coins being in Gk. alone. Gk. is also used on copper coins of Herod the Great, Archelaus, Antipas, and Philip, while Agrippa I. (37-44 A.D.), Herod of Chalcis (41-48 A.D.), and Agrippa II. (48-100 A.D.) are the first to stamp their images on Jewish coins. The coins of the procurators are also of copper, and bear in (Gk.) the names of the procurators. The occurrence of "shekels of silver and half-shekels" is based on the occurrence of silver and copper coins, inscribed in old Heb. characters on much defaced coins of Antioch, of Vespasian, Titus, Domitian, and Trajan (70-117 A.D.); but the characters used...
**WEIGHTS AND MEASURES**

This agrees not only with Gudea's scale, and the statement of Maimonides, but also with the standard *Dhar'a*, or "arm," of Arabs, measuring 26 6/6 in., or 2 small cubits. The word *'amnā* signifies the "forearm," or half the arm. To deduce units from the measurements of ancient buildings is an inconclusive method, as the lengths may be variously divided, but the 16-in. cubit seems to have been used in the Jerusalem temple enclosure, and in the Galilean synagogues. Thus the S. gates of the *Haram* at Jerusalem are 30 cubits wide, the "master course" of the wall is 4 cubits high, the piers along the wall appear to have been at 10 cubits (as *'eḥēb*); and in the building at *Umm el 'Amur* (Swarz. Pal. p. 406), the building is 40 cubits long, its pillars 10 cubits high, and the stylobate 1 cubit—coincidences almost conclusive. The *Finger-breadth* (c. 52.21), *Hand-breadth* (Ex. 25.25, 37.12; Ezek. 40.5, 45, 46.13) or *Palm* (Ex. 28.16, 38) and *Barley-corn* (as *'amnā* in Maimonides, *Sepher Torah* ix. 9)—the "finger-breadth" being equal to two barley-corns laid end to end, or to seven laid side by side. This would not apply to the Egyptian *'ēbū*, or *'ēbū* (20 1/4 in.); a later cubit (of about 21 3/4 in.) in Egypt is very close to 2 Heb. ft. An ancient scale discovered at Tell Loh, in Babylonia, measures 1553 in. and the statue of Gudea, on whose lap it is carved, may be as old as 2800 B.C. This scale is divided into 16 parts, each of which is thus very nearly 0.33 in. long. This (as we shall see) was the Heb. "finger-breadth," which gave a foot of 10 6/6 in. This scale is Akkadian, and we do not know if the Babylonians and Assyrians used the same standard, though they very probably did, and had thus a cubit of nearly 16 in. A table from an old Mesopotamian diary, dealing with fractions, had been thought to refer to cubits and reeds; but this is very doubtful, as the colophon states that it refers to the *Soss*, or unit of 60, and to its fractions. Dr. Pinches, however (Fl. R. Asiat. Soc. October, 1907), considers that a cubit of 30 fingers is noticed in this tablet. This would measure about 20 in. The *Siloham* tunnel (*Siloam*) was 1,200 cubits long, and measures 1,707 ft.; which would give a cubit of 17 in. But this record gives only a round number, and the result can only be regarded as an approximation to the unit. Barley differs in weight from 56 to 50 lb. to the bushel; and the following results of actual measurement, and weight compare with the Heb. barley, of which a grain weighed a Troy grain.

<table>
<thead>
<tr>
<th>Barley</th>
<th>English</th>
<th>Heb.</th>
<th>Arab</th>

These measures occur in O.T.—the Cab (2 K. 6. 25); the Omor (Ex.16.16), or 10th of the Eparh (16.36); the Hin (Ex.29.10, etc.); the Sod (A.V. measure, 2 K. 7. 1); the Bath, or 10th of the Homer (Ezk.45.11), which is the same as the Cor (45.14). In N.T. the Xouc (A.V. measure), or 1 gall., for a Denarius (Rev.6.6) is almost double a Sod (2 K.7.1), a heavy shekel. The Bushel (A.V. Mt.5.15; Mk.4.21; Ln.11.33) is the Modius, which—like the Arab. Midd—was no doubt a cylindrical wooden box. The Firkin (A.V. Jn.2.6) is the Metrires. In conclusion, it may be noted that European measures and weights all appear to originate in Babylon, the standard of the barley-corn and of the finger-breadth remaining unchanged. W. Europe got its weights from the Romans (who divided the talent of 400,000 gr. into 80 lb.) and from the Phoenicians. E. Europe, on the other hand, at different times took its standards from the Gk. traders; but their weights ultimately trace back (at Troy) to the Babylonian Talent of 480,000 gr. Among books founded on actual discoveries of recent times are: De Saulcy’s Numismatique Judaique, 1854, and Madden’s Jewish Coinage, 1854 (with the enlarged ed. called Coins of the Jews). The weights at Nippur are given in Hilprecht’s Babylonian Expedition, 1896, vol. 1, pt. 1. The scale of Gudea is in De Sarzeau’s Découvertes en Chaldée, 1887. The whole subject is treated in Sir C. Warren’s Ancient Cubit, 1903, and the measures of length in Dr. Flinders Petrie’s Inductive Metrology, 1877. The later Byzantine Talent at Jerusalem is described by Vicomte de Salignac Fénélon, Bimeatalisme chez les Hébreux. [C.R.C.]

Well. In 9 cases A.V. thus renders Heb. ‘ayin (spring) [Ain]: Gen.24.13,16,29,30,42,43, 45; Ex.15.27; Ne.2.13. The common word is bow, a well sunk in rock; it is so rendered in 28 cases, but as pit in A.V. in Gen.14.10, Ps.55.23,59.15, Pr.23.27. Private property in dug wells is noticed early (Gen.21.30). In Deut.6.11 “cisterns” (Heb. bōr) are rendered “wells” in A.V.; but in Pr.5.15 a private

FIRST POSITION.

SECOND POSITION.

ANcient egyptian machine for raising water identical with the “shadoof” of the present day. (Wilkinson.)

Whale. The Heb. words tan and tanin are translated in the A.V. indifferently as dragon, sea-monster, serpent, or whale. Leviathan
seems also in one passage to indicate a whale. [DRAGON.] As to the sea-monster which swallowed Jonah, nothing really definite can be said, because, under ordinary circumstances, no human being or other vertebrate animal could survive in the interior of a whale or fish. In Mt.12.40 the creature is called κῆτος, translated in E.V. "whale," which is a "late" limitation of the meaning of the Gk. word (Liddell and Scott), while the book of Jonah merely says "fish." There is no scientific necessity, however, to prove that the creature must have been a shark or other fish, for the idea that all whales have small throats, or that they necessarily feed on animals, is true only with regard to the right whales, such as the Greenland Balena mysticetus. Orquids, or finner-whales (Balanaeophila), and hump-backed whales (Megaptera) have large throats; the sperm-feed fish is intended. The sperm-whale, or cachalot (Physeter macrocephalus), subsists on gigantic cuttle-fish and squids, swallowing it is affirmed, masses several feet in cube. All these whales, except the first, occur in the Red Sea, and one of them may be the species intended. The much smaller grampus, or killer (Orca gladiator), would also be quite capable of swallowing a man. So also are certain kinds of sharks; but nothing would be gained by the substitution of "shark" for "whale," seeing that one of the latter (which are apparently primarily indicated by the Gk. word) would suit the context as well in every way, and the real difficulties of the passage. Paul Hantz (Proc. Amer. Phil. Soc. xi6i. 154-164, 1907) states that sperm-whales (na'ūnir = "blower" = Gk. φωτός) are mentioned in Assyrian cuneiform inscriptions of 885-860 B.C. The Ethiopian Bible has anbar = Arabic. anbar (sperm-whale), for Jonah's whale. The writer considers the sperm-feed fish espies intended, and that Jonah was swallowed near Joppa and cast ashore near Alexandria. Aambrigis, a product of the sperm-whale, is derived from the Arabic anbar. [R.L.]

Wheat. In A.V. the Heb. words bar, ḏaḏqān, ṛibbōth, are occasionally translated "wheat." Alluding to Pharaoh's poverty (Hist. Nat. viii. 7), while the wheat in the Thebaid; it was all bearded, as in the same varieties, Sir G. Wilkinson writes (Aeg. Egypt. ii. 39, ed. 1854), "existed in ancient as in modern times, among which may be mentioned the seven-cared quality described in Pharaoh's dream" (Gen.41.22). Babylonia was also noted for the excellence of its wheat and other cereals. Syria and Palestine produced wheat of fine quality and in large quantities (Ps.81.16, 147.14, etc.). There are three kinds of wheat at present grown in Palestine, the Triticum vulgare (var. hybemum), the T. spelta, and another variety of beardless wheat. The latter is the Egyptian kind, the T. compositum. In the parable of the sower our Lord alludes to grains of wheat which in good ground produce a hundred fold (Mt.13.8). The common Triticum vulgare will sometimes produce one hundred grains in the ear in Palestine. Wheat is reaped towards the end of April, in May, and in some places towards the drier season. The soil and position: it was sown broadcast and then trampled in by cattle (Is.32.20), or otherwise it was sown in rows (R.V. Is.28.25), which seems to imply that the seeds were planted apart in order to insure larger and fuller ears. The wheat was put into the proper order and measure as to each fish: in the Egyptian plague of hail, consequently, the barley suffered, but the wheat, not having appeared, escaped injury. (See Tristram, Nat. Hist. Bible, p. 488.) [C.R.C.]

Whirlwind. The A.V. thus renders (1) Heb. σφήνα (Job 37.9) for a tempestuous "whirlwind." The word occurs 15 times in O.T. and the expression "like a galgal in front of a storm" (Is.17.13) refers to the dust whirlwind which commonly precedes the storm in Palestine; as also in 5.28 (A.V. wheels), where the whirl of chariots is compared. (2) Heb. sa'ār and se'āra, a tempest or "tossing" (Luke 4.31, 13). This word is used 24 times, and in such a tempest Elijah departed (2K.2.1). The word galgal means a "rolling" thing: thus in Ps.77.18, "Thy thunder was in the galgal" refers to a whirlwind in a thunderstorm with lightning. In Can.3.6 and Jl.1.30 the "columns of dust" (inwind ELiJIb) are noticed. Solomon's train, coming from the wilderness to fetch his bride from Lebanon (Can.3.6.4.8), was heralded by clouds of dust, compared to the columns of the summer whirlwinds. [C.R.C.]

Whore. [Harlot.] Widow. Under the Mosaic dispensation no legal provision was made for the maintenance of widows. They were left dependent partly on the affection of relations, more especially of the eldest son, whose birthright, or extra share of the property, imposed such a duty upon him, and partly on the privileges accorded to other distressed persons. The widow in the triennial third tithe (Deut. 14.29, 26.11), in gleaning (24.19-21), and in religious feasts (16.11, 14). The only restriction [Levirate law] imposed by the Mosaic law upon the remarriage of widows had reference to the case of one left childless (25.5; Mt.22.25-33; or [Crimes; Family.]). In the Apostolic Church the widows were sustained at the public expense, the relief being daily administered in kind, under the superintendence of specially appointed officers (Ac.6.1-6). Particular directions are given by St. Paul as to those entitled to such public maintenance (1Tim.5.3-6). Out of the body of such widows a certain number were to be enrolled, who (1) were not under sixty years of age; (2) had been "the wife of one man," probably meaning but once married; and (3) had led useful and charitable lives (v. 9, 10). The object of the enrolment is not obvious. It is possible that the same in the ecclesiastical order, having duties identical with or analogous to those of the deaconesses.
of the early Church. [Deaconess.] But more probably the enrolment was for an ecleemos-
nary purpose, and the main condition poverty, though it is easy to understand how such
widows obtained a quasi-official position in the Church and became in later times a dis-
tinct order. These were the "theologian" widows, used by early writers in an extended sense, to
signify the adoption of the conditions by which widows, enrolled as such, were bound for the
future.

Wife. [Marriage; Family.]

Wild beasts. [Beasts.]

Wilderness of the Wanderings. [Exodus, The.]

Wills, undoubtedly the correct rendering of the Heb. 'ārāhkim, as is proved by the old
versions and the kindred Arab. gharab. Wills are mentioned in Lev.23.10, Job 40.22,
Is.44.4, Ps.137.2. In the last passage the weaving willow (Salix babylonica) is undoubt-
edly intended. This tree grows abundantly on the banks of the Euphrates and in other parts
of Asia, including Palestine. Sprengel seems to restrict 'ārāhkim to the Salix babylon-
onica; but the term is almost certainly generic, and includes other species of the large family
of Salices, which is sparingly represented in Palestine and in the eastern part of S.
Egypt, of Arab., and in the southern name. The Wādí Sāfṣāl (Willow Valley) is still attached to a part
of the main branch of the ravine which descends from Kerak to the Dead Sea.

Wills. [Testament; Family, Inheritance.]

Wimple, an Old Eng. word for "hood," or "vail"; representing the Heb. mitpābhah in
Is.60.13; R.V. pimnacle.

Window. The A.V. so renders five Heb.
words. (1) shemesh, "sun" (Is.54.12; R.V. pinnacle) (2) kavin (Dan.6.10; Aram. plur.),
"windows" or "apertures" in a wall (as in Syr. and Arab.). (3) sheqeph, rendered win-
dows in A.V. (1K.7.5; R.V. in prospect). (4) shq̇q̇phim, a cognate word (Heb. plur.) for windows
giving light (7.4), apparently narrow outside and with skew walls giving breadth inside
(6.4). [Lattice; Palace.] (5) Glass was not used and is still unusual in the East,
the wooden lattice taking its place (Heb. 'arūbbah), this word applying also to dove-cots
(Is.5.11.10). For a sketch of a square chimney (Ho.13.3). [Street.] [C.R.C.]

Winds. The "four winds" (Ezk.37.9; Dan.8.8; Zech.2.6; Mt.24.31) represent the
four quarters of heaven. The N. wind brings ice in winter (Eccles.43.20), but refreshes
in summer (Can.4.16), and is followed by rain (Pr.25.23 marg.). The E. wind from the desert
(Job 1.19; Je.13.24) is intensely hot and dry, without ozone. It blows usually for two or
three days at a time in May, and is sometimes violent (Job 27.21). The khamsin, or E. wind
of "fifty" days (April-May) in Egypt, dried up the corn (Gen.41.6); but the word qḋkḣṁ often means only a "contrary" wind (Ex.14.
21; Ps.48.7; Ezk.27.26). The S. wind is also a hot wind (Job 37.17; Lm.12.35). The W.
wind brings rain, and rises as a refreshing breeze about 10 a.m. in summer. [Rain.] The sea of Galilee is subject to sudden squalls from
W. in spring (Mt.8.24; Lm.8.23). In the account of St. Paul's shipwreck (Ac.27.12-14)
are noticed the S.W. (Nij, N.W. (χωρος), and S. (ρωτος) winds, with the stormy E.N.E. wind (επορκλάδως). [C.R.C.]

Wine. In Palestine the vintage takes place in September, and is celebrated with great
joicings. The ripe fruit was gathered in baskets (J.e.6.9), as represented in Egyptian paintings
and carried home. In the northern districts it was put into wine vats placed in the upper of the two vats or receptacles which formed the wine-press, and was "trod- den," as in all ages in Oriental and S. European countries (Ne.13.15; Job 24.11
Is.16.19; Je.25.30,48.33; Am.9.13; Rev.19.15). Some juice exuded from the ripe fruit itself under its own pressure before the tread- ing menced. This juice was kept separate from the rest, and to have formed the gleukos, or "sweet wine," noticed in
Ac.2.13. The treading was effected by one or more men according to the size of the vat. They encouraged one another by shouts and cries (Is.16.9; Je.25.30,48.33). Their legs and garments were dyed red with the juice (Gen.49.11; Is.63.2,3). The expressed juice escaped by an aperture into the lower vat, or was at once collected in vessels. A hand-press was occasionally used in Egypt, but not noticed in the Bible. Sometimes the wine was preserved in its unfermented state, and drunk as "pressed-out" wine (c.f. new wine), and referred to the root ḫārash, "to get possession of"; but its etymology is not certain; 'āṣis, "pressed-out" wine (i.e. new wine), is always referred to as "sweet" (Can.8.2; Is.49.26;
Jl.1.5.3.15; Am.9.15), hemer (Dent.32.14), in Arab. ḫāmar (Ezr.6.7,22), and ḫurūm (Dan.5.17); the vessels were termed otor, or wine vessels, and referred to the root ḫārash, or "pressed-out" wine, and to the Hebrew word ḥūlēl, and thus refer to fermentation (cf.
"leaven," which the cognate word in Arab. means); messēk (Ps.75.8), messēz (Can.7.2), and mimsākh (Pr.9.2.23.30; Is.55.11) imply a mixture of wine with some other substance. For ḫēkhār, see Drink, Strong. We find also ḫēkhār, a weak sour wine, and ḫēkhār, a sweet, a word pronounced "vinager," "āṭḥiḥāḏ, rendered "fagon [bottle in 2Sam.16.1] of wine" in A.V. (1Chr.
16.3; Can.2.5; Ho.3.1); but really meaning a "cake of pressed raisins" and ḫērāmūm, properly meaning the "lees" or dregs of wine, but in Is.25.6 transferred to wine kept on the lees to increase its body. In N.T. we termed "vinegar," "āṭḥiḥāḏ, rendered "fagon (bottle in 2Sam.16.1) of wine" in A.V. (1Chr.
16.3; Can.2.5; Ho.3.1); but really meaning a "cake of pressed raisins" and ḫērāmūm, properly meaning the "lees" or dregs of wine, but in Is.25.6 transferred to wine kept on the lees to increase its body. In N.T. we termed "vinegar," "āṭḥiḥāḏ, rendered "fagon (bottle in 2Sam.16.1) of wine" in A.V. (1Chr.
16.3; Can.2.5; Ho.3.1); but really meaning a "cake of pressed raisins" and ḫērāmūm, properly meaning the "lees" or dregs of wine, but in Is.25.6 transferred to wine kept on the lees to increase its body. In N.T. we termed "vinegar," "āṭḥiḥāḏ, rendered "fagon (bottle in 2Sam.16.1) of wine" in A.V. (1Chr.
16.3; Can.2.5; Ho.3.1); but really meaning a "cake of pressed raisins" and ḫērāmūm, properly meaning the "lees" or dregs of wine, but in Is.25.6 transferred to wine kept on the lees to increase its body.
WISDOM OF SOLOMON, THE

Winnowing. [Agriculture; Fan.]
Wisdom. The usual O.T. word is ἡσυχία, of which the root-idea is "making fast," hence "wisdom" is the stable principle in things and the human faculty which apprehends it; the wise man is he who apprehends laws and purposes in nature's life, in contrast with "the fool," who is the slave of his senses and of the moment. Hence Heb. "wisdom" always tends to have a moral and not merely an intellectual connotation. "The wise" formed a distinct class in Israel, and are ranked with priests and prophets in Je.18.18. The "wisdom-books" (Job, Proverbs, Ecclesiastes, several of the Psalms, Wisdom, Ecclesiasticus, and Baruch) really represent the native philosophy of Israel. They belong, for the most part, to the later period of Heb. literature, when the national experience of sorrow and a wider acquaintance with the Gentile world, as well as the current notions of prophets, was "the wise" to deeper and more independent and even to daring thought. "Wisdom" has several shades of meaning in O.T.—e.g. (1) practical shrewdness, knowledge of human nature, power of adapting means to ends, as in the typical case of Solomon, and often in Proverbs; (2) the mysterious order, adaptation, and observance in nature (cf. Job 28); (3) the special divine attribute originating both (1) and (2), which is almost realized in Pr.3.9 and Wis.7 as a Person co-eternal with God and immanent in the world. Thus Hebrew thought rises to the conception of the Word, while human wisdom is seen to "religion," and to be founded on "the fear of the Lord," Driver, "Proverbs" in Intro. to Lit. of O.T. (1891); Deane, Proleg. to Wisdom (1881); Farrar in Apost. in Speakers' Comm. (1884). [Philosophy.]

Wisdom of Jesus, Son of Sirach.
[Ecclesiasticus.]

Wisdom of Solomon, The. One of the most remarkable specimens extant of Jewish "Wisdom" literature, this book is written in praise of the Jewish conception of Wisdom, and in condemnation of those who are tempted to reject her. Though purporting to be written by one in origin to the other passages of the earth (cf. 1.1, 6, 1.9, 7), the adoption of the name belongs only to the literary form, and cannot be accepted as a statement of fact. The writer probably adopted the pseudonym because "Solomon" had become a collective name for all sapiential Jewish literature. The book falls into two divisions (1-9, and 10-19), the first of which may be subdivided. (1) (a) 1-5. Wisdom the giver of happiness and immortality. The author addresses himself first to the rulers of the world, bidding them love righteousness, since Wisdom is only attainable by those who lead pure and moral lives. (It is probable that the rulers he has in mind are Jews holding influential positions in the heathen world, who are tempted to apostatize, or to suit their religious life to the Gk. standard round about them.) Ch. 1. The attainment of Wisdom is possible only to moral purity and sincerity, whilst sin leads to punishment and death. The wicked gird them with a girdle, and to their frivolous view of life, abandon themselves to immorality, and persecute the "right-

WINE-PRESS

for the Mt. 21:33). The mingling implied in the term meshek may have been designed either to increase or to diminish the strength of the wine, according as spices or water formed the added ingredient. The notices chiefly favour the former view; for mingled liquor was prepared for high festivities (Pr.9:2,5), and occasions of excess (Pr.23:30; Is.5:22). At the same time, strength was not the sole object sought: the wine "mingled with myrrh" given to Jesus, was designed to deaden pain (Mk.15:23), and the spiced pomegranate wine prepared by the bride (Can.8:2) may well have been of a mild character. The only wines of which we have special notice belonged to Syria: these were the wine of Helbon (Ezk.27:18), and of Lebanon, famed for its aroma (Ho.14:7). Wine was produced on occasions of ordinary hospitality (Gen.14:18), and at festivals, such as marriages (Jn.2:3). The monuments furnish abundant evidence that the people of ancient Egypt, both male and female, indulged liberally in wine. Under the Mosaic law wine formed the usual drink-offering at the daily sacrifice (Ex.29:40), the presentation of the first-fruits (Lev.23:13), and other offerings (Num.15:5). The priest was also to receive first-fruits, and libations were to be paid, of wine as of other products (Deut.18:4; cf. Ex.22:29).

Wine-press. From the scanty notices in the Bible we gather that the wine-presses of the Hebrews consisted of two receptacles or vats placed at different elevations, in the upper one of which the grapes were trodden (Is.63:2,3), while the lower one received the expressed juice. The two vats are mentioned together only in Jl.3:13:—"The press (gath) is full: the fats (τριχημα) overflow"—the upper vat being full of fruit, the lower one overflowing with the must. gath is also strictly applied to the upper vat in Ne.13:15, Lam.1:15, and Is.63:2, with πυρα in a parallel sense in ver. 3. The term πυρα, as used in Hag.2:16, probably refers to the contents of a wine-vat, rather than to the vat itself. The two vats were usually hewn out of the solid rock (Is.5:2, marg.; Mt.21:33). Ancient wine-presses, so constructed, are still to be seen in Palestine. [Shebam.]
eous," self-blindened to the immortal destiny of man. Ch. 3. The blessedness of the righteous in spite of trouble and death, in contrast to the misery of the ungodly, in spite of their apparent prosperity. (The exquisite passage 3.1-10 forms the first morning, and 5.1-17 the first evening, lesson for All Saints' Day; and no other passages in O.T. or Apoc. could be more suitable.) Ch. 4. Contrast continued. Childlessness and premature death not a sign of impiety, except in the case of the ungodly. The righteous shall triumph over their enemies even in death. Ch. 5. The wicked shall be astonished at the glory of the righteous, and confess the vanity of the first-born (Isa. 19.1); with their little ones they shall destroy them. (b) Ch. 6-9. The Praises of Wisdom. Ch. 6. The author implores the rulers to seek Wisdom, remembering their responsibility if they exercise rule without it; for Wisdom is the secret of true power, and is easily accessible. Ch. 7 and 8. Solomon describes his prayer for Wisdom, and the reasons of his choice; and in elaborate allegory depicts the glory and nature of Wisdom, and the blessings that come from her possession. The section ends with (ch. 9) Solomon's prayer in full. (2) Ch. 10-19 exemplify the power of Wisdom in history, and offer a fine Jewish philosophy of the Jewish life-story. Ch. 10. The period from Adam to Moses. Ch. 11 and 12. The period of the wanderings in the wilderness, offering a justification of the punishment administered to the Egyptians and Canaanites. Ch. 13-15. General observations on the folly of idolatry, and its mischievous results. (This contemptuous polemic should be compared with that of Bel and the Dragon, ch. 13, 14.) Ch. 16-19. Emphasis is laid upon the remarkable providence of God, whereby the animal worshippers of Egypt were punished by the very animals and elements they worshipped, whilst Israel was preserved by the same means. The insect plagues, and the fire and hail, and the comet (ch. 16), compare with the river, the manna (ch. 16); the plague of darkness with the light of Goshen (ch. 17). The plague of the first-born (ch. 18). The passage of the Red Sea (ch. 19). The somewhat abrupt conclusion praises God for His love and mercy to His people. The most famous passages, apart from 3.1-10 and 5.1-17, are the description of "the righteous man" (4.7-18), and of Wisdom (7-9). Early Christian interpretation loved to see in the former a prophecy of the death of Christ, and in the latter an illustration of the doctrine of the Logos. The language of the book, whilst abounding in Heb. expressions ——the author was a Jew—and made use of O.T. language and conceptions, many of which are derived from the LXX., with which he was familiar (see e.g. 15.10; and cf. Is. 44.20 with Heb. and LXX.)—shows a considerable mastery of the Gk. language, and points conclusively to a Gk. and not a Heb. original. He writes with singular style and command of language, using classical phrases with great freedom and originality (some of his own expressions have become current in the religious language of the world—e.g. 3.4, "a hope full of immortality"); and he shows a varied acquaintance with Gk. culture, poetry, science, and art; whilst he has evidently studied Gk. philosophy, especially that of Plato and the Stoics (Farrar). In spite of the artificiality and exaggeration of the style here and there, the book may be said to be "the most beautiful and important work"—and (in many respects) the most valuable—of the apocryphal writings. The influence of Gk. civilization upon the Jew, especially those who resided outside the Holy Land—is one of the most interesting features in the development of the Jewish race previous to the birth of Christ. Many men(e.g. Aristobulus, Philo, and in later times Josephus) sought to present Judaism in an acceptable form to the Gk. world, and attempted to give a rational "fire" for their adherence to a religion which to the Greek appeared to be unphilosophical and irrational. Aristobulus allegorized the O.T. Philo made Moses the forerunner of Plato. But the writer of the book of Wisdom represents an uncompromising Conservatism. So far from showing any anxiety to smooth over anything that would offend Gk. susceptibilities, he places the views and practices of the heathen world with unmeasured scorn and indignation. As a worshipper of Jehovah, he felt that he was above meeting idolaters on their own ground; and had nothing but contempt and loathing for those of his nation who had become Grecianized at the expense of their faith. It may be this which influences him in the outward form which he gives to his work: its Biblical colouring, and his attachment to the LXX. and its Hebraisms. Much of his language finds echoes in N.T.—e.g. with Rom. 12.2 cf. Wis. 3.9, 4.15; with Jas. 1-5 cf. Wis. 8.21. In particular, the author of the gospel to the Hebrews shows indubitable acquaintance with Wisdom. Cf. Wis. 7.22, 26 with Heb. 1.1-3, etc. The writer in fact "had an honourable share in moulding the religious phraseology in which the gospel was ultimately to be preached" (Farrar). Other important points to be noted are the following:—"Individual" immortalized in the grave is more than suggested—e.g. 2.23, etc. The nature of God is expressed as "love," 11.26, etc. In one respect only is there a seeming loss. The doctrine of the Messiah has become very vague; indeed, in this book (as in Ecclesiasticus) there is no suffering or personal Messiah. The hope of Israel has come to be but the hope of an earthly domination over the Gentile world, coupled with the universal worship of Jehovah. There can be little doubt that the author was an Alexandrian Jew—of considerable education and culture—familiar with Gk. modes of life. The special familiarity with Gk. orientalism (18 and 19) and the manufacture of idols coloured and gilded to represent metal (15.9), points to a writer whose home was in Egypt. Some of the fathers (Clem. Alex., Didymus, Origen, Tertullian) speak of the author as Solomon; though this is no more than a popular reference. Jerome (and later Lother) attributed the book to Philo; but that style is not his. Noack, followed by Dean Plumptre, suggested Apollos, on the ground of the many parallels between the book of Wisdom and the epistle to the Hebrews, which they assumed that Apollos wrote. There is little doubt as to the unity and integrity of the book; though
Wisdom of Solomon, the

Houbigant (1759) suggested that the first nine chapters were by Solomon, and the remainder by an editor. Eichhorn fixed the end of the original book at 11:1. Bretschneider suggested four different authors, whilst Nachtigal (1870) suggested that it was a hymn in praise of Wisdom, to be chanted antiphonally, and composed by 79 authors! That it is a complete whole may be taken for granted, although the conclusion is rather abrupt. If the traditional text is at all defective, it may well be between vv. 21 and 22 of the last chapter, where the theme started in ver. 18 appears to require fuller treatment. With regard to the ideal of Wisdom here presented, see Philosophy. The writer has to face the old problem of the book of Job, under new circumstances. In view of the persecutions which his fellow-countrymen had borne (especially in Alexandria), he asks himself whether the faithfulness of the chosen people is rewarded? He solves the problem in eulogizing Wisdom, as being the supreme treasure. He who possesses her possesses everything worth having, and need not be dismayed by earthly and transitory troubles. Israel might suffer, under the fatherly chastisement of God; but the sufferings of this world would be compensated beyond the grave. The writer's conception of Wisdom is complex and many-sided. It is repeatedly personified, but obviously as a figure of speech. Sometimes it is used of God, sometimes of man. "We may sum up by saying, that on the divine side it represents the Spirit of God in all its fullness under the forms of Providence: and on the human side, as a knowledge of divine and human things, and of their causes." Wisdom is a word which sums up the result of the power of reconciling the teaching of divine revelation with the experience of life. The object of the book may now be seen. It is, first, hortatory, to console and encourage the Jewish people in a period of depression; second, apologetic, to offer a solution to the old problem touching the sufferings of the righteous; third, polemical, to expose the folly and wickedness of renegade Jews who had succumbed to the heathen life around them; and fourth, an apology of idolatry, "The achievement of Josephus (4 Ant. viii. 15), men and slaves were not competent witnesses; but this did not apply to a mother testifying against a rebellious son. (b) In extra-judicial proceedings. In archaic societies—before the use of written documents, authenticated by signatures or seals, and duly attested—public ceremonies are usual for conveyances of land and similar transactions. Accordingly, we find such ceremonies before witnesses in Abraham's purchase of Machpelah, and the acquisition by Boaz of the nearest kinsman's rights of property and marriage. In Is.6:2,16,20 and Je.32 we find the same practice (with an ulterior object) in the modern type. Some covenants could be witnessed by seven lambs (Gen.21:28), or a heap of stones (Gen.31:46) and a pillar (Gen.31:52; cf. Is.19:16); and in Joshua an altar of a particular type is erected to witness the legitimacy of the trans-Jordanic bond (22:26-29), and a stone is invoked to witness against the Israelites because "it hath heard all God's words" (24:27). [HOMICIDE; TESTIMONY.] Wiener, Studies in Bibl. Law. 66, 67; Post, Grundriss der ethn. Jurisprudenz, ii. 402, 548, 549. [H.M.W.]

(2) N.T. μορφής (μορφής). (a) Judicial. Evidence of two or three witnesses necessary to establish a case (Mt.25:6; 2Cor.13:1; 1Tim.5:19; Heb.10:28; cf. Jas.3:17). Instances of false witnesses (i) against Christ (Mt.26:60); (ii) against St. Stephen (Act.6:13). Witnesses to take active part in carrying out sentence (Ac.7:58). (b) In the general sense, one who can witness to the truth of what he knows has seen on 5:19; Heb.10:28; cf. Jas.3:17). Instances of false witnesses (i) against Christ (Mt.26:60); (ii) against St. Stephen (Act.6:13). Witnesses to take active part in carrying out sentence (Ac.7:58).
regards the prohibition as an instance of the general law against imitating the customs of the heathen (Lev.20.23), whose priests wore garments made of a mixture of animal and vegetable matter. [H.H.]

**Word.** [John, Gospel acc. to; Philosophy; Scripture, Holy.]

**Works.** [Justification; Faith.]

**Worm.** This translation in A.V. of the Heb. words šâs, rimmâ, and tôlêdâ, tôlê, or tôlôăth, occurs in passages in the Bible, šâs is found only in Is.51.8, and evidently denotes the larva of the clothes-moth (Tinea), the association of the moth itself in the same sentence being only what might be expected in an early writer. rimmâ (Ex.16.20) and tôlêdâ are used indiscriminately to denote caterpillars and grubs of various insects, and less commonly earth-worms. Job (25.6) compares the estate of man to a rimmâ, and the son of man to a tôlêdâ. This latter word, in one or other of its forms, is applied in Deut.23.39 to larvae harmful to vines, amongst the most destructive being the caterpillar of the moth of the genus Tinea which passes through several stages from the inner parts of the blossoms, and spins a web round the remnant. The death of Herod Agrippa I. was caused by worms (κωνάκια, Ac.12.23): according to Josephus (Ant. ix.8), his death took place five days after his departure from the theatre. Whether the worms, or maggots, were the cause or the result of the disease is not stated, although it would seem probable that they were the result. [R.L.]

**Wormwood (Heb. lâ‘ânâ) occurs frequently in the Bible, generally in a metaphorical sense. Tristram enumerates seven sorts of wormwood, of which Artemisia herba-alba may be held the most conspicuous in N. Palestine. The Heb. lâ‘ânâ is doubtless generic, and denotes several species of Artemisia.** [H.C.H.]

**Worship.** Worship is the outward expression of the life of the Church and its members devoted to the will of God (Ps.45.11,12). Allike in the old and new covenants worship is expressed, as it is generally representative of surrendered will and liturgical forms, as the Psalms, setting forth the glory of God, to Whom the wills of the worshippers are yielded (Ps.50.23,98.8). The moral ideal of worship corresponds to the perfect ideal of sacrifice expressed in the offering, eternal in its value, of the surrendered will of the Incarnate Son (Heb.10.10) to the Father. Adoration is paid to the Lamb (Rev.5.12) "standing as though it had been slain" (5.6), "in the midst of the throne." The "amen" (5.14) of "the four living creatures" and the worship of "the Elders" is their assent to that ideal.—O.T. As the ceremonial law was developed to sanctify the secular, so the law of sacrifice was at first to sanctify the whole life. The offering was a means to an end. As the end was the glory of God, so the means was the communication of the divine life.
WORSHIPPER

In the synagogues the lections, chants, homilies, and prayers influenced the growth of Christian worship (Col. 4:16; 1 Th. 5:27; Col. 3:16; 1 Th. 5:20, 21; 1 Tim. 2:1), to which was added, permanently, the Holy Communion (Ac. 2:42), including the sacrificial root-ideas of communion and offering (1 Cor. 10:16, 11:23-27), and, temporarily, the "spiritual exercises" regulated by St. Paul (1 Cor. 14). Our Lord, while forbidding personal ostentation (Mt. 6:6), assumes the duty of public worship which He scrupulously practised (Lk. 4:16; Jn. 2:13, 7:10, 10:22). In the apostolic Church, besides its private assemblies (Ac. 2:40, 4:23-31, 12:12, 20:7), the hours of the temple prayers (Ac. 3:1, 10:30) and, apparently, other hours (Ac. 2:15, 10:9) were observed. Collections connected with the Lord's day (1 Cor. 16:1) had a sacrificial character (Heb. 13:16), and are linked (13:15) with a reference to "a sacrifice of praise." The worship directed to the Father through His Son (Ro. 1:8, etc.) was also conveyed by word to our Lord (10:12, 13, Rev. 5:8, 8:14). In the apocalyptic scene of heavenly worship the adoration offered to the Lamb indicates the attitude of churches founded by apostles. Entrance "into the holy place" was realized through the Mediator (Heb. 10:19-25) and (12:22-24) that thoroughly worship was united with the heavenly. Of such worship the conduct demands a right Christian taste and deportment, and strict Christian method (1 Cor. 14:40).

(1903); Willis, Worship of the Old Covenant (1880); Oesterley and Box, Religion and Worship of Synagogue (1907); J. Wordsworth, The Ministry of Grace, ch. 6 (1901); Milligan, Ascension and Heavenly Priesthood of our Lord, Lect. vi. (1891); Swete, "Apostle of St. John," Commentary (1900). [A.W.]

Worshipper (Ac. 19:35). The A.V. rendering of νευροθος, translated more accurately in R.V. (and A.V. marg.) "temple-keeper." The town-clerk of Ephesus describes his city as the temple-keeper, or sacristan, of the goddess Diana. At a later date the term was applied to cities connected with the worship of particular emperors. [A.C.D.]

WRITING

Wrestling. (Games.)

Though writing is not directly mentioned in Genesis, its use by scribes employed by the Canaanites is implied (23:17, 18) when the field of Ephron was "made sure" to Abraham. For in their time a tablet, signet, tabby, was the only evidence of property held legal, at least by the Babylonians. The word sèpher, "writing" (Arab. sifr, whence English "cypher"), first occurs in the time of Moses (Ex. 17:14), as though already usual. The term is of Oriental "books" and "letter" in A.V., and otherwise "scroll" (Isa. 34:1-4), "evidence" (Is. 32:10, 11), "roll" (Ezek. 2:9), and "learning" (Dan. 1:4, 17). The "house of rolls" (Ezr. 6:14), or better (as A.V. marg.) of "books," was a royal library. In the time of Moses the Babylonian cuneiform characters were used by the Canaanites, and were known to scribes in Egypt, who wrote in this character to Asiatic princes. It appears probable that this was the kind of writing first used by the Hebrews, and there is no evidence that the alphabet had come into use before the time of David at earliest. Four early psalms (Ps. 9, 25, 34, 27) are written with verses beginning with letters of the alphabet, in the ordinary sequence, except in the first of them, where only 14 letters are given, some being out of the usual order. It is also remarkable that, in two cases (Ps. 25 and 34), there are 23 letters—a final P being given after the 22 Phoenician letters, in the position of the Etruscan F or the Gk. Phi. This may be an indication of early date, when the alphabet had not been finally reduced to 22 letters. Later psalms (Ps. 111, 112, 119, 145) are also alphabetic, as is a passage in Proverbs (31:10-31); while Lamentations (1:10) repeats the alphabet four times, with the peculiarity (in 20:5), that P precedes 'ayin. In N.T. the Gk. alphabet included the letters then in use (omitting Baw, San, and Kopha), and the first and last were "Alpha and Omega." (Rev. 1:8)—Materials. The "token tablets," on which the Ten Commandments were written, were of stone (Ex. 19:22; 25:19, 23), and they were written like Babylonian tablets—on both sides. The Heb. לועש (Arab. lūḥ) indicates a "tablet" like those which, in Babylon, were of stone, or of baked clay: and these continued in use among Hebrews [Gezer] down to 600 B.C. at least (Heb. 2:2). In N.T. the writing-table (Lu. 16:3), or "board," may, however, have been a wooden tablet covered with wax, as among Romans (see 2 Esd. 14:24). Tablets are often mentioned (Ps. 3:3, 7, 13; Is. 30:8; Je. 17:1), and the term Mēchlim (titles of Ps. 16 and 56-60), according to LXX., means "tablet-writing," indicating that these psalms were also originally on tablets; but for other views, see Psalms, Titles of.

Two other terms more clearly indicate clay tablets as in use, namely Heb. פְּבֵיתוֹ ("brick") (Ezk. 4:1), rendered tile in A.V., and Heb. īqqereth, rendered letter (2 Chr. 30:1; Ezr. 4:5, 5:6; Ne. 2:7-9, 6:5-19; Esth. 9:26-29) —the Babylonian īqarn for a "tile," The letters which Hezekiah received from Sennacherib, and from Merodach-baladan (2 K. 19:14, 20:12), were no doubt in cuneiform; and he was able to read them, and "laid down" (A.V. spread)

TESSERA; temp. PTOLEMY PHILADELPHUS.
the tablet before the Lord. The expression "open letter" (Ne.6.5), applying to such a tile or brick, signifies that it was not enclosed in a pottery case. It was a common Babylonian custom to place important documents in such cases, which were closed, and had an abstract of contents on the outer cover. This is clearly described in Jeremiah in connexion with a legal agreement (Je.32.9-12), when money was weighed in balances, and the "writing" (A.V. evidence) signed and sealed before witnesses, and "sealed up" according to lawful custom, with "open" writing on the cover. These sealed-up tablets are perhaps intended elsewhere (Job 14.17): "My fault is sealed up in a case, and Thou dost daub over my iniquity" (see also Is.29.11; Dan.12.4). But writing was not only on clay, or on stones covered with Plaister (Deut.27.2-4); it was also on stone so hard as to require an iron graver with a diamond "claw" (Je.17.1) to cut the tablet. Isaiah had bidden to use a "great slab" (A.V. roll, Is.8.1, Heb. gilly'yon: see Is.3.23, A.V. glasses) to write on with "the graver of a man," or in "common characters" (R.V. marg.), by which alphabetic letters may be intended, as contrasted with cuneiform script. Job refers (19.24) to monumental writing "carved" (A.V. printed), 19.23, on rock, hewn with an iron pen (see Je.17.1), or graver, and "with lead"—the latter expression being explained by the fact that Phoenician texts exist in Palestine, with letters engraved on stone, and then painted with red lead to make them conspicuous. The art of engraving characters on hard gems, for signets, and other purposes (Ex.38.9,11,21), was already ancient in W. Asia in the time of Moses; and we have a gem so engraved, with the name of Kurigl zu I. of Babylon, who was contemporary with Moses. Rolls of papyrus were equally ancient in Egypt; but such scrolls are not mentioned in O.T. till the time of David at earliest. The Psalmist (Ps.40.7) says, "I come to the written scroll written about me" (cf. Deut.17.18). Such scrolls were in use in Jeremiah's time, and the scribe used ink (d'yd). The scrolls could also be cut with a "scribe's knife" (A.V. pen-knife), and burned in the fire (Je.36.14,18,23). They were sometimes written on both sides (Ezk.2.9; Rev.5.1), but are not often noticed (see Is.34.1; Zech.5.1; Ezr.8.2). These sealed rolls (Rev.5.1) were opened for reading (Ne.8.5). They were written skins were used for sacred rolls of the law (12 Ant. ii. 11), said to have been inscribed with letters of gold. Such "membranes," or "archiments" (2Tim.4.13), were used by St. Paul. The art of writing in early times was confined to Scribes (Is.33.18; Je.8.8; Ezr.7.6; Mt.5.20, etc.) but Heb. kings apparently could read and write (Deut.17.18; 2K.19.14), though this was not a general accomplishment (2Sam.11.14), since Uriah apparently could not read; and Isaiah speaks of those who had not learned to read (Is.29.12). In the time of our Lord the debtors could write "a document" (A.V. bill, Lu.16.6); but it may be doubted if every Israelite could write a bill of divorce himself (Deut.24.1); and such a document was probably drawn up by a scribe, and attested by witnesses, after the Babylonian fashion—Hieroglyphics. The four great systems of hieroglyphs seem to have sprung from one ancient picture-writing, but to have developed separately. About 70 emblems are found in two or more systems with the same meaning, and about 20 are common to the Egyptian, the Syrian (usually called "Hittite"), the Akkadian, and the Chinese. The latter may be of Akkadian origin; but when first known (not earlier than c. 800 n.c.) it has become quite distinct. The Egyptian, Syrian, and Akkadian denote numerals by the same signs—strokes for units, and an arch for "ten," which becomes a crook in the later Phoenician numerals. The signs
commonly used include figures of men, and of the bull, ram, sheep, goat, stag, ass, hare, lion, and dog and snake. Actions are represented by the hand, foot, legs, eye, and mouth. The signs also represent the sun, moon, star, fire, water, mountains, tree, herb, flower, corn, and reed, with the throne, crown, sceptre, crook, axe, bow, and arrow; the house, altar, yoke, vase, bowl, bucket, plough, sail, boat, pyramid, tablet, web, chain, and sword. In each case the signs came to be used merely as syllables to spell words, to which certain "keys," or "determinatives," were prefixed or suffixed, to mark certain classes of nouns, and to make the reading certain. In each case also the rapid sketching of the signs, by practised scribes, gradually produced a conventional outline, which in time became hardly recognizable as connected with the hieroglyphic whence it originated; and each of the three old systems finally produced an alphabet of from 25 to 37 letters. But, as the languages differed, the sounds applying to the

The Syroam Inscription. (The oldest known Hebrew text. From Col. Conder's original squeeze, taken July 15, 1881.)

signs differed also, in the cases of Egyptian and Chinese. The Akkadian and the Syrian systems, on the other hand (wherever the sounds of the latter system are known), seem to have been more closely connected, and to have been used for a single language. Thus, both gave the sound le for the bull's head, lu for the yoke, mu for the tree, an for the star, bu for the flower-bud, and si for the eye. (1) The Egyptian System included about 400 signs, and out of these 45 are used as letters, to express 25 sounds. The "hieratic," or conventional hand, produced by sketching the signs with ink on papyrus, is at least as old as 2000 B.C., and was finally developed into the "demonetic" running hand of the Ptolemaic age. (2) The Akkadian System is traceable probably as early as 3000 B.C. It was applied to an agglutinative tongue full of monosyllabic words (of which at least 200 remain almost unchanged in pure Turkish), and these sounds were adopted by the Semitic Babylonians, who also applied to the signs the corresponding Semitic words. Thus ad, "father," was used by them for the syllable ad, but also stood for the Semitic abu, "father;" and an, "god," stood for the syllable an, and also for the Semitic ilu, "god." On the Akkadian texts the signs stand above one another (as in Chinese), two or three in the line, all facing to the right—that is, to the beginning of the line. The Babylonian monumental forms, down to 600 B.C., preserve the original vertical arrangement, and the original outline of the signs. But when they were used on a clay tablet, a conventional outline was produced by the strokes, which is now known as "cuneiform," or "楔形文"; and not only did this become gradually different in time—by omission of strokes—but the tablets were read sideways, so that all the emblems fell on their backs, and these were reversed from the left. The Babylonian and Assyrian emblems differed slightly by 9th cent. B.C. The Assyrians—adopting the Babylonian script—never used the old monumental forms; and, even on monuments, they employed the conventional "cuneiform" outlines, written in horizontal lines from the left. The original Akkadian system had only some 150 emblems; but compounds of these raised the total to 300 very early, and further compounds in Semitic texts produced a total of about 550 signs. Out of these, 115 were used for syllables, such as ab, ib, ba, ba, ba, and bi, and so on, for all the 22

Semitic sounds. The cuneiform was also used by the non-Semitic race of Susiana, and for the Mede language at lake Van. The Persians finally reduced it to a rough alphabet of 34 letters, with 9 "determinatives" for the original 35; and the horizontal line then rested from the left. (3) The Syrian System accompanies very archaic figures, which may be nearly as old as the Akkadian monuments, and it appears to have been used by the Hittites, and other cognate tribes, while one of these monuments has been found in situ in Babylon (Koldewey, Die Hethitische Inschrift, 1890), and others in Asia Minor. There were about 160 emblems, and these are arranged vertically in the line—two or three under each other—and face the beginning of the line, as in the Akkadian, but with the difference that (in each line) the emblems are all reversed, and the lines read alternately from right to left, and from left to right. This is in the early Phrygian, Carian, and Gk. texts, where this arrangement is called boustrophedon writing—as resembling the return furrow in ploughing. The Syrian system (as Dr. Isaac Taylor remarked) also produced a later hieratic script—a syllabary of at least 60 emblems—and this had a very wide diffusion in Asia Minor, Syria, Cyprus, Crete, Palestine, Egypt, and even as far W. as Spain. This syllabary was used by Greeks in Cyprus; but was evidently borrowed, as it is very insufficient to express Gk. sounds. It was

p. 954) ORIGIN OF ALPHABET.
deciphered by George Smith, from a Phoenician bilingual dating 375 B.C., and presents syllables like ba, be, bi, bo, bu, but not the syllables ab, eb, ib, ob, ub (found in Akkadian), which account for its only preserved fragment of 160 Syrian hieroglyphic emblems. Its signs occur at Gezer and Lachish, and on foreign pottery at Kahun in Egypt (18th dynasty); also in Cappadocia and Cilicia. It is recognized that the extra Gk. letters (v, φ, χ, ω) are derived from this script, which also furnished 11 extant letters for the akkadian alphabet with cent. n.c. The Cretan texts (probably in Gk., as in Cyprus) give at least 27 signs similar to those used in Cyprus, and some are found in Carian texts, while this system also accounts for at least five extra letters of the so-called "Celt-Iberian" alphabet (evidently of Gk. origin) found on coins in E. and N.E. of Spain. (4) The Alphabet. The oldest alphabetic text that can be dated is the Moabite Stone (Moab), and there is no evidence that letters of the Phoenician alphabet were in use much before 1000 B.C. It must have originated in a syllabary, as in the other cases, but the ancients knew little about its origin. They generally agree with Herodotus (v. 166) who believed the Phoenicians to have taken their letters from the Phoenicians. Yet the old Aryan alphabets of the W. distinguished about 37 sounds, whereas the Phoenicians distinguished only 22; and the Gk. names of letters (alpha, beta, etc.) are Aramesh rather than Phoenician. Diodorus Siculus (v. 4) says that there was no fixed system of development of the alphabet, when he says: "The Phoenicians were not the first that found out letters, but only changed the form and shape of them into other characters, which many afterwards using, the name of Phoenician grew to be common." Tacitus (Ann. xi. 14) found on coins in E. and N.E. of Spain. (4) The Alphabet. The oldest alphabetic text that can be dated is the Moabite Stone (Moab), and there is no evidence that letters of the Phoenician alphabet were in use much before 1000 B.C. It must have originated in a syllabary, as in the other cases, but the ancients knew little about its origin. They generally agree with Herodotus (v. 166) who believed the Phoenicians to have taken their letters from the Phoenicians. Yet the old Aryan alphabets of the W. distinguished about 37 sounds, whereas the Phoenicians distinguished only 22; and the Gk. names of letters (alpha, beta, etc.) are Aramesh rather than Phoenician. Diodorus Siculus (v. 4) says that there was no fixed system of development of the alphabet, when he says: "The Phoenicians were not the first that found out letters, but only changed the form and shape of them into other characters, which many afterwards using, the name of Phoenician grew to be common." Tacitus (Ann. xi. 14) found on coins in E. and N.E. of Spain.
to the Babylonian hieroglyphics. The subsequent history is important for Biblical study, and is very fully known from monuments. The script gradually divided into four families of alphabetic and hieroglyphic characters, which were used at Carthage and Marseilles, and in Spain. To this family the alphabet of Israel (as found on the Siloam text. c. 725 B.C.) belonged, and continued in use (on the Jewish coins) down to c. 100 B.C. The Samaritan, which is traced to 500 a.d., is only a later form of this Hebrew alphabet. The Greek, which in some cases preserves more archaic forms than the Phoenician, is however known not much earlier—since the Meobite Stone goes back nearly to 900 B.C., while the earliest Ionian texts (that can be approximately dated) are those at Abu Simbel in Egypt, where they occur supposititious in Greek and Karian texts, c. 600 B.C. All the European alphabets come from the Gk.—the "runes" directly so, and most of the others through the Latin. The Etruscans (who were not Aryans) brought letters from Lydia, and it is remarkable that they do not seem to have used the Gk. or Phoenician names for their alphabet. The Hebrew is nearly the same as the Gk. and Phrygian. 3. The Sabean differs considerably from the Phoenician. It is known as early as 264 B.C., from a dated text in Egypt; and it appears to have early developed seven signs, not used by Phoenicians, for seven modified sounds in the Arabic tongue [Semitic Languages], or origin of which signs is not to be sought in the original syllabary. Dr. Isaac Taylor regarded the texts of the Saft region, S.E. of Damascus, as representing a link between the Sabean and the Phoenician. Mr. Cyril Graham, and others, found 700 of these texts, which Haley deciphered in 1877 (Journ. Asian. Soc., vol. x. pp. 293-450), but they are not supposed to be older than 600 a.d. They present the same peculiarity as Sabean—viz., that they read from the left as well as from the right. Mr. E. J. Pulcher (Proc. Bib. Arch. Soc., March 1907) regards the Sabean as being derived from the Greeks in Egypt, c. 600 B.C.; and this suggestion is strengthened by the fact that the Numidian alphabet (c. 100 B.C.) does not appear to descend from the Punic, but shows remarkable resemblance to the Sabean. It too may have been derived from the early Greeks in N. Africa, at a time when the standard Ionian alphabet was not generally used, and when old signs of the Syrian syllabary were still employed. The Sabean coins (Schum- berger, Le Tresor de Sanaa, 1880) are not older than 2nd cent. B.C., and bear the Athenian emblem of the owl. Some have the head of Augustus with Sabean inscriptions. This Arab script is thought to have reached S. India before 250 B.C., as represented in the southern edicts of Asoka; but it was not used in N. Arabia, where the Aram. alphabet prevailed. 4. The Aramaic alphabet spread with the language, in the Persian age, all over W. Asia. At Samara, c. 800 B.C., Aram. is written in characters closely similar to those of the Meobite Stone; but the Aram. alphabet is less archaic, and which leaves open the loops originally closed, already begins to appear (in the gobh) at the same site in 730 B.C. [Syria.] The oldest weight at Nineveh (c. 880 B.C.), inscribed in alphabetic letters, presents the original Phoenician forms; but by 500 B.C. the Syrian traders in Babylonia and Assyria were using the open loops to the letters with the Aram. language: [Semitic Languages]. This alphabet was used, after 521 B.C., in N. India (the Kharoshthi), being the first script known beyond the Indus. The Pehlevi language, in Persia, was full of Aram. words, and the characters were of Aram. origin, like those of the Parthians in 3rd cent. A.D. The Naba- thaeans [Nabataean] borrowed the Aram. alphabet by 500 B.C.; and it thus developed the Neskh, or modern Arab., and is found hammered on the rocks of Sinai down to c. 400 A.D. The Nestorians used these characters, and introduced them among the Ugar Turks, from whom the Manichas took them. In the W. the Aram. alphabet became the script of the Palmyra traders, as early as a.d. at least, and from the Palmyrene came the Syr. of the 4th cent. A.D., and the Cufic, which was used near Damascus before the Moslem invasion, as witnessed by a Christian text, dating 568 A.D., at Harran (Waddington, No. 2494). The Georgians had it from the 8th cent., and the E. Aram. in origin, with additions from the Gk. alphabet.—Square Hebrew. It is clear that in the time of our Lord the script in use resembled the square Heb. in the peculiarity that the yodh (Gk. iota, A.V. //) was the smallest letter: and the reference to the "horned" (A.V. //) letters, to the "bulls" (A.J. //) to the "chamfered" (A.J. //) letters, is the oldest of the Hebrew. (Mt.5.18). The square Heb. occurs in the oldest known fragment of O.T., including the Ten Commandments, found in Egypt (Mr. S. A. Cooke, Proc. Bib. Arch. Soc. Jan. 1903, pp. 39-56), attributed to 2nd cent. A.D. It is found earlier at Jerusalem, over the Greek-Jewish porch of the tomb of the Beni Hezir priests. [Kidron.] It is impossible to suppose that such a monument could have been hewn that such a monument could have been hewn for Jewish priests after 70 A.D., and it may be as old as 100 B.C. The letters have almost the present shapes; and ligatures and final letters appear not only here but in Aram. papryi as old as 3rd cent. B.C. by the hand- writing to the Rabbis (Tal. Bab. Sanhedrin, 21 b. 22 a), the Aram. language, and the Lebanon (Lionlit) characters were used by private persons—representing the Samaritan alphabet, which was of Phoenician origin; but the sacred Heb. was written in the Assyrian (Asshuri) characters, which might mean the cuneiform, but more probably refers to the Aram. alphabet, since the Scriptures were written in alphabetic characters even before the Captivity. There is nothing improbable in Ezra having used the Aram. alphabet, which was the only one in use in Babylonia in his time, and in this having gradually developed into the square character by 100 B.C.—since the latter is certainly derived from the Aram., and is closely akin to the Palmyrene. The old alphabet of Israel was used (perhaps only for secular and monumental purposes) down to 100 B.C.; but forms similar to the Aram. came into the Gilead (2nd cent. B.C. [Syr.], [Syr. 21 7,21 175], and this script may have been used with ink on scrolls, side by side with the old alphabet. It was fully established before the gospels were written.—Points. Vowel points, marking the

p. 936] EARLY ALPHABETS.
length of vowels, are never found on ancient monuments in alphabetic writing. These monuments mark the ends of words in some cases with dots, as early as 900 B.C., but the notation of the shorter vowels seems to have been due to Greek influence. This is certain where the vowels are represented actually by the Greek letters α, ε, η, ο, υ, laid sideways above the Syr. letters. In Heb. an imperfect notation was in use as early as 370 A.D., and occurs in a MS. (No. 12,150 in Brit. Mus.) in 411 A.D.; but the Babylonian school (Odessa Codex) placed points under the letters, and this notation, which was adopted from those of the Palestinian school. The Massoretic points are not older than the end of the 7th cent. A.D. They served to express the traditional readings of that age, among the later Galilean Rabbis, and to define the exact sounds without adding a letter to the sacred text. It is evident, however, from the LXX. rendering of points as such by George Smith (‘Nebuchodonosor, for Nebuchadnezzar), that the old pronunciation in 250 B.C. was different, and also more correct; since the LXX. vowels in the case cited represent the Babylonian exactly. In the time of Jerome (end of 4th cent. A.D.) the pronunciation of the Rabbis of Tiberias, who consulted, must have differed, as shown by similar evidence in the Vulgate, such as Madian for Midian, which agrees with the LXX. (Madian); and this is probably more correct, representing the Babylonian Mad-yavan, or "no man’s land." Hence, when the translation of a passage in O.T. is rendered otherwise by the Massoretes, it is only to be regarded, and not to be discredited by the name of some Massoretic pronunciation of vowels, if a simple explanation is thereby rendered possible. With the tonal accents we are not here concerned, as they had no existence in early times.—Bibliography. For the Cuneiform, the most important works are: Ammaud and Méchineau, Tableau Comparé des Ecritures Babylonienne et Assyrienne (1882); Oppert, Le Peuple et la Langue des Mèdes (1879); De Sarzec, Découvertes en Chaldée (1887); Spiegel, Die Altpersischen Keilschriften (1881). For the alphabet generally see Isaac Taylor, The Alphabet (2 vols., 1883), and Renan, Corpus Inscriptionum Semit incarnum (1881–1889). The Cypriote syllabary is given by George Smith (Trans. Bib. Arch. Soc. vol. i.), and in later papers by Dr. Debeere. The Hittite characters are treated by the present writer in detail in The Hittites and their Language (1898). The Cretan signs are given by Mr. A. J. Evans in the Annual of British School of Athens (1900), and in earlier papers by the same discoverer of the Knossos clay tablets and signets. [G.R.C.]

X

Xanthicus (2 Mac. 11, 30, 33, 38). The Macedonian name for the sixth month in their calendar. In 1 Ant. iii. 3 Josephus identifies it with Nisan. [MONTHS.] Smith’s D.B. (vol. ii. p. 417, ed. 1893).

Y

Yarn. The notice of yarn is contained only in 1 K. 10, 28 = 2 Chr. 1, 16. The Heb. text is questionable. The word is a mistranslation in A.V. in any case. The context shows clearly that the reference is to "horses"; so that the R.V. rendering, "droves," gives (at all events) sense. [CASSIA.] [W.O.E.O.]

YEAR. The earliest applications of the measurement of time by a year-cycle occurs in Gen. 8, 22: "Seedtime and harvest, and cold and heat, and summer and winter . . . shall not cease." There are traces in the Mosaic legislation of this natural and therefore primitive method of reckoning time by the solar year, a period defined by the annual occurrence—the harvest. With agricultural peoples the harvest is the end of the year, and what follows is preparation for the ensuing year: cf. "The end of the year, when thou gatherest in thy labours out of the field" (Ex. 23, 15, 16); "The Feast of Ingathering at the end of [R.V. margin, evolution]" (33, 22). But in order to define time more exactly it would be found necessary to divide this longer period into shorter ones. The moon, appointed for seasons (Ps. 104, 19), provides the standard of measurement. A fixed number of "moons" would not, however, coincide with the harvest. The astronomical lunar month was 29 days, 12 hours, and 48 minutes (i.e. being divided into 1,080 parts). Twelve lunar months are 354 days, 8 hours, 876 parts, but the solar year is 10 days, 21 hours, 204 parts, i.e. approximately 11 days, longer than this. The discrepancy would have been serious in the course of a few years unless rectified by some means. The Heb. year is accordingly solubly associated with the two harvests. (1) The 15th day of the 7th month (Ethanim, 1 K. 8, 2; the post-Exilic Tishri) was the Feast of Tabernacles, the thanksgiving for the completed harvest (Lev. 23, 34; Num. 29, 12), held at the autumnal equinox. (2) On Abb 16 (the post-Exilic Nisan), the first fruits of the barley harvest were offered. This was also a harvest festival, at the spring equinox. These were constant, and the calendar had to be arranged so that the date and harvest synchronized. That the Heb. months were lunar is certain; the solemn observance of the New Moon would have had no meaning apart from its connexion with the cycle of festivals. It is not known how the difference of eleven days between the lunar and solar year was arranged in pre-Exilic times, but probably by the interpolation of a month every two or three years. In post-Exilic times a month was added when it was found necessary as the result of observation or calculation. If it was decided that Nisan would arrive before the grain was ripe, or that the sun was so far distant from the vernal equinox that it could not reach it by Nisan 16, a month called the Second Adar was interpolated. This was done arbitrarily, notice being sent by letter from the exarch of the various communities (Rosh hash-Shanah iii. 1). This rule was fixed by Hillel II. c. 361 a.d. The Jewish calendar is based on the Metonic Cycle of 19 years, 12 common and 7 leap years. It is a much-disputed question how far the Jews were indebted to the Babylonians for their method of computing time. Both had the lunar month of 29 or 30 days, with an
YOKE

intercalary Adar. In later times the Babylonian month seems to have consisted of 30 days, and the duration of the month agreed in the Flood story in Genesis, where five months are equal to 150 days, giving a year of 360 days (Gen.7.11,8.3.4). This was the Akkadian and early Gk. year. The Egyptian year was 365 days, and some think the Flood year was the same length. The Deluge began on the 17th day of the 3rd month, and lasted till the 27th day of the 2nd month of the following year. This would give 12 lunar months, or 354 days, plus the 11 days from the 17th to the 27th, or 365 days. The Babylonian year began in Nisan. The Heb. year originally commenced in Ethanim (Bab. Tishri), but at the Exodus Nisan was constituted the first month (Ex.12.2,13.4), all others being numbered from it. Tishri is known as the beginning of the civil year, and Nisan the first month of the sacred year. Some are of opinion that the ancient Heb. year always began on the 1st of Abib or Nisan, the civil year being of later institution; or that Tishri was the first of the intercalary series, since the Year of Jubilee commenced with it and not in Nisan (Lev.25.9). [Monthus.] Schwarz, Der Judische Kalendar; Abrahams, Hastings, D.B. s.v.; Sayce, Hibbert Lect. on Rel. of Anc. Bab. 70-76; G. Smith, Assy. Epon. Canon; Cuneif. Insers. of 1800 B.C. [c.r.c.]

Yoke. (1) In Heb. môl, mödâ, and 'ol, the two former words meaning a "bar" and the last the application (binding) of the article to the neck of the ox. The ordinary yoke for a pair of ploughing oxen is still a wooden bar, resting on their necks and bound round them. (2) A pair of oxen, so termed as being yoked together (rSam.11.7; 1K.19.19,21). The Heb. term remeth is also applied to asses (Judg.19.10) and mules (2K.5.17), and to a couple of horses in a chariot (1S.21.7). (3) The term remeth is also applied to a certain area of land (rSam.14.14), equivalent to that which a couple of oxen could plough in a day (1S.21.7), corresponding to the modern Arab. faddān. As early as the 17th cent. B.C. (Amarna letters) we find the word "yoke" used to mean "rule" or "government," as in O.T. and in the words of Christ, "My yoke is easy." Probably our Lord had Himself made yokes in the carpenter's shop at Nazareth. [c.r.c.]

Yoke of land. [Weights and Measures.]

Z

Zaana'an, a place named by Micah (1.11) in his address to the towns of the shephelah, near Zenan (Jos.15.37), a town of the shephelah, near Meidâdad (probably Meideleh). The site is unknown. [c.r.c.]

Zaanannim. [Zaanaim.]

Zaan'an, a Horite chief, son of Ezer the son of Seir (Gen.36.27).

Zabâdî—1. Son of Nathan, son of Attai, son of Ahiah, Sheshan's daughter (1Chr.2.31-37), and hence called son of Ahiah (11.41); one of David's mighty men.—2. An Ephraimit (7.21). [Elead.]—3. Son of Shimeath, an Ammonitess; an assassin who (with Jehozabad) slew king Joash (2Ch.24.26). In 2K.12.21 his name is written, probably more correctly, Jozachar.—4. 5. 6. Three laymen who divorced their foreign wives at Ezra's command (Ezr.10.27,33,43).

Zabadai as (1Es.9.35) = Zabad, 6.

Zab'ade'ans, an Arab tribe who were attacked and spoiled by Jonathan, on his way back to Damascus from his fruitless pursuit of the army of Demetrius (1Mac.12.31). Josaphat, king of Judah, attacked the Nabataeans (13.7.10,11) but perhaps in error. Nothing certain is known of them. Jonathan had pursued the enemy's army as far as the river Eleutherus (Nahr el Kebir). We must look for them, therefore, somewhere N.W. of Damascus. On the road from Damascus to Ba'albek, at a distance of about 26 miles from the former, is the village Zebdâny, standing at the upper end of a plain of the same name, in the very centre of Anti-libanus. This name is possibly connected with the Zabadeans.

Zabbai.—1. A descendant of Becai, who had married a foreign wife (Ezr.16.28).—2. Father of Baruch (Ne.3.26).

Zabbud', in Ezr.8.14 given as one of the sons of Bigvai who returned in the second caravan with Ezra. [Istalcurcus.]

Zab'de'us (1Es.9.21) = Zebadiah, 6.

Zabdi.—1. Son of Zerah ben-Judah, and ancestor of Achan (Jos.7.17,18). Perhaps the same as Zabdiel (B.C. 2A.V.-ae. 2), son of Zabdiel, one of the sons of Shimhi (8.19).—3. "The Shipmhte," David's officer over the wine-bearing grapes (27.27).—4. Son of Asaph the minstrel (Ne.11.17) = Zaccur (12.35) and Zachiri (1Chr.9.15).

Zabdiel.—1. Father of Jashobeam (1Chr.27.2).—2. A priest. "son of the great men" (I.V. of Haggodolim; Ne.11.11).—3. An Arab chief who put Alexander Balas to death (1Mac.11.17; Josephus, 13 Ant. iv. 8).

Zabud', son of Nathan (1K.4.5). He is described as a priest (A.V. principal officer), and as holding at the court of Solomon the position of "king's friend," held by Hushai the Archite at David's.

Zab'ul, the Gk. form of Zer'ulun (Mt.4.13,15; Rev.7.8).

Zacca'i. Of the sons of Zacca, 760 returned with Zerubbabel (Ezr.2.9; Ne.7.14).

Zacchaeus, the Gk. form of Zacai (pure), which is found in Ezr.2.9 and Ne.7.14; the chief tax-gatherer at Jericho at the time of our Lord's last visit, on His way up to Jerusalem (Lk.19.1ff., our only source of information). Zacchaeus was doubtless a Jews "son of Abraham," ver. 9, and well-to-do; Jericho being the centre of a district which brought in large
revolutions from palms and balsam (Josephus, 15 Ant. iv. 2). Being short, he climbed up into a sycomore tree on the wayside, when he heard of our Lord's passing through the town, in order to see Him; and was surprised (though delighted) to be accosted by name in his lofty hiding-place, and to be told that his house would be honoured by a visit from the new teacher. There was a general murmuring at this distinction; but it gave Zaccheus the opportunity of either vindicating his practice hitherto, or declaring his intention to amend his ways in future. The latter alternative seems the more likely, as our Lord assures him "this day is salvation come to this house" (ver. 9). It is assumed an interrogative of others between father to a famous Rabbi, was a native of Jericho in those days (Lightfoot, Hor. Heb., Exercitatae upon St. Luke in loc.).

**Zaccheus**, an officer of Judas Maccabaeus (2Mac.10.19).

**Zachur**, a Simeonite (1Chr.4.26).

1. Son of Shimea, a Reubenite spy (Num.13.4).—2. A Merarite Levite, son of Jaaziah (1Chr.24.27).—3. (25.2, 10; Ne.12.35) = Zabdi, 4.—4. Son of Imri; he assisted Nehemiah in rebuilding the city wall (Ne.3.2).—5. A Levite, or family of Levites, who signed the covenant (10.12).—6. A Levite, father or ancestor of Hananiah, 8 (13).

**Zachariah** (R.V. Zachariah).—1. Son of Jeroboam II., 14th king of Israel, and the last of the house of Jehu. There is a difficulty about the date of his reign. Jeroboam died in the 27th year of Uzziah and it is stated that Zachariah came to the throne in Uzziah's 38th year (2K.15.8), and accordingly Ussher assumed an interval of 10 years between Jeroboam's death and Zachariah's accession, during which the kingdom was suffering from the anarchy of a disputed succession; but this is doubtful. [CHRONOLOGY.] Zachariah's reign lasted six months. He was killed in a conspiracy, of which Shallum was the head, and by which in 2K.15.20 the ousting—2. The father of Abi, or Abijah, Hezekiah's mother (2K.18.2).

**Zacharias**.—1. (1Esdr.1.8) = Zechariah, 27.—2. In 1Esdr.1.15 Zacharias occupies the place of Heman in 2Chr.35.15.—3. (1Esdr.5.8) = Azariah, 20.—4. (6.1, 7, 3) = Zechariah, 1 of the Levites of Judah (6.37) = Zechariah, 9.—7. (8.4) = Zechariah, 10.—8. (9.27) = Zechariah, 11.—9. Father of Joseph, a leader in the war under Judas Maccabaeus (1Mac.5.18, 56).—10. Father of John the Baptist (Lk.1.5).—11. Son of Barachiah, who, as our Lord says, was slain between the sanctuary and the altar (Mt.23.25; Lu.11.57). It is alone mentioned, and therefore to the murder of Zechariah, 6. Some difficulty is caused by the designation "son of Barachiah" in St. Matthew. The Zechariah of 2Chr.24.20 was son of Jehohada. Zechariah the son of Barachiah is the prophet. There may be a confusion between the two on the part of Matthew, or of a later hand. The name of Jesus fixes upon a murder in the time of Joash (840 B.C.) is probably because Chronicles came last in the Heb. canon of O.T. [R.S.M.]

**Zachary.** The prophet Zechariah (2 Esd.1.40).

**Za'chen**, a son of Jehiel the father or founder of Gibea (1Chr.8.31).

**Zadok.**—1. One of the two chief priests in the time of David, Abiathar being the other. In 2Sam.8.17 he is said to be the son of Ahitub, but the text of this verse is uncertain. According to 1Chr.24.3, Zadok was a descendant of Eleazar, the son of Aaron. He first appears in 1Chr.12.28 (but scholars think that this passage relates to another Zadok who we read of his joining David at Hebron after Saul's death with 22 captains of his father's house. Up to this time, it may be concluded, he had adhered to the house of Saul. But henceforth his fidelity to David was inviolable. When David fled from Jerusalem before Absalom, Zadok and Abiathar, bearing the ark accompanied him, but at the King's command they returned to the city, and became the medium of communication between the king and Hushai the Archite (2Sam.15.17). When Absalom was dead, Zadok and Abiathar persuaded the elders of Judah to invite David to return (19.11). When Adonijah was made king, Zadok, as the appointed successor to the throne, and had persuaded Joab and Abiathar the priest to join his party, Zadok was faithful to David, and was employed by him to anoint Solomon (1K.1). And for this fidelity Solomon "put Zadok the priest in the office of Abiathar (1K.2.27, 35). Nothing further is recorded of him except that his name is mentioned as that of "priest" among Solomon's officers of state (4.4; 1Chr.29.22). Zadok and Abiathar were of nearly equal dignity (2Sam.15.35, 36, 19.11). The duties of the office were divided. Zadok ministered before the tabernacle at Gibeon (1Chr.16.39), Abiathar had the care of the ark at Jerusalem. Not, however, exclusively, as appears from 1Chr.15.21; 2Sam.15.24, 25, 29. Hence, perhaps, it may be concluded that from the first there was a tendency to consider the office of the highpriesthood as somewhat of the nature of a corporate office, although some of its functions were not performed by any member of that corporation. [SADDUCEES.— 2. According to 1Chr.6.12, there was a second Zadok, son of a second Ahitub, son of Amariah; about the time of king Ahaziah. It is possible that the repetition of the names is a copyist's error.—3. Father of Jerushah, the wife of king Uzziah, and mother of king Jotham (2K.15.33; 2Chr.27.1).—4. Son of Baana, who repaired a portion of the wall (Ne.3.4). He is probably the same as the Zadok in 10.21 who joined in sealing the covenant.—5. Son of Immer, a priest who repaired a portion of the wall over against his own house (3.29).—6. In Ne.11.11 and 1Chr.11.11 mention is made of Zadok, son of Meraioth, the son of Abitub; but the names may have been transposed. [N.C.B.]

**Za'ham**, son of Rehoboam by Abihail, the "daughter" of Eliah (2Chr.11.19).

**Zair**, a simeonite (2K.23.1), an unknown place, in or near Edom, to which Joram of Judah went over to attack the Edomites. [C.R.C.]

**Zalaph**, father of Hanum, 3 (Ne.3.30).

**Zalmon** (2Sam.23.28) = Lai.

**Zalmon**, Mount (Judg.9.48). [Salmon.]
ZALMONAH

Zalmonah' (Num. 33.41), an unknown site S. of Mount Hor. [c.r.c.]

Zalmunna', one of the two "kings" of Midian slain by Gideon (Judg. 8.2; 1S. 8.11). [Zal'mun'na, O.T.]

Zam'bis (1 Esd. 9.34) = Amariah, 5.

Zam'br (1 Mac. 2.26) = Zimri, 1.

Zam'oth (1 Esd. 9.28) = Zattu.

Zamummims' (properly Zanummimm). The inhabitants of the land subsequently occupied by the Ammonites were Rehaim, a giant race called by the Ammonites Zanummimm (Deut. 2.20). An Arab, word zamamsah means a distant noise, and zizim is used in that language for the noise the spirits or jinn make at night in the desert. Perhaps therefore the word was employed to indicate the ghosts of the old giant inhabitants which still haunted their ancient homes. This is, however, only a conjecture. [F.J.F.J.]

Zanoah.—1. In the skp'khud (Jos. 15.34; Ne. 11.30), named in the same group with Zareah and Jarmuth. Now Ždn̄a'a, a ruin 23 miles S. 3 W. of Seheveh. [Zam'miš.] 2. A town in the mountains (Jos. 15.56). Now Ždn̄a, a ruin 12 miles S.W. of Hebron. In 1 Chr. 4.18 Jekuthiel is said to have been the "father" or founder of Zanoah. [c.r.c.]

Zaphnath-paaneah' (R.V. correctly Zaphenath-paaneah; Gen. 41.43). A name given by Pharaoh to Joseph after he had explained the meaning of the king's dreams. It is the last of the dignities bestowed upon him. This Egyptian name has been variously interpreted, the interpreters seeking to find an absolute correspondence between the Egyptian and the Heb. letters. The transcription which is most satisfactory in that respect is zat (p nde-nt-anhkh, "the god speaks and he lives.") To this form, from which conclusions have been drawn as to the age of the text of Genesis, there seem serious objections: it is absolutely unmeaning here, quite out of place in the text, and has no connexion whatever with what precedes. Another explanation lately advanced is, "the nourisher of the land, who gives life," but this description seems rather premature, as Joseph had not yet done anything for the country. The present writer believes that these words are not a proper name, but a title—viz. Thes ndt mn pankh, the head of the Panakh, the sacred college of the learned men and hierogrammatics to whom Joseph had just proved superior. This head priest is sometimes seen holding a roll and marching at the head of a procession of the magicians. [E.N.]

Zaphon (north; Jos. 13.27), a town of Gad, in the Arabah, or Jordan Valley. The Jerusalem Talmud (Skeibih ix. 2) renders the name Zaphon, Zaphath or Zaphathus Gilead, which Josephus mentions, with Gadara, as the strongest fortress near the Jordan (1 Wars iv. 2; see 13 Ant. xii. 5, 14 Ant. v. 4). This site is on the Yermiq River, 2 miles N. of Gadara, and thus on N. border of Gad. The name Hammah here applies to a "low place," a place of palms. On the N. is a ruin on a basaltic precipice—it is called el Mukhaib (the little hiding-place), and the Heb. caphon also means "hidden" as well as "north." See Schumacher, Northern 'Af'lan, p. 91. [c.r.c.]

Zara (Mt. 1.3) = Zerah, 2.

Zar'aces, brother of Jocim, or Jeholakin, in the genealogy of Judah, according to the Esd. 1.38.

Zarah (Gen. 38.30; 46.12) = Zerah, 2.

Zara'ias—1. (1 Esd. 8.2) = Zerahiah, 1.—2. (8.34) = Zebadiah, 5.

Zareah, Zareathites, The (Ne. 11:29; 1 Chr. 2.53). [Zarah.]

Zarephath', a town which was the residence of the prophet Elijah during the latter part of the drought (1 K. 17.9, 10). Beyond stating that it belonged to Zidon, the Bible gives no clue to its position. Josephus (8 Ant. xiii. 2) says that it was "not far from Ar, Tyre, and for it lies between them." Jerome says (Onomasticon, "Saaretta") that it lay on the public road"—that is, the coast road. Both these conditions are implied in the mention of it in the itinerary of Paula by Jerome, and both are fulfilled in the situation of the modern village of Surafend, with ruins that extend for a mile or more, and fragments of columns, slabs, and capitals, and other architectural features. In N.T. Zarephath appears under the Gk. form Sarëetta. This place is noticed in an Egyptian papyrus of 14th cent. B.C. It was taken by Sennacherib in 702 B.C. [c.r.c.]

Zaretan' (Jos. 3.16), Zarta'nah (1 K. 4.12), Zarthan' (1 K. 7.46), all rendered Zerath in Eng. Bible. In 1 Chr. 4.17 it is rendered Zartanah, present for Zarthan. The place was "beside" the city Adim, and Solomon's fifth district included the district of Beth-shean "to Zartan," below Jezeel. There were clay lands in the Jordan Valley between Soccotah and Zarthan. It may be suggested that the name means "the great [or, lofty] rock," and thus applies to the conspicuous peak of Qur Qarašah—a landmark in the Jordan Valley W. of the Dismeh ruin. [Adim, City.][c.r.c.]

Zar'tesh-shahar' (Jos. 13.19), a place in Moab described as being in "the mount of the valley" (hâr hê'mey). [Moab.] The name means "perhaps a place descended to the valleys; black." There is a very remarkable black basalt rock, rising between white limestone and red sandstone cliffs, on S. side of the Zerga M'ain Valley. [Nahalilel.][c.r.c.]

Zarthites, The, a branch of the tribe of Judah, descended from Zerah the son of Judah (Num. 26.13, 20; Jos. 7.17; 1 Chr. 27.1, 15).

Zartanah, Zarthan. [Zaretan.]

Zath'oe (R.V. Zath'ees). The children of Zathoës (1 Esd. 8.32), i.e. Zattu (Ezr. 2.8; Ne. 7.13), returned with Zerubbabel. The name Zattu has been omitted from the Heb. of Ezr. 8.5. [Zathu.]

Zathhu (1 Esd. 5.12), Zathhu (Ne. 10.14), or Zattu, a family of laymen who returned with Zerubbabel (Ezr. 2.8; Ne. 7.13). Some of them married foreign wives (Ezr. 10.27), and the head of the family joined in sealing the covenant (Ne. 10.14).

Zavan' (1 Chr. 1.42) = Zava'an.

Zavath' (1 Esd. 5.12), Zealots, a Jewish sect very prominent in the pages of Josephus, who says that their
opinions agreed in all points with the Pharisaees', but they maintained their views with fanatical zeal. In the Talmud they appear as the followers of Abba Siga; the latter part of the narrative shows the watchful attempt to adapt the term Zealots to Heb. usage. They are represented as eager for war with the Romans. The Talmud credits them with destroying the stores of wheat in Jerusalem, to force their fellow citizens to join in resisting the enemy—in order to force resistance, destroying the means of H. Joseph attributes their rise to Judas of Gamala. They may have assumed the name in his time, but the party (with all its fanaticism) existed long before the "days of taxing." The "robbers" against whom Herod made his early expedition (Josephus, 14 Ant. ix. 2, 1 Wars x. 5) were really "Zealots." The "Sicarii" seem to have been the extreme wing of the "Zealots." The history of Italy and Ireland show how readily (among an excitable people) patriotism develops assassination. How far the "Zealots" deserved the designation "robbers," which Josephus applies to them, may be doubted. One of the apostles was a "Zealot" (Acts xii. 3); Gamala, "the Canaanite" (so A.V.; but R.V. "Canaan"), from qând, "to be jealous." This must have represented an earlier phase of his spiritual development. The followers of the Egyptian referred to in Ac.21.38 were probably "Zealots"; so also (not improbably) Barabbas and the "Thieves" that were crucified with our Lord. The statement of our Lord (Mt. 11.12), that "the kingdom of heaven suffereth violence, and the violent take it by force," may refer to the means by which the "Zealots" endeavoured to realize the kingdom of heaven as they imagined it. [J.E.H.T.]

Zebadiah,—1. 2. Benjamites of the sons of Benjamin (1 Chr.8.17) and of Elpaal (8.17).—2. One of two sons of Jerahim of Gedor who joined David at Ziklag (12.7).—4. Son of Asahel, the brother of Joab (27.5).—5. Son of Michael of the sons of Shephatiah (Ezr.8.8).—6. A priest of the sons of Immer who had married a foreign wife (10.20).—7. Third son of Meshelelah the Kenizzite, the head of the tribe (1 Chr.27.18).—8. Son of Ishmael and ruler of the house of Judah in the reign of Jehoshaphat (19.11).—9. One of the two "kings" of Midian who appear to have commanded the great invasion of Palestine, and who finally fell by the hand of Gideon himself. He is always coupled with Zalmunna, and is mentioned in Judg.8.5-21, Ps.108.11. While Oreb and Zeeb, two of the inferior leaders of the incursion, had been slain, with a vast number of their people, by the Ephraimites, W. of the Jordan, the two kings had succeeded in making their escape through Gilead, to Kispot near Zebaim ( Josh.11.16).—10. Zebaim, mentioned (2 Es.5.22), is doubtless high up on the Hauran. Here Gideon overtook them with the 15,000 left of their army, who, entirely unprepared for his attack, fled in dismay, and the two kings were taken. Gideon took them back down the long defiles leading to the Jordan. They returned by the coast road, and Zeeb, but not Oreb, his own native village—Gideon asked, "What manner of men were they that which ye slew at Tabor?" Up to this time the kings may have believed that they were reserved for ransom; but these words once spoken, they may have had no doubt as to their fate. They met it without fear or calculation, and not one request alone—that they may die by the hand of the hero himself—"and Gideon arose and slew them."

Zebaim'. The sons of Pochereth of ha'-bêthayim are mentioned in the catalogue of the families of Solomon's slaves, whom he retained from the Canaanites with Zerubbabel (Ezr.2.57; Ne.7.59). Zebaim means "gazelles" (Roe), and stands (with other points) for Zeboim in Gen.10.19. [C.R.C.]

Zebedee, the father of the apostles James and John (Mk.1.19), and the husband of Salome (Mk.15.40, compared with Mt.27.56). He had a fishing-boat with Zebedee and a disciple of the Baptist, as they were; though there is no actual evidence that he became a Christian. The name (which is of Heb. origin, and means "the gift of Jehovah") is found in slightly different forms elsewhere in the Bible (e.g. Zebediah and Zabulias).—2. Zebeel, one of the sons of Nebi, who put away his foreign wife (Ezra.10.43).

Zeboim, Zeboim (Gen.14.2,8). Zeboim represents in A.V. two different Heb. words. (1) "Zebaim (Ho.11.8), Zebayim (Gen.10.19, Deut.29.23), one of the cities of the Plain, always mentioned next to Admah. The site is unknown. (2) Zebaim (R.Sam.13.18; Ne.11.34), the name apparently of two distinct places, and meaning "hyenas." In the first-cited passage the Philistine bands are said to have turned "the way of the border that looks on the ravine (gę) of the Zebaim." This may refer to the old road from Ophrah to the Jordan Valley, which descends E., opposite a ravine called Shuakh el Nebi (hence Nebi). Here Zeboim, of the name Zebaim noticed with towns N. of Lydda, in Nehemiah, has apparently no connexion with this, and the site is unknown. [C.R.C.]

Zebudah, daughter of Pedaiah of Rimah and mother of king Jeholakin (2 K.23.36).

Zebul, the chief man (A.V. ruler) of the city of Shechem who allied himself with Abimelech against Gaal (Judg.9.22-41).

Zebulonite, this form of the ethnic name is applied only to Eton, the one judge produced by the tribe of Zebulun (Judg.12.11,12).

Zebulun, the tenth son of Jacob, and the sixth (and last) son of Leah (Gen.30.20). The name is (in A.V.) explained to mean "dwelling by the sea"; but though the name was probably intended as a round like a globe, or a disk or cake. It is best explained by the Assyrian zabulam, "to exalt" (Delitzsch). "Now will my husband extol me." In the blessing of Jacob, Zebulun is said to dwell at the "haven (hoph) of the sea" (Gen.49.13); perhaps referring to Haifa, the seaport of Mt. Carmel. The further expression, "his border unto Zidon," may be explained by the fact that, in early times, Zidon claimed all the shore
lands even S. of Carmel; and the shore of the bay of Acre seems to have been disputed with Israel in later times also. In the desert, Zebulun is the fourth largest tribe, under its chief Eliab (Num.1:31, 7-27, 24, 10:16), the spy chosen from it being Gadriel (13:10). There were three clans from Zebulun's three sons (Gen.46:14; Num.26:26, 27). In the blessing of Moses the tribe is coupled with Issachar, as assembling either on Ta'bor or some other "mountain" (Deut.33:18, 19), and as possessing the "abundance of the seas, and treasures hid in the sands." Though Zebulun did not expel all the Canaanites (Judg.1:30), the tribe is praised for its warlike prowess (Judg.4:6, 10, 5:18; cf. 1 Chr.12:33), and the expression "pen of the writer" (Judg.5:14), in the song of Deborah, is better rendered "the marshal's staff" (R.V.). The ancient assembling of Zebulun, with other tribes, at Jerusalem (Is.65:27) was followed by alienation from Judah, lasting after the fall of Samaria (2 Chr.30:6, 10, 11). Is. 9:1 refers to the Assyrian attack on the tribe in 724 B.C. The latest reference is in Rev.7:8.—The Tribal Lot. This included about 300 miles of hill and plain, with fine corn lands, in Lower Galilee. The N.E. and E. borders (Jos.19:10-16) adjoined Naphtali (see also Dabathoth), and the S. border ran along the foot of the Nazareth hills from the Kision, E. of Jokneam. On the W. the shore plain was apparently disputed between Zebulun, Asher, and Sidon (Gen.49:13; Jos.19:26). Beth-Dagon being on the border of asher and Zebulun (ver. 27). [C.R.C.].

Zebulunites, The (Num.26:27 only), members of the tribe of Zebulun.

Zechariah—1. (= Jehovah remembers.)—Biographical. The writer of the 11th book of the Minor Prophets makes his first appearance in the 8th month of the 2nd year of Darius (521 B.C., sec. 1, 1), and his last dated prophecy (7:1) brings us down to the 4th day of the 6th month of the 4th year of this king (528 B.C.). If ch. 9-14 are genuine, he prophesied still later, since 9:5, 11-13, 14-20 presuppose that the temple is in existence, and 9:13 very possibly refers to the great battles of the Greeks with the Persians. As the first part (1-8) shows his interest in the building of the temple (1:6, 3-7, 4:6, 8-11, 6:13f., 8:9), doubtless the Zechariah who, side by side with Jageniah, urged on the building of the temple (Ezr.5:1, 6:14) was the prophet. Zechariah is called the son of Iddo in Ezra, and in Zech.1:1, 7 the son of Berechiah and grandson of Iddo (but there may be a confusion with Is.8:2, cf. an actual one in Mt.23:35 with 2 Chr.24:20); but in the genealogies, individuals are often passed over [Genealogies], and Berechiah may have been left out in Ezra as of small importance, or as having died early. If the grandfather came back with Zerubbabel in 536 B.C., and if the grandson in the next generation took his place without any break as the head of a priestly family (Ne.12:4, 6), Zechariah must have been still a youth (Zech.2:2) in 520 B.C.; but ecclesiastical writers make him return from Chaldea a long time earlier, ascribe a great age to him at the time of his death, and say he was buried close to the grave of Haggai. We are not, however, in a position to verify this, and the statement in a codex of Epiphanius that in the time of the Judaeo-king Joash he was killed between the temple and the altar is another instance of confusion with 2 Chr.24:20 ff.—The Book. As there is at present uncertainty in the critical judgment with regard to the last six chapters, and as the first part really differs from the rest, it will be well to treat them separately. I. Three dated sections stand out from the rest of the first section (1-8). (1) 1:1-6 contains an admonition to the people, based upon the history of their fathers, whose contempt for the word of the earlier prophets did not go unpunished. (2) 1:7-6:15, eight successive visions closely connected in their symbolism. In the construction of these visions, which are especially interpreted by an angel, (a) there is a break after the fourth, indicated in 4:1; (b) the 2nd and 3rd, 6th and 7th visions are nearly related to one another; (c) the 7th vision has a dual character first; (d) the 4th and 5th visions are not without reference to one another, and together form a point of departure for the symbolism of 6:9ff. The visions are, 1st, the horsemen before Jehovah (1:8-17), 2nd, four horns and four smiths (1:18-21, R.V.); 3rd, the man with the measuring line (2:1-5); 4th, the grizzly beast subjected to the high-priest before Jehovah (3:1ff.); 5th, the golden candlesticks between the two olive-trees (4:1ff.); 6th, the flying roll (5:1-4); 7th, the woman in the ephah (5:5-11); 8th, the departure of the chariots (6:1ff.). All are favourable to Israel (1:13). In the symbolic action of 6:8ff. the prophet is bidden to deck the head of the high-priest Joshua with crowns (plur., as in Job 31:36) constructed from the gifts of the exiles, and Joshua (as in the 4th vision, 3:8ff.) is set forth as a type of the Messiah, and the Messiah's work itself is indicated with a clear reference to 1:8ff. The idea is doubtless the building of the temple in a spiritual sense. But (as already in the 5th vision) Joshua
and Zerubbabel symbolize the uniting of the high-priestly and the kingly authority, it follows that both are combined in the Messiah, who, as king, has a universal significance. The same idea occurs in Je.33.17ff., 22, 30, 21, where “I will cause him to draw near” is the expression for Levitical or priestly service, see Num.16, 5, and in Ezk.21.25ff. [30 ff.]; cf. 46, 22; see Messianische Erwartungsgeschichte, pp. 330 ff., 354 ff., and art. EZKIEL in this Dict. The explanation just given that Joshua alone is crowned is justified both by the text and by the clear reference to Zech.3.8ff. The Messias is called the “scion” (3, 8, 6, 12; A.V. branch), which expression is taken from Is.4.2; J.e.23.5ff., 35.13ff. (3) In 7, 8 dedicated by the angel and not actual, any more than do the relatively large number of the visions (cf. Am.7f., where are five visions). The appellative significance of Satan (Zech.3, 1ff.) has not yet passed out of mind. The kingdom of God is conspicuously distinct from the kingdoms of this world, and yet in such a way that the universal bearing of the historical plan of salvation has its place (2, 1ff.; [1ff.]; 6, 15, 8, 20ff.). All attempts to make political disturbances the occasions of the visions are discredited by the first, according to which the world is at rest. The chief purpose of these chapters, as it was the chief mission of Zechiah himself lies in the stimulation of a dispirited generation to their task of building the temple, and in keeping away doubts by promises, and so preserving national stability during the days of small beginnings. II. In ch. 9–14 the Syrians, Phoenicians, and Philistines are threatened, while in Israel the King of Peace makes His entry riding upon an ass. The people of God have to wage against Havan (Green), and they overcome. Israel returns from exile; the power of the world is overthrown. The prophet tends the flock with two shepherd’s crooks (“grace” and “union”), dismisses three shepherds in a month; on account of the behaviour of the people, breaks the crook “grace,” which signifies the covenant of God with the people and also the crook “union” (i.e. the brotherly relation of Judah and Israel), and he himself is paid off with 30 pieces of silver. Over the foolish shepherd, whom the people now support, rings out a wo. Attracted by the devotions, Jerusalem is delivered. The house of David and the dwellers in Jerusalem lament that they pierced God, as it is left to us to understand, in the person of Him Whom He sent. The guilt of the people is taken away, the worship of idols and prophecy are rooted out (12–13, 6). The shepherd of Jehovah (13, 7ff.) in which he is spoken of, and the failure of any reasoning from the verse, render the view, frequently held since Ewald, that he is the foolish shepherd of 11, 5ff. (impossible) is snitten; the sheep are scattered (13, 2); only the last third, chosen out from the rest, remains God’s people. By a Babylonian assault on Jerusalem, the city is taken; then, however, comes a dawn in which Jerusalem is raised up on high; the land becomes a plain; a living fountain issues from Jerusalem; a plague smites the hostile peoples; those saved are converted and build festal tabernacles. In Jerusalem the difference between profane and holy disappears (13, 7–14). Hist.History of the Criticism of 9–14. In this section we find no mention of the author or the time of the several prophecies, no visions and no allusion to the circumstances of the temple building. Angels retire into the background, yet see 14, 5. Ch. 9 introduces the most elevated poetry, whereas the first part namely more prosaic, is rooted. In which the symbolic manner of the first part recurs. The first objection, however, does not come from such internal evidences, but from the fact that 11, 13 is cited by Mt.27, 43, as a prophecy of Jeremiah (so Mede). Since the time of Archbp. Newcome it has been usual to ascribe 9–11 to the time before the war with Syria and Ephraim (c. 735 B.C.), and since the time of Berthold, following Mede’s hypothesis the Zechiah, son of Jebeleiah, mentioned by Is.8, 2 has been frequently supposed to be their author; and 12–14 have been assigned to the beginning of the 6th or the end of the 7th cent. B.C. So, even now, König, Strack, and von Orelli. Kuenen assigns an origin before the Exile for 9–11, with post-Exilic redaction, and supposes 12–14 to have arisen c. 400 B.C. Baudissin and Driver take a similar view. On the whole, however, there is at present an increasing disposition to refer all these chapters to late times. Edicheck a long time ago had considered that a part or all of these chapters belonged to the time of Alexander, the Great. Stade (Zeitschrift für A. T. Wissenschaft, i. and ii.) relegated 9–14 to the times of Alexander’s successors; Cornill.
followed him, whereas Marti holds that they originated in 160 n.c. Again, in opposition to Stade, Cornill, and Marti, who allow one author to have composed these chapters, Nowack finds four, and, following Flügge, breaks up the prophecy into nine parts, though he dates them differently from Flügge. On the other hand, Hävernick, Keil, Köhler (in his commentary and in Hertzog's Realigesätte, "Zechariah"), Lange, Bredenkamp, Hengstenberg (in his Christology and Beiträge i), hold very definitely that these chapters form a unity and that Zechariah himself wrote them, which is also the opinion of the writer of this article.—A Critical Estimate of these Opinions.

The fact that criticism starts from Mt. 27.9f. and results in hypotheses the most widely different and inconsistent with each other should give us pause. Although the subject-matter offers difficulties enough in itself, so that long ago the Fathers deplored the obscurity of this book, the decisive points of the comparison in a more general region concern this question, do such verses as 11.4ff., 12.10, 13.7-9 refer to circumstances and people in the environment of the author (e.g. 11.4ff. to 2K.15.8ff. or to Lysimachus, Jason, or Menelaus; 11.15ff. to Pekah, Menahem, Menelaus, or Alcimus; 12.10 to Urijah, Jason, or to rulers we have to explain them as Messianic? Is it possible for a Zechariah to prophesy the war with Javan (Greece) (9.13)? This supposed impossibility is the principal argument for bringing these chapters down to the Gk. period.

But at a time when Assyrta was the ally of Judah, Isaiah (7) foresaw severe conflicts with them; and when the ascendency of Babylon was just beginning, it is forthwith brought into the horizon of prophecy in Mi.4.10 and Is.39.6. We may similarly regard this prophecy, especially if we may suppose that Zechariah outlined the battles of Marathon (490 n.c.) and Salamis (480 n.c.) with a vision of the war that was not to be, with a sequence of things that are different in style, though this has been much exaggerated, without being driven to the conclusion that some other author wrote them; the dissimilarity may well be explained by their differing time and subject.

On the other hand, we ought not to overlook the fact that the chronological dependence of Zechariah upon the older prophets; the peculiar phrase "mē tōtōs umishshābbāh" ("that no man passed through, nor returned," 7.14,9.8), a parallel to which is found only in Ezk.35.7, and in a different form and context in Ex.32.27, and the bold word-painting common to Zech.8.20-23, 14.1-12(14), 15.1-10; the following passages in the two parts of Zechariah may also well be compared: 2.10(14) with 9.9; 2.9,11[13,15], 4.9,15 with 11.11; 3.9,4.10 with 9.1-8,12.4; 4.7 with 14.10. The northern kingdom is alluded to not only in the second part, but also in 8.13. The late date of 9-14 is further excluded by the closing of the prophetic canon, which we have reason to assume took place earlier. [Canon of O.T.]

In the first part naturally, as in Haggai, encouraging prophecies occupy the foreground, and in the last, the further fortunes of the kingdom of God follow with obscurer delineation. As an instance of many characteristics in common with the earlier prophets, we may especially compare Ezk.38.—Quotations in N.T.

The following passages are taken as Messianic: Zech.9.9 (Mt.21.4f.; Jn.12.15); 11.12ff. (Mt.27.9f.); 12.10 (Jn.19.37; Rev.1.7); 13.7 (Mt.26.31; Mk.14.27; Jn.10.30,16.32). With 13.1 compare the baptism of John and of Christ. The reading of Jeremiah for Zechariah in Mt.27.9f. is either an error of memory, similar to that in the Sinaric MS, and some cursives of Mt.13.35, where Isaiah should be read Asaph, or, since this is improbable in a place where an exact Messianic reference is given, it may be a combination of two passages, e.g. Je.18.2f. and the allied message of ch.19 may be set side by side in memory with Zech.11.12ff. (cf. Mk.1.12ff., in which Mal.3.1 and Is.40.3 are similarly joined). [Potter's Field; Zacharias, 11.] Other persons of the same name are of frequent occurrence, especially in the tribe of Levi. With regard to the confusion of these names (touching also the title of their region), compare Zahn, Geschichte des neuest. Kanons, ii, 695, 711f., 776ff., also Berendt's Studien über Zacharias-apokryphen und Zacharias-legenden (1895).—2. Son of Mesheleiah, a Korhite, and keeper of the N. gate of the tabernacle of the congregation (1Chr.26.27).—3. Son of the Levite Hananiah. He was in the second order in the temple band as arranged by David, appointed to play "with psalteries on Alamoth" (15.18,20).—5. A prince of Judah in the reign of Jehoshaphat (2Chr.17.7).—8. Son of the high-priest Jehoiada, in the reign of Josiah (2Chr.34.12).—9. The leader of the sons of Pharsah and—9. of the sons of Bebai, who returned with Ezra (Ezr.8.5,11).—10. One of the men of Masah. He was confirmed in council at the river Ahava (8.16). He stood at Ezra's left hand when he expounded the law to the people (Ne.8.4).—11. One of the family of Elam, who had married a foreign wife (Ezr.10.26).—12. Ancestor of Athaiah, or Uthai (Ne.11.4).—13. A Shilonite, descendant of Perez (11.5) and captive son of Pashur (11.12).—15. The representative of the priestly family of Iddo in the days of Joiakim (12.16). Possibly the same as 1.—16. One of the priests, son of Jonathan, who blew with the trumpets at the dedication of the wall (12.35,41).—17. A chief of the Reubenites at the time of the captivity by Tigris-pulseus (1Chr.5.7).—18. One of the priests who accompanied the ark from the house of Obed-edom (15.24).—19. Son of Isshiah, a Kohathite Levite (24.25).—20. Fourth son of Hosah of the children of Merari (26.11).—21. A Mnaasite (27.21).—22. Father of Jabaniah (2Chr.20.14).—23. Son of Jehosaphat (21.2).—24. A prophet in the reign of
Uzziah, who appears to have acted as the king's counsellor (28.5. — 25. The father of Abijah, or Abi, Hezekiah's mother (29.1). — 26. One of the families of Asaph in the reign of Hezekiah (29.15). — 27. One of the three sons of the temple in the reign of Josiah (35.8). — 28. The son of Jeherechiah, who was taken by the prophet Isaiah as one of the "faithful witnesses to record," when he wrote concerning Maher-shalal-hash-baz (Is.8.2). Possibly the same as 25 or 26. [ZACHARIAH] [W.] | [HABAKKUK] [C. R. C.]

Zedecki'ah. — 1. Son of Chenaiah (1K.22; 2Chr.18). Benhadad II. had not fulfilled his obligation, three years old, to restore Ramoth-gilead (1K.20.34). Ahab resolved to recover the city by force, and summoned Jehoshaphat to send an army to the front of the Lord; and Ahab summoned the prophets, 400 men, who foretold success. Jehoshaphat was still dissatisfied; and Micaiah, son of Imlah, was summoned. In the interval Zedekiah, apparently the leader of the 400, using the prophetic method of symbol (cf., 1K.11.30; Is.20.3; Jb.19.27; Jer.32.15), brought the horns of iron (horns being also the emblem of Ephraim, Deut.33.17), and declared: "Thus saith the Lord, With these shalt thou push the Syrians." The other prophets supported this prediction. Micaiah arrived, and, after an ironical promise of victory, plainly foretold disaster, and declared that God had sent a lying spirit into the prophets to allure Ahab to ruin. [Micaiah.] The incident is the first instance of a cleavage in the prophetic ranks. Despite Jezebel's Baal-worship, Ahab would seem still to have regarded himself as a worshipper of Jehovah. He summoned the prophets to respond to Jehoshaphat's appeal for counsel of the Lord, and it is possible that he had Micaiah in disfavour not as a prophet of the Lord, but as a foreteller of evil; and Micaiah himself seems to have had no doubt but that Zedekiah was really inspired by God, inspired to lead Ahab to deserved punishment. The Biblical narrative scarcely makes quite clear why Jehoshaphat's doubts were so completely satisfied. According to Josephus (8 Ant., xvi., 4), Zedekiah discredited Micaiah, first by showing his seeming discrepancy with Elijah's prediction (1K.21.19), that the dogs should lick Ahab's blood in Naboth's field, and then by the challenge: "You shall soon know whether he is a true prophet; for I will smite him, and then let him hurt my hand, as Jadow (8 Ant., viii. 5) caused the hand of Jeroboam to wither" (cf. 13.4); and, by the symbol of the horns, he completed the impression made on the two kings. — 2. Son of Hananiah, one of the princes of Judah in the reign of Jehoahaz (2K.23.13). — 3. Son of Maaseiah; — apparently had been carried with Jehoiachin to Babylon by Nebuchadnezzar. Jeremiah (29.21-23) in his letter from Jerusalem to the captives in Babylon, denounced him, with Ahab, son of Kolaiah, for vile conduct and for prophesying lies; and declared that their name and fate should become a byword (Jer. 29.21). — 4. Son of a king of Judah (2K.21.17-25.7; 2 Chr.36.10-20; Ezk.21.27-29.32-34.37.38; 3 Ezk.3-24; Josephus, 10 Ant., vii. 2—viii. 2). Nebuchadnezzar had carried away Jehoiachin, the temple treasures, and 10,000 of the people. But, in view of Egyptian hostility, he could not allow Jerusalem to remain in hands of Jehoiachin's uncle on the throne, changing his name from Mattaniah to Zedekiah, and binding him by a most solemn oath (Ezk.17.13-18) to keep the kingdom for him, and to have no league of friendship with Egypt (Josephus). The crisis demanded a ruler over Jerusalem — and he had three months before placed Jehoiachin's uncle on the throne, leading them with the sacred vessels of God, the temple treasures, and 10,000 of the people, into Babylon. Nebuchadnezzar was the first to show the spirit of a great king, a king of Jehovah's old covenant. He was" with the sacred vessels of God, the temple treasures, and 10,000 of the people, into Babylon. Nebuchadnezzar was the first to show the spirit of a great king, a king of Jehovah's old covenant. He was
was now powerless, able only to see Jeremiah by stealth; for the prophet's constant predictions of doom and exhortations to surrender were regarded as traitorous (38.4) and responsible for the many deserters (38.10). Every engine of assault was employed against the walls (Josephus), to repair which even the palace was demolished (Je.33.4). The princes offered a brave defence. But famine and pestilence raged in the city (52.6); the inhabitants were even reduced to cannibalism (19.9); and after 18 months the end came (39.2). The Chaldean generals entered through a breach (39.3f.). Zedekiah with his family and a few attendants cut their way out. But they were seized near Jericho and brought to Nebuchadnezzar at Riblah. Zedekiah saw his children cut down. Then his own eyes were put out and he was taken to Babylon (52.8-11). The seeming discrepancy between Jeremiah (34.3) and Ezekiel (12.13) was explained. He was taken to Babylon; yet he saw it not. No more is known of him. [C.R.C.]

Zeeb. [O.E.R.]

Ze'elah (Heb. elṭ): Jos.18.28; 2Sam.21.17. Son of Zerah, of whom was the family tomb of Kish. The word means a "rock," and the site was probably near Gibeah. It is noteworthy that S. of Gibeath, by a cliff in a valley, there are five rude structures called Qabār el Beni Isra'il, explained to mean "graves of the children of Israel," which might be connected with the genealogy of which Zophah, Jonathan, and five others of the family were buried. See Surv. W. Pal. iii. p. 101, for details. [C.R.C.]

Ze'leek, an Ammonite, one of David's guards (2Sam.23.37; 1Chr.11.39).

Ze'lophéhad, son of Hepher, and a descendant of Manassah (Jos.17.5; cf. 1Chr.7.15). Ze'lophéhad came out of Egypt with Moses, and died in the wilderness without male heirs. His 5 daughters, just after the 2nd numbering, came before Moses and Eleazar to claim the inheritance of their father in the tribe of Manasses. The claim was admitted by divine direction, and was expressly given as a general precedent to silsilah claims thereafter. But it is added that such heiresses should not marry out of their own tribe (Num.27.1-11,36; Jos.17.3-6). [Family; Tribe; Jubilee.]

Zelotes. [Canaanite; zealots.]

Ze'lah (1Sam.10.2). Gesenius explained this word to mean "shade from the sun," as though the men found by Saul were sitting in the shade near Rachel's tomb. The LXX. renders it "bounding along greatly." No place of the name is known. [C.R.C.]

Zemarna'im (Jos.18.22), a town of Benjamin, possibly in the Jordan Valley, and perhaps represented by the ruins of Sumrah, 4 miles N.E. of Jericho near N.E. border of the tribe. Mount Zemarna'im (2Chr.13.4) was in mount Ephraim. The site is unknown. [C.R.C.]

Zemarite, a Canaanite tribe (Gen.10.18) living at Zemar, in Phoenicia (cf. 1Chr.1.16). It is no doubt the Zama'ar mentioned in the records of Thothmes III. [Prexence.]

Zem'ira, one of the sons of Becher son of Benjamin (ch.7.7). [C.R.C.]

Zena'as (Jos.15.37), an unknown town near Mig'dal-Gad [Za'anân] (Mi.1.5). [C.R.C.]

Ze'nas, a Christian, whom, with Apollos, Titus is hidden by St. Paul to set forward diligently on their journey (Tit.3.13). Zenas is described as "the lawyer." This may mean either (i) a secular lawyer, or more probably (ii) a doctor of the Jewish law. [A.G.D.]

Zephaniah.—I. The ninth in order of the Minor Prophets. All that is known of the personality of this prophet is contained in the first verse of his book. The fact that his genealogy is there, contrary to custom (cf. Is.1.1; Jez.1.1; Ezk.1.3), carried back four generations, has led to the belief that the Hezekiah there mentioned as his ancestor is the king of that name, especially as the latter is not a common Heb. appellation. If this be true, it adds to the interest of 1.8. The writer's familiarity with the topography of Jerusalem is indicated in the place (i.e.) which are marked by significant clearness that he was a dweller in that city. (a) Analysis of the Book. This falls into three divisions. Minatory (1.1-18). A terrible judgment is about to visit the whole earth, but especially the Jews—and more particularly still their rulers, in the person of Josiah, whose infidelity is the reason for the prophecy. Religion among them. Admonitory (2.1-3.7). Let them repent while there is yet time to escape the doom which overhangs Philistia, Moab, Ammon, Cush, and Assyria. The Promise (3.8-20). The faithful must wait patiently till the judgment is consummated, when all the survivors shall serve Jehovah and rejoice. (b) Date. The title states that the prophecies of Zephaniah date from "the days of Josiah, king of Judah," and this is generally accepted, at least for ch. 1. Parts of the following chapters, however, have been disputed as being later additions. Thus Kuenen rejects the whole of ch. 11, while Julius Wellhausen would cut out 2.8-11, and thinks ch. 3 was added later in two successive stages of vv. 1-7 and 8-20. Marti is still more drastic. Driver ascribes to Zephaniah, all except 2.7b, 11,5,9,10,18-20. It is generally agreed also that the book falls on the earlier side of the great dividing line of Josiah's reign, i.e. it dates from before the reading of Deuteronomy in 621. The references to idolatry, and the social and religious conditions of the people implied throughout the book indicate that Josiah's great reformation is still in the future. (c) Value. Zephaniah is important as giving us an insight into the social, moral, and religious conditions of his countrymen during this period, and as reflecting the effects of the religious syncretism which Manasseh fostered and Josiah swept away. Like Isaiah, Zephaniah lays stress upon the impending judgment, though he conceives of it as more universal and terrible than does the former; and in this connexion it is significant that the Messiah does not appear throughout the prophecy. The book is marked by a profound
moral tone and deep sense of sin. But apart from 2:1ff. he makes no call to repentance; the opportunity for that is past, and only judgment remains. [Bibliography same as for Hag.]—2. A Kohathite (1Chr.6.36).—3. Son of Maaseiah; succeeded Jehoiada as second priest in the reign of Zedekiah (2Chr.36.15). He was opposed to the policy of Jeremiah, between whom and the king he acted as intermediary during the siege of Jerusalem by Nebuchadnezzar (21.1).—4. (Zechar.6.10,14.) Father of one Josiah (? = 3). [C.R.C.]

**Zepha'ah**, Valley of (2Chr.14.10), a valley "at Maresiah." This seems clearly to be the great area called Shephelah (valley of the Franks), which runs E. and S. from the vicinity of Mer'ash, and of Beth Jib'rin, towards Hebron, being a highway from Philistia to the mountains. On N. side of this valley is the ruin Selâheh, which preserves the old name. [Mizrâh, 3.]

**Zephi** (Twin) or Zepho (2Chron.36.11,15), a son of Eliaphaz son of Esau; an Edomite "duke," or phylarch.

**Zephon**, son of Gad and ancestor of the Zephonites (Num.26.15).

**Zer** (Jos.19.35), a fenced city of Naphtali, noticed with Ziddim, and other places W. of the sea of Galilee. The Jewish peninsula (Maghila i. 1) places it near Ziddim: but the site is unknown. [C.R.C.]

**Ze'rah** or Zara'ah.—1. A son of Reuel son of Esau; one of the Edomite "dukes" or phylarchs (Gen.36.13,17; 1Chr.1.37).—2. Twin son with his elder brother Pharez of Judah and Tamar (Gen.38.30; 1Chr.2.6; Mt.1.3). His descendants were called Zarahites, Ezrahites, and Izrahites (Num.26.20; 1K.4.31; 2Chr.27.8,11).—3. Son of Simeon (1Chr.4.24), called Zokar in Gen.46.10; Ex.6.15.—4. A Ger'ashonite Levite, son of Iddo or Adahiah (1Chr.6.21,41).—5. The Ethiopian or Cushite, an inhabitant defeated by Jehoshaphat (1K.22.11-15). "In the valley of Zepha'athah at Maresiah" the two armies met. So complete was the overthrow, that the Hebrews could capture and spoil the cities around Gerar, which must have been in alliance with Zerah. The identification of Zerah has occasioned some difference of opinion, but he is probably Osorok, II. of, the 2nd dynasty, a horseman, an inscription discovered by Prof. Naville at Babastis calls himself the conqueror of Palestine (cf. Higher Crit. and Mon. p. 362 f.). The composition of the army of Zerah (Cushim and Lubim; 2Chr.16.8) closely resembles that of Shishak (Lubim, Sukkîm, and Cushim; 12:9); both were second contingents of Jews, or, horsemen (12:3,16,8). The Lubim or Libyans then formed the main part of the Egyptian army, the kings of the 22nd dynasty having been themselves of Libyan origin. [A.H.S.]

**Zerah'ah**, a priest, son of Uzzi, and ancestor of Ezra (1Chr.6.6,51;5.32,5.36, Heb.; Ezra.2.40; 4.11,12; 4.11); Zer'ed, Brook (Deut.2.13,14; A.V. Zared in Num.21.14), the border torrent between Moab and Edom. It is apparently the present Wady el Hesi, which flows into the Dead Sea from S.E. The modern name means "pebble valley." [C.R.C.]

**Zereda'ah** (1K.11.26), a place apparently in mount Erre'râm, where Jeroboam I. was born. A probable site would be Surâdah, a village 2 miles N.W. of Bethel. The LXX., in the passages added to the Heb. in ch. 11 and 12, reads Sarâth both for Zereda and also for Tîr'â (14.17). If correct, this would point to Sarâ, a ruin 15 miles E. of Shilo'h, which would suit the account of the visit of Jero- boam's wife to Ahijah at Shiloh. [C.R.C.]

**Zereda'thah** (2Chr.4.17). [Zareatan-] **Zererath** (Judg.7.22). The word apparently means "pebbles" (Arab. sarâr). Some manuscripts read Zeredath; but the situation, between Abel-meholah and Beth-shittah, does not appear to fit with that of Zareatan (otherwise Zerethath); and Zererah cannot have been in the Jordan Valley near Bethshean. The valley just N. of Abel-meholah ("Ain Helweh) is called Sherâr, but this does not exactly represent the Hebrew. [C.R.C.]

**Ze'resh**, the wife of Haman, who advised him to erect a gallows for Mordecai (Esth.5.10,14.13).

**Ze'rush**, son of Ashur the founder of Tekoa, by his wife Helah (1Chr.4.7).

**Zeri**', one of the "sons of Jeducthun" in the reign of David (1Chr.25.3). [Izrâ'-]

**Zeror**, a Benjamite, ancestor of Kish the father of Saul (1Sam.9.1).

**Zeruahő**, the mother of Jeroboam the son of Nebat (1K.11.26); said in LXX. to have been a harlot (cf. A.V. a widow woman).

**Zerubbabe'el** (begotten of or in Babylon, or, better, seed of Babylon), the head of a tribe of Judah at the return from the Babylonish Captivity in the days of Cyrus. His exact parentage is a little obscure, as he is called the son of Shealtiel (Ezr.3.2,3,5, etc.; Hag.1.11,12,14, etc.), and appears as such in the genealogies (Mt.1.12; Lu.3.27); whereas, perhaps by an error in the Mass. text of 1Chr.3.19, he is represented as the son of Pedahlah, Sheshbazzar's brother, i.e., the son of the Hebrew high priest. If, however, he was heir to Shealtiel, or if Pedahlah had contracted a levirate marriage with Shealtiel's widow, the double ascription of parentage would be explained. Salathiel and Pedahlah were sons of Jehoiachin (Jerconiah; see 1Chr.3.17), and thus descended from David through Solomon, according to Mt.1.7,12. St. Luke, however (3.27,31), makes the descent to be through Neri and Nathan. The history of Zerubbabel in Scripture is as follows: In the first year of Cyrus he was living at Babylon, and received from the king the office of governor of Judaea. In the Return he was the leader of either the first or second contingent of Jews, i.e., the one associated with the high-priest Jeshua in the subsequent administration (Ezr.3.2,3, etc.). He is probably to be identified with Sheshbazzar. On arriving at Jerusalem, Zerubbabel's first care was to build the altar on its old site, and to restore the daily sacrifice. Then he immediately set about the great work of rebuilding the temple. In the second month
of the second year of their return, the foundation was laid with all the pomp which they could command (Ezr.3). Opposition from the Samaritans impeded the work for sixteen years, because of their enmity to the part of Zerubbabel and the rest of the people, who had been busy building costly houses for themselves. But in the second year of Darius Hystaspis (521 B.C.) the spirit of prophecy suddenly blazed up. The words of Hagai and Zechariah like sparks upon tinder. Zerubbabel, zealously seconded by Jeshua and all the people, then threw his whole strength into the work. Further hindrances from the Samaritans were met by a successful appeal to Darius, who (on the authority of the decree of Cyrus, found at Ecbatana) enjoined Tattai and Shehter-bozna to assist the Jews with whatsoever they had need of at the king's expense. The work advanced so rapidly, that on the third day of the month Adar, in the sixth year of Darius, the temple was finished, and was forthwith dedicated with much pomp and rejoicing (Ezr.6.15ff.). The only other works which are apparently connected with Zerubbabel in canonical Scripture are the provisions for the care of Levites, and of the provision for their maintenance, according to the institution of David (Ezr.6.18; Ne.12.47): the registering the returned captives according to their genealogies (Ne.7.5); and the keeping of a pasover in the seventh year of Darius. The apocryphal history of Zerubbabel, which follows Josephus (1Ant.iii.2-8) follows, may be summed up in a few words, premising (as an illustration of its apocryphal character) that it assumes (1Esdr.4.43ff.) that it was Darius (not Cyrus) who gave permission for the Return, and who restored the sacred vessels; and this, although the true account had been given in the previous chapter. The story told in 1Esdr.3.7 is, that on the occasion of a great feast made by Darius on his accession, three young men of his body-guard had a contest who should write the wisest sentence. That one of the three (Zerubbabel) writing "Women are strongest, but above all things Treasure the victory," and afterwards defending his sentence with much eloquence, was declared by acclamation to be the wisest, and claimed for his reward, at the king's hand, that the king should perform his vow to rebuild the city and the holy house. Upon which the king gave him letters to all his treasurers and governors on the other side the river, with grants of money and exemption from taxes, and sent him to rebuild Jerusalem and the temple, accompanied by the families of which the list is given in Ezr.2 and Ne.7; and then follows, in utter confusion, the history of Zerubbabel as before given. Josephus has also another story (1Ant.Mv. iv. 9), not found in 1 Esdr., of "Zorobabel" going on an embassy to Darius. [GENEALOGY OF J. C. [A.W.S.]

Zeruiah', the mother of the three leading heroes of David's army—Abishai, Joab, and Asahel—the sons of Zeruiah.' She and Abigail are specified in 1Chr.2.16 as 'sisters of Jesse'; and some suppose the expresion to imply that they were not the daughters of Jesse (cf. 2Sam.17.25, where Abigail is called the "daughter of Nahash"). Of Zeruiah's husband there is no mention in the Bible. [H.C.B.]

Zethan', son, or grandson, of Laadan, a Gershonite Levite (1Chr.23.8; cf. 26.22).

Zethan', a Benjamite, son of Bilhan (1Chr.7.10).

Zethan', one of the seven eunuchs of Ahaserus sent to summon Vashti (Esth.1.10).

Z'i'a, a Gadite (1Chr.5.13).

Ziba', a servant of the house of Saul (2Sam.9.2-12,16.1-4,19.17,24-30). [Mephibosheth]

Zibeon', father of Anah, whose daughter Aholibamah was Esau's wife (Gen.36.2). Although called a Hivite, he is probably the same as Zibea, the son of Seir, the Horite (vv. 20,24,29; 1Chr.13.48,50).

Zibia', a Benjamite, son of Shaharaim by his wife Hodesh (1Chr.8.9).

Ziblah', a native of Beer-sheba, and mother of Joash king of Judah (2K.12.1; 2Chr.24.1).

Zichri'.—1. (Ex.6.21.) Thus A.V. 1611, R.V., and some modern editions of A.V., but some wrongly read "Zithri," probably through a confusion with the Zithri of the following verse. Son of Izhar, the son of Kohath.—2. 3. 4. Benjamites of the sons of Sirih (1482 B.C.) and Jehoram (27).—5. (1Chr.9.15.) [ZABDI, 4.]—6. A descendant of Eliezer, the son of Moses (1Chr.26.25).—7. The father of Eliezer, the chief of the Reubenites in the reign of David (1Chr.27.16).—8. Of the tribe of Judah, father of Amasiah (2Chr.17.16).—9. Father of Elishaphat (23.1).—10. An Ephraimite hero in the invading army of Pekah, king of Israel (28.7).—11. Father or ancestor of Joel 14 (Ne.14).—12. A priest of the family of Abijah, in the days of Josikam, the son of Jeshua (12.17).

Ziddim' (Jos.19.35), a fenced city of Naphtali, W. of the sea of Galilee. The Jerusalem Talmud (Megilla 1) identifies it with Kaphar Ha'ttaiy, apparently Hattin, on the plateau W. of Tiberias, a famous place for Saladin's defeat of the Franks in 1187 A.D. [C.R.C.]

Zikkimah', a priest, or family of priests, who signed the covenant (Ne.10.1).

Zidon'. [SIDON.]

Zion'.—1. [Zeal of Jacob, Sidonians. [SIDON.]

Zif' (1K.6.37). [MONTHS.]

Ziha', a family of Nethinim who returned with Zerubbabel (Ezr.2.33; Ne.7.46,11.21).

Ziklag'.—This name seems to signify "the narrow place of the deep hollow." It was a town of Simeon, noticed with Hormah (Jos.15.31; 19.5; 1Chr.4.30); but it seems doubtful if this site could have belonged to the king of Gath in Philistia, unless it was towards the W. of the territory of Simeon. The Ziklag which he gave to David as a dwelling-place must, however, have been at some distance from Gath, since the king did not know in what direction David's raid had been made (1Sam.27.6-12), whether against the negheb of Judah, or towards Shur. When David left the Philistines near Jerzeel (29.11), to "return to the land of the Philistines," he reached Ziklag "on the third day" (30.1). The distance must have been more than 120 miles, but David's force—travelling by the plains—was probably mounted on riding camels, which would easily traverse this distance in the time. The spoil of the Amalekites was sent from Ziklag to David's friends (30.26-31) in places where he and
men were "wont to haunt"; and the cities noticed were all in the far S. of Judah, and of Simeon, including Horamah. The name of Ziklag has not been recovered. [c.r.c-]

Zippor' (shadow), daughter of Tobiah and Naamah; one of the two wives of Lamech the Cainite addressed in his song (Gen.4.19, 22,23).

Zilpah', a handmaid given by Laban to his daughter Leah (Gen.29.24), who gave her to Jacob as a concubine; mother of Gad and Asher. [c.r.c-]

Ziltha'-i. 1. A Benjamite, of the sons of Shimhi (1Chr.8.20).—2. One of the captains of thousands of Manasseh who desisted to David at Ziklag (12.20).

Zimmah', the name of a family of Gershonite Levites (1Chr.6.20,42).—3. Father (or ancestor) of Jeoh, a Gershonite in the line of the reign of Hezekiah (2Chr.29.12).

Zimran', the eldest son of Keturah (Gen.25.2; 1Chr.1.32). The Gk. form of the name, Ζημωνά, has suggested a comparison with Ζαφανά, the chief city of the Cinedocolpitae, which dwelt on the Red Sea, W. of Mecca. Grotius finds a trace of it in the Zambuani, a tribe of the interior of Asia. [c.r.c-]

Zimri', 1. Son of Salu, a Simeonite chief-tain, slain by Phinehas with the Midianitish princess Cozbi (Num.25.14).—2. King of Israel for seven days; originally the commander of half the chariots in the royal army. He gained the crown by the murder of king Elah, son of Baasha. But when he took the army, then engaged in the siege of Togun, the Philistine town of Gibbethon, heard of Elah's murder, it proclaimed its general Omri king, who immediately marched against Tirzah, and took the city. Zimri retreated into the royal palace, set it on fire, and perished in the ruins (1K.16.31). A son of Zerah, son of Judah (1Chr.2.6); perhaps = Zabdi, 1. 4. Son of Jehoshaph, and descendant of Saul (8.36,9.42).—5. In Je.25.25 all the kings of Zimri are mentioned with those of Elam and the Medes as those destined to drink of the cup of the fury of the Lord. It has been suggested this Zimri may be identical with Zimran, which, however, is H. V. W. of Zimran. The border of the tribe of E. of the Tigris, between Babylonia and Media, was called Zimri (otherwise read Namri), according to Assyrian texts. [h.c.b.]

Zin, the desert close to Kadesh-barnea. The name recalls the Akkadian Zimmra, "desert" (Num.13.21,20,1,27,14,35,36,34,3; Deut.32.51; Jos.15.13,15). The border of Judah ran from S. end of the Dead Sea, by Zin to Kadesh, along the W. border of Edom. The most definite statement is in Num.33.36: "Zin which is Kadesh" and Meribah-kadesh was "in the desert of Zin" (27.14). [c.r.c-]

Zina'. [Zizah.]

Zim.' [Jerusalem.]

Zior', a town in the mountains of Judah (Jos.15.54 only). It belongs to the same group as Hebron. It is probably Sit'air, a village 4% miles N. of Hebron. [c.r.c-]

Ziph, son of Jehaleelel (1Chr.4.16).

Ziph, the name of two towns of Judah.—1. In Mt. 5:39, between Ithma and Telem (Jos.15.24). The site is unknown.—2. Named between Carmel and Juttah (Jos.15.55; 1Sam.31.14,15,14,26,2.2; 2Chr.11.8). These passages show that it had near it a wilderness and perhaps a wood. In the Onomasticon it is placed 3 miles E. of Hebron near the village, "in which David hid is still shown." It is now Tell es Zif, a ruin 4 miles S.E. of Hebron; and, 1% miles to its S., the ruin Khoreisa may retain the name of the koresh (or copse) of Ziph. The site looks down E. on the desert. [c.r.c-]

Ziphah', son of Jehaleelel (1Chr.16).

Ziphims' (Ps.54.title) or Ziphites (1Sam.23.19,26.1); inhabitants of Ziph, 2, who twice betrayed the whereabouts of David to Saul.

Ziphion' (Gen.46.16) = Zephon.

Ziph'ites, The. [Ziphims.]

Zipor', a point in the N. boundary of the Promised Land (Num.34.9). It occurs between Zedad and Hazar-enan. The site is unknown. [c.r.c-]

Zippor', father of Balak, king of Moab (Num.22.2,4,10,16,23.18; Jos.24.9; Judg.11.25).

Zipporah', daughter of Reuel (or Jethro) the priest of Midian, wife of Moses, and mother of Gershom and Eliezer (Ex.2.21,4.23,18.22). The only incident recorded of her is her walking by the margin of Gershom (4.24,26). There seems no reason for identifying Zipporah, a Midianitess, with the Cushite (A.V. Ethiopian) woman alluded to in Num.12.1ff. [h.c.b-]

Zithri' (R.V. Sithri), a grandson of Kohath (Ex.6.22). In the previous verse Zithri should properly be Zichri. [Zichri, 1.] [h.c.b.]

Ziz, Cliff, a part of the mountain chain, by which is the boundary of Moabites, Ammonites, and Meunim made their way up from the shores of the Dead Sea to the wilderness of Judah (2Chr.20.16 only; cf. 20). The Heb. mat'âl hai-tîk (ascent of Ziz; see R.V.) suggests a connection with Hazzezon-tamar (Hasasheh), near Enegid, and thus with the Neph, or hewn ascent from the shore of the Dead Sea, at the latter place. [c.r.c-]

Ziza'.—1. Son of Shiphi; a Simeonite chief in the reign of Hezekiah (1Chr.4.37).—2. Son of Rebohoam by Maachah (2Chr.11.20).

Zizah', a Gershonite Levite, second son of Shimei (1Chr.23.11); called Zizah in ver. 10.

Zo'an, or Tanis, an ancient city situated in Lower Egypt. These two names are identified in all the seven references made to the city by the LXX. and Vulg. in O.T. (see Vulg. of Ps.78.12,43; Is.19.11-13,30.4; Ezk.30.14; and cf. A.V.). In what some think the most important allusion of all (Num.33.22), the journey of the spies through the land of Canaan is described. The writer makes a note: "Now Hebron was built seven years before Zoan in Egypt." (Vulg. Ante Tanim urbem Aegypti condita est). Some Gk. writers speak of the greatness of Tanis, and of this fact there can be no doubt. It was inhabited by the Tani, or Tanites, where of which it lay, the Tanaitic mouth. Clearly the Hebrews looked upon Zoan as a very old city, nearly as old as Hebron, which existed before Abraham's time. Josephus states that Hebron was the oldest city in Canaan, older even than Memphis in Egypt. It was occupied by the Hebrews in the time of the sons of Anak, which come of the giants." Joshua took it, and afterwards gave the city.
ZOAN

for an inheritance unto Caleb ([Jos. 14:43). It
afterwards became one of the six cities of
refuge. But it is not clear, from the simple
fact of the juxtaposition of the names of
Hebron and Zoan in Num.13:22, that there
was any community of names, or if, between these
or any historical link at that period of Israel's
migration into Egypt. The name Zoan, 
signifying "migration," or "place of de-
parture," is not found in the book of Exodus.
It is, however, much more to the point to note
the poetic references to Zoan in Ps. 78. Reference
is there made to the going out of the
people, and to what Jehovah did for them.
"Marvellous things did he in the sight of
their fathers, in the land of Egypt, in the
field of Zoan." Also (ver. 42,43, "They re-
membered not His hand, nor the day when
He delivered them from the enemy: how He
had wrought his signs in Egypt, and His
wonders in the field of Zoan." Here, ob-
viously, is a clear connexion between
the scene of the mercies of the deliverance from
Egypt and a district known to the Psalmist
as the field of Zoan. Now, in Ex.12:37 it is
stated that it was from Rameses that the
Israelites went forth on their great journey.
Hence, before their first halt, they travelled
from Succoth. But before they set out the
terrible drama of the plagues was enacted—
those "signs" and "wondrous things" which Israel never forgot, and the story of
which passed for ever into their poetry and
their literature. The Egyptians were clamour-
ous for Israel to depart, rather they
Israel could efface from their memories the
horror of the tragedy of the death of the
firstborn (12,31,33). The scene of these
events was called the field of Zoan, and this
locality, it is here suggested, must have been
near to Rameses. Brugsch and Budge go so
far as to identify Rameses with Zoan. "The
treasure city Rameses is, then," the latter writes,
"almost beyond doubt, none other than
Tanis, or Pa-Ramesse." He says that the
state of misery to which the Israelites were
reduced, so vividly described in O.T., is exactly
the result of that alien people in the
Delta would be brought under, and turned into
gangs for the corée of that day. "Thus there
seems to be no doubt that the period of
greatest oppression fell in the reign of Ram-
ses II., and that the works wherein the Israel-
ites toiled were in connexion with the re-
building of the city of Tanis and the founding of
the frontier fortress of Pa-Temn, or Pi-
thom." Egyptologists are, however, not yet
quite at one in their interpretation, and some
do not admit that Zoan and Rameses are
one and the same. Prof. Sayce writes that
an unedited papyrus (in the possession of a
gentleman whose name he gives) distinguishes
Rameses from Zoan, placing the former in a
different, though adjacent, locality. The
position of Zoan upon the great river, or
rather upon the branch of it which once was
a splendid waterway, and its admitted con-
exion with the Exodus of the people of
Israel makes the place itself together with
its name is in or quite near to the land of Goshen.
When the river ceased to be a main stream
Zoan began to decay, but the ruins upon its
site are sufficient evidence of its former
greatness, of the splendour of its temples and
obelisks, and of the position which it held in
the days of the ancient dynasties. Monu-
ments of Pepi I. (or Apepa), Meri-Ra, or the
Pharaoh of the Plagues, found there, show that
it was a great and important city far back
as the 6th dynasty, which may be pre-
sumably dated c. 3200 B.C. All the glories of
Zoan are now represented by the mounds of
San, by the Tanaitic branch of the Nile.
Some of its excavators are ready to affirm
that it was probably the chief city of Lower
Egypt, and, as has been so many times freely
alleged, the residence of the Pharaoah of the
period. It may well have been that in Zoan
and Bubastis, chief Hyksos cities, Joseph
laboured as minister to the Pharaoah of his
day, and that in one of these places the former
Hebrew shepherd-boy made himself known
to his brethren. This might be during the
reign of Apophis I., probably during the
period of the 16th dynasty, when the Hyksos
had to all intents and purposes become
Egyptians. The bilingual Inscription of
Canopus was found in the ruins of Zoan. It
was an ancient town of the time of
Ptolemy Euergetes (247-222 B.C.), decreing
divine honours for the king and his sister-
consort Berenice. Its date is 238 B.C.
The inscription is valuable because it is in two
languages (Egyptian hieroglyphics and uncial
Gk. characters) and entire, thus giving it an
advantage over the Rosetta Stone. The site
of ancient Zoan, near to the eastern border
of Lower Egypt, is dotted over with a few
fishermen's dwellings, and lake Menzaleh is
hard by. The former rich pastureland of
the district is now for the most part marsh and
pool. Ball, Light from the East; Budge,

Archaeology; Brugsch, Hist. of Egypt (1878);
Records of Past (old ser.), vol. viii. [Chronol-
ogy.]
[A.H.P.]

Zo'ar (small), the city to which Lot escaped
from Sodom. The position of the Cities of the
Plain, which cannot well be supposed to have been
more than 10 or 12 miles from Sodom (see Gen.
19,15,23), as the journey began at dawn, and
Zoar was reached in the morning. The Jordan
Valley, however, first sees the sun late, as it lies
in the shadow of the range of Moab, rising 4,000
ft. above it. Zoar was in the hikkâr, or "plain
of Jordan" (Gen.13,10). and its original name
was Be'ela (14,2,8). It was not in the mount-
ain region (19,19,22,23,30), but probably near
its foot, E. of the river, and it was quite a small
place (ver. 20). It was within sight at Nebo, on
the limits of that part of the valley in which
Jericho stood (Deut.34,1), and consequently
could not have been S. of the Dead Sea, which
would mean out of sight, though Josephus
speaks of Zoar (4 Wars viii. 4) as a place in
Arabia, near the end of the Dead Sea—perhaps
referring to Zuwetrah, on S.W. shore, though
this name does not represent "Zoar," which
represents that it is "small." Is.15,5 and
1e.48-34 place Zoar in Moab, noticing it with
Nimrim, and as below Lath and Horon-
aim. Apparently also Eglath-Shebenshiyah
was near Zoar. [Moab.] There can thus be no
doubt as to the approximate position of this
town, which would have lain opposite Jericho,
at the foot of the Moab mountains. Pтолемей
also places Zarah in Moab, a little S. of Livias
[Beth-aram], and the site appears to have been
known in 4th cent. A.D. to Eusebius and Jerome
(Onomasticon), who called it Seger—following
the LXX. They follow O.T. in placing it not
far S. of NIRM. A bishop of Zoar was pre-
sent at the Council of Chalcédon in 451 A.D.,
and the place then belonged to Palestine Ter-
tia, which included Moab. The site (as sug-
gested by Rev. W. F. Birch) is no doubt the
present Tell esh Shaghar, though this name
is nearer to the Christian Seger than to the origi-
nal Zoar. It is a white rocky mound, about an
acre in area, with ruins of a small hamlet be-
low, and springs on N.W. and E. It stands
at the foot of the Moab mountains, about 63
m.s. E. of Beth-aram (Tell Nimrin), and a mile
E. of Beth-aram (or Livias, now Tell er Râ-
meh), the locality being remarkable for the
number of rude stone monuments, including
dolmens, menhirs, and circles, which exist close
by, and which prove the place to have been
an ancient centre of worship (Surv. E. Pal. pp.
239, 236; Deut. 34:3). The position of Zoar seems
to show that the Sodom was near the Jordan (per-
feth E. of the river, which is not mentioned as
having been crossed by Lot), in the lower part of
the Jordan Valley. It is notable that the S. end of
the Dead Sea is the line of Zarah (Tell Nimrin),
and the mountains E. of Hebron—the three places
from which Lot, Moses, and Abraham are
described (Gen. 13:10,19,27; Deut. 34:3) as
looking towards Zoar, and towards the cities
of the “plain,” or of the kikkar, of Jofra.[c.r.c.]

Zoba', Zubah', the region near Damascus (Aram), while Hamath-zobah (2Ch.8:3)
lay farther N., near Tadmor. The word ap-
ppears to mean “straight,” and (like mishkár,
see Plains) to indicate flat country. It in-
cluded more than one petty kingdom (1Sam.
14:47) conquered by Saul and (2Sam.8.3,5,12;
1Ch.18.3,5,12) by David (Tell Nebi Nâbi, 6,8,23:36;
1K.11:23,24; 1Ch.18:24). In the title of Ps.60.
Aram-zobah (the highland of the plateau)
applies to the same region in S.E.
of Syria.[c.r.c.]

Zobehah', a man of Judah; son of Coz
(1Ch.4:8).

Zo'har,—1. Father of Ephron the Hittite
(Gen.23:8,25,9).—2. [Zerah, 3.]

Zo'heleth, Stone of (1K.1:9), a stone, and
rock, “by En-rogel,” where Adonijah
made a feast. The word means “slippery,” and
the name Zalwiethe, with the same mean-
ing (Clermont-Ganneau), still applies to the
cliff on and against which the hovels of the vil-
ages of Silwan are built, E. of the Kidron
valine. Thus Solomon, at Gihon (or En-rogel)
was anointed in full view of Adonijah’s party
on the opposite side of the valley.[c.r.c.]

Zo'hebeth', a man of Judah; son of Ishi (1
Ch.4:20).

Zoph'ah (1Ch.7.35,36), son of Helam, or
Hormaun (ver. 32): an Asherite.

Zophai' (1Ch.6:26). [Zuph.]
Bir Isleh. On the return journey from the "end of the city" (ver. 27) no hill is noticed; for the road here runs flat along the ridge, to Rachel's tomb. According to this explanation, Saul and David were both anointed by Samuel in the same city, where he had a house, which he visited at times.

Zur.—1. Father of Cozbi (Num.25.15), and one of the five princes of Midian ("dukes of Sihon," Jos.13.21) slain with Balaam (Num.31.8).—2. Son of Jچiel the founder of Gibeon (1Chr.8.30,9.36).

Zuriel, son of Abihail, and chief of the Merarite Levites at the Exodus (Num.3.35).

Zurishaddai, father of Shelumiel the Simeonite chief at the Exodus (Num.1.6, etc.).

Zuzims (properly Zusim), a nation smitten by Chedorlaomer in his invasion of Palestine (Gen.14.5). They are mentioned between the Emim and Rephaim, and the scene of their defeat is said to have been Ham. The LXX. translates the words ἔθνος ἱσχυρά, strong nation. They have been identified with the Zamzummims (in which case Zuzim is an easily explicable misreading of a cuneiform document for Zamzummim: Sayce's Higher Crit. and Mon., p. 161), and with a place called Ziza, 10 miles S.E. of Heshbon.
